Fur Farming.—A comparatively new industry but one which is assuming appreciable proportions, is that of fur farming There were 6 524 fur farms in the Dominion in 1930, 5 070 of which were fox farms the remainder being divided between mink raccoon marten, skunk, fisher, Karakul sheep beaver, muskrat chinchilla rabbit coyote badger and Siberian hare The total number of animals on the farms at the end of 1930 including estimates of the numbers of muskrats and beaver was 568,018, valued at $16 197 747 born in captivity, 232 864 sold from farms 24,500 value $1 828 545, pelts sold, 77 657 value $3,096 270 the total sale for live animals and pelts being $4 924 815 as compared with $6,779 863 in 1929

Fisheries.—The fisheries are an important source of wealth, and include salmon, cod, halibut whitefish, herrings, mackerel, and lobsters The total value of the catch marketed in the calendar year 1931 was $30 682 631, as against $47 804 216 in 1930 and $60 259,744 in 1918 the banner year of the fishery harvest The capital invested in vessels, &c, engaged in catching operations and in fish canning and curing establishments in 1931 was $45 351 256 and the number of men employed 69 370 The number of canning and curing establishments in operation in 1931 was 662

Lumbering.—The value of production, including (*a*) primary forest production and (*b*) the value added by manufacture in sawmills and pulpmills was $303,145,169 in 1930, as compared with $337,649,678 in 1929 The principal items of production in 1930 were sawn lumber $87,710,957 shingles $5,388,837, lath $1,154 593, and wood pulp £112,355 872

Industrial Statistics.—Industrial establishments of all kinds in 1930 had a total capital of

$3,203,316,760, the gross value of the products being $3,428,970,628. These industries employed 644,439 hands, the total pay roll for whom was $736,092,766.

Minerals.—Some minerals produced in 1931* were as follows: Gold, 2,693,892 oz. ($55 687,688), copper, 292,304,390 lb. ($24,114,065); lead, 267,342,482 lb. ($7,260,183); nickel, 65,666,320 lb. ($15,267,453); silver, 20,562,247 oz. ($6,141,943); zinc, 237,245,451 lb. ($6,059,249); cobalt 521,051 lb. ($652,179); coal, 12,243,211 short tons ($41,207,682); natural gas, 25,874,723 M. cu. ft. ($9,080,754); crude petroleum, 1,542,573 bbls. ($4,211,674); asbestos, 164,296 tons ($4,812,886); gypsum, 863,752 tons ($2,111,517); salt, 259,047 tons ($1,904,149). The total value of the mineral output in 1931 was $228,029,028.

COMMUNICATIONS

Railways—The total single track mileage of steam railways in operation on Dec 31 1931 was 43,173 miles the capital liability of the steam railways being $4 101 124 843 (1930), earnings (1931) $358 549 382 the working expenses (1931) $321 025 587 There were also (1931) 1 982 (single track, 1 409) miles of track of electric railways with a capital of $216 778 095 earnings $49,088,310, and working expenses $35 367 067 In 1931 the passengers carried numbered 26 550 556 (steam) 720 468 361 (electric) and freight 88 148,232 tons (steam) 1 977 441 tons (electric)

Name	Total Miles Operated 1931	Capital 1931
Canadian National Railway System (in Canada) single track	21 950	$ 2 910 466 763
Canadian Pacific single track	15 636	925 732 170*
Other Lines single track	5 756	398 075 770
Total (1930) miles of track including Sidings &c miles of road	56 908	4,234 274,703*

Investment in road and equipment of steam railways 1931

Canadian National	$1 975 130 198
Canadian Pacific	946 070 242*
Other Railways	324 446 264
Total	$3 245 646 704*

Canal—In 1931 the vessels passing through the canals of the Dominion numbered 27 651 of 17 618 784 tons There are seven systems under control of the Dominion Government with a total waterway of 1 846 miles (of which 509 miles are constructed canals)

The new *Welland Ship Canal* between Lake Erie and Lake Ontario with a 25 foot channel was opened for traffic on April 20 1931 although the official opening was postponed until August 1932

Posts and Telegraphs—There were 12 427 post offices on Mar 31 1931 The postal revenue was $30 416 106 in 1930 31 On March 31 1930 there were 4 210 rural mail delivery routes on which were erected 237 351 boxes The length of telegraph lines directly operated by the Dominion Government in 1931 was 9 300 miles and that by the Canadian National System 24 627 miles Other lines reached 19 301 miles On March 31 1931, there were 1 075 coast and land wireless stations 319 ship wireless stations 58 broadcasting stations and 523 100 private receiving stations for the reception of broadcast programmes The ship to shore wireless traffic for the twelve months ended March 31 1931 amounted to 396 727 messages and 8 534 982 words Wireless beam stations are operated at Montreal Quebec for direct communication with Great Britain and Australia and a station at Louisburg, N S provides a long distance service to ships

On December 31 1930 there were 1 399 986 telephones and 4 476 213 miles of telephone wire in use earnings $65 240 610 expenses $56 559 517

* Subject to revision

Provinces of the Dominion

ONTARIO

Area and Population—The Province of Ontario contains a total area of 407 262 sq miles with a population (1930) of 3 313 000 Of the population (Census 1921) 1 082 871 live in rural parts and 1 883 594 in urban centres

Government—The Government is vested in a Lieutenant Governor and a Legislative Assembly of 112 members elected for five years which meets every year at Toronto Executive Council of fourteen members (three without portfolio) act as the Ministry of the Province

Lieutenant Governor, Hon Herbert A Bruce $10 000

Official Sec, Col A Fraser LL D 1 400

Executive

Premier and Minister of Education Hon George Stewart Henry LL D $12 000

Highways, Hon Leopold Macaulay 10 000

Attorney General Hon William H Price 10 000

Agriculture Hon Thomas Laird Kennedy 10 000

Health, Hon John Morrow Robb 10 000

Provincial Secretary and Registrar Hon George H Challies 10 000

Assistant, S E Percival

Finance—The Ordinary Receipts of the Provincial Government for 1930 were $57,343,291, and the Ordinary Expenditure $57 989 353

Agriculture and Live Stock—The total area is 234,163 200 acres, and in 1931 the area of cleared land was about 15,000 000 acres, of which 9,064,649 acres were under field crops The estimated total value of all field crops in 1931 was $124 541,000 Cheese factories produced 79,816,828 lb of cheese in 1929 valued at $14 513,547, and creameries made 59,185 194 lb of butter valued at $23,623,174 In 1931 there were 578 333 horses, 2,488 000 cattle 1,035 000 sheep, 1,379 943 pigs and 23,588 000 poultry Free grants of land are obtainable in the great clay belt of Ontario opened up by the Temiskaming and Northern Ontario railway Improved farms orchards and small holdings can be bought on reasonable terms in the older settled parts of the Province There is a scheme of land settlement with free land and financial assistance for returned soldiers, both Imperial and Canadian There is always a demand for farm workers

Lumbering—The value of production including primary forest production and the value added by manufacture in pulp mills and saw mills in 1929 was $111 000 000

Manufactures—Ontario is the chief manufacturing province of Canada The total value of its manufactures in 1929 was $2 103,090,788 There were, in 1929 339,859 employees, and an invested capital of $2,418 340 450 and an annual wage bill of $307 304,007 The chief manufacturing centres in 1929 were Toronto ($593 253 569), Hamilton ($197,949,081), Ottawa ($36 098 047) Oshawa ($66,317,911) London ($50,346,829), and East Windsor ($59 617 888)

Minerals—Ontario is the leading mineral Province in the Dominion, the output in 1930 being $113,530,976 The principal metals are gold, $35 886,552, silver, $3,893 876, nickel, $24,455,133, and copper, $15,187 259

Hydro Electric Power—The Province of Ontario is well supplied with water power having available about 7 000 000 h p The chief power rivers are the Niagara, the St Lawrence and the Ottawa One of the world's largest and most successful electrical undertakings—the largest publicly owned—is operated by the Hydro Electric Power Commission of Ontario, which generates and transmits power to more than 600 co operating municipalities and serves about 75 per cent of the population of the Province The aggregate peak load exceeds 1,200 000 h p The undertaking represents a capital investment of about £70 000,000 ($350 000 000)

Principal Cities—CAPITAL, TORONTO, population 632,000 with great shipping interests on the Lakes, and the chief centre of industrial and commercial activity, Hamilton, the "Birmingham of Canada" (156,000), Ottawa, the Federal capital (127,000), with a large lumber trade and woodenware manufactories, London (71,000), Brantford (30 000), Kingston (23,500), Peterborough (22 000), Windsor, connected by tunnel beneath Detroit River with Detroit Mich, U S A (63,000), Port William (26,000), Kitchener (31,000), Guelph (21 000), St Catharines (25,000), Sault Ste Marie (23,000)

QUEBEC

Area and Population—The Province of Quebec contains an area estimated at 594,434 square miles, with a population (1931) of 2,874 255, an increase since the last Census of 513,590 In 1927 the Province was diminished by 112,400 square miles by the award of the Imperial Privy Council in the controversy between the Dominion of Canada and Newfoundland with regard to their boundary in the Labrador Peninsula

Government—The Government of the Province is vested in a Lieutenant Governor, the Council of Ministers, a Legislative Council consisting of 24 members appointed for life, and a Legislative Assembly of 90 members elected for five years to represent the 90 electoral districts of the Province

Lieut Gov, Hon Henry George Carroll $10,000

Finance.—The actual revenue for the year 1931-32 was $36,941,080 and the actual expenditure $37,525,729. The bonded debt (June 30, 1932) was $91,987,691 and the net funded debt $66,860,821.

Production and Industry.—The gross value of manufactured products in 1930 was $1,022,980,687 the principal manufacturing centres being (1930): Montreal ($532,404,756), Quebec ($38,314,617), Three Rivers ($37,972,620), Shawinigan Falls ($24,510,936), Sherbrooke ($15,946,699), Granby ($11,385,686), and Hull ($8,960,340) The lumber industry is still by far the most important trade, but the settled portion of the country has been too much denuded of wood, and the provincial Government has found it necessary to organise an effective service of rangers to prevent the destruction of trees by forest fires. The forest lands cover an area of over 120,000,000 acres, of which 51,000,000 are under licence to cut timber. The wood pulp industry is assuming greater importance every year. Several large mills have recently been built, and during 1930 the production reached 1,833,000 tons, valued at $112,355,872. The Province produces more than half of the total output of the Dominion. In 1930, 1,536,240 tons of paper were manufactured, valued at $90,668,181 (mainly newsprint). Unimproved lands may be bought from the Government at 60 cents per acre, and the purchase-money paid in five instalments. The area of land subdivided for the purpose of settlement unsold on June 30, 1930, was about 8,463,816 acres. In 1930 the production of dairy industry products was cheese 34,059,680 lb. (valued at $5,106,866), and butter 60,746,665 lb. (valued at $17,851,545). In 1931 there were in the Province 304,537 horses, 1,720,000 cattle, 732,000 sheep, 725,398 swine, and 7,932,000 poultry

Education.—The Superintendent of Education, assisted by a Council composed of a Roman Catholic and a Protestant Committee, each under a deputy head, is invested with the central control of Education. The schools, both Roman Catholic and Protestant, are maintained partly by local taxation and partly by Government grants. There were, in 1930, 8,279 schools with 634,757 scholars, including the high and superior schools and 20 normal schools supported by the State. There are also Schools of Agriculture, Dairying, Polytechnic, Fine Arts, Rangers', Historic Guides,' Blind and Deaf, Nursery, Commercial and Classical Schools, and four Universities—two Protestant (McGill University, Montreal, and Bishop's College, Lennoxville); and two Roman Catholic (Laval University, Quebec, and Montreal University).

Principal Cities.—CAPITAL, QUEBEC (population, 130,594), historic city visited annually by thousands of tourists, and one of the great seaport towns of Canada; and Montreal (population, 818,577), the commercial metropolis, and the principal centre of the Canadian grain export trade, situate at the confluence of the Ottawa and St. Lawrence Rivers. Ocean-going steamers ascend the St. Lawrence as far as Montreal. Other important cities are Hull (29,433), Sherbrooke (28,933), Trois Rivières (35,450), Verdun (60,745). Population figures from the "Seventh Census of Canada, 1931.

NOVA SCOTIA.

Area and Population.—NOVA SCOTIA is a peninsula between 43° 25'-47° N. lat. and 59° 40'-66° 25' W. long., and is connected with New Brunswick by a low fertile isthmus about thirteen miles wide. It comprises an area (with Cape Breton Island) of 21,428 square miles (360 miles of which consists of lakes, rivers and inlets of the sea) with a total population, at the Census of 1921, of 523,837, an increase since the last census of 31,499 persons. Estimated population (1929) 550,000.

Government.—The Government is administered by a Lieutenant-Governor, aided by an Executive Council and a Legislative Assembly of 38 members.

Lieut.-Governor, His Honour Hon. Walter H. Covert, K.C. $9,000

Executive.

Premier and Minister of Public Works and Mines, Col. the Hon. G. S. Harrington, K.C $7,000
Attorney-Gen., Hon. John Doull, K.C. 6,000
Highways, Hon. P. C. Black 6,000
Agriculture, Hon. O. P. Goucher 6,000
Provincial Secretary-Treasurer, Hon. J. F. Fraser, K.C. 6,000
Health, Hon. G. H. Murphy, M.D., C.M., ... 6,000
Ministers without Portfolio, Hons. Albert Parsons, Joseph McDonald.

The Legislature.
(Single Chamber.)

Speaker, House of Assembly, Hon. Daniel G. MacKenzie $1,500

The Judicature.

Chief Justice, Hon J. A. Chisholm $10,000
Judge in Equity, Hon. R H. Graham 9,000
Puisne Judges, Hons. H. Mellish, W. F. Carroll, H. Ross ..... each 9,000
Judge, Vice-Admiralty Court, Hon. H. Mellish 1,000

Agriculture and Live Stock.—About 8,000,000 acres are fit for tillage, and the soil is of good average fertility. The climate is delightful, the winter being less severe than in most of the other parts of the Dominion. In 1931 there were about 5,000,000 acres of land occupied, of which about 735,000 acres were under crop, 3,000,000 acres in pasture and partially wooded lands, and about 70,000 acres in gardens and orchards. Fruit is extensively cultivated, and the apple crop for 1931 was 1,400,000 barrels, the principal fruit belt being the Annapolis Valley. The products of the fields and orchards in 1931 were valued at $15,000,000. Improved farms of 100 to 250 acres, with house and buildings, may be obtained at from £100 to £1,000, whilst the Government offer uncleared Crown lands at $100 per 100 acres, or $1 per acre for any additional, not to exceed 150 acres in all. There is a Government agricultural college and experimental farm at Truro for men and women, and a well-equipped technical college at Halifax. In 1931 the live stock included 50,500 horses, 287,300 cattle, 282,300 sheep, 48,100 swine, and 1,255,500 poultry.

Manufactures.—In 1929 the gross value of the manufactures was $65,033,701. The capital invested was $117,526,491, and 16,568 hands were employed; the principal industrial centres being Sydney ($12,962,221) and Halifax ($10,900,999).

Fisheries.—The total value of the fisheries in 1927 was $9,500,000, and the number of persons employed was about 20,000.

Minerals.—Mine products in 1927 were valued at $35,980,000; the coal deposits are extensive and are estimated to last for 200 years. 4,745,005 gross tons were produced in 1932. Iron ores are plentiful, and extensive manufactures of iron and steel are carried on at Sydney and Sydney Mines, Cape Breton.

Principal Cities.—CAPITAL, HALIFAX (population 58,372), one of the terminals of the Canadian National Railway, with a magnificent harbour, is one of the principal winter ports of Canada, and the *entrepôt* of a large trade with the West Indies and South America. A shipyard for the building of large ocean-going steamers, with a dry dock, is one of the leading industries. Sydney in Cape Breton has a population of 22,545, and Glace Bay 17,007.

CAPE BRETON ISLAND.

Cape Breton Island, formerly a distinct Colony, now incorporated with Nova Scotia, contains an area of 3,975 square miles, with a population of about 130,000, inhabitants. The chief city, Sydney (pop. 22,545), on the eastern coast, has valuable collieries in the neighbourhood and is the site of the largest steel works in Canada. The Canadian National Railway connects the island with the mainland by rail ferry.

NEW BRUNSWICK.

Area and Population.—NEW BRUNSWICK is situated between 45°—48° N. lat. and 63° 47'—69° W. long., and comprises an area of 27,985 square miles, with a population in 1921 of 387,876, an increase since the last census of 35,987 persons. It was first colonised by British subjects in 1761, and in 1783 by the inhabitants of New England, who were dispossessed of their property in consequence of their loyalty to the British Crown.

Government.—The Government is administered by a Lieutenant-Governor, assisted by an Executive Council, and a Legislative Assembly of 48 members elected by the people.

Lieutenant-Governor, Maj.-Gen. Hon. Hugh H. Maclean, K.C., V.D. $9,000

Executive.

Premier and Minister of Lands and Mines, Hon. C. D. Richards $3,500
Minister of Public Works, Hon. D. A. Stewart 3,000
Provincial Secretary and Treasurer, Hon. Antoine J. Leger 3,000
Agriculture, Hon. Lewis Smith 3,000
Health, Hon. H. I. Taylor, M.D. 3,000

Speaker, Legislative Assembly, J. Leonard O'Brien.

The Judicature.
Court of Appeal and Chancery Division.

Chief Justice, Hon. Sir J. Douglas Hazen, K.C.M.G. $10,000
Judges, A. S. White; W. C. H. Grimmer each 9,000

King's Bench Division.

Chief Justice, Hon. J. H. Barry $10,000
Hons. O. S. Crocket; A. T. Le ; J. P. Byrne ; J. B. M. Baxter each 9,000

Court of Vice-Admiralty.

Judge, Hon. Sir J. Douglas Hazen $3,000

Court of Divorce and Matrimonial Causes.

Judge, Hon. O. S. Crocket 500

Finance.—The ordinary receipts for 1927 were $4,933,029, and the ordinary expenditure $4,917,237.

Agriculture and Live Stock.—The total land area is 18,663,000 acres, of which 500,038 acres were under field crops in 1925. The total value of the field crops in 1927 was $18,413,500. The live stock (1927) included 216,679 cattle, 153,057 sheep, 77,307 pigs, 51,304 horses, and 954,093 poultry. Free grants of land are offered, and settlement encouraged. Improved farms are obtainable at reasonable rates. The fisheries include salmon, cod, mackerel, herring, and shad; value of the fisheries (1925) $4,798,589. In 1927 the cheese factories in operation produced 802,000 lb., and the creameries 1,885,262 lb. of butter.

Manufactures.—The gross value of the output of manufactured goods in 1924 was $67,456,026, the principal manufacturing centre being St. John ($26,552,152). The chief industrial pursuits arise from the produce of the forests and the fisheries. Natural gas has been found in immense quantities in Albert County; and the south-eastern section of the Province is remarkably rich in oil shales. Coal is found; also silver, lead, antimony, copper, iron, manganese, and other valuable minerals in considerable quantities.

Principal Cities.—CAPITAL, FREDERICTON; population (1921), 8,114. St. John (pop. 69,093) is one of the principal winter ports of Canada, and is connected by C.P.R. and Canadian National Railways with Montreal; Moncton (17,488).

MANITOBA.

Area and Population.—Manitoba, originally the Red River Settlement is situated in about the centre of the continent, between 49°—60° N. lat. and 95°—101° W. long., with a total area of 251,832 square miles and a population (1931 Census) of 700,139, an increase since the last census of 61,079.

Government.—The Government is administered by a Lieutenant-Governor, assisted by an Executive Council of 8 Ministers, who are members of the Legislative Assembly of 55 members, each in receipt of an annual sessional allowance of $1,800.

Lieut.-Governor, Hon. James McGregor $9,

Executive.

Premier and President of the Council, Hon. John Bracken ....
Mines and Natural Resources, Hon. J. S. McDiarmid 6,000
Public Works, Hon. W. R. Clubb 6,000

Agriculture and Live Stock.—Saskatchewan is the largest wheat-producing province of the Dominion, and one of the most productive grain areas in the world. In 1931 the grain yield totalled 207,256,000 bushels. The approximate value of grain crops was $65,101,000, of field crops $2,046,000, livestock $12,434,000, poultry products $6,934,000, and garden produce $2,036,000. The live stock included 1,077,234 mules and horses, 1,214,785 cattle, 209,888 sheep, and 497,027 swine.

Industries.—The capital invested in manufacturing enterprises in 1931 was $50,000,000, and the value of the manufactured products $84,000,000, the principal industrial centres being Regina, Moose Jaw, Saskatoon and Prince Albert.

In 1931 there were 4,720 public elementary schools with 221,550 pupils and 6,946 teachers, and 19 Secondary schools with 8,942 pupils.

CAPITAL, REGINA. Population (1931), 53,209. Other large centres are Saskatoon (43,291), Moose Jaw (21,209), Prince Albert (9,905), Swift Current (5,296), North Battleford (5,986), and Yorkton (5,027).

TERRITORIES.

THE YUKON TERRITORY was constituted a separate political unit in 1898. It is governed by a Comptroller and a Territorial Council of three elected members. The area of the Territory is 207,076 square miles. The population in 1921 was 4,157 (2,819 males and 1,338 females). Mining is the chief industry. The gold output for the year ending Dec. 31, 1931, was $826,138.

Comptroller, George A. Jeckell.
Judge, Hon. C. D. Macaulay.

THE NORTH-WEST TERRITORIES (1,309,682 square miles, population 12,000—including 7,100 Eskimo, and 3,800 Indians) comprise the territories formerly known as Rupert's Land and the North-western Territory (except such portions thereof as form the provinces of Manitoba, Saskatchewan and Alberta and the Yukon Territory) together with all British territories and possessions in North America and all islands adjacent thereto not included within any province, except the Dominion of Newfoundland and its dependencies. For administrative purposes the Territories were subdivided into the provisional districts of Mackenzie, Keewatin and Franklin. The Commissioner in Council has power to make ordinances for the Territories under instructions from the Governor-General in Council or the Minister of the Interior.

TERRITORIAL COUNCIL.

(Appointed by the Governor-General in Council.)
Commissioner, Hugh Howard Rowatt.
Deputy Commissioner, Roy Alexander Gibson.
Councillors, Charles Camsell; Austin Louis Cumming; Kenneth Robinson Daly; Gen. J. H. MacBrien, C.B., C.M.G., D.S.O.
Acting Secretary, David Livingstone McKeand.

DOMINION OFFICIALS.

Chairman, Dominion Lands Board, H. E. Hume, *Ottawa.*
Stipendiary Magistrate, J. M. Douglas, *Edmonton.*
Public Administrator, (*Mackenzie District*) Egbert Owen, *Edmonton*; (*Franklin District*) W. M. Cory, *Ottawa*; (*Keewatin District*) (Vacant).

THE WORLD'S RUBBER.

In a Paper on "The Supplies of Rubber," Dr. George Rae, D.Sc., said the total area under plantation rubber at the end of 1929 was between 6,600,000 acres and 7,200,000 acres, of which the area under native rubber in Netherlands' India was variously estimated at between 1,100,000 acres and 1,700,000 acres. The remaining 5,500,000 acres consisted of approximately 3,360,000 acres in estates owned by Europeans and Americans; 320,000 acres in Asiatic owned estates over 100 acres, and 1,630,000 acres in native holdings under 100 acres. About 80 per cent. of all the estate rubber trees were tappable; 90 per cent. of the native rubber in Malaya and Ceylon was tappable, and probably less than 50 per cent. of the native rubber elsewhere was tappable.

The total exports of rubber from producing countries were 94,000 tons in 1910; 267,000 tons in 1915; 354,000 tons in 1920; 518,000 tons in 1925; 861,000 tons in 1929, and about 800,000 tons in 1930. The actual output of rubber for the year 1929, distributed according to the nationality of producers, was approximately as follows:—

	Tons	Per Cent
British:—U.K.	236,000	7·9
" Local ...	69,000	8·1
Netherlanders ...	57,000	6·7
Other European ...	30,000	3·5
American	22,000	2·6
Asiatic estate ...	64,000	7·6
Malayan native ...	199,000	23·4
Neth Ind. native	103,000	12·8
Other native	36,000	4·3
Wild...	26,000	3·1
	847,000	

The absorption of rubber by manufacturers (i.e., the quantities of rubber they turned into rubber goods) was 85,000 tons in 1910; 230,000 tons in 1915; 310,000 tons in 1920; 560,000 tons in 1925; 790,000 tons in 1929; and approximately 705,000 tons in 1930.

PHYSIOGRAPHY.

The Island of Newfoundland is situated between 46° 37'-51° 37' N. latitude and 52° 44'-59° 30' W. longitude, on the north-east side of the Gulf of St. Lawrence, and is separated from the North American Continent by the Straits of Belle Isle. The island is about 317 miles long and 316 miles broad, and is triangular in shape, with Cape Bauld (N.), Cape Race (S.E.) and Cape Ray (S.W.) at the angles. The coast is extremely rugged, and the coastal regions are mountainous, the north and east being cold during winter and early spring owing to the quantities of ice brought down from the Greenland seas. The interior is undulating and is covered with tolts (round hills) interspersed with lakes, rivers, and swamps, but containing many fertile valleys, where the climate is favourable to agriculture, and a great wealth of forests, mainly of spruce, fir, pine, and birch. The climate is salubrious, and the people are a strong, brave, healthy, hardy, industrious race. The thermometer seldom falls below zero in winter, and ranges in the shade in summer from 70° to 80°.

GOVERNMENT.

Newfoundland, the oldest English colony, was discovered by John Cabot on June 24, [illegible] navigator Gaspar de Cortereal, and soon became the centre of an extensive fishing industry, with settlements of Portuguese, Biscayans, and French. In August, 1583, the island was formally occupied by Sir Humphrey Gilbert, in the name of Queen Elizabeth, and by the Treaty of Utrecht (1713) the whole island was acknowledged to be British. A Governor was first appointed in 1728, and in 1855 "Responsible Government" was accorded to the island.

The executive is entrusted to a Governor, appointed by the Crown, aided by an Executive Council, with a Legislature of two houses.

GOVERNOR.

Governor, His Excellency Admiral Sir David Murray Anderson, K.C.B., C.M.G., M.V.O. (1932) $15,000

THE MINISTRY (October, 1932)

Prime Minister and Minister of Finance and Customs, Hon. F. C. Alderdice $8,000
Secretary of State, Hon. J. C. Puddester... 4,000
Minister of Justice, Hon. L. E. Emerson, K.C. 4,000
Minister of Agriculture and Mines, Hon. W. J. Walsh $4,000
Commissioner of Fisheries, Hon. J. G. Stone 4,000
Chairman, Bureau of Labour, Hon. K. M. Brown .....
Without Portfolio, Hons. H. A. Winter, K.C.; F. McNamara; J. S. Ayre; S. J. Foote, K.C.; W. J. Brown; H. Mitchell.

Not in the Cabinet.

Minister of Public Works, H. W. Quinton.. 4,000
Minister of Posts and Telegraphs, H. C. Winsor 4,000

LEGISLATURE.

The *Legislative Council* consists of not more than 25 members, appointed for life; the *House of Assembly* of 27 members, elected by the people for 4 years, every male British subject aged 21, and every female aged 25, being entitled to the franchise.

President of the Legislative Council, Hon. M. P. Gibbs.....
Speaker of the House of Assembly (Vacant) 750

JUDICATURE.

Chief Justice, Hon. Sir W. H. Horwood, Kt. $9,000
Assist. Judges, Hon. J. M. Kent, Hon. W. J. Higgins .....each 8,000
Registrar, Rt. Hon. Sir W. F. Lloyd, P.C., K.C.M.G., D.C.L., K.C.

DEFENCE

Newfoundland contributed 11,922 men to the fighting forces of the Empire during the War in addition to 3 000 enlisted in Canadian and other forces

EDUCATION

Education is denominational and is assisted by Government Primary and Secondary schools were attended in 1930 31 by 60 592 pupils The Government grants in 1930–31 amounted to $1,025 157 33

RELIGION

Census figures for 1921 estimated for 1931 —

Religion	1921	1931
Roman Catholics	86 576	92 845
Church of England	84 665	90 195
United Churches	74 205	76 840
Presbyterians	1 876	1 903
Salvation Army	13 023	13 747
Various	2 688	6 019

FINANCE

The revenue expenditure and debt of Newfoundland are stated as under ($1 at par = 4s 2d or $4 86 = £1 sterling) —

Year	Revenue	Expenditure	Public Debt
	$	$	$
1927 28	9 466 005	10 740,000	
1928 29	10,025 649	11,132,822	85 477 106
1929 30	11,570,215	11 934 313	87 592 106
1930 31	7 931 000	11 960 000	87 592 106

EXTERNAL TRADE

Year	Imports	Exports	Total
	$	$	$
1913 14	15 193 726	15 134 543	30,328,269
1928 29	29 237 381	36 797 703	66,035 084
1929 30	31 871,151	40 051 959	71 923 110
1930 31	25 261 701	33 537 569	58 799,270

Chiefly distributed in 1930 31 as under —

Country	Imports from	Exports to
United Kingdom	$4 192 300	$9 491,661
United States	9 266 133	10,985 135
Canada	10,675,248	2,327 020
Portugal	6 548	991,711
Spain	86 859	1,506,739

The principal imports are flour textiles, coal, hardware, and provisions the principal exports are codfish, cod and seal oil pulp and paper herrings, seal skins tinned lobsters, iron pyrites and other minerals the total value of the fishery products in 1930–31 was upwards of $10,469 856

PRODUCTION AND INDUSTRY

The inhabitants are chiefly located on the coast line of the shore and bays, nearly 10,000 being engaged in fishing—for cod in summer and seal fishing in winter and spring Agriculture, mining, and lumbering are also engaging attention and affording means of employment while large pulp and paper mills have been erected The larger portion of the interior is practically in a state of nature, but the railways have opened up large tracts A valuable discovery of copper has been made at Little Bay, about 200 miles from St John's

COMMUNICATIONS

Railways —There were 905 miles of railway open in 1926 and 47 miles of private line The transinsular line runs to Port aux Basques, and Exploits River and Bay of Islands with branch connexions to Placentia, Bonavista, Bay de Verde Hearts Content Terrenceville, the principal settlements in Conception Bay, and to Lewisporte (in Notre Dame Bay) Communication between various points on the coast and Sydney C B is maintained by a fleet of 11 first class steamers

Posts and Telegraphs —There were 893 post offices in 1930 (161 of which were also telegraph offices) and 79 telegraph offices additional dealing with 7 386 400 letters and post cards 3 300,000 newspapers and books, and 711 521 parcels 800 telephone stations are open, mostly in post offices There are 4,830 miles of telegraph line and 1,200 miles of postal telephone wire Postal revenue $485 320 Customs duty collected, $178 836, telegraph revenue $189,581

Shipping —On Dec 31, 1930 the Mercantile Marine of Newfoundland consisted of 2 501 sailing vessels of 102 718 tons, and 255 steam and motor vessels of 41,670 tons In 1929 30 the tonnage of vessels entered and cleared at Newfoundland ports was 3,375 499 tons, of which 1 820,223 tons were British

TOWNS

The CAPITAL, ST JOHN'S (population 1931 42 645 with suburbs 59 420), contains two cathedrals, several banks and numerous public buildings Other towns are Harbour Grace (3 825) Bonavista (4 052), Carbonear (3,320), and Twillingate (3 217)

HIGH COMMISSIONER

High Commissioner in London D J Davies C B E B Sc (*Acting*) *Office*, 58, Victoria Street,

LABRADOR

Labrador, a dependency of Newfoundland, forms the most easterly part of the North American continent, and extends from Blanc Sablon, in the Straits of Belle Isle, on the south, to Cape Chidley, at the entrance to Hudson's Straits on the north The boundary between Quebec and Labrador came up for settlement before the Judicial Committee of the Privy Council in Oct, 1926 By the judgment given in March, 1927, the boundary was defined as a line drawn due N from the eastern boundary of Blanc Sablon as far as 52° N Lat and from thence W along that parallel to the Romaine River, and thence N along the east bank of that river and its headwaters to their source and thence due N to the crest of the watershed or height of land there, and thence W and N along the crest of the watershed of the rivers flowing into the Atlantic Ocean until it reaches Cape Chidley The territory thus confirmed as under the jurisdiction of Newfoundland has an area estimated at 120,000 square miles Labrador possesses valuable cod, herring, trout, and salmon fisheries One of the grandest spectacles in the world is provided by the Grand Falls on the Hamilton River The inhabitants are mainly Eskimos engaged in fishing and hunting There are no towns, but there are Moravian Mission stations at Makkovik, Hopedale, Nain, Okak, Hebron, and Killinek.

The Commonwealth of Australia.

* Exclusive of full blood Australian Aboriginals, who are estimated at 60,000.
§ Estimate, as at March 31; Census postponed to June 1933.

Australia was separated from the other great land surfaces at a remote period, and exhibits therefore some very archaic types of fauna and flora It may be regarded as the largest island or the smallest continent being surrounded by the following waters —*North*, the Timor and Arafura Seas and Torres Strait, *East*, Pacific Ocean, *South*, Bass Strait (which separates Tasmania from the Continent) and Southern Ocean, and *West* Indian Ocean The total area of the Continent is 2,948,366 English square miles the island of Tasmania having an area of 26 215 square miles, and making a total area for the States and Territories of 2,974 581 square miles. The coast line of Australia is approximately 12,210 miles, and the geographical position of the Continent is between 10° 41 39° 8 South latitude and 113° 9′-153° 39′ East Longitude, the greatest length East to West is 2,400 miles and from North to South 1 971 miles Its nearest distance to England is about 11 000 miles

From a physical standpoint the continent of Australia is divisible into an eastern and a western area the former containing a regular coast line with a good harbourage, roadsteads, rivers, and inland waterways, and a greater development of fauna and flora the latter a broken coast-line with estuaries rather than rivers, and but little inland water communication The whole continent is roughly speaking a vast irregular, and undulating plateau, part of which is below the level of the sea, surrounded by a mountainous coast line with frequent intervals of low and sandy shore on the north, west and south The Great Barrier Reef extends parallel with the East coast of Queensland for 1,200 miles at a distance of about 60 miles from the mainland A large part of the interior particularly in the west, consists of sandy and

[illegible]th the direction of the mountain chains from N to S, and the tertiary formation to be found in the N, S, and W develops in the S E into a gigantic tertiary plain watered by the Darling and the Murray Rivers Nearly all round the coast however, and in eastern and south-eastern Australia stretching far inland from the coastal range, is a fertile area devoted partly to agriculture, partly to dairying, while the inland districts particularly are admirably adapted to the rearing of sheep The most extensive mountain system takes its rise near the S E point and includes a number of ranges known by different names in different places, none of them being of any great height The highest peak, Mount Kosciusko, in New South Wales reaches an elevation of 7,328 feet The principal rivers are the Murray, which debouches on the south coast, after receiving the waters of its tributaries the Murrumbidgee, Lachlan and Darling in the S E part of the island on the east coast the Hawkesbury, Hunter, Clarence Richmond, Brisbane, Mary Burnett Fitzroy, and Burdekin, on the west the Swan, Murchison Gascoyne, Ashburton, Fortescue De Grey, and Fitzroy, on the north the Drysdale, Ord, Victoria and Daly, and the Roper, the Flinders, and Mitchell, which debouch into the Gulf of Carpentaria Lakes are numerous, but nearly all are salt, the scarcity of the natural water supply has been, however, mitigated by successful borings and by the construction of large dams The work of conserving the vast quantities of water which run to waste in the wet season is being vigorously prosecuted by a system of locks and weirs on some of the rivers Minerals comprise gold, silver copper, zinc, iron, and coal in large quantities, antimony, tin, gypsum, magnesite, osmiridium opal, sapphires, &c., and there are abundant supplies of building stones, clays, &c The potentialities of the country in regard to its supplies of metals and minerals have not yet been fully tested

Climate —The seasons commence about March 21 (Autumn), June 21 (Winter), Sept 22 (Spring), and Dec 22 (Summer) The climate is extremely dry, but except in the tropical coast land of the north, the continent is everywhere highly beneficial to Europeans, the range of temperature being smaller than that of other countries similarly situated.

GOVERNMENT.

The Government is that of a Federal Commonwealth within the British Empire, the executive power being vested in the Sovereign (through the Governor-General), assisted by a Federal Ministry of ten Ministers of State and such honorary Ministers who may be appointed thereto The Commonwealth was constituted by an Act of the Imperial Parliament dated July 9 1900, and was inaugurated Jan 1, 1901. Under the Constitution the Federal Government has acquired and may acquire certain defined powers as surrendered by the States, residuary legislative power remaining with the States **Trade** and customs passed under Federal control immediately on the establishment of the Commonwealth, posts, telegraphs and telephones, naval and military defence lighthouses and quarantine on proclaimed dates. The Commonwealth also now controls such matters as old age pensions, patents and copyrights, naturalization, navigation, &c The right of a State to legislate is not abrogated except in connexion with matters exclusively under Commonwealth control, but where a State law is inconsistent with a law of the Commonwealth the latter prevails to the extent of the inconsistency.

GOVERNOR GENERAL

Governor General, His Excellency the Rt Hon Sir Isaac Alfred Isaacs, P C, G C M G (1931) £10,000
Military Secretary Capt L F Bracegirdle D S O, R A N
A D C, Lieut C H Finlay

Executive Council.

DEFENCE

Navy

The Australian fleet consists of the Cruisers *Australia Canberra, Brisbane, Adelaide* 4 sloops 5 destroyers seaplane carrier and several auxiliaries The personnel of the fleet is mainly Australian in character although still supplemented to some extent by Imperial officers and men The sea going forces of the Royal Australian Navy on February 15, 1932, consisted of 341 officers and 2 776 men. There is also a R A N Brigade composed of members of the Citizen Naval forces

Army

From 1911 to 1929 the defence policy was based on the universal compulsory training of a Citizen Army but from November 1st 1929, the constitution of the forces on a voluntary basis was adopted Under this system men from 18 to 40 years of age may be enlisted in the Militia Forces and youths from 14 to 17 years in the Senior Cadet Corps On March 31st, 1932, 29 821 were undergoing training

Air

The permanent strength of the Australian Air Force in April 1932 was 102 officers and 788 airmen and of the Citizen Air Force 48 officers and 260 airmen The Air Force and the Civil Aviation expenditure (excluding war services) for the year 1930 31 was £579 898

FEDERAL FINANCE

The Premiers Plan

The Governments of Australia met in Conference (May June and August–Sept 1931) to consider what measures were possible to restore solvency and to avoid default The National Income of Australia was £650 000,000 in 1927–28, falling to £564 000 000 in 1929 30 and a further fall to £450 000 000 was estimated for 1931–32

The Premiers Conference adopted a plan which combines all possible remedies in such a way that the burden falls as equally as possible on every one and no considerable section of the people is left in a privileged position Thus sharing of the burden is necessary to make the load more tolerable it is still more necessary, because only on this condition will it be possible to get the combined effort required

The plan has been adopted by the Conference as a whole, each part of which is accepted on the understanding that all the other parts are

equally and simultaneously put into operation It embraces the following measures —

(*a*) A reduction of 20 per cent in all adjustable Government expenditure, as compared with the year ending 30th June, 1930, including all emoluments, wages salaries and pensions paid by the Governments whether fixed by statute or otherwise, such reduction to be equitably effected

(*b*) Conversion of the internal debts of the Governments on the basis of a 22½ per cent reduction of interest,

(*c*) The securing of additional revenue by taxation, both Commonwealth and State

(*d*) A reduction of bank and Savings Bank rates of interest on deposits and advances

(*e*) Relief in respect of private mortgages

These proposals require the greatest effort in economy and taxation which the Conference considers it safe to attempt The effect will be still to have a gap of from £13,000,000 to £15 000 000 to be covered for a time by borrowing

REDUCTION OF EXPENDITURE

The plan provides for Government economy on the basis of an immediate cut, averaging 20 per cent, for all Government wages and salaries below the level of 1929 30 To this will be added all saving that can be made from a strict scrutiny into the necessity of every item of Government expenditure

Year	Revenue	*Expenditure	Payments to States
	£	£	£
1927 28	73,808,227	79 258,464	9,085 789
1928 29	74,894,799	77 253 774	9,036,638
1929–30	77,143,387	78 614 392	9,489,344
1930 31	69,566 920	80 324,539	11,112,615
1931–32	71,532 298	70 218 207	10, 88 503

The above particulars do not include the Interest payable on loans to the States, which amount is recoverable from the States concerned

DEBT

The total of the Public Debt for Commonwealth Purposes on June 30 1932 was £398,884 730, including a War Loan from the British Government of £79 724,220, which is subject to a funding arrangement whereby the debt is to be extinguished about 1956 by annual repayments of 6%, of which £1 18 8*d* per cent is for reduction of principal The British Government agreed to the suspension for the years 1931–32 and 1932–33 of the repayment of principal moneys due under this arrangement, and of the interest moneys for 1931–32 The interest payments suspended are to be liquidated by 10 equal annuities from July 1, 1933, with interest at a rate to be determined Adding the indebtedness of the States viz, £788,943,138, the total public debts of Australia amounted (June 30, 1932) to £1,187,827,868 (of which £601,607,938 was redeemable overseas) or £181 7*s* per head of population

In July and August the internal debt of £558 000,000 was the subject of a voluntary conversion plan in connection with the "Premiers Plan' for financial rehabilitation Of the total internal bondholders, conversion applications totalled £510,000,000, while in the absence of notification of dissent, £31 000,000 was automatically converted Dissents amounted to only £16 000,000, or less than 3 per cent The conversion plan involved an interest reduction of 22½ per cent

Banking —For the quarter ended June 30 1932, the Australian liabilities of the Banks of Issue throughout the Commonwealth amounted to £352,537 702, and the Australian assets to £415 310 082 On June 30 1932 the amount of deposits in the Savings Banks totalled £197 925 927 approximately £3 2*s* 4*d* per head of population The Trading and Savings Banks have reduced their interest rates for deposits and advances in accordance with the "Premiers Plan

PRODUCTION AND INDUSTRY

The estimated values of products —

	1929 30.	1930–31
Agricultural	£77,109,000	£70,500,000
Pastoral	86,483,000	69,499,000
Dairying, &c	49 398,000	43 067 000
Forests and Fisheries	11,371,000	8 313 000
Mining	17,945,000	15,400,000
Manufacturing	149 184 000	112,966,000
	£391,490,000	£319,745,000

Agriculture and Live Stock —The total land area is estimated at 1,903,732,240 acres of which 25,163 816 were under cultivation in 1930–31.

Crop	Acreage	Produce *Bushels*
Wheat (*b*)	18,164 920	213,594,391
Oats	1,082,101	16,658,058

Live Stock

	1929	1930
Sheep (*a*)	104,558,342	110,568,279
Cattle	11,202,134	11,720,916
Horses	1,845,614	1,792,734
Pigs	1,018,324	1,071,679

(*a*) Estimated number of sheep as at Dec 31, 1931 108 000 000

(*b*) 1931 32 14 724 830 acres, 189 652 654 bushels

In 1930 31 Australia produced 912,141,253 lb of wool (as in the grease) against 937,596,816 lb in 1929 30, 350,405,104 lb of butter, 33,099,781 lb of cheese, and 71,050,133 lb of bacon and hams

Mines and Minerals —In 1930 the value of gold produced was £1,981,971, silver and lead, £2,243,313, copper, £810,687; tin, £218,053, coal, £7,632 311, value of all minerals produced in 1930, £15,400,334. The production of gold in 1931 was valued at £3,563,499 (Australian currency)

Manufactures —In 1930–31 there were in Australia 21,751 industrial establishments, employing 338,843 hands, wages paid amounted to £52,454,859, value of plant and machinery, £124,497,697, of lands and buildings, £112,210,609, materials used, £162,104,646, value added by manufacture, £118,310,123, and total value of final output, £290,798,564

* In addition the following amounts were spent from loans for War Purposes and for Works—1925–26 £9 273 588 1926–27, £9 428 570 1927–8 £8,638 848, 1928–29 £8 831 147 1929–30 £5 291 533, and 1931 £1 988 820 There was no loan expenditure on works in 1931 32 all such expenditure being made from revenue

Labour Statistics.—In 1931 there were 362 Trade Unions, with 769,006 members, of whom 112,901 were women. The estimated total number of employed persons over 20 years of age in 1931 was 1,321,000 males and 314,600 females. The number of unemployed members of trade unions averaged 27·4 per cent. Employers' Associations number 547, with membership of 132,428. Retail Price Index No. for food, groceries and rent (4 and 5 rooms) (6 Capital Cities) 1931 (base 1923-1927=1,000) 852; including clothing, fuel, light and other miscellaneous household expenditure (base 1923-1927 = 1,000) 873. Melbourne Wholesale Price Index 1931 (base 1911=1,000) 1,428. Nominal Weekly Wage Index No., Australia, males (base 1911 = 1,000 = 51*s.* 3*d.*) 1,694 = 86*s.* 10*d.* Number of industrial disputes in 1931 was 134, involving 37,667 persons in a loss of 245,991 working days and £227,731 in wages.

COMMUNICATIONS.

Railways.—Total length of Government (and private) railways open for general traffic at June 30, 1931, private lines being included in the totals and shown in parentheses :—

State.	Miles open.	
New South Wales	6,160	(116)
Victoria	4,742	(25)
Queensland.....	6,795	(266)
South Australia	3,932	(34)
Western Australia	4,911	(277)
Tasmania	806	(141)
Federal Capital Territory	5	—
Northern Territory	317	—
Total.....	27,668	(859)

The gross earnings of all Government lines in 1930-31 were £38,985,433, working expenses £31,727,975, and net earnings £7,257,458, being at the rate of 2*s.* 3*d.* per train mile, and representing a return on the total cost (£341,544,692) of 2·12 per cent., as against 2·36 per cent. in 1929-30. In 1930-31 passenger journeys numbered 312,553,960 and 26,547,136 tons of goods and live stock were carried, the train miles run being 64,753,508. The electrification of the Sydney suburban system is in progress.

Tramways —There are 630 miles of tramways in Australia, 575 miles of which are of electric, 29 of steam, 24 of cable, and 2 of horse traction Extensive conversions to electrical traction have been made and more are in progress The several Governments control 403 miles, municipal authorities 186 miles, and the remaining 36 miles are operated by private companies and individuals The total capital cost of tramways at June 30, 1931, was £25,410,598 The revenue of electric tramways for the year 1930 31 was £6 723 164, working expenses £5 586,025 and net revenue £1,137 139 or 3 84*d* per car mile 71,043 470 car miles were run and 584,978,843 passenger journeys recorded

Shipping —The entrances and clearances of vessels engaged in oversea trade at the various Australian ports in 1930–31 were entered, 1 534 (5,581,517 tons), cleared, 1,573 (5,668 673 tons) Of the vessels entered, 1,009 of 3,736,039 tons were under the British flag and 525 of 1,845,478 tons under foreign flags

The total including local shipping entering the ports of the capital cities during 1930 31 was Sydney 5,982 vessels of 8 468,232 tons Melbourne 3,014 (6 310,549), Brisbane 1,147 (3,570,102), Adelaide 2,864 (3 983,519) Fremantle 708 (3,464,655), and Hobart 453 (767,592). At December 31, 1931, there were 2,346 vessels of a total net tonnage of 354,174 on the shipping registers of the several States

Posts and Telegraphs —In year ended June 30, 1931, there were 8,137 post offices, there were 9,189 telegraph stations with 160,149 miles of wire, transmitting 12 985 298 telegrams receiving 572,423 and dispatching 647,655 cable grams A Beam wireless station, giving a service to and from Great Britain, was opened for traffic in April, 1927 At the end of year 1930–31, 498,055 *Telephones* were connected with 6,086 telephone exchanges, approximately 405,954 000 "local" and 30 164 077 "trunk line" calls were recorded for the year 331,082 wireless broadcasting listeners licences were issued in 1930 31

Motor Vehicles —At June 30, 1931, there were 604,105 motor vehicles registered in the several States These comprised 409 206 cars, 76,966 motor cycles, and 97,933 commercial vehicles; revenue derived from motor registration fees and motor tax, &c, in 1930 31 was £4,072,633 Motor omnibus services are extensively operating in urban areas

Civil Aviation —225 aeroplanes of various types were registered with the Department of Civil Aviation at June 30 1931 During the year 113,340 flights of a total duration of 44,507 hours were effected 3,596,930 miles were flown, and 94 350 passengers carried 48,503 lbs of mail were carried by aerial mail contractors Three subsidized companies are now operating machines over approved routes (5,479 air miles), while several unsubsidized companies have commenced commercial services over additional routes

CAPITAL —CANBERRA, in the Federal Capital Territory, transferred to the Commonwealth by N S W on Jan 1, 1911, has been laid out as the capital of the Commonwealth At June 30, 1932, the population of the Federal Capital Territory amounted to 8,386, of which 7,033 were living in Canberra

WORLD MOTOR VEHICLES PRODUCTION, 1929 AND 1930

THE following table shows the production of motor vehicles in the five principal producing countries in 1929 and 1930, the figures are those published in the *United States Commerce Reports*, May 25, 1931, with the exception of those relating to the United Kingdom which have been provided by the Society of Motor Manufacturers and Traders Limited The figures relate only to complete vehicles manufactured by companies strictly national in character, and not to the output of assembly plants in various countries

* These totals are the figures shown in the *United States Commerce Reports*, they do not include the effects of the revisions in the United Kingdom figures due to the substitution of particulars obtained from the Society of Motor Manufacturers and Traders Limited

THE NORTHERN TERRITORY

The Northern Territory has a total area of 523 620 square miles and lies between 129°–138° East longitude as far as 26° South latitude. The administration was taken over by the Commonwealth on January 1, 1911, from the government of the State of South Australia, and the divisions into territories known respectively as *North Australia* and *Central Australia*, were abolished in 1931—a reversion to the position as it existed prior to such divisions on February 1 1927. The headquarters of the Administrator are at Darwin in the far north, a Deputy Administrator being stationed at Alice Springs in the south, to exercise all the powers and functions of the Administrator in that portion of the Territory situated south of 20° S lat. except the power to fix the commencement of Ordinances and to make regulations under Ordinances in force in the Northern Territory. As the administrative system obtaining from February 1 1927, to June 12 1931, has thus been continued the residents of that part of the Territory south of 20° S lat. are no less favourably placed than hitherto. The population of the Northern Territory as at June 30, 1931, was 4 193 (exclusive of full blooded aboriginals).

Agricultural development is increasing both in the number of individual landholders and the acreage under crop. The success of peanut growing during the last two years is mainly responsible for the improvement, and it is believed to presage a definite era of agricultural progress in the Territory. This applies to the land situated north of 20° S lat. Agriculture is practically negligible in that part south of 20° S lat. Agricultural leases are granted in perpetuity at nominal rentals which are subject to re-appraisement every 21 years. They may be converted to freehold at any time after commencement of lease, subject to easy and liberal conditions. Most tropical products can be grown, and the potentialities for pig raising and bacon curing are excellent. The staple industry is pastoral, cattle raising north of 20° S lat. and cattle, horse, and sheep raising south of 20° S lat. Until railways are constructed however, little, if any, improvement is expected in the pastoral industry in that part north of 20° S lat., owing to the distance between the eastern and southern Australian markets. The position south of 20° S lat. is more hopeful, as a result of the extension of the railway from the Adelaide (South Australia) market to Alice Springs. The whole of the Territory is capable under proper conditions, of carrying successfully and profitably a great expansion of the beef cattle industry. There are vast areas of magnificent country which could be scientifically developed. From the Queensland border to the Western Australian border, a distance of over 600 miles, there are many thousands of square miles of country splendidly grassed and growing edible shrubs. The chief rivers are Victoria, Adelaide, Daly, Roper, Liverpool, Goyder, McArthur, and the Robinson. The first five are navigable, from 40 to 200 miles from their entrance, for boats drawing 4 feet. Pearl fishing is carried on round the coast, the shell being of good quality. There are considerable mineral resources, gold, silver, lead, tin and mica being indicated, and when communications are opened up the industry will become important. The railway extends from Darwin to Birdum in the N. (315 miles), and Alice Springs is now connected by rail with Adelaide.

Darwin occupies an elevated site 80 feet above high water mark overlooking Port Darwin. Alice Springs is situated in the MacDonnell Ranges, and boasts a splendid climate.

Administrator of Northern Territory (Darwin) Col. R. H. Weddell . . £1,200
Deputy Administrator (Alice Springs) V. G. Carrington . . 600
Chief Clerk and Accountant L. H. A. Giles . . 770
Judge Supreme Court, R. I. D. Mallam . . 1,000

PAPUA.

The Territory of Papua which was placed under the authority of the Commonwealth of Australia in 1906 comprises a part of the New Guinea mainland situated between the meridians of 141° and 150° 50' E. longitude, and between the 5th and 12th parallels of South latitude, also the Trobriand Group of islands, Woodlark, the d'Entrecasteaux Group, the Louisiades, the Conflict Group and the Laughlan Group. The total area of Papua is 90 540 sq. miles, of which 87 786 are on the mainland. There is an Executive Council of nine members who with five non-official members form the Legislative Council. The white population in 1931 was 1 128. The official estimate of the native population is 275,000. On Dec. 31, 1930 58 902 acres were under crops (47 837 coco-nuts, 9 075 rubber, 750 sisal hemp and 348 coffee). Owing to heavy rainfall Papua is well watered in most parts and possesses a large number of streams. The best known rivers are the Fly (650 miles long and navigable by steam launch for 500 miles) and the Purari. The climate is favourable to the cultivation of tropical products.

TERRITORY OF NEW GUINEA.

The part of "German New Guinea" over which Australia was given a mandate is situated in latitude between the Equator and 8° S. and in longitude between 141° E. and 156° E. It consists of the N.E. portion of New Guinea to 141° E. (70,000 sq. miles), Bismarck Archipelago including New Britain, New Ireland, and islands adjacent to both (19,200 sq. miles), and the two northernmost Solomon Islands (4,100 sq. miles) (Bougainville and Buka). The principal river in N.E. New Guinea is the Sepik, which is navigable for 250 miles.

The climate is hot and moist along the coast, with a steady drop as the higher altitudes are reached. It is suitable to the growth of all tropical products. In 1931 there were 212,600 acres under crops (coco-nuts, 204,100). The white population in 1931 was 2,905, and the Asiatic population 1,457 (estimated), the native

Population in 1932 was 390 000 (enumerated) including 26 000 working under indentures (Natives living in areas not under complete Government influence are not included in the above total as no reliable estimate can be made)

NORFOLK ISLAND

This island is about 930 miles from Sydney and 400 miles from New Zealand It is about five miles in length by three in breadth and was discovered by Capt Cook in 1774 Its area is 8 528 acres and circumference 20 miles The climate is mild with a mean temperature of 68° and an annual rainfall of 55 inches The descendants of the mutineers of the *Bounty* were brought here from Pitcairn Island in 1856 The population in July 1931 was approximately 1 000

Administrator Captain Charles Robert Pinney M C
President Executive Council E C Robinson

States of the Commonwealth

I NEW SOUTH WALES

The State of New South Wales is situated almost entirely between the 29th and 37th parallels of S lat and 141st and 154th meridians of E long and comprises an area of 310 372 square miles (inclusive of 940 square miles of Federal Territory)—*i e* more than five times that of England and Wales and over three times the size of Great Britain and Northern Ireland

POPULATION —The estimated population at 31st March 1932 was Males 1 282 100 Females 1 245 784 Total 2 527 884 A census is to be taken on June 30 1933

Births Deaths and Marriages

Year	Births	Deaths	Marriages

1931	47 724	21 284	15 377

Vital Statistics—Annual rate per 1 000 of population in 1931 —Births 19 01 Deaths 8 48 Marriages 6 13 Deaths under 1 year per 1 000 births, 43 5

Religions

All religions are free There is no State Church About three fourths of the people are Protestants the members of the Church of England in New South Wales according to the Census of 1921 number 1 027 410 Roman Catholic 502 815 Presbyterian 219 932 Methodist 181,977 Congregational (Independent) 22 235 Baptist 24 722 Salvation Army 9 490 and Hebrew 10 150

PHYSIOGRAPHY

The Eastern or coastal district is traversed by the Great Dividing Range the various portions of the Range in N S W being (from N to S) Macpherson, New England Liverpool Main or Blue Mountain Cullarin Gourock Monaro and Muniong Ranges—the highest points being Mount Kosciusko, 7,328 feet, and Townsend 7,256 feet The eastern or coastal district is watered by the Tweed Richmond Clarence, Bellinger, Nambucca Macleay Hastings, Camden Haven Manning, Wollomba, Hunter Hawkesbury, George, Shoalhaven, Clyde Moruya Tuross Bega, Towamba and Snowy Rivers The western portion of the country is not so well watered but immense reservoirs have been constructed for irrigation purposes and there are many artesian bores The Darling 1 609 miles and the Murrumbidgee 981 miles are both tributaries of the Murray which has a total length of 1 609 miles 1 203 miles forming part of the boundary between the States of New South Wales and Victoria Other inland rivers are Lachlan Bogan Macquarie Castlereagh Namoi and Gwydir

Climate —New South Wales is situated entirely in the Temperate Zone The climate is equable and very healthy At the capital (Sydney) the average mean shade temperature is 63 2° The mean temperature in the shade for the North coast is 66° to 69° south coast 60° to 63° northern tableland 56 to 60° southern tableland 44° to 57° north western slopes the mean annual temperature ranges from 62 to 68° in the Central western slopes 58 to 64° south western slopes 59° to 63° and in the Western Plains and Riverina Division from 62° to 69° The Seasons are as follows Spring during September October and November Summer during December January and February Autumn during March April and May Winter during June, July and August

GOVERNMENT

New South Wales was first colonised as a British possession in 1788 and after progressive settlement a partly elective legislature was established in 1843 In 1855 Responsible Government was granted the present Constitution being founded on the Consolidating Act of 1902 New South Wales federated with the other States of Australia in 1901 The executive authority of the State is vested in a Governor (appointed by the King) assisted by a Council of Ministers

GOVERNOR

Governor of New South Wales His Excellency Air Vice Marshal Sir Philip Woolcott Game G B E, K C B D S O *born* 1876 (1930) £5,000
Official Secretary, H S C Budge C M G
Private Secretary Brig Genl A J Anderson C M G
Lieutenant Governor, His Excellency the Hon Sir Philip Street K C M G, *born* 1863

EXECUTIVE COUNCIL

Education

Education—Education is compulsory between the ages of 7 and 14 years It is non sectarian and free at all State schools The total enrolment in 1931 in 3 240 State schools was 387 881, and the average daily attendance 322 816 In addition to the State schools there were in 1931 751 private colleges and schools with 94,022 scholars exclusive of many business and short hand schools The University of Sydney, with which 6 colleges are affiliated, including two Women's Colleges was incorporated in 1850, and had 3 147 students (2,295 male and 852 female) in 1931 The State expenditure on Education was

£5 007 973 in the year ended June 1931 The individual students at State Technical classes numbered 15 152 in 1931 and many attended at the State Agricultural College and Farms

FINANCE

The receipts and expenditure of the principal revenue accounts of the State are shown below Particulars of the business undertakings are stated separately, their accounts having been separated from the Consolidated Revenue Account as from July 1 1928

A sum of £800 000 contributed from Consolidated Revenue towards losses on developmental railways is duplicated in the figures for 1928 29, and later years being included as receipts and expenditure in both groups Governmental and Business Undertakings

The foregoing statement is exclusive of particulars of special funds such as the Unemployment Relief Fund formed in 1930 by means of special taxation of wages and other income The receipts in 1930–31 amounted to £4,877 835 and the expenditure to £4 857,084 and in 1931 32 receipts £6,042 256, expenditure £6 105 452

In terms of a financial agreement between the Commonwealth and the States, the Commonwealth took over the debts of New South Wales and the other States on July 1 1929, and assumed the liabilities of the States to bondholders A national debt sinking fund was established and the Australian Loan Council of representatives of the Commonwealth and the States was constituted to manage the debts and supervise public borrowing The Commonwealth contributes a certain sum each year towards interest and sinking fund charges In the latter part of the year 1931 the debts held in Australia were converted under the National Debt Conversion Loan into securities bearing interest at a reduction of 22½ per cent

Of the public debt of New South Wales at June 30 1931 an amount of £162 942 651 was repayable in London the annual interest being £7,840 497, and £13,825 624 was repayable in New York, interest £671,667 The balance, £98,930,254 was held in Australia, and the annual interest (£5 772,171 in June 1931) has been reduced by the conversion

Banking, &c.—There were (June 30, 1932) 14 banks, with total assets within New South Wales £158,499,939, including advances, &c, and Government securities £138,639 011, coin bullion, Australian Government Notes, and cash with Commonwealth Bank, £13,564 844, and liabilities, £116,065 803, including deposits £111 172 054 The savings bank deposits on June 30, 1932 amounted to £71 518,000 The amount assured in New South Wales in *Life Assurance* Societies in 1931 was £118,429 561 Ordinary, and £27,802 001 Industrial The membership of *Friendly Societies* was 242,344, and the funds at June 30, 1931, were £4 029 240 Members of *Trade Unions* numbered 315 840 the funds of 190 Unions at Dec 31, 1930 being £375,748

Co operative Societies—There were 376 registered societies in existence at June 30, 1931 During the year ending on that date the sales of 98 rural societies amounted to £14 060 694, and the sales of 48 trading societies amounted to £2,466,826 Building Societies advanced £500 519 to members.

Shipping—Excluding coastal trade 2,547 vessels entered ports of N S W during the year ended June 30, 1931 For the year ended June 30, 1932 the shipping entries at Sydney, including State coastal, were 5 840 vessels of 8,227,876 net tonnage The dock accommodation at Sydney includes four large graving docks, five floating docks, and seven patent slips At Newcastle there are a floating dock and five patent slips

Motor Vehicles—At June 30, 1932, there were 143 970 registrations of motor cars in force, and 62,791 of other motor vehicles

Railways—The railways and tramways of New South Wales with the exception of a few short lines, representing about 113 miles are controlled by the State At June 30, 1931 the mileage of the State railways open for traffic was 6,044 the capital cost amounted to £132 565,362, and the net earnings for the year 1931 32 to £2,476 790 ‡ There were also 200 miles of State tramways, the capital cost being £8 435 810 excluding cost in respect of power houses transferred to railways in 1930 and the net earnings during the year 1931 32 £255 690.‡

Roads and Bridges—A Main Roads Board, of two engineers with special knowledge of road construction and a president, was constituted in 1924 The Board was abolished on March 22, 1932, and its functions were transferred to a Board of Commissioners appointed to control the land transport services of the State Municipal councils are assisted in the construction and maintenance of the main highways with the object of developing vacant lands, feeding the railways, and giving primary producers access to markets and providing better facilities for motor traffic There are 118,341 miles of roads in New South Wales The total expenditure by the Government on roads, bridges etc, other than on Sydney Harbour Bridge, in 1930–31 was £3 785,275 (including loan moneys expended by Main Roads Board) The construction of an arch bridge over Sydney Harbour was completed and the bridge opened

† Government railways and tramways, Sydney Harbour Works Hunter District Water and Sewerage Works

for traffic in March, 1932. This bridge carries a roadway 57 ft. wide, two footways each 20 ft. wide, and four lines of railway, of which two are being used as tramways. At mean high water there is a headway of 172½ feet. At June 30, 1931, the Government expenditure in connection with the bridge amounted to £8,136,947. Of this sum £1,252,858 had been expended on resumptions and £1,507,000 on approaches. The cost of the bridge is being defrayed partly by a levy of ½*d.* in the £ on the unimproved capital value of properties in adjacent local areas, and partly by charges and tolls in respect of traffic across the bridge.

Posts, Telegraphs and Telephones.—The postal, telegraphic, and telephonic services are administered by the Commonwealth Government. At June 30, 1931, there were 2,542 post offices in New South Wales. The postal matter carried during 1926-27 (the latest year for which the information is available) included 352,038,712 letters and postcards, 81,395,900 newspapers, 66,164,500 books, packets and parcels. During the year ended June 30, 1931, 5,517,053 telegrams and cablegrams were transmitted, exclusive of telegrams from other States of the Commonwealth of Australia. The telephone line connections numbered 141,445.

Trade.

The oversea imports into New South Wales during 1931-32 were valued at £18,795,655, and the oversea exports were £34,604,529. The chief exports were wool £13,896,000, wheat and flour £6,657,000, butter £1,990,600, meats £2,025,000, hides and skins £976,000.

Production and Industry.

Agriculture is one of the principal industries of New South Wales; 6,809,520 acres, excluding 1,737 acres double-cropped, were under cultivation during the year ended June 30, 1932, producing 65,877,000 bushels of wheat, 2,767,000 bushels of maize, 3,242,980 bushels of oats, 2,427,423 bushels of rice, besides other kinds of grain, with 32,283 tons of potatoes, 1,191,696 tons of hay, and 2,048 cwt. of dried leaf tobacco. Sugar-cane to the extent of 260,209 tons was crushed; and 1,335,882 gallons of wine, 226,756 cases of bananas, and 16,501 dozen of pineapples obtained; almost every kind of fruit and vegetable is grown. The total area under wheat in the year 1931-32 was 3,923,100 acres, of which 3,624,900 acres were harvested for grain, and 286,700 acres for hay, and 11,500 acres were fed off. The production of wheat was 140,000 bushels of grain and 364,600 tons of

Alienation.—The total extent of land alienated and in process of alienation from the Crown on June 30, 1932, was 67,859,926 acres, while the area of land held under lease, &c., from the Crown was 113,112,127 acres, and the balance, 17,064,447 acres, consisted of reserve and other lands neither alienated nor leased; the total area of the State, exclusive of Federal Capital area (Canberra), being 198,036,500 acres.

Live Stock.—The country is admirably adapted for sheep-farming, and several breeds of sheep are depastured, including the celebrated merino, which was introduced in 1797. On June 30, 1932, there were 344,312 horses, 1,074,786 dairy cows, 2,776,289 other cattle, total cattle 3,840,473; 53,366,000 sheep, 334,332 swine, 25,633 goats, and 427 camels. In 1930-31, 427,200,000 lb. (stated as in the grease) of wool were produced, 114,201,709 lb. butter, 6,516,065 lb cheese, and 22,001,194 lb. bacon and ham. The production of wool in 1931-32 was about 497,200,000 lb., and butter about 124,000,000 lb. During 1930-31 there were 124,532 persons permanently engaged in rural industries, 114,989 being males, and 9,543 females.

Values of Rural Industries.—The agricultural production was valued in 1930-31 at £15,105,000, dairying and farm-yard produce at £12,560,000, and pastoral production at £22,175,000, a total of £49,840,000.

Forests, Fisheries and Trapping.—The value of these industries in 1930-31 was £2,607,000, and 5,593 persons were engaged.

Mining Industry.—The goldfields were opened in 1851. The principal minerals are coal, copper, silver, lead, zinc, tin, iron, opal and platinum. The total value of minerals won during 1931 was £7,246,873, exclusive of Portland cement £617,432, lime £28,125, and coke £297,328, coal accounting for £4,607,343, silver, silver lead and ore £1,079,359, and gold £83,365. The value of the mining plant and machinery was £7,453,590. The mining industry gave employment to 18,370 persons during the year.

Factories.—In 1930-31 there were 7,544 factories. The average number of persons employed during the year was 127,605, of whom 93,881 were males and 33,724 females, the amount of £25,200,290 being paid in salaries and wages. Male workers, exclusive of working proprietors, received on an average an amount of £244 7*s.* 3*d.* during the year and females £107 10*s.* 9*d.* The capital value of land, buildings and fixtures amounted to £49,822,312, and of plant and machinery £50,865,884. The full capacity of the machinery was 1,368,140 h.p., including steam, 928,374 h.p.; gas, 14,231 h.p.; electricity, 374,499 h.p.; water, 19,035 h.p.; oil, 32,001 h.p. The power actually used was, on the average, 749,026 h.p. The value of output was £118,483,536; materials used, £64,579,042, and fuel consumed (including motive power rented), £4,380,721; the production, *i.e.*, value added to raw materials, was £49,523,773. There are large iron and steel works at Newcastle, Lithgow and Port Kembla.

The total value of the production of the primary industries in 1930-32 was £58,152,000, making, with factory production, a total for all industries (as far as it is recorded) of £107,676,000, which is equal to £43 2*s.* 4*d.* per head of population.

Local Government.

For purposes of Local Government, with the exception of an area of 125,400 sq. miles in the sparsely-populated western division, the State is divided into 181 municipalities and 138 shires, governed by councils which are elected triennially. The councils are empowered to levy rates on the value of land, to float loans, to acquire land and works, to construct and maintain streets, jetties, wharfs, &c., to make regulations regarding cattle slaughtering, maintenance of public places, traffic, street — read lighting, public health and safety, management of parks, &c.

The basis of rating is mainly on the unimproved capital value of land, which in 1930 was £220,421,732 in municipalities, including the city of Sydney, and £169,853,697 in shires.

The total income of the municipal bodies was £15,178,581, and the expenditure on works and services, &c., £14,941,921

TOWNS

SYDNEY, the chief city and capital stands on the shore of Port Jackson, with a water frontage of 188 miles the depth of water at the Heads is not less than 80 feet, and at the wharves from 30 to 50 feet There are extensive plants for loading ships, and for storing and loading grain in bulk, also for replenishing coal and oil bunkers For 13 miles Sydney Harbour extends inland, the finest harbour in the world, and is surrounded by scenery of surpassing beauty The principal wharves are situated in close proximity to the business centre of the city The total area of water in the port is 14,284 acres, or about 22 square miles, of which 3 000 acres have a depth of from 35 feet to 160 feet the rise and fall of the tide is from three to six feet The city extends four miles north and south by three miles east and west, and contains a population of 109 400 (Dec, 1931) or, including suburbs, a population of 1,256 230. In addition to the Government buildings there are the University and Colleges, National Art Gallery, museums, botanic gardens, zoological gardens free public libraries observatory, conservatorium of music, two cathedrals, numerous churches and some large public hospitals The parks within the metropolitan area are 92 298 acres in extent and include the National Park which measures 33 807 acres, Kuring gai Chase 35 300 acres Kurnell 248 acres, Centennial Park 474 acres, and Parramatta Park 252 acres Other towns are Newcastle (with suburbs) 103 700, Broken Hill, 22,950 Lithgow, 15,050, Maitland, E & W 11,940, Goulburn, 12,570, Katoomba, 9,580, Bathurst, 10,050, Lismore, 10,510, Albury, 9 770, Cessnock, 13,860, Wagga Wagga 9,100, Liverpool, 6,360, Fairfield, 7,920, Grafton and South Grafton, 6 560 Wollongong, 10 800, Orange, 8 640, Tamworth, 7,790, Armidale 6,960, Dubbo, 6,350, Glen Innes, 4,250, Forbes, 5,120

Approximate time in transmission of mails from London to Sydney, 28 days

DEPENDENCY OF NEW SOUTH WALES

LORD HOWE ISLAND (436 miles north east of Sydney) Lat 31° 33′ 4″ S, Long 159° 4′ 26″ E Area, 3,220 acres Pop, Dec, 1931, 113 The island is of volcanic origin and Mount Gower reaches an altitude of 2,840 feet The affairs of the Island and the control of the Kentia palm seed industry are vested in a Board of Control Office, Chief Secretary's Department, Sydney.

II.—VICTORIA.

The State of Victoria comprises the south-east corner of Australia, at that part where its territory projects farthest into the southern latitudes, it lies between the 34th and 39th parallels of South latitude, and the 141st and 150th meridians of East longitude Its extreme length from east to west is about 420 miles, its greatest breadth is about 250 miles and its extent of coast line nearly 600 miles, the entire area being 87 884 square miles.

POPULATION.—On June 30, 1932, the estimated population numbered 1,805,298 (890,439 males and 914,859 females).

Increase of the People

Year	Births	Deaths	Marriages
1927	35 074	16 773	13,608
1928	34 498	17 708	13,186
1929	33,604	16 717	12,935
1930	33,127	15 959	11 641
1931	30,332	17 033	10,182

Vital Statistics.—Annual rate per 1 000 of population in 1931.—Births 16 88 Deaths, 9 48, Marriages, 5 67 Deaths under 1 year per 1,000 births 44 47

Religion

There has been no State aid to religion since 1875 Members of the Church of England in 1921 (last census) numbered 601,809 Protestants 18 636, Presbyterians 257 072 Methodists 183 829, Baptists 32 305 Church of Christ 22 250, Independents 15 893 and Roman Catholics 322,565

PHYSIOGRAPHY

The *Australian Alps* and the *Great Dividing Range* pass through the centre of the State and divide it into a northern and southern watershed the latter sloping down to the ocean and containing, especially in the south east, well wooded valleys The Murray River forms the northern boundary of the State, and has many Victorian tributaries The capital stands upon the Yarra Yarra, which rises in the southern slopes of the Dividing Range

Climate.—The mean temperature over a period of 76 years ended in 1931, was 58 5° Fahrenheit the thermometer rising (on the average four days during the year) above 100° in the shade, and falling (on the average for about two nights in the year) below 32° F The average number of days on which rain fell was 139, and the average yearly rainfall was 25 53 inches

GOVERNMENT

Victoria was originally known as the Port Phillip District of New South Wales and was erected into a separate colony in 1851, with a partially elective legislature In 1855 Responsible Government was conferred The executive authority is vested in a Governor, appointed by the Crown aided by an Executive Council of 12 members

Crown Solicitor F C Menzies 1 475

NOTE.—All the above mentioned salaries including Judges salaries, are subject to percentage reductions under the Financial Emergency Act, at various rates, from 2½ per cent on salaries of £728 to 27 per cent where the salary exceeds £3 000

EDUCATION

Primary Education is compulsory, secular and free between the ages of 6 and 14 there being 260 319 children on the registers in 1930, the average attendance being about 70 per cent *Secondary Education* is principally under private control 75,944 pupils being in attendance at the 502 schools in 1930 There is a State aided *University* at Melbourne with four affiliated colleges (Trinity, Ormond, Queens, and Newman)

FINANCE

The revenue and expenditure and State Debt for five years are given as follows —

Year	Revenue	Expenditure	Debt
	£	£	£
1927–28	27,357,917	27,521,270	158,183,470
1928–29	28,156,034	28,104,947	159,552,653
1929 30	27,323,842	28,496 712	162,288,994
1930–31	27,575,504	28 029,702	167 016,596
1931–32	24,555,272	26,163,594	169,833 964

Banking, &c.—There were (June 30, 1932) 14 banks (including Commonwealth Bank) with total assets £140 733 208, within the State, and liabilities £142 036 678 The savings bank deposits (including amounts deposited in the Commonwealth Savings Bank) at June 30, 1932, amounted to £65 781 000

PRODUCTION AND INDUSTRY

Agriculture—Of the 9,306,289 acres under cultivation in 1930–31 4 600,200 were wheat crops and 371 024 acres and 1 277 338 acres were cut for hay In 1931 31 7 254 615 gallons of wine were produced The estimated value of production in 1930 31 was (including manufacturing values) £70 298 610

Live Stock—There were in 1931, 669 132 milch cows producing 110 006 619 lb of butter and 8 064 463 lb of cheese and 760 788 other cattle 16,477 995 sheep 281 245 pigs and 379 872 horses

Minerals—The gold production in Victoria has declined very considerably the amount produced in 1931 being 43 638 oz (£262,462) Other minerals raised consisted principally of coal (black and brown) kaolin limestone and gypsum

Trade and Industries—Wool wheat flour butter live stock fruits condensed milk and poultry are the staple productions of the State and the manufactures (8 109 factories &c employing 126 016 hands in 1930 31) are mainly for home consumption The chief exports oversea are wool butter wheat flour skins and hides, tallow, milk and cream preserved and frozen meats and fruit (dried and fresh) The principal oversea imports of the State are iron and steel, machines and machinery metals and metal manufactures silks velvets &c apparel and attire bags and sacks tea cottons and linens, woollens timber petroleum spirit and paper

CITIES AND TOWNS

MELBOURNE the capital city, which is an episcopal see was originally laid out in the year 1837 with wisdom and foresight its wide streets, park lands public gardens university, public library museum and large churches are the principal features of the city Melbourne and suburbs cover an area of 125 741 acres and contained (December 31 1931) a population of 1 030 750 Other cities are Ballarat, 41,750 Geelong 42 760 Bendigo 33 720 Warrnambool, 8 200 The chief towns are Castlemaine 6 670, Wonthaggi 7 330 Mildura, 6 000 Hamilton, 5 300 Ararat 5 750 and Shepparton, 6 000

Transmission of mails approximate, 30 days Melbourne distant from London 11 267 miles, transit, 30 to 35 days

III.—SOUTH AUSTRALIA.

The State of South Australia is situated between 26° and 37 S lat and 129° and 141° E long the total area being 380 070 sq miles.

POPULATION.—In 1932 the population numbered 585 466 (302 371 males and 283,095 females)

Increase of the People

Year	Births	Deaths.	Marriages.
1927	11 492	5,128	4,502
1928	11 408	5,147	4,146
1929	10,665	5,039	3,719
1930	9 984	4,851	3,312
1931	9 079	4,888	3,069

Birth rate 15 56 death rate 8 38, marriage rate 5 26 per 1,000 of population Infantile mor

tality 35 46 per 1 000 births, being one of the lowest rates in the world

Religions.

Religion is free and receives no State aid At the Census, 1921 the persons belonging to the principal religious denominations were as follows —Church of England, 165 968 Methodists 122 634 Congregationalists 15 289 Baptists 33,033 Lutherans, 24 606 Roman Catholics, 64 054 Presbyterians 22,659 and Churches of Christ 15 039

PHYSIOGRAPHY

The eastern portion of the State is divided longitudinally by the *Flinders Range*, which extends from the eastern side of the Gulf of St Vincent to the Lakes Torrens and Eyre The north western portion is partly desert which can never be brought into cultivation The northern portion of the State, between Lake Eyre and 26° South latitude is also unpromising in comparison with the fertile land that surrounds the hill country of the east Except for the Murray which flows for some 250 miles through the south eastern corner into the Southern Ocean there are no rivers of importance in South Australia

Climate —The mean annual temperature at Adelaide is 63 the winter temperature (July August) averaging 53° and the summer (November March) 71° During the summer months the maximum temperature at times exceeds 100°, but owing to the purity and dryness of the atmosphere the inconvenience is comparatively slight The average annual rainfall at Adelaide derived from 93 years record is 21 10 inches This total is rather higher than the approximate average annual rainfall over the whole of the agricultural areas extending from Melrose to Cape Northumberland In the Mount Lofty Ranges the mean yearly rainfall in places exceeds 40 inches while on the Adelaide plains the precipitation has fallen as low as 16 inches

GOVERNMENT

South Australia was proclaimed a British Province in 1836 and in 1851 a partially elective legislature was established The present Constitution rests upon a Law of Oct 24 1856 the executive authority being vested in a Governor appointed by the Crown, aided by a Council of 6 Ministers, and the Lieutenant Governor

GOVERNOR

Governor of South Australia, His Excellency Brig Gen Hon Sir Alexander Gore Arkwright Hore Ruthven VC, KCMG, CB, DSO (1928) £5 000
Private Sec, Leigh Winsel, CMG, MVO
Lieut Governor, Hon Sir George John Robert Murray, KCMG, LLM, *born* 1863 (1916)

THE MINISTRY (Oct 30, 1930)

(£7,750 is allotted as salaries to Ministers less 20 per cent for 12 months)

Premier and Treasurer, and Minister of Education Hon Lionel Laughton Hill
Attorney General and Minister of Railways, Hon William Joseph Denny, MC
Chief Secretary and Minister of Agriculture and Commissioner of Forest Lands, Hon Stanley R Whitford
Commissioner of Crown Lands and Minister of Mines Marine, Labour and Employment, Hon Robert Stanley Richards
Commissioner of Public Works and Minister of Industry Hon John McInnes
Minister of Local Government Immigration Repatriation and Irrigation Hon James Jelley

AGENT GENERAL IN LONDON

Agent General in London Hon Sir H N Barwell KCMG, Australia House, WC 2 £1,600
Secretary and Trade Commissioner, C F G McCann 850

THE LEGISLATURE

Parliament consists of a *Legislative Council* of 20 members elected for 6 years one half retiring every 3 years and a *House of Assembly* of 46 members elected for a maximum duration of 3 years Election is by ballot with universal adult suffrage for the House of Assembly for all British subjects male and female there is a small property qualification for electors to the Legislative Council, who numbered 133 409 in 1931 those for the Assembly numbering 329 895
President of the Legislative Council, Hon Sir J L Stirling KCMG £680
Speaker of the House of Assembly Hon E J Shepherd 680

THE JUDICATURE

Law and Justice —The Supreme Court is presided over by the Chief Justice and four Puisne Judges there are Courts of Vice Admiralty and Insolvency as well as Local Civil Courts with stipendiary magistrates and the usual Police Courts The Supreme Court convictions for 1931 totalled 1 to 274 which is at the rate of 1 in every 2 100 of the population
Chief Justice and Judge of Vice Admiralty Hon Sir G J R Murray KCMG, BA LLM £2 000
Judges Hon J M Napier, LL B Hon H A Parsons, LL B Hon F W Richards LL D Hon A W Piper 1,700

EDUCATION

Public Education (Primary Secondary and Technical) is provided by the State, and controlled by a responsible Minister it is secular, compulsory and free there are 1,074 State schools with 3 604 teachers and 95 002 scholars, the expenditure in 1931 was £917 233 including grants to University Libraries &c The Government grants Exhibitions and Scholarships, carrying the holders to higher schools and the University Private schools number 186 with 917 teachers and 14 310 scholars There is an endowed *University* at Adelaide founded in 1874, with 1 056 undergraduates and 1 372 other students all classes are open to women A State School of Mines and Industries has also been established, and there are technical schools at 9 country centres and also special trade schools for apprentices The public library, museum art gallery and local institutes are supported or assisted by the State

STATE FINANCE

Year	Revenue	Expenditure	Debt
	£	£	£
1928	11 346 903	11 621 834	90,612,402
1929	10,840,914	11 771,772	92 653,531
1930	9,847 201	11,473 023	93,410,118
1931	10 725,811	12,539 668	99,527,447
1932	10,481,977	11,545,336	101,599,238

Banking —There are 8 banking institutions in Adelaide, in addition to the Commonwealth Government Bank and the State Bank of South Australia, with about 385 branches and agencies and £42,000 000 paid up capital having a total liability of £20 901,165 and assets £29 482 907 in June quarter, 1932 The savings banks on June 30, 1932, had 549 634 accounts open with £21 167 251 to their credit Over 90 per cent of the population have savings bank accounts

PRODUCTION AND INDUSTRY

Agriculture —Of the total area about one half is farmed or grazed, and 8,100 000 acres cultivated —under wheat 4,100,000 acres, hay 528 000 oats 206 000 barley 242,000 orchards and vineyards 82 000, with 2 500 000 acres lying fallow Wheat produced 48 093 000 bushels Oranges lemons apples apricots, pears and all stone fruits and olives are successfully grown, and fruit drying is profitable There were 52,000 acres of vines, with a production of 10 680 000 gallons of wine 156 000 cwt of currants and 185 000 cwt of raisins Considerable quantities of fruits (fresh and dried) and also wine are annually sent to overseas countries, principally the United Kingdom and the other Australian States Brandy and other spirits are also produced The land is also very suitable for the growing of all kinds of root crops and vegetables

Live Stock (Dec 31 1931) There were 6 608 981 sheep cattle 265 324, horses 185 222 pigs 109,780 Wool production 66 162 687 lb

Minerals —Copper and gold silver, lead manganese bismuth, iron gypsum salt phosphate rock, coal &c are found the total mineral output being valued at £553 558 (1931) Over £33 096 000 of copper have been produced since the foundation of the State, but production has not been profitable for some time

Manufactures —In 1931 there were 1 644 factories employing 25 141 hands, the gross value of the output being £19 997 455 and the wages paid £4 655 144. Plant, machinery, land, and buildings were valued at £18,601 557

Value of Production, 1930 31 —Crops, total value, £9 009,865, average per head £16, manufactures, £7,397 175, pastoral £2 777 621 minerals, £1 288,238, dairying, £1,644 881 poultry, fisheries and game, forestry, &c £1,739,386 *Total value of production* £23,857,166, average £41 per head

Trade and Commerce Oversea, 1930–31 —The total value of the *Imports* was £3 915 550 (U K £1 402,996, or 37 per cent other British countries £746,591, or 20 per cent foreign countries £1,636 229 or 43 per cent) The total value of the *Exports* was £10 061 535 (U K £5 444 798, or 54 per cent, other British countries £856 628, or 9 per cent, foreign countries £3,760,109, or 37 per cent) In 1931 32 the imports were £2 821,761 and exports £12,222 151, consisting of breadstuffs £6,350 243, pastoral and dairying products £2 493 661, fruits and wine £1 562 300, minerals £1,628,669, and miscellaneous £187,338

Transport, &c —There are 3 821 miles of railway in South Australia, 156 miles of electric tramways, 46,000 miles of roads and several good harbours On June 30, 1932 there were 57,882 motor vehicles in use, classified as 39,023 cars, taxi cabs, &c, 10 909 lorries, trucks, &c, 7,860 motor cycles and 89 road tractors There are 874 post offices in the State, and 759 telegraph stations and 50 656 telephones connected

Shipping (1930 31) —Ships entered numbered 1,020, tonnage 4 165 788 British 820 (3 417,553 tons), foreign 200 (748 235 tons)

TOWNS

ADELAIDE, the chief city and capital, population (1931) 324 337 inclusive of suburbs within 10 miles radius Other towns are Moonta (4 250) Kadina (5 000) Wallaroo (3,250) Port Pirie (10,000) on the east and Port Augusta (3 350) on the west of Spencer Gulf and Kapunda (2,100), Gawler (5 000), and Peterborough (3 300) on the line from Adelaide to the north Victor Harbor (3 450) in the south, Mt Gambier (6 000) in the south east, and Port Lincoln (2 850) on Eyre Peninsula Murray Bridge (3,600) and Renmark (3 750) on the River Murray

Transmission of mails from London to Adelaide, approximate, 29 days

IV —QUEENSLAND.

This State situated in lat 10° 40′—29° S and long 138 153° 30 E comprises the whole north eastern portion of the Australian continent

Queensland possesses an area of 670 500 square miles (*i e* equal to more than 5½ times the area of the United Kingdom)

POPULATION —At the Census of 1921 the population numbered 755 972 (398 969 males and 359 003 females) On March 31 1932 the estimated population was 965 934

Increase of the People

Year	Births	Deaths	Marriages
1927	19 830	8,079	6,278
1928	19 783	7 976	6,321
1929	18 487	8 308	6,169
1930	18 939	7,455	6,199
1931	17 833	7 525	5,951

Religion.

Since 1861 no State aid has been afforded to religion At the Census of 1921 there were 309,786 Church of England 172 662 Roman Catholics, 91 610 Presbyterians, 77 566 Methodists, 17,891 Lutherans 14 735 Baptists and 44 132 other Christians with 4 267 Muhammadans and Pagans, besides Indefinite No religion, &c

PHYSIOGRAPHY

The *Great Dividing Range* on the eastern coast of the continent produces a similar formation to that of New South Wales, the eastern side having a narrow slope to the coast and the western a long and gradual slope to the central plains where the *Auburn Range* divides the land into a northern and southern watershed. The Brisbane, Burnett, Fitzroy, and Burdekin rise in the eastern ranges and flow into the Pacific, the Flinders, Mitchell and Leichhardt in the Gulf of Carpentaria, and the Barcoo and Wairego rise in the central ranges and flow southwards

Climate —At Brisbane the mean temperature for 1931 was 69 2°, the maximum and minimum shade temperatures being 100 2 and 41 8°, mean barometer, 30 067 The coastal regions are warm and moist, the plateaus dry and temperate, whilst in the very far west the rainfall is scanty

The rainfall during 1931 was 66·72 inches and there were 132 wet days

GOVERNMENT

Queensland was constituted a separate colony with Responsible Government in 1859 having previously formed part of New South Wales The executive authority is vested in a Governor (appointed by the Crown) aided by an Executive Council of 10 members

GOVERNOR

Governor of Queensland His Excellency Col The Rt Hon Sir Leslie Orme Wilson GCSI GCIE CMG DSO £3,000

V—TASMANIA

Tasmania is an island in the South Pacific Ocean off the southern extremity of Australia from which it is separated by Bass Strait about 140 miles wide in which are situated the Furneaux Group and King Island included within the State It lies between 40° 33 43° 39 S lat and 144° 39—148° 23 E long and contains an area of 26 215 square miles

POPULATION—At the Census of 1921 the population numbered 213 780 (107 743 males and 106 037 females)

Year.	Birth Rate	Death Rate	Infant Mortality	Marriage Rate
1927	23 01	9 68	53 0	6 82
1928	22 13	10 06	64 0	7 09
1929	22 44	10 17	53'2	8 01
1930	22 11	9 00	50 6	6 70
1931	21 65	9 35	46 0	6 82

Religion

All religions are free In 1921 there were 118,222 members of the Church of England, 35 456 Roman Catholics, 27 171 Methodists 14 796 Presbyterians 4 543 Congregationalists and Independents and 5 332 Baptists

PHYSIOGRAPHY

The surface of the country is generally hilly and timbered with mountains from 1,500 to 5 000 feet in height and expanses of level, open plains There are numerous streams, the Derwent and the Tamar being the largest The climate is fine and salubrious and well suited to European constitutions the hot winds of Australia do not reach the island At Hobart the mean annual temperature averages 54 4°, the mean temperature for Dec Jan and Feb being 61 5° and that of June July and Aug 46 9 The western side of the island is very wet the eastern like having rainfall similar to that of eastern England the average rainfall varies from 20 inches to 100 inches in different parts

GOVERNMENT

The island was first settled by the British in 1803 as an appendage to New South Wales from which it was separated in 1825 In 1851 a partly elective legislature was inaugurated and in 1856 Responsible Government was added In 1901 Tasmania became a State of the Australian Commonwealth q.v. The State executive authority is vested in a Governor (appointed by the Crown) aided by an Executive Council of responsible Ministers

EDUCATION

Primary education is compulsory secular, and free, there being 500 State schools in 1930 with 38,345 children on the registers *Secondary* education is also provided by the State (5 high schools with 1,687 scholars) and by private endowment There is a *University* at Hobart and technical schools at Hobart, Launceston Queenstown and Zeehan

FINANCE

Year	Revenue	Expenditure	Debt
1927–28	£2,962 687	£2 867,605	£24 872 785
1928 29	434	2 855 977	23 324 630
1929 30	272	2,981,992	22,921 211
1930 31	290	2,854,394	23 389 079
1931 32	090	2 657 109	23 659 588

Banking—Dec 31 1931 the banks of issue had total deposits £7 665,404, the savings bank deposits were £5 482 293

PRODUCTION AND INDUSTRY

Agriculture and Live Stock—Of the total area of 16 778 000 acres there were in 1930 31 267 632 acres under crops The principal crops are apples, potatoes, hay and other fruit, followed by hops, peas, oats, green forage and wheat The live stock included 230 284 cattle, 2 119 606 sheep 54 556 pigs and 32 700 horses The wool production was 14 000 000 lb The butter produced amounted to 9 802 300 lb

Electrical Energy—The Hydro Electric Department of Tasmania has completed an important waterpower development at the Great Lake, in the centre of the State the capacity of the installation being 81 000 h p The advantage of cheap power is steadily attracting new manufacturing industries

Forestry—Timber reserves total 950 538 acres Area held under lease or forest permits for saw milling logging, &c 272 000 acres The amount of timber milled for 1930 31 was 30 597 832 super feet, exclusive of piles, poles fencing, and for practically all sleepers The utilisation of forest waste for the production of wood pulp has, after long investigation, been brought within the scope of business operations A company has been formed with options over large areas, and there is every prospect of an early commencement of manufacturing operations

Minerals—The chief minerals produced are copper, tin, silver, lead coal, the value of all minerals produced in 1931 being £707 028

Manufactures—The chief factories for export are metallurgical, fruit preserving, woollen mills, cement, and confectionery, the value of production in 1930 31 was £2,807,497, the capital invested in the 805 establishments being £9 182,000 in 1930–31

TOWNS

CAPITAL, Hobart. Population (1932), 58,270

Other towns are Launceston (pop 31,210), Devonport, Ulverstone, Burnie, and Queens own

Transmission of mails, approximate, 31 days

VI—WESTERN AUSTRALIA

Includes all that portion of the continent west of 129° E long, the most westerly point being in 112 52′ E long and from 13° 30′ to 35° 8′ S lat Its extreme length is 1,500 miles and 1,000 miles from east to west, and its total area 975,920 square miles

POPULATION—At the Census of April 4, 1921, the population was 332,732 (177 278 males, 155,454 females), in 1932 the total was estimated at 421,609 (225,586 males, 196,023 females)

Natural Increase of the People

	Births	Deaths	Marriages
1927	8 481	3 93	3,107
1928	8 704	3,640	3 309
1929	9 051	3 930	3 367
1930	9 200	3 774	3,205
1931	8 549	3 681	2,741

Religions.

There is no State aid to religions At the Census of 1921 there were 153 285 persons belonging to the Church of England 64,488 Roman Catholics, 39 116 Methodists and 28 377 Presbyterians

Physical Features—Large areas of the State for some hundreds of miles inland are hilly and even mountainous although the altitude, so far as ascertained, rises nowhere above that of Mount Bruce (4 024 ft) in the north west division or that of Bluff Knoll (3 640 ft) in the Stirling Range in the south west The coastal regions of the west and of the north are undulating, with an interior slope to the unsettled central portion of Australia The Darling and Hamersley ranges of the west have a western slope to the Indian Ocean into which flow many streams notably the Swan Murchison, Gascoyne, Ashburton Fortescue and De Grey In the north the Fitzroy flows from the Leopold range into the Indian Ocean and the Drysdale and Ord into the Timor Sea The greater portion of the far interior may be described as a great tableland, with an altitude of from 1,000 to 2 000 ft above sea level the surface of which consists in parts of sand dunes, varied by wide stretches of clayey soils The climate is one of the most temperate in the world The total rainfall at Perth during 1931 was 39 18 inches the average for the past 55 years being 34 70 Of the area of Western Australia which is equal to more than half that of European Russia probably about two thirds is suitable for pastoral purposes, immense tracts having already been proved eminently so

GOVERNMENT

Western Australia was first settled by the British in 1829, and in 1870 it was granted a partially elective legislature In 1890 responsible government was granted, and the Administration vested in a Governor, a Legislative Council, and a Legislative Assembly The present constitution rests upon an Amending Act of 1899, further amended by the Constitution Acts Amendment Act 1911 the Executive is vested in a Governor appointed by the Crown and aided by a Council of responsible Ministers.

GOVERNOR

Governor of Western Australia, (vacant)

Lieutenant Governor, His Excellency Hon Sir John Alfred Northmore, K C M G, LL B (June, 1932)

Private Sec, Maj B Kerr Pearse, C M.G, M V O

Executive Council

Premier and Treasurer, Hon Sir James Mitchell K C M G M I A £1 700
Minister for Lands Immigration and Health Hon Charles G Latham M I A 1 500
Attorney General and Minister for Education Hon Thomas A I Davy K C, M I A 1 500
Minister for Railways Mines, Police, Forests and Industry Hon John Scaddan C M G, M L A 1 500
Minister for Public Works and Labour Hon John Lindsay M L A 1,500
Chief Secretary and Minister for Country Water Supplies and Trading Concerns, Hon Charles F Baxter M L C 1,500
Minister for Agriculture, Hon Percy D Ferguson M L A 1,500

Agent General in London

Agent General in London, Hon William C Angwin *Offices* Savoy House 115 116 Strand W C 2 £2 000
Secretary C B Rushton I S O 810

The Legislature

Parliament consists of a *Legislative Council* of 30 members elected for 6 years and a *Legislative Assembly* of 50 members elected for 3 years by universal adult suffrage the electorate of the Council is restricted by a property qualification that of the Assembly being subject to residence and registration
President of the Legislative Council, Hon Sir John Waters Kirwan £800
Speaker of the Legislative Assembly, Hon S Stubbs 800

The Judicature

There is a Supreme Court presided over by a Chief Justice and three Puisne Judges which has complete jurisdiction in all criminal and common law matters There are courts known as local courts which have limited civil jurisdiction There are Courts of Session dealing with criminal matters outside Perth and there are Magistrates courts and Children's courts
Chief Justice Hon Sir J A Northmore K C M G LL B £2,300
Puisne Judges, Hons T P Draper C B E, J P Dwyer (and 1 vacant) each £2,000

Education

Education—Education is compulsory and free and numerous elementary schools are under the control of the Minister of Education There are a training college technical schools a school of mines and a Goldfields High School at Kalgoorlie (State Secondary Schools in various centres and the capital) and a University The total amount expended on education during the year ended June 30 1932 was £549 116 in addition, a grant of £25 111 was made to the University

Finance

Revenue and Expenditure and gross public Debt for 5 years ended June 30 —

Year	Revenue	Expenditure	Debt
	£	£	£
1928	9,807,949	9 874,415	76,427,764
1929	9 947 950	10 223,919	69,355,449
1930	9,750,515	10,268,518	71,194,325
1931	8 686 756	10 107,294	76 564,885
1932	8,035,316	9,593,812	79,707,953

Banking—There were, including the Commonwealth Bank of Australia, 8 cheque paying banks, formerly banks of issue, in the State on June 30, 1932 with total assets £25 591 112 and liabilities £16,678 049 The amount due to depositors in the Commonwealth Savings Bank in Western Australia on June 30, 1932 was £10 210,879

Production and Industry

Crops and Live Stock—Of the total area (624 588 800 acres) 3 960 850 acres were under crops in 1931 32 wheat for grain accounting for 3 158 888 acres In 1931 the live stock included 826 417 cattle 10 096 614 sheep, 120,482 pigs 18 828 goats and 156 347 horses There were about 5 000 acres of vineyards.

Manufacturing Industries—There were on June 30 1931 a total of 1 455 industrial establishments in the State employing either machinery or at least four hands The total number of persons employed in them was 14 619 The combined output of these establishments for 12 months ended June, 1931, was computed at £12 353 353

Forestry—The forests contain some of the very finest hardwoods in the world Two of these Jarrah (*Eucalyptus marginata*) and Karri (*Eucalyptus diversicolor*) are largely exported The quantity of timber cut during the 12 months ended June 1931 is computed to have been 112 483 555 super feet

Minerals—The groups of the Coolgardie gold fields (covering a vast portion of the interior and extending to the 125th meridian) as well as other fields are being constantly worked, the production of gold being 510 572 oz in 1931 The total amount produced in the State from 1886 to June 30 1931 is 39 103 153 fine ozs Magnetic iron lead copper and tin ores and coal exist in large quantities

Trade—The principal ports are Fremantle, Albany Bunbury Geraldton, and Broome The opening of the Trans Australian Railway in Oct 1917 afforded another means of ingress and egress both for travellers and merchandise The imports chiefly consist of machinery, vehicles manufactured hardware clothing and textiles, tobacco cigars and cigarettes, also (mainly from the sister states of the Commonwealth) provisions Principal exports for the year ended June 30 1932 —Gold £4,912,715, Wool £2,345 570 timber, £358,361, sandal wood pearls and shell hides and skins, £341 999 wheat £5 323 740, flour £580,729, and fresh fruit £430 738

Towns

Capital Perth Population (1931) of Metropolitan area, including Fremantle, 209,729

Perth, the capital, stands on the right bank of the Swan River estuary 12 miles from Fremantle The King's Park (approximately 1,000 acres), on a hill overlooking the city and the wide estuarine reaches of the river, possesses unique natural beauty Other towns are Fremantle (including suburbs 35,143), Albany Kalgoorlie and Boulder (11,635) Bunbury Cottesloe (5,510) Claremont (6,400), Geraldton (4 556) Midland Junction (5 220), Northam (4,874), and Collie (3,450)

THE DOMINION OF NEW ZEALAND.

(By the Rt. Hon. G. W. FORBES, P.C., *Prime Minister.*)

THE Dominion of New Zealand is situated in the South Pacific Ocean and in point of actual distance is consequently far from the Homeland and from the older established countries of the world. This fact does not however, in any way diminish the importance of New Zealand. Rather, on the other hand, does it serve to increase its significance as a power in the Pacific Ocean.

Actually the Dominion possesses an importance far in excess of that which the uninformed might expect to be attached to such a young country. Directly connected with the older world by fast modern steamship services—indeed, only a few short weeks away from the Homeland—her isolation is much more apparent than real.

New Zealand extends for a length of over one thousand miles north and south and possesses a population of slightly more than one and a half million people. In addition the Dominion has control over numerous islands in the South Pacific with a large aggregate Polynesian population. More specifically her jurisdiction extends from Penrhyn Island, about eight degrees south of the Equator, to the coasts of the Ross Sea on the borders of the Antarctic Continent.

New Zealand is primarily a grazing country, and the quality of its pastures has gained a world wide reputation. For that and other reasons its future will for many years to come doubtless be inseparably associated with stock raising, principally of dairy cattle and sheep. Wool, frozen meat, butter, cheese, hides and skins, and fruit in the main comprise her staple exports, and are the products upon which the Dominion principally relies to exchange for many manufactured goods from overseas.

It is equally true, however, that with increasing population there is a growing tendency for greater diversity in industry and for the manufacture of many commodities within the Dominion which formerly were obtained solely from abroad. Nevertheless the population is as yet insufficient to maintain a very wide range of industries and consequently the Dominion's industrial field of manufacture is to a great extent limited to the treatment of the principal primary products.

The main market for the products of New Zealand is the United Kingdom, as much as 88 per cent. of the total value of her exports being sent there during the calendar year, 1931. A further 5 per cent. was sent to other British countries, making a total of 93 per cent. marketed within the British Empire.

The importance of the United Kingdom and of the British Empire as a market for the raw materials and foodstuffs which the Dominion produces is fully realised by the Government and the people of New Zealand, and it is also realised that the prosperity of the United Kingdom is dependent in large degree upon the extent to which New Zealand and the other Dominions and Colonies co-operate by purchasing the products of the Homeland.

That this is fully recognised in New Zealand is obvious from the fact that this country purchases a greater proportion of its imports from the United Kingdom than any other British Dominion. The desire to further inter-Empire trade moreover finds practical expression in the extension of a substantial measure of preference by means of differential rates of customs duties to the products of the British Empire.

Generous provision is made in New Zealand for primary, secondary and technical education, and, in addition, every encouragement is given to the student who is desirous of continuing his course at the University. So far as humanitarian legislation generally is concerned New Zealand is recognised as being one of the foremost countries in the world.

Finally, a few words must be written of the Dominion's wonderful scenic attractions and sporting facilities. This article would, indeed, be incomplete without reference to them, however brief.

Within the compass of a comparatively small country there are to be found all the varieties of scenery that is possible to see in any other part of the world and these offer unlimited scope to the tourist. From the sportsman's point of view the attractions, too, cannot be surpassed anywhere, for here in New Zealand is to be obtained much that appeals—deep sea fishing, incomparable angling in the numerous lakes, rivers and coastal waters, and excellent deer-stalking.

All these features combine to make the Dominion's scenic resorts, tourist attractions and sporting facilities one of its most important natural resources.

PHYSIOGRAPHY.

The Dominion of New Zealand is distant about 1,200 miles south-east of the mainland of Australia, and consists of three main islands in the South Pacific Ocean, known as the North, South, and Stewart Islands, having a length of 1,100 miles, between 34° 22′ and 47° 18′ South latitude and 162° East longitude – 173° West longitude, with several groups of smaller islands lying at some distance from the principal group.

Geographical.—The two principal islands of New Zealand have a total length of 1,040 miles, the total coast line reaching 4,330 miles. A large portion of the surface is mountainous in character The principal range is that of the Southern Alps, having its culminating point in Mount Cook (12,349 ft.). The North Island mountains include several active and dormant volcanoes. Mt. Ruapehu (9,175 ft.) and Mt. Ngauruhoe (7,515 ft.) are the most important. Of the numerous glaciers in the South Island, the Tasman (18 miles by 1½) is the largest. The North Island in particular is noted for its hot springs and geysers. For the most part the rivers are too short and rapid for considerable use in navigation. The more important include the Waikato (220 miles in length), Wanganui (140) and Clutha (210). Lakes (Taupo, 238 sq. miles in area; Wakatipu, 112; and Te Anau 132) are abundant; many of them of great beauty.

Meteorological.—Owing chiefly to its great length, New Zealand's climate varies very considerably in its different divisions. In general it is mild with an abundant rainfall. Snow is rarely seen except upon the higher levels Annual averages —North Island, mean temperature 57° F., rainfall 47 in (days with rain 163) sunshine, 2,134 hours; South Island, mean temperature 52° F., rainfall 56 in. (days with rain 145), sunshine, 1,956 hours

GOVERNMENT.

The west coast of the South Island of New Zealand was discovered by Abel Jansen Tasman, the navigator (voyaging under the direction of the Netherlands' East India Company), on December 13, 1642. The islands were visited in 1769 by Captain Cook, who returned to them in 1773, 1774, and 1777. In 1793 the Government of New South Wales despatched H.M.S. *Daedalus* to the islands on a diplomatic mission. The first settlement of Europeans was made in 1814, but no colonisation took place until 1825. In 1840 British sovereignty was proclaimed, and on May 3, 1841, New Zealand was, by letters patent, erected into a separate colony distinct from New South Wales On Sept. 26, 1907 the designation was changed to *The Dominion of New Zealand.* The Constitution rests upon the Act of 1852, under which the executive authority is entrusted to a Governor (now Governor-General) appointed by the Crown and aided by an Executive Council, with a Legislature of two houses.

GOVERNOR-GENERAL.

Governor General and Commander-in Chief of New Zealand, His Excellency The Right Hon. Lord Bledisloe, P.C., G.C.M.G., K.B.E., D.Sc., *appt'd* 1930 (salary £7,500; H.E. has relinquished £2,250) £5,250

Official Secretary, Sir Cecil Day, C.M.G., C.B.E. *A.D.C.s*, Lt. J. C. Elworthy, R.N., Capt. J. W. Tweedie.

* EXECUTIVE COUNCIL.

His Excellency the GOVERNOR GENERAL.

COALITION CABINET (Aug. 1932).

Prime Minister, Minister of Railways, of External Affairs, and in Charge of Scientific and Industrial Research, Public Trust, Electoral and High Commissioner's Departments, Rt. Hon. G. W. Forbes, P.C. £1,377

Minister of Public Works, of Transport, of Employment, and in Charge of Roads and Public Buildings, Rt. Hon. J. G. Coates, P.C., M.C. 895

Minister of Lands, Commissioner of State Forests, and Minister in Charge of Land for Settlements, Scenery Preservation, Discharged Soldiers' Settlement, and Valuation Departments, Hon. E. A. Ransom £895

Minister of Finance, of Customs, of Stamp Duties, Attorney-General, and Minister in Charge of State Advances and Land and Income Tax Departments, Hon W. Downie Stewart 805

Minister of Native Affairs, of Cook Islands, and in Charge of Native Trust, Government Life Insurance, State Fire and Accident Insurance, Legislative, Public Service Superannuation, Friendly Societies and National Provident Fund Departments, and Member of the Executive Council representing the Native Race, Hon Sir Apirana Ngata. 895

Minister of Health, of Immigration, and in Charge of Mental Hospitals and Printing and Stationery Departments, Hon. J. A. Young 895

Minister of Education and of Industries and Commerce, Hon. R. Masters M.L.C. 895

Minister of Defence, of Justice, of Mines, and in Charge of Pensions, Police, Prisons, Registrar-General's, and Inspection of Machinery Departments, Hon. J. G Cobbe..... 895

* Members of the Executive Council travelling within the Dominion on public service are entitled to an allowance not exceeding £1 1 s *per diem* when so engaged but not during attendance at a session of the General Assembly A house allowance of £153 is also paid where a Government residence is not provided (10 per cent cut in 1931–32 and further 15 per cent in 1932–33)

Postmaster General, Minister of Telegraphs, of Labour, of Internal Affairs and in Charge of Tourist and Health Resorts Publicity Government Statistician's Audit Museum and Advertising Departments Hon A Hamilton £895
Minister of Agriculture and of Mines, Hon C E Macmillan 895

HIGH COMMISSIONER IN LONDON

High Commissioner in London Sir I M Wilford, K C M G K C, New Zealand Government Offices 415 Strand W C 2 £1 575
Secretary, F J Sandford . 753

THE LEGISLATURE

Parliament consists of a General Legislative Council appointed by the Governor (prior to 1891 the appointments were for life since that date for 7 years only) at present consisting of 24 members, and a House of Representatives consisting of 80 members elected for 3 years (Life of present parliament extended to 4 years) Four of the members are Maoris elected by the natives Women are entitled to vote and to be elected Members of the House of Representatives (Women's Parliamentary Rights Act 1919) Members of the Upper House receive £255 3s *per annum*, and of the Lower House £364 10s *per annum*, in each case with travelling expenses and deductions for non attendance
Speaker of the Legislative Council Hon Sir W C J Carncross £583 4s
Speaker of the House of Representatives Hon Sir C E Statham (plus sessional allowance of £78 15s per annum and free sessional quarters) 708 15s

THE JUDICATURE

The judicial system comprises a Supreme Court and Court of Appeal also Magistrates Courts having both civil and criminal jurisdiction
Chief Justice Rt Hon Sir Michael Myers P C, K C M G £2 250
Puisne Judges Hons Sir A L Herdman J R Reed C B E A S Adams W C MacGregor H H Ostler A W Blair D S Smith R Kennedy each 2 000
Judge, Court of Arbitration Hon I V Frazer 2 000

In 1931 62 945 civil cases were tried in Magistrates Courts while summary convictions in criminal cases were 42 092 In 1931 convictions (or sentences) in Supreme Courts were 1 624 Civil cases to number of 527 were tried and 706 judgments were recorded for a total amount of £311,400

POLICE

On March 31 1932 the strength of the Police Force was 1 157 of all ranks equivalent to 1 for every 1 317 of the population Average cost of police protection per inhabitant was, in 1931 3s 5d

LOCAL GOVERNMENT

For purposes of local government the Dominion is divided into counties and ridings with incorporated boroughs, under elected county and municipal councils, town boards, electric power, and harbour boards

For cities or boroughs any adult of either sex resident in the town may register as an elector Non resident ratepayers may also exercise the franchise

For counties adult ratepayers of either sex may register as electors, and may have one, two or three votes according to the value of their property

Revenue of local bodies 1930–31	£16 864 645
Receipts not revenue, 1930–31	4 432 956
Expenditure 1930 31	22 174,524
Net indebtedness March 31, 1931	62 166,199

PASSPORTS

With certain exceptions no person over 15 years is permitted to land unless in possession of a passport issued by a competent British authority

DEFENCE

Army.

The New Zealand Defence Forces consist of the Permanent Force the Territorial Force and the Senior Cadets

Units of the N Z Permanent Forces are the Staff Corps the Permanent Staff the Artillery the Permanent Air Force, the Army Ordnance Corps the Permanent Army Service Corps, and the Army Medical Corps The compulsory territorial system (including Senior Cadets) is at present in abeyance for reasons of economy It has been replaced by a volunteer system on a reduced scale Establishment of N Z Permanent Forces 110 professional officers, establishment of N Z Permanent Staff 135 (chiefly drill instructors) Strength of (volunteer) Territorial Force on March 31, 1932, 1,020 officers 6 613 other ranks

Navy

In 1909 New Zealand presented the battle cruiser *New Zealand* to the Imperial Government The Naval Defence Act 1913 provides for the establishment of a New Zealand Naval Force by voluntary enlistment for a prescribed period (fixed at 12 years or until age 30) members on discharge to be drafted into the New Zealand Royal Naval Reserve for such period as may be prescribed for service only in time of war the ships and personnel forming the Force to pass under the control and to be at the disposal on of the Imperial Government in time of war A Naval Board controls all matters relating to the Naval Forces and is vested with the executive command of the Naval Forces By Order in Council of the 20th June 1921 it was provided that the ships and personnel shall be described respectively as forming and belonging to The New Zealand Division of the Royal Navy" Expenditure on naval defence 1931 32 £504,182 The New Zealand Division comprises the cruisers *Dunedin* and *Dunedin*, the depot ship *Philomel*, the trawler *Wakakura* and oil tanker *Nucula* Two sloops *Veronica* and *Laburnum*, are maintained by the British Government for duties in the South Pacific within the limits of the New Zealand station

Banking—At the end of 1931 there were six banks of issue doing business, two of which were New Zealand banks Total assets (average of four quarters of year) £68 557 120 liabilities £61 713,034, value of notes in circulation, £5,782 355

Post office and private savings banks had, at the close of the year 1931 32 1 091 607 depositors having £53 387 732 to their credit

EDUCATION

The State system of education is free secular and compulsory There were (December 1931) 2,524 public primary schools with 6 191 adult teachers and 223 105 scholars there are also 305 registered private primary schools, with 26 726 scholars, and, in addition 139 village schools for the Maoris with 7 523 scholars The higher education of boys and girls in the cities and large towns is carried on in 46 endowed colleges and grammar schools in 22 technical high and technical day schools In addition there are 82 secondary depts of district high schools and 2 junior high schools 49 private secondary schools and 11 secondary schools for Maoris The University of New Zealand consists of Auckland University College Victoria University College Canterbury University College and the University of Otago the four colleges having 4 869 students in 1931 and has power to confer degrees

PRODUCTION AND INDUSTRY

Agriculture and Forestry—The total area of the Dominion (excluding annexed islands) is 66 390 262 acres and apart from boroughs and holdings under 1 acre, 43 239 585 acres of this were in occupation in 1931, this acreage representing 83 816 holdings New Zealand is a pastoral rather than an agricultural country but the quantity of wheat and oats grown is sufficient for the Dominion's requirements The area under wheat in 1930 31 was 249,014 acres, giving a yield of 7 579 153 bushels An area of 87 152 acres of oats was threshed, the yield totalling 3 376 609 bushels while 223 869 acres were converted to chaff hay or ensilage Other acreages in 1930 31 were barley, 24 887 peas 10 558 rye grass 47 942 and potatoes, 28,459 An area of 504 608 acres was sown in turnips and mangolds Amongst the forest productions are the Kauri pine (found only at the northern extremity of the islands) much valued for shipbuilding and for its resin (Kauri gum) New Zealand flax is used for the manufacture of ropes and twine

Live Stock—The cattle in 1931 numbered 4,080 525, sheep 29 792 516 pigs 476 194 and horses, 295,743 Sheep in 1932 numbered 28 606,219. The pastures of the South Island produce the celebrated sheep of the Canterbury Plain

Manufactures—Statistics of factory production show (1930–31) 5 203 factories in operation, employing 80 829 hands Value of output for year, £80,745,426

Minerals—Coal-mining is one of the largest industries, the output in 1931 being 2 157 756 tons, the approximate total output to the end of 1931 being 75 999,000 tons Gold mining both alluvial and quartz is an important industry in many districts and rich iron ore, in the form of ironsand, occurs in great abundance in Taranaki, and in the form of brown hæmatite at Onakaka and Parapara, near Nelson

EXTERNAL TRADE

Year	Imports	Exports	Total
1927	£44 782 946	£48 496,354	£93,279,300
1928	44 886 266	56 188 481	101,074,747
1929	48 797 977	55 579 063	104,377,040
1930	43 025 914	44 940 692	87 966 606
1931	24 812 958	35 153,028	59,965 986

[Note Imports in 1930 and 1931 are in sterling exports values in New Zealand currency]

Principal Imports 1931 —

Fruit (Fresh and Dried)	£632 636
Tea	650 550
Sugar	552 605
Tobacco	668 846
Iron and Steel	2 028 512
Electrical Machinery and Apparatus	1 334 112

Ceylon	613 142	5,093
Germany	408 195	309 847
Belgium	269 056	146 335
Dutch East Indies	844 329	10,205

COMMUNICATIONS

Railways—In March 1932 there were 3 322 miles of Government railway lines in working order and more under construction, and 117 miles of private lines together with an excellent system of road service cars The number of passengers carried on Government lines in 1931 32 including season ticket holders was 19 155,600, and in addition 2,384 670 on railway road motor services while goods carried amounted to 5 824 811 tons Operating revenue and expenditure were £5 788,965 and £5 301,653 respectively

Shipping—During 1931 the vessels entered inwards numbered 564 (tonnage, 2 155,920), and those entered outwards 559 (tonnage, 2,155,713), exclusive of coasting vessels

Posts and Telegraphs—The annual postal circulation was (1931) 271,243,916 letters and postcards, 39 454 972 newspapers, 151,369,568 books

and packets and 3 415 554 parcels and the work is effected by 1 738 post offices There are 12 558 miles of telegraph line with 63 934 miles of wire The telephone service is highly efficient and universal in all centres Telegrams transmitted during year 14 166 403

TOWNS

CAPITAL WELLINGTON in the North Island

The estimated population of the Urban Areas, 31 April 1 1932 was as follows —Wellington 144 800 Auckland 218 400 Christchurch 128 900 Dunedin 87 400 Wanganui 27 800 Invercargill 24 350 Palmerston North 23 200 Napier 19 300 Timaru 18 650 New Plymouth 18 650 Hamilton 18 250 Hastings 16 750 Gisborne 16 400 Nelson 12 700 Masterton 8 700 Oamaru 7 600 Whangarei 7 700 Greymouth 6 250 Ashburton 5 450 Blenheim 5,300 Rotorua 5 150

THE ISLANDS OF NEW ZEALAND

The following islands form part of the Dominion proper —*North Island* and adjacent islets *South Island* and adjacent islets *Stewart Island* and adjacent islets and *Chatham Island* between 43° 30 S lat and 175° 40 177 15 W long Chatham Islands have a population of 620 half of whom are Maoris and half castes They support large flocks of sheep and some cattle

The following are included in the geographical boundaries of New Zealand as proclaimed in 1847 —*Three Kings* (discovered by Tasman on the Feast of the Epiphany) in 34 9 S lat and 172° 8 8 E long (uninhabited) *Auckland Islands* about 290 miles south of Bluff Harbour in 50° 32 S lat and 166 13 E long The islands contain several good harbours but are uninhabited *Campbell Island* (uninhabited) *Antipodes Group* (49° 41 15 S lat and 178 43 E long) uninhabited and *Bounty Islands* (47° 43 S lat 179° 0 30 E long) uninhabited

The following islands have been annexed to New Zealand —

The Kermadec Group between 29° 10 to 31° 30 S lat and 177° 45 to 179° W lon includes Sunday Macaulay Curtis Islands and L'Esperance and some islets The group is uninhabited

Cook Islands, included in the boundaries of New Zealand since June, 1901 consist of the islands of Rarotonga Aitutaki Mangaia Atiu Mauke Mitiaro Manuae and Te Au o tu) Takutea Palmerston Penrhyn (or Longareva) Manahiki Rakahanga Pukapuka (or Danger) Nine (or Savage) Suwarrow and Nassau The population at the Census of 1926 numbered 13,877 all except 313 being Natives The chief products are bananas oranges, and other tropical fruits, copra coffee and pearl shell The trade is chiefly with New Zealand and the United States of America The exports (1931) were valued at £87 136 and the imports at £80,767 Rarotonga is the chief island with a native population of 3,731, and a population other than native of 205 The government is administered locally under the direction of New Zealand The Island Council of the Cook Islands is under the direction of the Resident Commissioner at Rarotonga The five Arikis of Rarotonga are of equal rank and are all members of the Council Rarotonga is a place of call for the mail steamers between Sydney, N S W, and Wellington N Z and San Francisco U S A

Resident Commissioner Rarotonga H F Ayson C M G
Postal Controller Suva W M Bell C B E

Island Dependencies—By Imperial Order in Council of July 30 1923 the coasts of the Ross Sea with adjacent island and territories were placed under British Settlement under the control of the Governor General of New Zealand

Tokelau or Union Islands —A group of atolls (population 1 048) transferred from Gilbert and Ellis Islands Colony in 1920 and now administered on behalf of New Zealand by Administrator of Western Samoa

The Mandate Territories are —

Western Samoa consisting of the islands of Savaii Manono Apolima Upolu Fanuatapu Namua Nuutel and Nuulua (the remaining islands of the Samoan group belonging to the U S) have a total area of 1 133 square miles and a population at the Census of 1926 of 229 36 880 were Samoans 1 079 Chinese and Melanesians and 1 270 half castes and Europeans The largest islands are Savaii (703 square miles) and Upolu (430 square miles) Upolu contains the harbours of Apia and Saluafata of which the former is the capital In 1889 a very heavy sea set up by a cyclone wrecked three U S A warships and the *Iberian* and *Olga* of the German Navy, H M S *Calliope* of the British Navy effecting its escape The disaster is recalled in A Footnote to History by R L Stevenson whose home was at Vailima (near Apia) The natives of the islands are Christians of different denominations including a few adherents of the Latter Day Saints (Mormons) Cocoanuts (copra) cocoa bananas and rubber are the chief products of the islands The exports were valued in 1931 at £194 447 (copra £109 220) and the imports at £164 950

Administrator Brigadier General H E. Hart, C B C M G D S O V D

NAURU ISLAND

Nauru Island situated in longitude 166 degrees east and 26 miles south of the Equator, was proclaimed German territory on Oct 1, 1888 and was administered as part of the (German) Marshall Islands group until its surrender to the Australian Forces in 1914 The island was included in the cession of colonies made by Germany in 1919 and is now administered by the United Kingdom the Commonwealth of Australia and the Dominion of New Zealand under a mandate from the Allied and Associated Powers 1919 the first and second Administrators having been appointed by agreement by the Australian Government. The island has a population (April 1 1932) of 2,326, of whom 141 are Europeans There are valuable deposits of phosphates on the island and in 1930 the exports of phosphates were 271,255 tons (valued at £270 091) The value of the imports in 1930 was £143 416

Administrator W A Newman (*address*, Nauru Central Pacific)

The Union of South Africa.

AREA AND POPULATION.

Provinces	Area (English Sq Miles)	Census of 1921		European Population, 1931.
		European	Total

A law (No 17 of 1923) amending and consolidating the pre Union Acts in force in the four Provinces was passed and came into force as from the 1st January, 1924 Under this law registration of all European, Asiatic and Coloured (as distinct from Native) births and deaths was compulsory throughout the Union Registration of Native births and deaths is compulsory only in urban areas Only marriages solemnized under the prescribed civil laws are subject to registration

PHYSIOGRAPHY

Boundaries —The provinces of the Union extend from the southernmost point of the African Continent to the course of the Limpopo River, *i.e.*, from 34° 50′ – 22° South latitude, and include all the British territories within those limits with the exception of Basutoland and the Swaziland and Bechuanaland Protectorates, while provision is made for the future inclusion within the Union of these territories and of the territories of the British South Africa Company

Relief —The southernmost province contains many parallel ranges, which rise in steps towards the interior The south western peninsula contains the famous *Table Mountain* (3,582 feet), while the *Great Zwarte Bergen* and *Langeberg* run in parallel lines from west to east of the Cape province Between these two ranges and the *Roggeveld* and *Nieuweveld* to the north is the Great Karroo Plateau which is bounded on the east by the *Sneeuwbergen*, containing the highest summit in the province (Compassberg, 7,800 feet) In the east are ranges which join the *Drakensbergen* (11,000 feet) between Natal and the Orange Free State

The Orange Free State presents a succession of undulating grassy plains with good pasture land, its general elevation of some 3,800 feet, with occasional hills or kopjes The Transvaal is also mainly an elevated plateau with parallel ridges in the *Magalies* and *Waterberg* ranges of no great height The veld or plains of this northernmost province is divisible into the Hooge Veld of the south, the Bankeveld of the centre and the Bush Veld of the north and east, the first and second forming the grazing and agricultural region of the Transvaal and the last a mimosa-covered waste The eastern province of Natal has pastoral lowlands and rich agricultural land between the slopes of the Drakensberg and the coast, the interior rising in terraces as in the southern provinces.

Rivers —The *Orange*, with its tributary the *Vaal*, is the principal river of the south, rising in the Drakensbergen and flowing into the Atlantic between the Protectorate of South West Africa and the Cape of Good Hope The *Limpopo*, or Crocodile River, in the north, rises in the Transvaal and flows into the Indian Ocean through Portuguese East Africa Most of the remaining rivers are furious torrents after rain, with partially dry beds at other seasons

HISTORICAL SKETCH

The *Cape of Good Hope* was discovered in 1486 by Bartholomew Diaz, the commander of one of the many expeditions sent out by successive Kings of Portugal to discover an ocean route to India. Diaz merely doubled the Cape and returned home. Eleven years later, in 1497, Vasco da Gama not only doubled the Cape and landed in what is now Natal but successfully accomplished the voyage to India. The Portuguese, however, did not make any permanent settlement at the Cape, although it was used by their vessels, and subsequently also by those of England and Holland as a place of call in going to and from the East Indies. In 1652 the Netherlands East India Company took possession of the shores of Table Bay, established a fort, and occupied the adjacent lands, in order to be always ready with supplies for their passing ships. In 1814 the Cape was formally ceded to the British Crown.

Natal derives its name from the fact of its discovery on Christmas Day, 1497, by the celebrated Portuguese navigator Vasco da Gama. The first European settlement was formed (1824) by a small party of Englishmen, who came by sea and established themselves on the coast where Durban now stands. Natal was then a part of the great Zulu kingdom under Tshaka. Between 1835 and 1837 another settlement was formed by a large body of Dutch Boers who came with their waggons overland from the Cape Colony and settled in the northern districts where to this day the Boers preponderate. In the year 1843 Natal was proclaimed as British and annexed to the Cape Colony. In 1856 it was erected into a separate colony, with representative institutions, and in 1893 acquired responsible government.

The *Transvaal* was formed as the *South African Republic* by parties of Dutch Boers from the English colonies who trekked into the interior of the continent and wrested the land across the Vaal river from the native chiefs. The discovery of the goldfields within its borders led to the settlement of large numbers of foreigners and eventually to hostilities with the British Government. A war of nearly three years duration was fought with great tenacity and its close was marked by the inclusion of the South African Republic within the British Empire; 'responsible government' being granted almost immediately.

The *Orange Free State* was founded in much the same way as the Transvaal by Boer emigrants from Cape Colony, and its independence was granted in 1854. Its subsequent history is identical with that of the Transvaal.

Delville Wood.—The title deeds of Delville Wood containing the graves of South African troops who fell there during the battles on the Western Front in France in the Great War, are held by the Government of the Union of South Africa, and Delville Wood is part of South Africa.

GOVERNMENT

The Union of South Africa is constituted under the South Africa Act 1909 (9 Edw. VII., cap. 9), passed by the Parliament of the United Kingdom on September 20, 1909. In terms of that Act the self-governing Colonies of the Cape of Good Hope, Natal, the Transvaal and the Orange River Colony became united on May 31, 1910, in a legislative Union under one Government under the name of the Union of South Africa, those Colonies becoming original Provinces of the Union under the names of the Cape of Good Hope, Natal, the Transvaal and the Orange Free State respectively.

The Union Government is seised of all State property, and the Railways, Ports, Harbours and Customs are administered by Union Commissioners for the benefit of a Consolidated Revenue Fund. The former debts of the Provinces are administered by and form a first charge upon the funds of the Union. Provision is made in the Act of 1909 for the admission to the Union of Rhodesia and for the transfer to the Union Government of the administration of protected and other native territories. The Union was inaugurated by H.R.H. the Duke of Connaught, K.G., in 1910.

The Government publishes annually an 'Official Year Book of the Union of South Africa,' giving full statistics and descriptive information on all matters of public concern.

The seat of the Government is Pretoria; the seat of the Legislature is Cape Town.

The Executive is vested in a Governor-General appointed by the Sovereign, and aided by an Executive Council with a Legislature of two Houses.

THE LEGISLATURE

The *Senate* consists of 40 members For ten years after the establishment of Union eight were nominated by the Governor General in Council and 32 were elected eight for each Province The first election was made prior to the establishment of the Union by the two Houses of each of the Colonial Legislatures sitting as one body, and a vacancy was filled by the choice of the Provincial Council in respect of whose Province a vacancy occurred Since 1921 the Provincial element has been elected, according to the system of proportional representation with the single transferable vote by the Members of the House of Assembly and of the Provincial Council for each Province sitting together and presided over by the Administrator of such Province Vacancies amongst elected Senators are filled in the same manner, but only for the period which the Senator in whose place the new Senator is elected would have held his seat Originally under Section 24 of the South Africa Act nominated Senators held their seats for a period of ten years, but this provision was amended by Act No 54 of 1926 and nominated Senators are now required to vacate their seats on the dissolution of the Senate or upon a change of Government Of the eight nominated Senators, four are selected on the ground of their thorough acquaintance, by reason of their official experience or otherwise with the reasonable wants and wishes of the coloured races

The *House of Assembly* consists of 148 elected members 58 of whom represent the Cape of Good Hope, 17 Natal 55 Transvaal and 18 the Orange Free State. Members of both Houses must be British subjects of European descent

The Fifth Delimitation Commission appointed in July 1927 divided the country into the following constituencies Cape of Good Hope 58 Natal 17 Transvaal 55 Orange Free State 18 and the present Government was elected on that basis The *Sixth* Delimination Commission is now functioning and according to the results of the Census of 1931—Europeans only—will delimit the country according to the following constituencies Cape of Good Hope 61 Natal 16 Transvaal 57 Orange Free State 16 a total of 150 The total number of seats contemplated by the South Africa Act §§ 32–33 is thus reached and the members assigned to each province will henceforth be based on a Union quota of European on all adults The female franchise which was introduced under the provisions of Act No 18 of 1930 is not utilised in the determination of the quota

President of the Senate Sen the Hon C A van Niekerk £1 200
Speaker of the House of Assembly Hon J H H De Waal 2 000

LOCAL GOVERNMENT

A Provincial Council in each Province has power to legislate by ordinance on certain subjects specified in the Act and on such other subjects as may be delegated to it All ordinances passed by a Provincial Council are subjected to the veto of the Governor General in Council Members of the Provincial Council are elected on the same system as Members of Parliament, but the restriction as to European descent does not apply Provincial administration is in the case of each Province vested in an Administrator with an Executive Committee of four members The Provincial Council in each case consists of the same number of elected members as there are electoral divisions of such Province for the House of Assembly unless that number is less than 25 (as in the cases of Natal and the Orange Free State) when the number is 25. Each Council exists for a period of three years Direct taxation is permitted for Provincial purposes and legislation is authorised on certain specified subjects

DEFENCE.

The South Africa Defence Act, 1912, became law on June 14, 1912. This Act, as amended by the South Africa Defence Act Amendment Act of 1922, provides for the establishment of Defence Forces comprising:—

(1) *The South Africa Permanent Force*; (2) *The Coast Garrison Force*; (3) *The Citizen Force*; (4) *The South African Division of the Royal Naval Volunteer Reserve*; and (5) *Special Reserves.*

Every citizen between the ages of 17 and 60 is liable to render personal service in time of war, and those between 17 and 25 are liable to undergo a prescribed peace training with the Active Citizen Force spread over a period of four consecutive years. The Act states, however, that only 50 per cent. of the total number liable to peace training shall actually undergo that training unless Parliament makes financial provision for the training of a greater number.

The establishment of Rifle Associations, under the Citizen Force Reserve, is a marked feature of the Act; citizens between the ages of 21 and 25 who are not entered for peace training with the Active Citizen Force are to be compelled to undergo training during these four years in a Rifle Association, thus ensuring that, in course of time, all citizens will at least know how to handle and use a rifle.

Provision is made in the Act for the cadet training of boys between 13 and 17 in urban and other populous areas, where facilities can conveniently be arranged.

The Union is divided into 6 military districts. To each military district has been allotted various units of different arms, to which the citizens entered for peace training in their 20th and 21st years are posted.

EDUCATION.

In the South Africa Act, Section 85 (iii.), it is provided that "Education, other than higher education, for a period of five years and thereafter, until Parliament otherwise provides, shall be and remain under the jurisdiction of the respective Provincial Councils."

Under Act No. 5 of 1922, a definition is given of the term "higher education." Section 11 of that Act, as amended by Section 14 of Act No. 46 of 1925, reads as follows:—The expression "higher education" as used in Section 85 of the South Africa Act, 1909, shall include *inter alia*: (*a*) Education provided by universities and university colleges incorporated by law; (*b*) education provided by the South African Native College; (*c*) education provided by such technical institutions (including schools of art, music, commerce, technology, agriculture, mining and domestic science) as the Minister of Education may declare to be places of higher education; (*d*) such part of the education provided by other technical institutions as the Minister of Education may, after consultation with the provincial administration concerned, declare to be higher education; (*e*) any other education which, with the consent of the provincial administration concerned, the Minister of Education may declare to be higher education.

In terms of clauses (*c*), (*d*) and (*e*) above, the Provinces have been relieved of all vocational education (technical, industrial and agricultural), and the Department of Education under the Minister is therefore now concerned with—

I. Universities and university colleges comprising the following:—

1. *University of South Africa*, with the following constituent colleges—
   - Potchefstroom University College, Potchefstroom.
   - Grey University College, Bloemfontein.
   - Rhodes University College, Grahamstown.
   - Huguenot University College, Wellington, C.P.
   - Natal University College, Pietermaritzburg.
2. *University of Capetown.*
3. *University of Stellenbosch.*
4. *University of the Witwatersrand.*
5. *University of Pretoria.*

II. Technical colleges which have been established under Act No. 30 of 1923 at Capetown, Durban, Johannesburg, Port Elizabeth, East London, Pretoria, Pietermaritzburg, and Bloemfontein.

III. Industrial, trade and agricultural schools (State and State-aided) at various centres throughout the Union.

The number of students at universities and university colleges for the year 1931 was 7,049. The State expenditure on higher education as above defined during the financial year 1931–32 was £794,465.

Primary Education and Education other than Higher Education.—The central direction of

public education (other than higher education) is exercised by the Provincial Education Department in each of the four Provinces of the Union Each Department is controlled by a Director o Superintendent of Education In the Cape Province practically all the schools are State aided In Natal they are partly State schools and partly State aided In the Transvaal and Orange Free State they are in the main State schools In all Provinces primary education is free

Number of State and State aided Schools in the Union in 1931 —For European scholars 4,887, for Non-European scholars, 4,044, total 8 931

Number of Scholars and Teachers on Nov 3 1931 —European scholars 358,021, Non European scholars 399 360, total, 757 381 Teachers —In European Schools, 15,724, in Non European Schools, 10,132

State Expenditure on Education in 1931 — Cape, £3 464,876 Natal, £759,653, Transvaal £2,795 690 Orange Free State, £911,926 total, £7 932 145

Private Schools in 1930 —European, 264, Non European, 474, total, 738

Number of Scholars —European, 20,652, Non European 20 800, total 41 452

Number of Teachers —European, 1,194, Non European 598 total, 1,792

In all Provinces Normal Colleges and other institutions for the training of teachers are maintained by the Education Departments

Superintendent General of Education, Cape Prof M C Bothia, M A

Supt of Education Natal F D Hugo B A

Director of Education, Transvaal S P E Bashoff, M A, D Litt

Director of Education, Orange Free State S H Pellissier, B A

UNION FINANCE

The ordinary Revenue and Expenditure of the Union (exclusive of subsidies to Provincial Administrations and interest on Railway capital) for the five years ended March 31, 1931, are stated as under —

Year	Revenue	Expenditure
	£	£
1926–1927	28 577,003	21,850 419
1927–1928	30 094 024	22 840 768
1928 1929	30 501 650	23,180 076
1929–1930	30 486 458	24,414,770
1930 1931	28 563 005	24 249 060

DEBT

The Funded Debt of the Union at March 31 1931, was £243,539,687 and the Floating Debt £13 305 413

PROVINCIAL FINANCE

Since their establishment in 1910 the powers and functions of the Provinces have undergone various alterations, and their powers of taxation have been limited from time to time An Act (No 46, 1925) to amend the laws regulating the financial relations between the Union and the several Provinces thereof was passed in the 1925 Session of Parliament and as from April 1, 1925, the sources of revenue available to the Provinces are —

(1) A subsidy from the Union Government based upon the average attendance of pupils receiving education within the Province, and the extent of other educational functions carried on by the Province

(2) Certain scheduled and limited taxes.

(3) Certain taxes collected by the Union and assigned to the Provinces without power to legislate in regard thereto

(4) Special grants of £75 000 each to the two smaller Provinces of Natal and the Orange Free State

The requirements of the Provinces in regard to capital expenditure are supplied by the Union Government by way of loans Special loans repayable in 10 years have been made by the Central Government to finance the deficits on the Provincial Revenue Funds at March 31 1924

The ordinary Revenue and Expenditure for six years ended March 31, 1931, were as follows —

Financial Year	Revenue raised or assigned	Subsidies	Total Ordinary Revenue	Total Ordinary Expenditure
	£	£	£	£
1925–26	4 349,768	5 300 776	9 650,544	9 499 183

Manufactures.—The development of local industries has been most marked during the last three years, the scarcity of overseas supplies with the consequent increase in prices having served as a very effective measure of protection under which enterprise has flourished to a degree previously unknown. New industries have sprung up in the principal centres of trade and existing industries have largely extended their operations. From the recently published returns of manufactures in the Union the total output during the year 1917 18 was £60 123 111 sterling, 1918 19 £70 934 098, 1919 20, £92 913 844 1920 21, £98,307 910, 1921 22, £79 446 299, 1922 23, £74 496,292, 1923 24, £79 789 348 1924 25, £84,159,604, 1925 26 £91 536 926 1926 27, £97,878,822, 1927 28, £106 981 697 1928 29, £113,440 757, and 1929 30 £112,178 613. Amongst the new industries which have been established during the period of the War may be mentioned the following:—Wattle extract, industrial alcohol (motor fuel) from molasses, calcium carbide, sulphate of ammonia, bottle making, starch from maize iron smelting (still in the initial stage), arsenic production detinning of scrap tin, copper manufacture, &c.

Mines and Minerals.—Gold mining still continues the chief source of the country's mineral wealth. At the outbreak of war the diamond mines closed down. The value of the output of the principal minerals of the Union in 1931 was:—

			£
Gold	46 205 858		69 760
Diamonds	4 187,523		246,583
Coal	3 032 800	Osmiridium	63 174
Copper	387 505	Corundum	10 357
Tin	47 752	Platinum	217 807

The mineral production for the Union of South Africa was as follows:—

Gold

1921*	8 128 710 fine oz.	£43 082 162
1922*	7 009 858	32 343 485
1923*	9 149 073 "	41 574,945
1924*	9 575 040 "	44 739 377
1925	9 597,592	40 767 981
1926	9 954 762	42 285,139
1927	10 122 491	42 997 608
1928	10 254 264	43 982,119
1929	10 412 326	44 228 748
1930	10 716 351	45 520,166
1931	10 877 777	46,205 858

The labour employed in the gold industry in December, 1931, Transvaal was 23 827 Europeans and 222 526 coloured.

Diamond

1922	669 559 metric carats	£2 266 631
1923	2,053,095	6 038 207
1924	2 440,398	8 033 406
1925	2 430 128	8 198 128

1929	3 661 212	10 590 113
1930	3 163 591	8,340 719
1931	2 119 156	4 182 523

The average labour employed in diamond mining including individual diamond digging was in 1931 Transvaal 4 600 Europeans 26 633 coloured Cape 2 951 Europeans 9 288 coloured O F S 476 Europeans 2 454 coloured a total of 8 027 Europeans and 38 375 coloured. The value of diamonds owned throughout the world was stated to be £600 000,000 in 1918, one half being owned by residents in U S A.

Coal

(Tons of 2 000 lb)

	1931	
Transvaal	7 004 448 tons	£1,717 853
Cape	4 601 "	3 008
O F S	1 129 880	327 961
Natal	3 500 319 "	993 978
Totals	11,639 248 "	£3 032 800

The average labour employed in coal mining in 1931 was Natal 516 Europeans 11 722 coloured Transvaal 781 Europeans 11 845 coloured, Cape 81 Europeans 93 coloured O F S 145 Europeans 2 467 coloured a total of 1,450 Europeans and 26 127 coloured.

Silver

There are no silver mines in the Union. The output valued at £69 760 in 1931 represents silver contained in gold bullion and base metal ores.

Copper

(Tons of 2 000 lb)

In 1931, 11,271 tons of concentrates were produced in the Transvaal and 2,594 tons in the Cape Province. The total shipments of copper during the year amounted to 16,396 tons, valued at £387,505.

* Premium included—1920 1921 1922 1923:—£10 950 842 £8 553 598 £2 567 501 £2 712 151 and £4 067 191 respectively.

Tin

(Tons of 2 000 lb.)

The Union figures for 1931 are 681 tons valued at £47 752

Other Minerals

The value of the total mineral production of the Union in 1931 was £54 894 888 The value of miscellaneous products quarry products £82 935 lead £518, magnesite £2 598, graphite £1 360

EXTERNAL TRADE

The total value of the Imports and Exports in the five years 1927 1931 (exclusive of silver and copper specie) was as follows Note amended figures (exports) include Gold Specie —

COMMUNICATIONS

Railways —The first railway in South Africa was commenced in April 1859 the first sod being turned by the then Governor of the Cape of Good Hope Sir George Grey This was very shortly followed by Natal which started the construction of a line running from Durban Another two lines finally linked up at Heidelberg in 1895 The Cape line was opened for public traffic to Stellenbosch in 1862 and to Wellington in 1863, while a track to Wynberg was opened to traffic in 1864 Little progress was, however, made in succeeding years and it became evident that the development of the country could not be left to private enterprise The existing Cape lines were therefore purchased by the Government on Jan 1 1873 and in 1876 Natal followed by acquiring the railways in that colony Increased working at once took place, and the construction of four lines was pushed inland from Cape Town, Durban Port Elizabeth, and East London Bloemfontein was reached in 1890 and two years later a line to Germiston linked up with the system already established in the Transvaal

The total open mileage of Government owned lines at the end of March, 1931 was 13 048 miles (comprising Cape 5 177 Orange Free State 1 633, Transvaal 3,281, Natal 1 495, and South-West Africa 1,462), of which 12,152 miles are 3 ft. 6 in gauge and 896 miles 2 ft gauge

The capital expenditure on Government railways up to March 31, 1932, amounted to £147 885 1·5 The gross earnings for the year ending March 31, 1932, were £22,039,659 and the net deficit, after payment of interest, £1 212 386 Working expenditure (excluding depreciation) amounted to £15 627 753, or 70 90 per cent of the gross revenue, as compared with £17 420 435, or 71 63 per cent of the gross revenue for the previous year The *Cape to Cairo Railway*, projected by Cecil Rhodes had advanced to Buluwayo by 1902 1 362 miles from Cape Town and 3 600 miles from Cairo through communication by rail is now available from Cape Town to Port Francqui in the lower Congo 3 300 miles, all 3 6' gauge The *Trans Zambesi Railway*, from Dondo (on the Beira Mashonaland line) to the Zambesi was opened July 1 1922 thus placing the Union in direct communication with Nyasaland

Posts and Telegraphs—On March 31 1932 there were 3 162 post and 2 942 telegraph offices open in the Union During the year 1931 32 330 353,000 articles of mail matter including 3 254,000 registered articles addressed to places within and without the Union were handled An Air Mail service in conjunction with incoming and outgoing European mails operates between Capetown and Port Elizabeth with branches to Durban and Johannesburg (Rand Airport) A direct Air Mail service once weekly—operates between South Africa (Capetown) and England (Croydon) via Rhodesia Tanganyika, Kenya Sudan Egypt Greece and France The number of money orders issued was 644 905 valued at £3 146,690, while 528 406 orders value £2 216 918 were paid 4 083 150 postal orders were issued and 3 728,212 postal orders paid The number of depositors in the Savings Bank was 461 342, with £6,760,508 standing to their credit 4,961 465 inland telegrams (including press messages) were received and despatched during the year 36 652 miles of telegraph wire were in use There are 5 wireless telegraph stations in the Union, which during the year received from and transmitted to ships 14 466 messages in respect of which £5 236 accrued to the revenue of the Department The telephone system consists of 438,646 miles of wire with 104 122 telephone instruments in the service of 77,729 subscribers, by whom approximately 171½ million (inclusive of 10½ million trunk) calls were made through departmental telephone exchanges The combined cash revenue from Posts, Telegraphs and Telephones was £4,359 991, comprising Postal £2,331,076, Telegraphs £469,277, and Telephones £1,559 638 The combined cash expenditure totalled £3 089 141

Shipping—In 1931, 4,755 vessels (15,009 288 tons) entered, and 4 756 vessels (15 007 585 tons) cleared at the ports of the Union of South Africa

Railways and Harbours Board.

Chairman, Hon C W Malan, M P, Minister of Railways and Harbours

Members, A Kuit, R B Waterston, and D Hugo

Secretary, W Heckroodt.

The railways, ports, and harbours of the Union are administered and worked under the control and authority of the Governor General in Council, exercised through a Minister of State, who is advised by a Board consisting of three Commissioners

The management and working of the railways and harbours are subject to the control of the Minister of Railways and Harbours, carried on by the General Manager, who is governed by such regulations as the Minister may from time to time frame after consultation with the Board

South West Africa
(*Suidwes Afrika*)

Administered under Mandate as an integral part of the Union of South Africa

Administrator Albertus Johannes Werth

Secretary H P Smit

South West Africa lies between S lat 17° 23 and the Orange River with a narrow strip between 18°–18° 30 S lat extending from 21° to 25° E long known as the Caprivi Zipfel, and gives access to the Zambesi The estimated area of the country is 322 393 square miles and the population (1932) is approximately 275,900, of whom approximately 32 000 are Europeans The estimated native population (1932) is distributed as follows Territory proper, 100,600, *Ovamboland* 117 000 *Kaokofeld* 4,300, *Okavango*, 14 000 *Caprivi Zipfel* (eastern portion only) 8 000 Running more or less parallel to the coast, and roughly at a distance of 60 to 100 miles from it is a broken range of mountains, from which there is a gradual slope to the sea The country between these mountains and the coast is barren desert except towards the North, and is known as the Namib Towards the East from these mountains the land slopes east ward and forms the western edge of the great Kalahari Plateau The boundaries are the Okavango and Kunene Rivers in the north, and the Orange River, in the south all perennial streams of considerable volume On the Orange are the *Augrabies Falls*, twice the height of Niagara

The native races are—In the South Hottentots In the centre Hereros and Bergdamaras, with the exception of the Rehoboth district which is occupied by a mixed race known as the Bastards and in the North Ovambos To the North and East there are many small bushmen tribes some pure bushmen but the remainder a mixture of aboriginal native tribes and bushmen The Kaokoveld (the North Western area) is very scantily inhabited by Hottentots and Ovatjimbas the only Europeans are those allowed in under permit for the purpose of prospecting for minerals It is very mountainous, and in many places well supplied with water

The Administration of the country is exercised by the Governor General, who has, however, delegated most of his powers to an Administrator appointed by the Union Government The territory is divided into 17 Districts ruled over by Magistrates as the representatives of the Government The territory of Walvis Bay which is actually part of the Cape Province of the Union, is administered so far as possible as a portion of South West Africa and its magnificent harbour will undoubtedly in the future prove of great benefit The constitution granted under Union Act No 42 of 1925 provides for a Legislative Assembly consisting of 12 elected and 6 nominated members, an Executive Committee of 4 members elected by the Assembly with the Administrator as Chairman The powers of legislation granted exclude the following matters which are permanently reserved to the Union Government:—

(*a*) Native affairs or any matters specially

affecting natives, including the imposition of taxation upon the persons, land, habitations o earnings of natives

(*b*) Mines, minerals, mineral oils and precious stones, or the moneys derivable therefrom or payable to the administration in respect of licences for prospecting or winning the same or as share of the produce thereof or any taxation in connection therewith,

(*c*) The acquisition, construction, management, regulation, control and working of railways and harbours in the territory, and the organization, discipline and conditions of employment of and the payment of pensions, retiring allowances and financial benefits to persons in the employment of the railways and harbours administration,

(*d*) The organization of and discipline and conditions of employment of persons in the public service who are serving in the territory, and the payment of pensions, retiring allowances and financial benefits to such persons,

(*e*) The constitution and jurisdiction of courts of justice whether superior or inferior and the practice or procedure to be observed therein,

(*f*) The administration, management and working of the postal, telegraph and telephone services,

(*g*) The establishment or control of any military organization in the territory,

(*h*) The movements or operations of any unit of the South African Defence Forces within the territory

(*i*) The entry of immigrants into the territory or of other persons

(*j*) Tariffs of customs and excise duties and the control and management of customs and excise

(*k*) Currency and banking and the control of banking institutions

The following matters are reserved for a period of three years,* after which period the Assembly may by resolution assume control thereof —

(*a*) The establishment or control of any police force in the territory,

(*b*) Civil aviation,

(*c*) Primary or secondary education in schools supported or aided from the revenues of the territory,

(*d*) The establishment, management or control of any land or agricultural bank in the territory

(*e*) The allotment sale, lease or disposal of Government lands in the territory

In regard to finance, the Assembly may not initiate any ordinance imposing taxation unless recommended to it by the Administrator

The railway system in South West Africa, now controlled and worked by the South African Railways and Harbours Administration, and connected with Union Lines (De Aar to Nakop Protectorate border 343 miles), comprises Union Lines 398 miles, S W Territory Lines 1 462 miles and privately owned lines 74 miles, a total of 1,934 miles

The Capital of the Protectorate is Windhoek, which lies practically in the centre of the country at 5 500 ft above sea level (Urban white population, 1926, 3 809) Other inland towns are Keetmanshoop (Urban white population, 1926, 1 159) Aroab, Bethanie, Gibeon Gobabis, Grootfontein, Karibib Okahandja, Omaruru, Otjiwarongo, Outjo, Rehoboth Warmbad and Maltahoehe The ports are Walvis Bay (Urban white population 1926 662) and Luderitz Bay (Urban white population, 1926 1,234)

* The period of 3 years has expired but a resolution for the extension of powers has not yet (October 1932 been passed by two thirds majority of the members of the Assembly as required by the Constitution Act

Provinces of the Union of South Africa

CAPE OF GOOD HOPE

The Province of the Cape of Good Hope reaches in S lat from 26 to 34° 50′ and in long from 16° 25 to 30 The extent of the country is, N E to S W 750 miles, and from N W to S E 800 miles, with a coast line of nearly 1 300 miles

Capital, CAPE TOWN Total population (1931) European (with suburbs), 150 914

Cape Town is 5,979 miles from Southampton transit, 16 days

NATAL

The Province of Natal comprises an area of 35 284 square miles (including Zululand 10 427 square miles) with a seaboard of 360 miles In 1931 the European population was 177,449 (males 90,253, females 87,196)

In 1900 the European births registered numbered 3 041 deaths 1 658 and marriages 1,454 The race question in Natal is complicated by the presence of large numbers of Indian subjects of the Crown brought over during the latter half of the nineteenth century to supply the deficiency of local labour

Education —There is a University College at Pietermaritzburg which is affiliated to the University of South Africa It has a constituent college at Durban with faculties of engineering fine arts, and commerce There are in the Province (1931) 444 primary schools and 28 beyond primary schools for European children also 2 technical colleges, 1 physical culture school, 3 night continuation classes, and 1 training school for European teachers In addition there are 83 Asiatic schools 683 native schools, 23 other coloured schools, and 10 training colleges for native and Asiatic teachers These are maintained or aided by Government There is also a large number of private schools

Administration —The Provincial government is administered by an Administrator aided by a Provincial Council of 25 members (elected for 3 years) There is an Executive Committee of 4 members

Administrator, Hon H Gordon Watson I S O
Executive Committee, F C Hollander Capt G M Botha, J Macaulay I N Wadley
Provincial Secretary, A E Charter, O B E.

PIETERMARITZBURG the capital and seat of the Provincial Government, is situated about 54 miles inland from Port Natal Total population (European and coloured) 36 023 in 1921 The 1931 Census figures for the European population of Pietermaritzburg are 21,581

In Durban (population, 1921, 153 855 1926, 72 928 for 1931 European population of Durban was 86 228) or Port Natal, is the only harbour of any importance on the south east coast The entrance is now safe and navigable for any vessel at any time the average low water depth at the entrance, L W O S I, the bar being no longer existent for 1927 being 37 feet

Natal, 6 800 miles transit, 20 days.

ZULULAND

Zululand annexed in 1897 comprises about two thirds of the country formerly under Zulu kings and is bounded on the south and south west by the Tugela River on the south east by the Indian Ocean, on the north by the Portuguese possessions and on the west by the new territory (formerly Utrecht and Vryheid districts of the Transvaal) and Swaziland The *Amaputaland Protectorate*, created by proclamation of Nov 22, 1897, was annexed to Zululand on Dec 27, 1897, and now forms part of the Province The *Northern District* territory (consisting of the Magisterial Divisions of Vryheid, Utrecht, Paulpietersburg and Babanango) was annexed to Natal on January 27, 1903

THE TRANSVAAL

In 1931 the European population numbered 696 120 (males 357 504 females 338 616)

The Province of the Transvaal has a total area of 110 450 square miles, about 20,000 square miles lying within the tropics The Census of 1921 showed a population of 2 087,636, of whom 1 159 430 were males and 928 206 females In 1930 there were 19 108 European births, 6 667 European deaths, and 6,912 European marriages

Religion —The religious statistics for 1921 are —

Churches	Europeans	Others
Dutch Churches	287 630	49,578
Anglican	98 849	94,543
Presbyterian	31,715	12,407

BERMUDA

The Bermudas or Somers Islands are a cluster of about 100 small islands (15 or 16 only of which are inhabited the rest being mere rocks) situated in the west of the Atlantic Ocean in 32° 15 N lat and 64° 51 W long comprising an area of about 19 square miles with a population (1931) of 27 789 (11 353 white and 16 436 coloured) These islands derive their name from Bermudez a Spaniard who sighted them in 1527 But they were first colonised by Admiral Sir George Somers who was shipwrecked here in 1609 on his way to Virginia The nearest point of the mainland is Cape Hatteras in North Carolina 580 miles distant

The Government is administered by a Governor who is also Commander in Chief of the military forces He is advised by an Executive Council of 7 members appointed by the Crown There is also a Legislative Council composed of 9 members appointed by the Crown and a representative House of Assembly consisting of 36 members

The climate is mild and healthy There are no streams or ordinary wells and the inhabitants are normally dependent on the rainfall stored and preserved in tanks but a new system of horizontal wells has recently been successfully installed Vegetation is prolific the principal trees being the Bermuda cedar (juniper) formerly of great importance for shipbuilding The islands produce large quantities of onions potatoes and green vegetables which are largely exported together with cut flowers and lily bulbs to Canada Arrowroot and bananas are also grown but meat flour and other articles of consumption are imported from the U S and Canada Fish are plentiful round the coasts The islands are much frequented as a health resort by Americans and Canadians

BORNEO

Borneo is a large island in the Eastern Archipelago extending from lat 7° 4 N to 4° 10 S and from long 108 50 to 119° 20 E It is about 850 miles in length and 600 in breadth and contains an area of 284 000 square miles divided by the equinoctial line into two nearly equal portions The population is probably about 1,846 000, consisting chiefly of Dyaks Malays Kyans, Papuas or Negritos Chinese Bajaus Dusuns, Muruts and Lluers (the aboriginal Celebes) The island was discovered by the Portuguese in 1521 and at the present time rather more than two thirds of the island is included within Netherlands India The remainder of the island is under British protection

BRITISH NORTH BORNEO

The territory of British North Borneo occupies the northern part of the island with a total area of about 31 000 square miles and a coast line of about 900 miles The population (1931) is 270,223 consisting mainly of Muhammadan settlers on the coast aboriginal tribes inland and a large number of Chinese traders artisans and agricultural labourers The interior is mountainous (Mount Kinabalu 13 455 feet) and is densely timbered

The two chief towns are Sandakan on the east coast and Jesselton on the west coast All legislation is passed by the Legislative Council which consists of 9 official and 5 unofficial members who have the local title of Honourable The appointment of the Governor is subject to the approval of the Secretary of State for administrative purposes the whole State is divided into 4 Residencies The laws are based on the Indian codes of criminal and civil procedure, amended and adapted by local ordinances There is an Imam's Court for Muhammadan law

The chief products are timber tobacco rubber, coal copra, cutch birds nests salt fish damar, sago, coco nuts rattans and all varieties of jungle and sea produce The country is suitable for the cultivation of sugar, tapioca coco nuts, kapok, ground nuts rubber pepper and gambier on a large scale Gold has been found

A railway runs from Jesselton, the chief port on the west coast, and down the coast to Beaufort, the centre of the rubber industry, where it turns inland to Melalap, in the interior, there is a branch from Beaufort to Weston (20 miles). There are five wireless stations There is a State bank at Sandakan with a branch at Jesselton

There is an Armed Constabulary numbering 508 all ranks composed of Indians and Natives under European officers armed with S M L E rifles and Lewis guns There is a Church of England and a Roman Catholic mission and churches at Sandakan Kudat, and Jesselton

High Commissioner The Governor of the Straits Settlements
British Resident, Brunei, T F Carey, M C S

Brunei is 5 hours by steamer from Labuan, and is distant 758 miles from Singapore (transit 4 days) There are wireless stations at Brunei, Labuan Tembulong, and Belait

BRITISH GUIANA,

which includes the Counties of Demerara, Essequebo, and Berbice, is situated on the north-east coast of South America and has a total area of 89 480 square miles with a seaboard of more than 300 miles The population, Dec 31, 1931, was estimated at 313 619, of whom 131,919 were East Indian immigrants The birth rate was 31 4 and the death rate 21 8 per 1,000 of the population The colony is bounded on the south by Brazil on the east by Dutch Guiana on the west by Venezuela, and on the north and N E by the Atlantic Ocean The climate although hot is pleasant and healthy The cultivated portion of the country, amounting to about 180 366 acres (of which 61,097 acres are in sugar cane and 73 647 in rice), is confined to the sea coast and to a short distance from the rivers The coastland is very like the Netherlands being below the level of the sea and intersected with canals constructed by its former Dutch owners At the junction of the boundaries of British Guiana and Venezuela is Mt Roraima, a flat topped mountain 8 740 feet above sea level, and on the Potaro River (a tributary of the Essequebo) are the *Kaieteur Falls* with a clear drop of 741 feet and a total fall of 822 feet The seasons are divided into dry and wet the two dry seasons lasting from the middle of February to the end of April and from the middle of August to the end of November The meteorological records taken on the coast lands during a period of 85 years show, as regards temperature, that the climate is a very equable one The mean temperature is 80 4°, the recorded extremes during this long period ranging between 68° and 96°, but these extreme temperatures are very rarely recorded, the usual extremes during a year being 70° and 89° In the interior the mean temperature is higher—82 6°, its extremes ranging from 66° to 103° The yearly rainfall is, on the contrary, subject to marked variation, its mean on the coast lands being 91 00 inches distributed over 192 days of the year, and its range from 52 7 to 135 2 inches per year In the interior the average recorded rainfall is 58 5 inches per year, ranging from 45 2 to 80 4 inches per year. The chief product is sugar, which forms 57 per cent of the export trade The leading exports are sugar (£1,109 532 in 1931) rum, diamonds, gold, timber, balata, bauxite, rice and copra. There are about 9,000 aboriginal Indians; they

are occupied largely in fishing, hunting, and raising crops of cassava

The British Guiana Order in Council, 1928 providing for the Government of the Colony and for the Constitution of a Legislative Council in place of the Court of Policy and Combined Court which have been determined came into operation on July 18 1928 The Legislative Council consists of the Governor as President of 10 Official Members and of 19 Unofficial Members Executive and administrative functions are exercised by the Governor and an Executive Council There are 3 941 miles of post office telephone wire 1,430 of which are contained in 13 miles of aerial cable in addition there are 21¼ miles of submarine cable and 384 of telegraph lines with 73 post offices and postal agencies There are 95 miles of railway

BRITISH HONDURAS

British Honduras in Central America lies within 18 29′ 5 to 15° 53 55 N latitude and 89° 9′ 22″ to 88° 10 W longitude Its extreme length and breadth are approximately 174 m and 68 m respectively, it is bounded on the north and north west by Yucatan (Mexico), on the west and south by Guatemala, and on the east by the Caribbean Sea The total area is about 8 598 sq miles with a population (Census 1931) of 51 347—25 524 males and 25 283 females The climate generally is damp and hot but not unhealthy The temperature ranges from 50 to 98° The average lies between 75° and 80° but this is considerably tempered by the prevailing sea breezes In September 1931 a disastrous hurricane devastated the capital of the colony with a loss of nearly 1 000 lives, a Mansion House Fund being raised for the sufferers The country consists chiefly of primeval forest with savannahs and so called "pine ridges which are open sandy plains covered with a wiry grass and dotted with pine trees affording fair runs for cattle The ground is level and swampy along the coast line and generally flat for about ten or twenty miles inland, after which hills from 500 ft to 4 000 ft high succeed each other to the western boundary

The staple products are the natural woods of the colony principally mahogany and logwood Sugar rubber and cacao grow readily Fruit including bananas plantains cocoa nuts pineapples, mangoes and mangoes also grow well while in land there are extensive regions of good pasturage About 60 000 acres are under cultivation The best description of cacao trees grow wild in the bush There are 85 primary schools in the colony and 4 schools with secondary departments in Belize The shipping entered and cleared at the port of Belize in 1930 was 625 960 tons there is a radio telegraph station at Belize

British Honduras is governed as a Crown colony There is an Executive Council of 3 officials and 4 appointed members and a Legislative Council of 6 official and 7 appointed members The Governor is President of both Councils

THE WINDWARD ISLANDS

The Government of the Windward Islands is made up of the three colonies of Grenada (the seat of government), St Vincent and St Lucia, with their dependencies, the Grenadines being divided between Grenada and St Vincent The total

area is 508 square miles, with a population (1921) of 162,254. There is one Governor for the three Islands; but there is no General Legislative Council as in the Leeward Islands, and no common tariff or treasury. Each island retains its own institutions, and in the Governor's absence is governed by an Administrator subordinate to him.

Governor and Commander-in-Chief, Sir Thomas Alexander Vans Best, K.C.M.G., K.B.E. (1930) £3,000

Transit to Grenada from London about 14 days.

GRENADA AND THE GRENADINES.

Grenada is situated between the parallels of 12° 30′–12° 58′ N. lat. and 61° 20′–61° 35′ W long., and is about 21 miles in length and 12 miles in breadth; it is about 96 miles north of Trinidad, 68 miles S.S.W. of St. Vincent, and 100 miles S.W. of Barbados. Area, about 85,120 acres; population (including some of the Grenadines), 66,302 (Census of 1921). The country is mountainous and very picturesque, and the climate is healthy. Grenada was discovered by Columbus in 1498, and named Conception. It was originally colonised by the French, and was definitely ceded to Great Britain by the Treaty of Versailles in 1783.

The soil is very fertile, and cocoa, spices, rubber, cotton, coffee and fruit are grown. The forests are rich in timbers. The imports chiefly comprise dry goods, bread-stuffs, hardware, &c. The Legislative Council consists of 16 members, 8 of whom are officials, 3 nominated and 5 elected.

St. George's, on the south-west coast, is the chief town, and possesses a good harbour.

	1930	1931

Colonial Secretary, N. R. R. Blood, M.A., *(and quarters)* £1,000
Chief Justice, R. S. de Vere..... 1,000
Colonial Treasurer I. C. Beanbrun £450 to 500
Attorney-General, J. H. Jarrett 700
Chief Medical and Health Officer, Maj. H. E. Sutherland Richards 750
Magistrates, I G. Wakeley M.C., *S. Dist.*; H. W. Steele, *N. Dist.*, each £500; V. F. Drayton, *District Commr of Carriacou* .....*(and quarters)* £350 to 420
Chief of Police, Maj. E. E. Turner *(and quarters)* £450 to 500

The Grenadines are a chain of small islands lying between Grenada and St. Vincent (within which Governments they are included), comprising an area of 8,462 acres. The largest island is Carriacou, attached to the Government of Grenada, pop. (1921) 7,104.

ST. LUCIA,

the largest and most picturesque of the Windward group, situated in 13° 54′ N. lat. and 60 59′ W. long., at a distance of about 90 miles W.N.W. of Barbados, 21 miles N. of St. Vincent, and 24 miles S. of Martinique, is 27 miles in length, with an extreme breadth of 14 miles. It comprises an area of 233 square miles with a population (Dec 31. 1931) of 59,676. It possibly possesses the most interesting history of all the smaller islands. Fights raged hotly around it, and it constantly changed hands as between the English and the French. It is mountainous, its highest point being 3,145 feet above the sea, and for the most part it is covered with forest and tropical vegetation. The principal exports (1931) are sugar, cocoa, coco-nuts, copra, limes, lime-juice, lime-oil, charcoal, bay rum, molasses, syrup, and fruit. The chief places are Castries, the capital (pop. 1921 5,899), and Soufriere (pop. 1921, 2,480).

Port Castries, one of the finest in the W.I., is a coaling depot. In 1931, 268 steamers (tonnage 707,964) entered Port Castries.

Chief Justice and Magistrate, First District, T. W. S. Garraway 700
Attorney-General and Registrar, G. N. W. Boyes 500
Treasurer and Postmaster, H. J. Pink £640 to 690
Chief Medical Officer, (vacant) .....£600 to 700

ST. VINCENT,

an island about 95 miles west of Barbados, situate in 13° 10′ N. lat. and 60° 57′ W. long., is 18 miles in length and 11 in breadth, comprising an area, with its dependencies, of 150 sq. miles, and a population (Census of 1931) of 47,961. In 1846 a large number of Portuguese labourers, amounting to 2,400, entered the island, and proved a valuable acquisition. St. Vincent is more thoroughly English than the two other islands of the group, though it has been the scene of warfare. In 1783 it was secured to Great Britain.

The chief products are arrowroot, cotton, molasses, rum, cassava, cocoa, coffee, and spices. Its chief imports are linen, cotton and woollen manufactures, Canadian flour, fish, lumber, &c. Steps have been taken to settle the labouring classes on lands acquired for the purpose.

CAPITAL, Kingstown. Population (1931), 4,269.

CAMEROONS.

(Cameroons under British Mandate.)

The German Protectorate of *Kamerun* on the west coast of Africa between (British) Nigeria and French Congo was obtained by conquest by Franco-British forces during the War of 1914–18.

The approximate geographical limits of the German territory were 2°–12° 30′ N. lat. and 8° 30′–16° E. long. and the area was about 87,595 square miles. By the Milner-Simon Agreement of July 10, 1919, the whole area was divided into a British sphere and a French sphere, and in 1922 the territories were placed by the League of

* Includes Imperial Grants of £6 to and £4,420.

† Incl £5 12o Colonial Development Fund.
†† Do £16 0 6 do do.

Nations under British and French Mandates. The Cameroons under British Mandate marches the whole distance of the Nigerian Eastern boundary, save for one short break. The total area is 34,236 square miles, and the population is 774,585.

The two narrow strips of territory reach from the Atlantic Ocean to Lake Chad, a distance of 700 miles, and lie diagonally between 4°—12° 30′ N. lat. and 8° 30′—14° 45′ E. long. The nature of the country varies to a remarkable extent, from the coastal mangrove swamps and thick forest regions to the grasslands at heights of 4,000 ft. to 7,000 ft. and more, and again to sandy and swampy areas in the region of Dikwa and Lake Chad. The highest point is the peak of the Cameroon Mountain, which rises to a height of 13,350 ft. It is volcanic, but has not been active since 1922. The mandated territory is administered as part of Nigeria. The Northern areas are administered by the Residents of the adjoining Provinces of Adamawa and Bornu; the Southern section forms a separate Province, known as the *Cameroons Province*, with headquarters at Buea on the slopes of the Cameroon Mountain. Cattle breeding and the production of guinea corn are the chief occupations of the population of Dikwa, which consists mainly of Arabs and Kanuri. The inhabitants of the areas which for administrative purposes form part of the Adamawa Province, are mostly primitive hillmen whose chief occupation is agriculture.

Cameroons Province is rich in timber, and the volcanic soil of the lower slopes of the Cameroon Mountain is particularly fertile. The chief exports of the Province are cocoa, palm oil and kernels, rubber and bananas (fresh and dried), the banana industry being recently established with marked success; the chief imports are textiles, salt, iron-ware dried fish and other provisions, motor spirit and tobacco.

The ports are Victoria and Tiko, and are connected with Buea by motor road. 118 ships (203,744 tons) arrived in Victoria in 1931 and 102 ships (70,329 tons) entered Tiko.

CEYLON,

an island in the Indian Ocean, to the south-east of the peninsula of Hindustan, is situated between 5° 55′—9° 50′ N. lat. and 79° 42′—81° 53′ E. long. Its area is (with outlying islands) 25,332 square miles, or more than three-fourths of that of Ireland. Its greatest length is from north to south, 270 miles; and its greatest width 140 miles. The climate varies with the altitude of the district; but on the whole, though tropical, it is healthy, except in the low-lying jungle. The coolest months are December and January; the hottest are April and May.

The population (Census of 1931) was 5,312,548 (including military and shipping), the most important element being the Sinhalese, descendants of colonists from the valley of the Ganges, who first settled in the island about B.C. 543. In 1505 the Portuguese landed in Ceylon and formed settlements along the coast; but about 150 years later they were dispossessed by the Dutch. In 1796 the British took possession of the Dutch settlements on the island, and annexed them to the Presidency of Madras; but six years after, in 1802, Ceylon was formed into a separate Crown colony. In 1815 the King of Kandy was deposed and banished; and his dominions, which had up to that time maintained their independence of European rule, were annexed to the British Crown.

The staple products of the island are agricultural. The most important for home consumption is rice in its two forms of paddy and husked grain. The principal exports are tea, rubber, products of the coconut palm, plumbago, cacao, cinnamon, citronella oil, cardamoms, areca nuts, ebony, and a little vanilla.

About one-fifth of the island is under cultivation, and the approximate areas in 1931, in acres, were:—Rice, 1,000,000; other grain, 105,000; tea, 400,000; coconuts, 1,000,000; rubber, 500,000; cinnamon, 26,000; cacao, 34,000; citronella, 33,000; and tobacco, 14,000. The live stock in 1931 included 1,580,000 horned cattle, 65,000 sheep, 194,000 goats, 41,000 pigs, and 1,100 horses. Among the more important native industries are gold, silver, brass, ivory and tortoiseshell work, pottery, mats, fans, and wood-carving. Ceylon is famous for precious stones, especially cateeyes, rubies, &c.; and for the pearl fishery in the Gulf of Mannar, off the N.W. of the island. The manufacture of salt is a Government monopoly.

There are 951 miles of railway open, 834 being 5 ft. 6 in. gauge and 117 miles 2 ft. 6 in.; and 843 post offices, 401 money order offices, and 260 telegraph offices, with 13,025 miles of telegraph wire.

The government of Ceylon is administered by a Governor, aided by a *State Council* consisting, at its full strength, of *50 members (elected on a territorial basis) with 8 nominated unofficial members, and 3 Officers of State (Chief Secretary, †Legal Secretary and Financial Secretary). The elected and nominated members are divided into 7 Executive Committees: (1) Home Affairs, (2) Agriculture and Lands, (3) Local Administration, (4) Health, (5) Labour, Industry and Commerce. (6) Education and (7) Communications and Works, each with an elected Chairman who is the Minister for the subject dealt with. The Chief Secretary is in charge of External Affairs, Defence and the Public Services; the Legal Secretary and the Financial Secretary in charge of Legal and Financial Affairs. The Officers of State and the Ministers form a Board of Ministers which prepares the Estimates of Revenue and Expenditure in consultation with the Financial Secretary.

For administrative purposes the island is divided into 9 provinces, at the head of each of which is a Government agent. The larger towns have municipalities, Urban District Councils, or local boards; and in the country districts the Ceylonese retain their village councils and tribunals for matters of minor importance.

The MALDIVE ARCHIPELAGO lies to the S.W. of Ceylon, a few degrees north of the equator. Male, the seat of government, is about 400 miles distant from Ceylon, to which the islands have always been nominally tributary. The Sultan acknowledges his allegiance by sending an annual embassy to Colombo. The natives are Muslims. The islands are unhealthy, and the main exports are dried fish, cowrie shells, coco-nut coir, and tortoiseshell.

Colombo, distant from London (overland) 5,868 miles; transit. 17 days.

THE CHANNEL ISLANDS.

situated off the north-west coast of France (at distances of from ten to thirty miles), are the only portions of the *Dukedom of Normandy* now belonging to England, to which they have been attached ever since the Conquest. They consist of Jersey (28,717 acres), Guernsey (15,654 acres), and the following dependencies of Guernsey—Alderney (1,962 acres), Brechou (74), Great Sark (1,035), Little Sark (239), Herm (320), Jethou (44), and Lithou (38), a total of 47,083 acres, or 73·4 square miles. The 1931 Census population of Jersey was 50,455, and of Guernsey, &c., 42,606 (Guernsey 40,470, Alderney 1,506, Sark 575, Herm 53, Jethou 2).

The climate is mild, and the soil exceptionally productive. The land under cultivation in 1916 was 49,678 vergées (2¼ vergées = 1 acre), the principal product of the soil of Jersey being potatoes, tomatoes and wheat, and of Guernsey green crops and oats, fruits tomatoes and flowers. The famous Jersey and Guernsey breeds of cows have earned a well-deserved celebrity. The principal officer in each island is the Lieut.-Governor, who represents the King-Emperor (the Duke of Normandy). French is the official language of the local legislatures, called the *States*, and of the Royal Court, and is still spoken by the people, but English is now permissible in the Legislative Assembly. The Bailiff, appointed by the Crown, presides over the *States* and over the Royal Court or judicial body. The islands possess a very large trade, the principal imports being coal and coke, and the chief exports being potatoes, tomatoes, flowers, and stone and granite. The chief town of Jersey is St. Helier, on the south side; the principal town of Guernsey is St. Peter Port, on the east coast.

The trade of the Channel Islands is principally with the United Kingdom.

CYPRUS

is an island in the Mediterranean Sea, between N lat 34° 33 and 35° 41 and E long 32° 20 and 34° 35′. It is about 40 miles distant from the nearest point of Asia Minor and 60 miles from Latakia on the Syrian coast. The distance to Port Said, at the entrance of the Suez Canal, is 238 miles. The larger part of the island is an irregular parallelogram 100 miles long and 60 to 30 broad, from which a narrow peninsula, 5 or 6 miles wide, runs out for 40 miles towards the north east. The area is 3,584 square miles. The population at the census of 1931 was 347,959 of whom about 18 per cent were Muhammadans and the remainder mostly members of the autocephalous Church of Cyprus, which is a branch of the Orthodox Eastern Church. The principal productions are grain of various kinds, sesame, linseed, flax, wine and spirits, silk, olives, locust beans (carobs), cotton wool, hides, grapes, oranges, pomegranates, asbestos, aniseed, sponges, sumac, leaves, terra umbra, gypsum, salt, pyrites and chrome. In 1931 the wine export was 2,014,513 gals., and that of spirits 8,955 gals.; the wine going to Egypt, the U.K., Malta, Syria, and the Dodecanese and spirits to Egypt, Syria and Castellorizo. The climate varies in different localities. In the plains the summer heat is very great and the British troops suffered when first stationed in the island. Excellent summer quarters were however found in the hills, and, owing to the enforcement of various sanitary measures, the death rate of the whole island is nearly as low as that of any European country.

Cyprus was formally annexed to the British Empire in 1914. The inhabitants have been granted a political franchise, every man paying direct taxes having a vote. From March 10 1925, until Nov. 12 1931, the Government was administered by a Governor, aided by an Executive and Legislative Council, the latter containing 9 official and 15 elected members, but after the disturbances which occurred in the Island during the autumn of 1931, the clauses (in the Letters Patent of March, 1925) dealing with the constitution of the Legislative Council were revoked, power to legislate being vested in the Governor pending a review of the constitutional future of the Island.

For administrative purposes the Island is divided into six districts, in each of which the executive government is represented by a commissioner. For judicial purposes it is divided into three judicial districts. The law courts were reconstituted in 1927, and there are now a supreme court, 3 divisional courts, 3 assize courts, 3 district courts, and also magisterial and assistant district judges courts. In all the courts Cypriot judges (Christian and Moslem) take part. There are also 3 Mussulman religious tribunals styled *Sheri* Courts, and a *Sheri* Tribunal of Appeal.

The capital is Nicosia (Lefkosia), near the centre of the Island, with a population of 23,507 in 1931, the other principal towns are Larnaca (population 11,725), Limassol (15,065), Famagusta (8,171) Kyrenia (2,049) Paphos (4,467), and Morphou (4,335).

Important works at Famagusta have rendered the inner harbour accessible to steamers and there are 37 miles of railway, and 71 miles of motor road services. There is a regular service of steamers between Cyprus and Egypt, Syria, Cilicia, Palestine, Smyrna, Istanbul, Greece, France and Italy.

FALKLAND ISLANDS.

These, the only considerable cluster in the South Atlantic, lie about 300 miles east of the Straits of Magellan, between 51° 15′—53° S. lat. and 57° 40′—62° W. long. They consist of East Falkland (area 2,580 sq. miles), West Falkland (2,038 sq. miles), and upwards of 100 small islands (islets, rocks, and sandbanks), comprising in the aggregate 4,618 sq. miles, and a population in 1921 of 2,094. Mount Adam, the loftiest peak in the colony, rises 2,315 feet above the level of the sea. The Falklands were discovered by Davis in 1592, and visited by Hawkins in 1594. A settlement was made by France in 1764; this was subsequently handed over to Spain, but the latter country recognised Great Britain's title to a part at least of the group in 1771. In 1820 the Argentine Republic established a settlement, which was destroyed by the Americans in 1831. In 1833 the islands were again taken possession of by the British for the protection of the seal-fisheries, and colonised, being the most southerly organised colony of the British Empire. On Dec. 8, 1914, a British squadron under Adm. Sir Doveton Sturdee defeated a German squadron (von Spee) off the Falkland Islands. A memorial erected in the harbour of Port Stanley in commemoration of this victory was unveiled on Feb. 26, 1927. The climate is cold, the thermometer ranging in winter from 20° to 50°, and in summer from 40° to 65° Fahrenheit. The islands are chiefly bog-land, and have proved suitable for sheep, 606,882 being carried in 1930; the output of wool is about four million lb. annually. The population is mainly British, and is principally engaged in sheep-farming. The chief exports are wool, tallow, hides and sheepskins; seal oil is also produced and exported. The only important settlement is Port Stanley, at the head of Port William, on the coast of East Falkland.

The government of the Falkland Islands is vested in a Governor, aided by an Executive Council of 3 official and 1 unofficial members, and a Legislative Council, of 4 official and 2 unofficial members.

CHIEF TOWN, Port Stanley. Population (1931), 1,213.

Dependencies of the Falkland Islands.

The total area of land and sea included in the dependencies of the Falklands is over 3,000,000 square miles. *South Georgia,* an island 800 miles east-south-east of the Falkland Group, with an area of 1,000 square miles, is the only part of the dependencies which is permanently habitable, there being a Resident Magistrate and other officials, and a permanent population (engaged in the whaling industry) at Grytviken Harbour. In the *South Shetlands,* Deception Island contains a harbour at Port Foster, ice-free for about five months in the year, with a land station which arrives and departs with the whaling fleet. The *South Orkneys* also have a seasonal land station, and the Argentine Government have, with the permission of H.M. Government, established a meteorological station, in connexion with a discovery that a cold winter in the Weddell Sea is a precursor of drought in the maize and cereal area of Argentina 3½ years later. The other dependencies, of which the principal units are the *South Sandwich Islands,* and a part of the *Antarctic,* or South Polar, continent known as *Graham's Land,* are even more inhospitable than those already named, being nearly covered with snow and ice and almost completely destitute of plant life. In spite, however, of the climatic and other disadvantages, the revenue derived from all the dependencies in 1930 amounted to £84,547. The local expenditure was £21,597, the surplus (after meeting administrative expenses at Port Stanley) being devoted to local research and development. The trade is considerable, the exports being valued at £2,726,175, and the imports at £499,829 in 1930. The whaling industry carried out from these dependencies is greater than that of the rest of the world combined.* Fifteen companies (3 British, 12 Norwegian) caught 10,725 whales in the 1929-30 season, the landed value of the oil being £3,166,450.

In 1928 a claim was made by Norway to *Thomson* and *Bouvet* Islands in the Antarctic and by Argentina to the *South Orkneys*; these claims were not admitted by the British Government, but Bouvet Island was ceded to Norway in November, 1928, as an act of grace.

Port Stanley is distant about 8,130 miles; transit, 26 days from Liverpool. Telegrams by cable and wireless telegraphy *viâ* Monte Video and *viâ* Bergen.

* Colony only.

* The *total* number of whales caught in the world in 1905 was 4,592; in 1920 it was 24,730 (oil production 884,320 barrels); in 1927-8 the catch was 37,674 (oil production 2,799,042 barrels).

FEDERATED MALAY STATES

(*See* MALAYA).

FIJI.

This is a group of 200 to 250 islands (of which some are, however, mere uninhabited islets and rocks) in the South Pacific Ocean, about 1,200 miles north of New Zealand, which extend 300 miles from east to west, and 300 north to south, between 15° 45′—21° 10′ S. lat. and 176° E.—178° W. long. The gross area of the group is about 7,083 square miles. The islands are of volcanic origin, with lofty mountains, and well wooded. The principal are Viti Levu (Great Fiji) and Vanua Levu (Great Land). The climate is equable and remarkably healthy for Europeans; the average temperature in the shade in the cool season is 72°, rising to 84° in the hot season, extremes lying between 60° and 94°. Vegetation is remarkably luxuriant, the chief products being bread-fruit, bananas, plantains, pea-nuts, yams, and dalo (taro),

coco-nuts, sugar-cane, rice, maize, and cotton. The principal exports are sugar, copra, bananas, trocas shell, molasses, maize, fresh fruit and vegetables, and bêche-de-mer. The Governor is appointed by the Crown, and is assisted by an Executive Council consisting of 7 members. Laws are passed by a Legislative Council (of which the Governor is president) containing 13 nominated members, 6 European elected members, 3 native members, and 3 Indian elected members. Native administration is carried on through the chiefs under the Governor's supervision. The estimated population (Dec. 31, 1931) was 185,573 (93,414 native Fijians, 76,772 Indians, 5,058 Europeans, and some Polynesians and others).

GAMBIA.

The West African river Gambia, which is navigable for some 300 miles from its mouth, was discovered by the Portuguese in 1447; and in 1588, the year of the Spanish Armada, Queen Elizabeth, being then at war with Spain and Portugal, gave a charter to a British Company to trade with the Gambia, and as early as 1618 an effort to do so was made, but it was not successful. In 1686 a fort was built upon a rocky island, and, in honour of the new King, was named Fort James; but the English merchants had formidable rivals in the Portuguese and French, and it was not until 1783 that the river was recognised, by the *Treaty of Versailles*, as British. The Colony had no regular political institutions until 1807, when it was put under the Government of Sierra Leone. The Colony of the Gambia was created in 1843, and was constituted a separate government in 1888. It now consists of the Island of St. Mary, British Kombo, Albreda, the Ceded Mile, MacCarthy Island, and various other islands and territories on the banks of the river. The total area is estimated at 4,132 sq. miles. The population of the Island of St. Mary, at the Census of April 11, 1931, was 14,370, and that of the Protectorate 185,150. The climate is unhealthy during the rainy season, viz., from June to October; but during the rest of the year it is less unhealthy. The chief export is ground nuts, which form ninety-five per cent. of the total exports; they are sent chiefly to France, where the oil is extracted and used for the same purpose as olive oil. Palm kernels, hides, and beeswax are also exported; and rice, cotton, maize, and a kind of millet called *kous* are produced in the countries bordering the Gambia, but not in sufficient quantities to meet local requirements. The chief imports are apparel, cotton goods, flour, kola nuts, oil, rice, soap, spirits, hardware, sugar, tea, wine, and tobacco. A Company of the R.W.A.F.F. (3 officers and 135 non-commissioned officers and men) is stationed in the Colony, and there is an armed police force (numbering 148 officers and men), which performs both civil and military duties. There are 4 Government wireless stations. The Government, which is that of a Crown Colony, is vested in a Governor, assisted by an Executive Council consisting of 4 official members (besides the Governor), and by a Legislative Council of 5 official members and 3 unofficial members, nominated by the Crown.

Bathurst is distant from London 2,600 miles; transit about 10 days.

GIBRALTAR,

a rocky promontory, 2¾ miles in length and ¼ of a mile in breadth, and 1,396 feet high at its greatest elevation, near the southern extremity of Spain, with which it is connected by a low isthmus. It is about 14 miles distant from the opposite coast of Africa. Gibraltar was captured in 1704, during the war of the Spanish Succession, by a combined Dutch and English force, under Sir George Rooke, and ceded by the Treaty of Utrecht, 1713. Since that time it has remained continuously in possession of the British. Of the many attempts to retake it, the most celebrated was the great siege in 1779–83, when General Elliot, afterwards *Lord Heathfield*, held it for 3 years and 7 months against a combined French and Spanish force. The town stands at the foot of the promontory on the N.W. side. Gibraltar is a free port, and enjoys the advantages of an extensive shipping trade, and is becoming a popular tourist centre. During the year 1931 3,509 vessels (including 63 tourist steamers) entered, with a total tonnage of 6,900,700. The chief sources of revenue are the port dues, the rent of the Crown estate in the town, and duties on wine, spirits, tobacco, beer, motor spirit and perfumery. There is an enclosed Admiralty harbour with an area of about 440 acres, containing three graving docks. The estimated civilian population (1931) was 15,428.

The Governor is in command of the garrison, and is aided in the administration by an Executive Council of 7 members; there is no Legislative Council.

GOLD COAST.

The Gold Coast comprises a portion of the coast of the Gulf of Guinea from about 3° 7′ W. to 1° 14′ E. of Greenwich. It is divided into three parts:—Gold Coast Colony, 23,937 sq. miles; Ashanti, 24,379 sq. miles; and the Northern Territories, 30,486 sq. miles—a total area of 78,802 sq. miles. It extends along the coast line about 334 miles and inland to an average distance of 440 miles, or to the 11° of N. latitude. It is bounded on the west and north by the French colonies of the Ivory Coast and French Sudan, and on the east by Togoland. The population (April 1931) was: *Gold Coast Colony*, 1,573,770; *Ashanti*, 578,702; *Northern Territories*, 717,382; total, 2,869,854, excluding 3,139 Non-Africans. The natives are almost all Pagans, but there are many Muhammadans, and the number of Christians is steadily increasing.

The trade in 1931 was principally with the United Kingdom (51 per cent.), U.S. (15), Germany (11), Netherlands (11) and France (2 per cent.). Gold is found in considerable quantities, and diamonds were discovered in 1919; there are also large deposits of high-grade manganese. The principal product is cocoa, more than half the world's supply being produced in the Colony. The principal exports in 1931 were: cocoa, £5,493,165; gold and gold dust, £1,069,581; manganese £388,963; and diamonds, £440,924. The chief imports are apparel, building materials, cotton goods, provisions, kerosene, hardware, motor spirit, motor cars and motor lorries, beer, ale, stout and porter, sugar, tobacco and cigarettes. The climate, generally, is hot and moist, but is becoming annually less unhealthy by the aid of medical science and sanitation. The Government assists the missionaries in educational matters and has established many schools of its own, and a college and school at Achimota, 6 miles from Accra, have been built and opened. Great efforts are being made to improve the sanitary condition of the coast towns. Accra, Kumasi, Sekondi (including Takoradi), Koforidua, Winneba and Tamale are lighted by electricity, and there are pipe-borne water supplies at Accra, Sekondi (including Takoradi), Cape Coast, Winneba and Tamale; similar supply is being installed for Kumasi. 4,713 miles of telegraph land wire and 7,911 miles of telephone trunks have been established. Exchanges have been opened in the principal towns and are served by 3,633 miles of underground and overhead line wire. There is a wireless station at Tokoradi. A Government railway runs from Sekondi through Tarkwa, the centre of the gold-mining industry, to Kumasi and thence to Accra (362 miles), with branches (590 miles in all). In 1928 a harbour was opened at Takoradi.

The seat of government is Accra (population 59 895). The other principal towns are Cape Coast (17,685) Ada (4 450) Elmina (4 797) Sekondi (16,742) Tarkwa (3 321) Keta (6 392) Axim (4,533), Kumasi (36 200) Saltpond (6,369) Koforidua (19 634) and Winnebah (10 990) The government of the Colony is administered by a Governor aided by a nominated Executive Council There is a Legislative Council of 15 official and 14 unofficial members for the Colony excluding Ashanti and the Northern Territories

ASHANTI

Ashanti was placed under British protection on Aug 27 1896. Under Orders in Council of Sept 26 1901 the country was definitely annexed by Great Britain the Governor of the Gold Coast Colony being appointed Governor of Ashanti though only some of the laws and ordinances of the Gold Coast Colony apply to the annexed territory The area is 24 379 square miles, with a population (census of 1931) of 578 702 (Europeans 417) Kumasi the chief town has about 36 284 inhabitants In 1931 there were 1 253 children in the Government schools and 3 906 in the mission schools 41 students were in residence (1931 32) at the Agricultural and Forestry Training centre Police force (1931–32) 256 prosecutions (1931 32) 3 922 but there is little serious crime There are 1 284 miles of motor roads Agriculture is extending large areas are under cacao and coffee and cola are also cultivated In 1931–32 the export by rail of cacao was 63 192 tons and the gold output £739 654 (174 118 oz). In the western parts of the colony are rich forests of mahogany cedar &c and trees yielding oil kola and rubber Practically the whole of Ashanti is now connected by motor road with Kumasi and with the main trade routes to the north The country is well watered and with proper restraint it could contain inexhaustible supplies of valuable forest products On the eastern side the forests are sparser, though timber and oil trees are common and game fairly plentiful the products there are chiefly maize yams cocoyams ground nuts and cacao the plantations of which are rapidly extending

HONG KONG

The Crown Colony of Hong Kong consists of a number of islands and of a portion of the

mainland, situated off the south eastern coast of China, at the mouth of the Canton River, in 22° 9′ N lat and 113° 52′—114° 30′ E long and bounded on the N by the Shum Chun River

Hong Kong is an island about 11 miles long and from 2 to 5 miles broad, with a total area of 32 square miles, it lies close to the mainland, being separated at one point by a narrow strait (Lyeemoon) not more than a quarter mile wide, and was first occupied by Great Britain in January, 1841, and was formally ceded by the Treaty of Nankin in 1842, *British Kowloon* was subsequently acquired by the Peking Convention of 1860 and the *New Territories* being a peninsula in the southern part of the Kwangtung province by a lease signed June 9, 1898 The whole colony comprises an area of about 391 square miles, with a population (Census, 1931) of 840 473 The non-Chinese residents, excluding naval and military, numbered 19 369

The capital of the colony is Victoria which lies along the northern shore of the island facing the mainland and between the mainland and the city is the harbour, which is one of the finest in the world, with a water area of some 10 square miles With the exception of liquor, tobacco and motor spirit the port is free and is fortified It possesses excellent docks capable of holding the largest vessels for the purposes of repair There is a considerable ship repairing and construction industry Shipping entered (1930) 21,095,306 tons, (1931) 22 075,010 tons A railway, of which 22¼ miles belong to the Government, runs from Kowloon to Canton, the length north of the Shum Chun River (which is the boundary of the British territory) is controlled by the Chinese Government Good roads connect the principal districts with the railway

The island is broken in shape and mountainous, the highest point being Victoria Peak, which is about 1,809 feet high The Peak District is a favourite place of residence, and is reserved for Europeans The New Territories contain peaks from 1,800 to 3,000 feet The hot season lasts from May to October During the winter months, from November to March the climate is cooler, drier, and more invigorating The average daily maximum temperature ranges from 87° in July to 63° in February, and the average daily minimum temperature from 78° in July to 55° in February The average annual rainfall is 86 in of which no less than 75 per cent falls between May and September, when the S W monsoon prevails

Hong Kong is the centre of a vast trade in many kinds of produce, chiefly camphor, coal, cottons, flour gunnies, hides, iron and steel goods, leather, matches, oils rice silks, sugar, tea and tin

Much encouragement is given by the Government to education in the colony In 1931 there were 1,072 schools subject to Government supervision, attended by 68 593 pupils The University (opened in 1912) includes faculties of medicine, engineering, and arts

Hong Kong is a Crown colony, and its government is administered by a Governor, aided by an Executive Council of 9 members, together with a Legislative Council of 18 members, including himself, a representative from the Chamber of Commerce, and a representative of the Justices of the Peace There is also a Sanitary Board, partly elected, which controls certain sanitary measures.

THE ISLE OF MAN (MONA),

an island in the Irish Sea, in lat 54° 3′ – 54° 25 N and long 4° 18′ – 4° 47′ W, nearly equidistant from England, Scotland, and Ireland The total land area is 145,325 acres (227 sq miles), with a population (1931) of 49,308 (22,459 males, 26,849 females) In 1931 the births numbered 679 and the deaths 743 The cultivated area (1932) was 80,785 acres, and the live stock included 3,564 horses, 20 169 cattle 101,995 sheep, and 4,379 pigs The Islands main industry is catering for holiday makers (numbering about 500 000 in the year) from all parts of the British Isles

The land is rich in minerals, lead, iron, blende and slate and exports large quantities of agricultural produce Forty seven miles of railway have been constructed, and about 25 miles of electric tram road

Government, etc —In the 9th century a body of malcontents from Norway emigrated to the western isles of Scotland, and their prosperity drew upon them the anger of the Norwegian monarch Harold, who in the year 870 sent forth a great expedition and conquered the Orkneys and the Shetlands, the Western isles, and Man For three centuries the Norwegian rule remained intact, but when, in 1263, Alexander III defeated the famous Haco at the battle of Largs, all these islands fell under Scottish rule On his accession to the English throne, Henry IV seized on the Isle of Man, and in 1406 bestowed it on the Stanley family In 1827 the Crown purchased it for the sum of £417,144.

Man is now governed by a separate Legislature, called the Tynwald, consisting of two branches —the Governor and Council and the House of Keys The Council consists of the Governor, the Bishop of Sodor and Man, the two Deemsters, the Attorney General, 2 members appointed by the Governor, and 4 members appointed by the House of Keys The House of Keys (possibly from the Scandinavian *kose*=chosen) is one of the most ancient legislative assemblies in the world It consists of 24 members elected by the male and female owners and occupiers of property, 16 from the six *sheadings* 5 from Douglas, and 1 each from Castletown, Peel and Ramsey Bills after having passed both Houses are signed by the members, and then sent for the Royal Assent After receiving the Royal Assent a Bill does not become law unless promulgated within the ensuing twelve months, and on the first Tynwald Day (July 5) following it is announced in the English and Manx languages on the Tynwald Hill On the promulgation taking place a certificate thereof is signed by the Governor and the Speaker of the House of Keys An annual contribution of £10,000 is made to the Imperial Government In 1921 Tynwald accepted liability for the redemption of £250,000 War Stock, and in 1927 liability for a further sum of £500,000 of War Stock was accepted in final settlement of all responsibility to the Imperial Government in respect of the cost of the Great War The chief source of revenue is found in the customs duties, the only direct taxation being income tax, which ranges from 1s for incomes under £500 to 3s 6d for incomes over £5,000 There are 38 elementary and 4 secondary schools in addition to King William's College, the gross expenditure on elementary education in 1931–32 was £68,491 and on higher education £27 742

CAPITAL, Douglas Pop (1931), 19,265 (Castletown is the ancient capital), the other towns are Peel and Ramsey

KENYA

Kenya Colony and the *Kenya Protectorate* are situated in Eastern Equatorial Africa The eastern boundary has been settled by agreement with Italy, to whom the Province of Jubaland (35,812 sq miles) was ceded by treaty in 1925, and on the north by an agreement with Ethiopia in 1908 On the west the Colony adjoins Uganda, the boundary being determined by an Order in Council in 1926 to include in Kenya an area on the west of Lake Rudolph and north of the River Turkwel, stretching from Mt Elgon to Mt Zulia (on the boundary of the Sudan), which was formerly part of the Uganda Protectorate On the south Kenya adjoins the mandated Tanganyika Territory Kenya Protectorate also includes the *Witu Protectorate*, a small tract of country at the mouth of the river Tana The total area is 224,960 sq miles and the population is estimated at 3,040,940 (Europeans 16,812, Indians 39,644, Goans 3,959, Arabs 12,166, Africans 2,966,993, and others 1 366)

A great portion of this vast region consists of pasture lands or barren wastes, but there are not lacking extensive districts of great natural fertility in the interior as well as on the coast The Colony is divided for administrative purposes into 9 provinces which are subdivided into districts, those most suitable for settlement by Europeans being Kyambu North Nyeri, Laikipia, Nakuru, Naivasha, Kericho, Uasin Gishu, and Trans Nzoia There is also a considerable region still undeveloped

The telegraph and telephone systems of Kenya have 13,919 miles of wire Telegraph lines connect Mombasa with Lamu and Witu, Mombasa with Gazi and Tanganyika Border along the coast and inland between Mombasa and Entebbe, the capital of the Uganda Protectorate There are also extensions to Kahe, Lake Magadi, Machakos, Nyeri, Nanyuki, Meru, Isiolo, Narok, Rumuruti, Kericho, Chen agel Songhoi, Eldama Ravine, Lake Solai, Eldoret, Kitale, Endebess Kimini and Moiben Communication between Mombasa and ships at sea and Italian Somaliland is maintained by radio telegraphy A short-wave wireless station (owned and maintained under licence from Government) is established at Nairobi and provides communication between the Colony and Protectorate and Great Britain

Telephone communication exists in the majority of the settled areas of the Colony. The Kenya and Uganda railways and harbours are State-owned; the railway, which is metre gauge, has a total route mileage of open lines of 1,628 miles, made up as follows:—*Main Line* (Mombasa—Kampala) 886 miles; *Principal Lines*—Nakuru Junction–Kisumu (132 miles), Tororo–Soroti (100 miles), Voi—Kahe Junction (91 miles); *Minor and Branch Lines*, Rongai—Lake Solai (26), Kisumu—Butere (44), Leseru—Kitale (40), Mbulamuti—Namasagali (18), Kampala—Port Bell (6), Gilgil—Thomson's Falls (49), Nairobi—Nanyuki (145). The Konza—Lake Magadi Line (91 miles) is worked but not owned by Government. In addition, the Administration operates a marine service on Lakes Victoria, Kioga and Albert, and on the River Nile, with a route mileage of 3,401 miles.

Kenya and Uganda are one administrative unit for purposes of customs, and the principal imports are cotton piece goods and manufactures, textiles and textile manufactures, motor cars, parts and accessories, motor spirit, cigarettes, cigars and tobacco, cutlery, hardware, instruments and implements; china and glass ware; motor lorries, parts and accessories, industrial machinery, and wearing apparel. The principal exports are coffee, raw cotton, maize, sisal fibre and sisal tow, hides and skins, carbonate of soda, oil seeds, wheat, ivory, wattle bark and extract, tin ore and butter.

	1930.	1931.
Revenue	£3,241,600	£3,066,930
Expenditure	3,438 874	3,216,089
Imports(Kenya&Uganda)	6,923,665	5,092,026
Exports (Kenya)	3,422,571	2,343 874
Imports from U.K. (K.&U.)	2,530,366	1,961,652
Exports to U.K. (do.)	2.379,387	1,581,059

NAIROBI, the capital of the Colony, and central station of the Kenya and Uganda railways and harbours, has a non-native population of 24,773, of whom 7,164 are Europeans, 14,951 Indians, 271 Arabs, 2,387 Others. The native population of the Nairobi district (including parts of Kiambu and Fort Hall) is 60 949. There are also some 600 European farmers in the immediate neighbourhood of Nairobi. Mombasa, which is connected with Europe by telegraph, possesses perhaps the finest harbour on the east coast of Africa (population 57,324, of whom 1,215 are Europeans).

Governor and Commander-in-Chief, His Excellency Brigadier-General Sir Joseph Aloysius Byrne, K.C.M.G., K.B.E., C.B. (1931), *and Duty Allowance* £2,500, *and Allowance as High Commissioner for Transport* £1,000...£5,000

MALAYA.

The whole of the Malay Peninsula, from the southern boundary of Siam to the Strait of Singapore, is within the British sphere, the administrative groups being the *Straits Settlements*, the *Federated Malay States*, and the Protected *States of Johore, Kedah, Kelantan, Trengganu* and *Perlis*. The total area is 51,000 sq. miles (S.S. 1530, F.M.S. 27,430, other 22,040), and the total population of BRITISH MALAYA (1931) was 4,385,346 (as compared with 3,358,054 in 1921). Of the 1931 total, 2,598,023 were males and 1,787,323 females, the disparity being principally due to the large number of Chinese male immigrants. The total European population at the Census of 1931 was 17,768.

(1) THE STRAITS SETTLEMENTS.

The Settlements forming what is known as the Colony of the Straits Settlements consist of the island of Singapore (with its dependencies, including the Cocos or Keeling Island and Christmas Island), Penang (including Province Wellesley and the Dindings), Malacca, and Labuan. These Settlements have an entire area of about 1,531 square miles, with an estimated population (1931) of 1,114,015.

The Government consists of a Governor, assisted by an Executive Council of 11 members, and a Legislative Council of 13 official and 13 unofficial members, appointed by the Crown. Of the unofficial members 11 are nominated by the Crown and 2 are selected by the Chambers of Commerce at Singapore and Penang. The law of the colony is the common and statute law of England as it was in 1826, qualified by local ordinances. The Supreme Court consists of the Chief Justice and 3 puisne judges, and constitutes also a court of appeal, from which there is yet another appeal in certain cases, viz., to the Privy Council. The jurisdiction of the Supreme Court includes that of a Colonial Court of Admiralty. There are also in each Settlement district courts with limited civil and criminal jurisdiction, and the usual police magistrates' and coroners' courts. An ordinance passed in 1931 provided for the establishment of a Court of Criminal Appeal.

The climate of the colony is almost uniform throughout the year, and foliage is perennial.

There is railway communication from Singapore, across the Straits of Johore, to Bangkok, *viâ* Penang (West Coast) or Kelantan (East Coast).

The principal *imports* in 1931 were areca nuts cigarettes, coal, copra, cotton piece-goods, fish (dried and salted), machinery, milk (condensed and sterilized), rubber, pepper, petroleum, lubricating oil, rattans, rice, sago, sarongs, sugar and tin ore. The principal *exports* in 1931 were areca nuts, petroleum, lubricating oil, copra, cotton piece-goods, cigarettes, fish (dried and salted) milk (condensed and sterilized), pepper, preserved pineapples, rice, rattans, rubber, sago, sarongs, sugar and tin.

SINGAPORE is an island situated off the southern extremity of the Malay Peninsula, from which it is separated by a narrow strait about three-quarters of a mile in width; its length is about 27 miles, and its breadth 14 miles; it comprises, with the adjoining islets, an area of 220 square miles, and a population (1931) of 557,745. It was first occupied in 1819, and formally ceded to the British Government by the Sultan of Johore in 1824. The seat of government for all the settlements is the town of Singapore, situated on the south side of the island in lat. 1° 17′ N. and long. 103° 50′ E., with 445,719 inhabitants in 1931. The climate is fairly healthy for Europeans, except for the absence of any marked change of temperature throughout the year.

The number of merchant vessels entered and cleared in 1931, exclusive of native craft, was 14,085, with a tonnage of 29,230,850. The total for the whole colony was 21,239, with a tonnage of 43,640,442. The total native craft entered and cleared at all four ports, Singapore, Penang, Malacca, Labuan, during the same year was 55,292 (tonnage, 2,108,208). The harbour, in the extent of its shipping, is one of the greatest ports in the world, being a port of call for vessels trading between Europe or India and the Far East, Australia, and Netherlands Indies, and is strongly defended. The Tanjong Pagar docks and wharves were taken over by Government in 1905 at a cost (fixed by arbitration) of $29,000,000 (£3,300,000). The King's Dock (opened in 1923) is the largest east of Suez, being 879 feet long, 100 feet wide, and 34 feet deep; its cost was $3,500,000. Singapore is a free port; no duties are levied, but excise is collected upon the release for consumption of opium, tobacco, spirits, wines, malt liquors, and petroleum.

Labuan is an island of the Malayan Archipelago, situated about 6 miles off the north-west coast of Borneo, in 5° 16′ N. lat. and 115° 15′ E. long. Its area is about 40 square miles and its population is 7,507 (1931). It was ceded to Great Britain by the Sultan of Brunei in 1846, being at that time uninhabited, and was incorporated in the Straits Settlements in 1907, becoming a separate Settlement in 1912. The island has a good harbour. The principal export is sago.

* Including $19,000,000 from Currency Guarantee Fund.

Victoria Harbour, in the south east, is the principal inlet, and affords good anchorage There is a cable station of the Eastern Extension Telegraph Company on the island
Resident, C H Whitton, M C S (*acting*)

The Cocos Keeling Islands are a group of about 20 small islands about 700 miles south west of Sumatra, and form part of the Settlement of Singapore The population is 2,142, and the islands export about 800 tons of copra There is a station of the Eastern Extension Telegraph Company on Direction Island

Christmas Island, in the Indian Ocean 222 miles S of Java, and 589 miles E of the Cocos Keeling Islands, has an area of about 60 square miles and a population of 1 059 (1931) A District Officer is stationed on the island which contains enormous phosphate deposits worked by the Christmas Island Phosphate Company The amount exported in 1932 was 65 849 tons.

Penang is the northernmost of the Settlements. It includes Penang or Prince of Wales's Island (pop 1931 198 871) on the eastern side of which is Georgetown, the port and capital, and the strip of mainland opposite, known as Province Wellesley (pop 1931, 141,388) and the territory of Dindings west of Perak Penang Island about 15 miles long and 9 broad, is situated off the west coast of the Malay Peninsula, in lat 5 24 N, long 100 21' E, and was ceded to the Government of India in 1786 by the Raja of the neighbouring territory, Kedah Area, 110 square miles At the time it was founded, Penang was the only British settlement in further India, now it is the emporium for all the trade of the northern and more prosperous parts of Sumatra and the Malay Peninsula

Province Wellesley is a strip of coast about 45 miles in length with an area of 280 square miles, ceded by the Raja of Kedah in 1800, with some land S of the Krian River acquired more recently The province is in a high state of cultivation as compared with the neighbouring territory, containing rice, spices, tapioca, rubber, and coconut plantations

The Dindings Territory, ceded by the State of Perak in 1874 (area 180 square miles pop. 1931, 19,592) is at present little developed, but it contains what is considered the best natural port on the western side of the peninsula The headquarters are at Lumut, where a District Officer is stationed, and steamers call regularly at Pangkor and Lumut The territory comprises a group of islands (of which Pangkor is the largest), and a strip of the mainland on the west coast of the peninsula, cut out of the State of Perak, and measuring about 22 miles long by about 10 miles in width.

Malacca, the largest of the Settlements, situated on the western coast of the peninsula, between Singapore and Penang, and about 110 miles to the N W of Singapore, comprises an area of about 640 square miles. It is one of the oldest European settlements in the East, having been captured by the Portuguese in 1511, and held by them till 1641, when the Dutch drove them out. In 1795 it was captured by the British, and retained till 1818, when it was restored to the Dutch, it finally became a British possession, in pursuance of the treaty with the Netherlands, March 17, 1824, being exchanged for the British settlement of Bencoolen in Sumatra. The population in 1931 was 186,721.

SINGAPORE, the capital of the Straits Settlements, is distant from London 8 700 miles, transit 22 days Penang, 20 days, and Malacca, 23 days

(2) THE FEDERATED MALAY STATES

These States are situated on the mainland of the Malay Peninsula and are closely connected with the Straits Settlements, they consist of the States of Perak, Selangor, Negri Sembilan, and Pahang, which have by treaty (1895) renewed their engagements with the British Government, and are administered under the advice of a Chief Secretary to Government, with Residents in each State, subject to the instructions of the High Commissioner, who is also Governor of the Straits Settlements The total area of the Federation is 27 648 square miles, with a population in 1931 of 1 713,096 The principal towns are Kuala Lumpur (Sel), pop 111,738 Ipoh (Pk), 53,863, Taiping (Pk), 31 881; Kampar (Pk), 15,302, Seremban (N S) 21 650, Klang (Sel), 20 913, and Teluk Anson (Pk) 14,671

The first three States are on the west coast, and extend from the border of Province Wellesley to that of the independent State of Johore Pahang is on the east coast All are governed by their native rulers under the above mentioned control

The States are policed by a mixed force of Indians and Malays, officered by Europeans

There are 1 073 route miles of railway practically all of which have been constructed from revenue This mileage includes the Johore State Railway (121 miles) which is leased from the Johore Government The line is of metre gauge throughout, and extends from Singapore (in the South) to Padang Besar (on the Siamese frontier), where it is connected with the Royal State Railways of Siam, affording direct communication with Bangkok The journey between Singapore and Penang occupies 22 hours and that between Prai (Penang) and Bangkok 27 hours (compared with a sea journey of 4 days) The railway runs direct between Singapore Island and the mainland, crossing the Straits of Johore by a causeway At Gemas there is a branch from the main Singapore Penang line running northwards through Negri Sembilan, Pahang and Kelantan as far as Tumpat At Sungei Golok this line is connected with the Royal State Railways of Siam There are 2,840 miles of metalled roads, 150 miles of unmetalled roads, and 1,771 miles of bridle paths while the principal rivers are navigable for small boats.

The Federated Malay States contribute largely to the supply of raw materials of the British Empire, and although production of plantation rubber and tin predominates, figures given below show that other products are produced and exported in large quantities Gold has always been found in small quantities, chiefly in Pahang, and about half a million tons of coal are annually mined in Selangor and used locally. While with the growth of the rubber industry there has been a tendency to neglect some of the older agricultural products, such as indigo, coffee, sugar, pepper, nutmegs and other spices, it has been proved that large areas in the Federated Malay States are suitable for the cultivation of the oil palm, and 19,000 acres have already been planted and nearly 30,000 acres alienated for this cultivation.

Principal exports from the Federated Malay States —

		1930	1931

Climate —Temperature shows little variation throughout the year The days are sometimes oppressive owing to the high humidity the nights are generally cool The mean maximum shade temperature is about 90° F inland and rather lower on the coasts while the mean minimum is about 72° F , inland and a little higher on the coasts The average yearly rainfall varies in places from 65 inches to 165 inches There are no clearly defined wet and dry seasons but there are well marked seasonal variations in the rainfall. On the West Coast and inland the months of January February June July and August have considerably less rainfall than the remaining months The full force of the S W monsoon is not felt owing to the barrier provided by Sumatra, but violent squalls of short duration (known as Sumatras) are not infrequent between April and September On the East coast during the N E monsoon which prevails from November to March heavy rains and strong winds are experienced, the remainder of the year being comparatively dry

(3) OTHER STATES

The Malay States not included in the Federation consist of Johore Kedah Perlis Kelantan and Trengganu The relations of Johore with Great Britain are defined in the Treaty of Dec 11 1885 as amended by an agreement dated May 12 1914 whereby the Sultan accepts and acts upon the advice of a British officer called the General Adviser In respect of the other four States the rights of Suzerainty protection, administration and control were transferred by Siam to Great Britain by the Anglo Siamese Treaty of March 10 1909 In all these States the trade is almost entirely carried on with the Straits Settlements Currency weights and measures are the same The religion is Muhammadanism

JOHORE with an area of 7 678 square miles and a population (census of 1931) of 505 309 occupies the southern extremity of the Malay Peninsula In 1895 the Sultan undertook to receive a British Agent having the functions of a Consular Officer In 1914 following an agreement of that date a General Adviser was accepted The Legislature consists of a Council of State to which European and Asiatic unofficial members are appointed The judicial system resembles that of the Federated Malay States Judges of Supreme Court of the Straits Settlements and of the Federated Malay States are *ex officio* Judges of the State of Johore and Netters Johore is primarily an agricultural country producing, as major crops rubber, coco nuts tapioca and pineapples The cultivation of African oil palm is also making progress Iron ore and iron ore are exported in considerable quantity The Johore State Railway runs for 120 miles through the middle of the State There are 831 miles of metalled road

MALTA,

an island in the Mediterranean Sea 58 miles from Sicily and about 180 from the African coast about 17 miles in length and 9 in breadth and having an area of 91½ square miles The colony includes also the adjoining island of Gozo with an area of 24¼ square miles COMINO—the site of the Sultan's distillery in 1889 and several islets The civil population of the whole group on April 26 1931 was 241 621 In religion the Maltese are Roman Catholics The lower orders are mainly Punic in race The Maltese language which is generally spoken by all classes is of Semitic origin and is held by some to be derived from the Carthaginian and the Phœnician tongues There is a Maltese order of nobility recognised by the Crown consisting of 29 families.

The island of Malta is said to have been converted to Christianity on the occasion of the shipwreck of St. Paul in 58 A D In the Dark Ages it was taken by the Moors, its commerce was destroyed and it was used mainly as a base for piratical expeditions. In 1090 it was again brought under Christian rule being conquered by the Norman Count Roger of Sicily For 440 years it followed the fortunes of that kingdom but was in 1530 handed over to the Knights of St. John, who made of it a stronghold of Christianity In 1565 it sustained the famous siege when the last great effort of the Turks was successfully withstood by Grand Master La Vallette The Knights expended large sums in fortifying the island and carrying out many magnificent works, until they were expelled by Napoleon in 1798 The Maltese rose against the French garrison soon afterwards and with the assistance of some British and Neapolitan troops, compelled the French to capitulate in 1800. The islands were then ceded to Great Britain, the cession being confirmed by the Treaty of Paris of 1814.

The climate, although not tropical, is very hot in summer. The mean temperature for the summer months in 1930 (June, July, August and September) was 81·7°. In winter the mean temperature was 51·3°. The islands are highly cultivated. The chief products are corn, oranges, melons, grapes, forage, cummin seed, onions, and potatoes; figs and honey are plentiful. The principal occupation of the people is in connexion with shipping.

Citta Vecchia, the former capital of the island, contains the ancient palace of the courts of justice, the Cathedral, and the Seminary; its population has now dwindled to 982, but its suburb, Rabat, has 9,050 inhabitants. Citta Vecchia has been entirely eclipsed in importance by the modern capital of Valletta, which was founded in 1566. The principal harbour is one of the finest in the world; it is very deep, and large vessels can anchor alongside the shore. It is an important port of call for vessels passing to and from the East and the Suez Canal, being about half-way between Gibraltar and Port Said. There is an extensive arsenal and important dockyard, Malta being the headquarters of the Mediterranean Fleet.

Malta possesses a University and Lyceum; 89 elementary and infant schools, 6 central schools, 2 secondary schools, and 60 night schools; in addition there are garrison schools, a Dockyard school, and 49 private schools of which 15 receive grants-in-aid from the Government.

Under the Constitution of 1921 the Legislature consists of a Senate and a Legislative Assembly. The Senate is composed of 17 members, 10 of whom are special members representing the Clergy, the Nobility, the Graduates, the Chamber of Commerce and the Trade Union Council, the other 7 being elected by a special electorate. The Legislative Assembly consists of 32, returned by 8 electoral districts, each represented by 4 members. The method of voting is that of Proportional Representation under the system of the single transferable vote. The Governor is assisted by two Councils—an Executive Council consisting of such of the Ministers as he selects and a Nominated Council consisting of the Lieutenant-Governor, the Legal Adviser and three officers chosen from the Navy, Army and Air Force. The Governor may summon these two Councils to sit together as the Privy Council of Malta. When any legislative or administrative act is done which, in the Governor's opinion, affects a reserved matter, he may submit the consideration of it to a Joint Committee consisting of three members of the Nominated Council appointed by himself and three members of the Executive Council appointed by the Head of the Ministry. The Constitution, which was temporarily suspended by an Order in Council (June 26, 1930) empowering the Governor to make laws for the peace, order and good government of Malta, was restored to the Island in 1932.

In 1931 the Port of Valletta was entered by 2,322 vessels (tonnage, 3,639,918).

MAURITIUS

Mauritius is an island lying in the Indian Ocean, 550 miles east of Madagascar, between 57° 17 57° 46 E long and S lat 19° 58 — 20° 33 and comprising an area of 720 square miles The permanent population at the Census of 1931 was 393 418 made up of Indians Europeans (mainly French) and natives of mixed descent

Mauritius was discovered between the years 1507 and 1528 by the Portuguese but they never formed any settlement on it The Dutch visited it in 1598 and named it Mauritius in honour of the Stadtholder Prince Maurice of Nassau In 1644 they established a small colony on the shore but in 1710 they abandoned the island and in 1715 the French took possession of it and changed the name to Ile de France Under the French it became a great centre of trade but in 1789 the seat of French Government in the East was removed to it from Pondicherry and it was taken by a British force in 1810 The French language and French law have been preserved under British rule when the ancient name Mauritius was restored

Of the total cultivated area of 170 165 acres 134 915 are under sugar 20 000 under fibre and 15 250 under other crops the necessaries of life have all to be imported from abroad Rice and grain are obtained from India flour from Australia and India, oxen from Madagascar and minor imports from South Africa and elsewhere 82 per cent trade of the island is with Great Britain and British Dominions Being just within the tropics it has a hot climate but, except in Port Louis and some of the low lying districts, it is not unhealthy The island is subject to cyclonic disturbances and a hurricane in 1892 was particularly severe a cyclone lasted from March 5 to 7, 1930 and did considerable damage to sugar plantations and buildings

There is an excellent harbour on the N W coast, on which the capital Port Louis, stands and the annual trade of the island passes entirely through Port Louis The shipping entered and cleared, in 1931 amounted to 1 062 466 tons In 1931 there were 144 miles of railway (120 of 4 ft 8½ in gauge and 24 of 2 ft 6 in) 59 post offices, 49 telegraph offices and 10 telephone offices in the island, with 438 miles of telegraph including block telegraph for the railway, and 230 miles telephone wires (Government)

The Government is administered by a Governor, aided by an Executive Council of four official members and of such other persons in the service of the Government as the Governor through instructions of the Secretary of State may from time to time appoint and a Legislative Council of 27 members, eight being *ex officio* nine nominated by the Governor and 10 elected by a moderate franchise Port Louis has two members and each of the country districts one

The inhabitants of European descent are mostly Roman Catholic Education has two branches —(1) *Superior or Secondary Instruction*, to which is attached the Government Royal College and the Associated Schools, (2) *Primary Instruction*, consisting of the Government schools and the grant in aid schools The estimated expenditure on education for 1932-33 is Rs. 1,348,729

DEPENDENCIES OF MAURITIUS.

(1) RODRIGUES 350 miles north east of Mauritius Population (Census 1931) 8,202 Area, 40 square miles Cattle beans, salt fish, and goats are the principal exports The island is under the administration of a magistrate from Mauritius who takes his orders from the Governor of Mauritius
Magistrate R Blouard (*acting*) Rs 7 200.

(2) OTHER DEPENDENCIES. Most of the scattered groups of coral islands belonging to Great Britain in the Indian Ocean are administered by the Mauritius Government being visited periodically by two magistrates, whose duty it is to inquire into the condition of the labourers, and settle any disputes which may be referred to them The chief product is coco nut oil The most important is Diego Garcia (pop 1921, 445), one of the Chagos Archipelago, which lies on the direct route from the Red Sea to Australia, and possesses a good harbour The total population of the Other Dependencies (1931) is 1,457

Transit from London to Mauritius, 30 to 35 days.

NIGERIA

The Colony and Protectorate of Nigeria includes the territories situated on the Bight of Benin between Dahomey on the west and the Cameroons on the east. The Protectorate (Headquarters Lagos) is in two main divisions, the Northern and Southern Provinces, coinciding with the former Protectorates of Northern and Southern Nigeria The area of the whole territory (including the portion of the Cameroons under British Mandate) is about 372,674 sq miles, and the population is 18,765,790.

By Order in Council of Nov 1922 (amended 1928) there is a Legislative Council for the Colony and the Southern Provinces of the Protectorate. The Legislative Council consists of the Governor as

President, 27 official members, 3 nominated official members, 3 elected members representing the municipal area of Lagos (Dr C C Adeniyi Jones Eric O Moore and F A Doherty), 1 elected member representing Calabar (C W Clinton) and 14 nominated unofficial members. The Governor continues to legislate for the Northern Provinces.

The chief industry is agriculture and crops consist of cotton cocoa ground nuts kola nuts, maize, guinea corn millet, rice coffee, yams cassava, and tobacco. The export trade relies mainly upon certain staple articles of great value principally palm oil and kernels ground nuts cocoa cotton lint, and tin. The Udi coalfields are of great extent and the coal is of excellent quality. A railway is in operation comprising (1) a Western line from Lagos to Kano (704½ miles) crossing the Niger by bridge at Jebba with branches from Kano to N Guru (143 miles) Minna to Pato (111 miles), from Zaria to the Bauchi tin fields (Jos) (133 miles light railway) from Zaria to Kauia Namoda (137 miles) and from Ifo to Idogo (27 miles) (2) an Eastern line (569 miles) from Port Harcourt to Kaduna on the Western Railway crossing the Benue by train ferry at Makurdi with a branch line connecting from Kafanchan junction (mile 458¼) with the tinfields (Jos) 62¾ miles. Centres of trade are Lagos Abeokuta Ibadan, Oshogbo Illorin Zaria, Kano Onitsha Lokoja, Warri Bonny Sapele, Calabar Opobo Forcados, and Port Harcourt.

The principal imports (1931) were cotton goods (£1 556 308) provisions, spirits hardware cutlery, cycles, kerosene tobacco, building material, soap, motor cars and lorries motor spirit, cement and bags and sacks. The principal exports were palm kernels (£2 132 345), palm oil (£1 541 681) tin ore (£906 185) cocoa (£1,093 254) ground nuts (£1 510 691) hides and skins (£725,665) and cotton lint (£152 812). The total imports from the British Empire were £4,999,155 in 1931, and from U S A £584,490.

NYASALAND PROTECTORATE.

This country was proclaimed a British Protectorate on May 14 1891. The Protectorate comprises the western shore of Lake Nyasa and the country southwards nearly to the Zambesi. The population of the Protectorate (Dec 31 1931) was 1 502 283 including 1 910 Europeans and 1 537 Asiatics, and it has a total land area of 37 596 square miles.

The principal exports are tobacco, cotton, chillies coffee, ground nuts fibre and tea. The cultivation and export of tobacco is considerable, tea, cotton and fibre are also exported in fair quantities. The principal imports are soft goods provisions and hardware. On Lake Nyasa there are three steamers. A railway from Port Herald (the 'inland port" of the Protectorate) to Blantyre (113 miles) is open for traffic. An extension from Port Herald to Chindio (the terminus of the Central Africa Railway) on the Zambesi (61 miles) was opened in 1915. The Trans Zambesia Railway, from Beira to Muraça (on the southern bank of the Zambesi River) was opened in April 1922 the terminus is opposite to Chindio, and the line (174 miles) thus establishes direct railway communication between Beira and Blantyre. A further extension to Lake Nyasa is under construction. Main roads and carrier roads are open all over the Protectorate, the total mileage being 2,666. A road from Salisbury to Blantyre *via* Tete (Portuguese E Africa) is open and is freely used during the dry season.

Mails to and from England are despatched every week *via* Cape Town and Beira. Between Beira and Europe the means of communication are the Union Castle Mail S S Co, Messrs Rennie's Line *viâ* Natal, the British India Steam Navigation Co and other lines. The Protectorate is connected by telegraph overland with the Cape *viâ* Salisbury. The telegraph lines extend northwards as far as Tukuyu, in Tanganyika.

The chief towns are Blantyre (population about 600 Europeans and 7,000 natives), Limbe (near Blantyre), and Zomba, the headquarters of the Government

PACIFIC ISLANDS

High Commissioner, His Excellency Sir A G M Fletcher K C M G C B E £1,200 (*In addition to £3 000 as Governor of Fiji, and allowance of £150 as Consul General for Western Pacific*)
Secretary to High Commission, H H Vaskess (*House Allowance £75*) £700 to 800
Chief Judicial Commissioner, Capt M H Anderson C B E, K C R N (*ret*) 400 (*In addition to £1 200 as C J of Fiji*)

(1) *The British Solomon Islands*, protected since 1893, consist of Guadalcanal, Malaita San Cristoval, New Georgia, Choiseul Ysabel, and other islands situated east of New Guinea, with a total area of about 15,000 square miles and a population (1931) of 478 Europeans, 173 Asiatics, and 93,415 natives The *Santa Cruz Group* and several other islands were incorporated in the Protectorate in 1898 and 1899 and in 1900 Choiseul and Ysabel, with the islands in Bougainville Straits and Lord Howe's Group, were transferred by treaty from Germany The revenue in 1930–31 was £62,728, and the expenditure £67,816, exports 1930–31 £304,310, imports, £215 269 The seat of government is Tulagi
Resident Commissioner, Francis Noel Ashley (and £150 allowances) £1,200 to £1,400
Secretary to Govt, N S B Kidson £500 to £600

(2) *The Gilbert and Ellice Islands* formerly a Protectorate were formally annexed to the Empire in November 1915 The Gilbert Group, situated between 4° N and 3° S latitude and 172° and 177° W longitude, consists of 16 islands, with several small islands or islets depending upon them and the Ellice Group, between 5° S and 10½° S latitude and 176° E and 179 58° W longitude consists of nine islands. Ocean Island (or Paanopa) in lat 0°52 S and long 169° 35 E, which is the seat of government, was proclaimed British in 1900 Total area, 180 square miles population (1931) 266 Europeans, 730 Asiatics (698 on Ocean Island) and 32,813 Pacific Islanders Revenue (1929–30), £67 105 expenditure, £59 324, imports (1929–30), £148,779, exports £213 328

Fanning Island in lat 3° 30 N, long 159° 13′ W, and Washington Island, 66 miles N W by W of Fanning Island Pop, 37 Europeans, chiefly in connexion with Pacific cable station, and 399 Gilbert Islanders in copra industry The islands were included in the Gilbert and Ellice Colony by an Order in Council of Jan 27, 1916, and Christmas Island was included in 1919
Resident Commissioner, A F Grimble C M G, M A (and £100 allowances) £800 to £1,000

(3) *The Tonga or Friendly Islands* —A protectorate over the Tonga Islands Kingdom was proclaimed May 18 1900 These islands are situated in the Southern Pacific to the E S E of Fiji and 390 miles therefrom with an area of 385 square miles and population (1931) of 482 Europeans 265 half castes, 27 700 Tongans, and 392 others—total 28 839 The limits of the group are between 15° and 23° 30′ S and 173° and 177° W Nukualofa on the Island of Tongatabu, is the seat of government The present Queen Salote succeeded the late King George Tubou II in 1918 Soil generally is fertile, the principal export is copra Two of the smaller islands disappeared owing to a tidal wave in June, 1919 Revenue 1930–31, £71,672, expenditure £78,660 imports (1930) £148,306, exports, £169 610 The total shipping entered and cleared in 1930 was 163 023 tons
Agent and Consul, J S Neill, B A B L £800 to £1,000 (and duty allowance £200)

(4) *The Phœnix Islands* (McKean, Gardner Birnie Hull, Enderbury, Phœnix, Canton, and Sidney), between 2° 30 and 4° 30′ S and 171° and 174° W

(5) *Pitcairn Island*, situate in lat 25° 3′ 30″ S, long 130° 8′ 30″ W Pop (1931) 200, descendants of the mutineers of H M S *Bounty*
Chief Magistrate, Richard Edgar Christian

(6) *The New Hebrides Group*, about 500 miles west of Fiji and 250 miles north east of New Caledonia, is under the administration of British and French officials as provided for by an Anglo-French Convention of 1906 and a protocol of

1924 The population is estimated at 56,564 (British Nationals 227 French Nationals 797, Foreigners 30, Asiatics and Protected French Subjects 5,510, Natives, 50,000) Principal products, copra, coffee, cotton, cocoa, maize wool, sandalwood and shell Joint revenue, 1930 £20,152, expenditure £28 140 Total imports, 1930, £157,541, total exports £250,520 A British steamer runs regularly between Sydney and the group, and French steamers from Sydney and New Caledonia there is a two monthly service with France, *via* Panama

British High Commissioner, Sir A G M Fletcher, K C M G C I E
French High Commissioner, M Jore (*acting*)
British Resident Commissioner G A Joy (*Allowances* £100) £800 to £1,000
French Resident Com M Cullotti
President of Joint Court, Count de Buena Esperanza, K C M G
British Judge A de J Carey
French Judge, M Sachon

(7) There are also a large number of scattered groups and isolated islands

PALESTINE

Palestine extending from the Mediterranean on W to an eastern boundary formed by the Wady Arabah, Dead Sea River Jordan and Sea of Tiberias, and from the Egyptian frontier on S to the French Mandatory Sphere of the Great Lebanon on N, includes, in addition a large area E of the Jordan and S of the Yarmuk

Palestine is under British administration since the conquest of the country by the forces of General Allenby in 1918 The Administration is conducted under a Mandate from the League of Nations which entered officially into force on Sept 29, 1923 The country consists of a W maritime lowland, the mountain region of Judea (which forms the backbone of the district) and, on the E the depression through which the Jordan winds its way from the Sea of Galilee (Tiberias) to the Dead Sea The *Dead Sea* 1,292 feet *below* the level of the Mediterranean, is 46 miles long and has an average width of 8½ miles, it receives the waters of the Jordan and of six other rivers, and has no outlet, the surplus being carried off by evaporation Its water is intensely salt and has a specific gravity one sixth greater than water, with 24 per cent of salt (The Great Salt Lake of Utah, U S A, is 80 miles long and 30 miles wide, at 4,218 feet *above* mean sea-level, and contains 25 per cent of salt) The area of Palestine W of the Jordan is about 9,000 square miles, with a population (census Oct 23, 1922), of 757,182, of whom 590,890 are Muhammadans, 73 024 Christians, 83,794 Jews, and 9,474 members of other faiths The estimated population on July 1, 1929, was 826,064, not including Beduin, who are about 103,000 in number The ~~~ estimate includes 80,225 Christians, 572,443 Moslems, 154 330 Jews and 9 066 others Since 1919 about 60,000 immigrants (mostly Jews) have settled in the country In 1927 the Jewish immigrants came principally from Poland (35 per cent), Russia (20 per cent), Rumania (6 per cent) In 1927, 2,713 Jews (956 men, 1,140 women, and 617 children) entered Palestine as immigrants, in the same period, 5,071 emigrated from Palestine, the net decrease thus being 2,358

Palestine is divided into 8 administrative districts, under District Commissioners, and the Jerusalem Division under a Deputy District Commissioner English, Arabic and Hebrew are the official languages of the country The chief town, *Jerusalem*, had been in Moslem hands since 1244, and under Turkish rule since 1517, until it surrendered to General Allenby on Dec 9, 1917 to be entered the next day by British troops The city, which occupies so prominent a place in the affections of the Jewish, Christian and Muhammadan peoples, had a population in Oct, 1922 of 62,578 The Church of the Holy Sepulchre at Jerusalem is visited annually by large bands of Christian pilgrims, principally of the Orthodox and Coptic churches The site of Solomon's Temple is occupied by the Dome of the Rock, sometimes erroneously called the Mosque of Omar, which contains a relic of Mahomet and the "Holy Rock, the sacrificial altar of Abraham A conflict of claims, Jewish and Arab, as to rights at the *Wailing Wall* of the Haram al Sharif at Jerusalem has provided opportunities for disorder and the Government submitted proposals to the Council of the League of Nations for a Commission to define and determine the rights and claims In Jan, 1930 the Council appointed a Commission, as requested by the British Government *Bethlehem* the scene of Christ's Nativity is 5 miles S of Jerusalem The Church of the Nativity at the E end of the present village, is reputed to be the oldest Christian church in existence King David was also born in Bethlehem *Nazareth*, about 25 miles S W of the Sea of Galilee, had a population of 7,424 in 1922 Other large towns are Jaffa (47 709) Tel Aviv (40 000), Gaza (17 480), Acre (6,420), and Haifa (24 634) An archaeological museum constructed, equipped and endowed at the cost of Mr John D Rockefeller, Jr, is in course of erection at Jerusalem

The railway system of Palestine consists of five sections *Haifa Haifa*, continuing southward to Kantara to join up with the railways of Egypt, passengers and freight being transported across the Suez Canal at Kantara, *Haifa Acre Samakh*, continuing beyond Samakh to Damascus in the French mandated territory of Syria *Jaffa Lydda Jerusalem*, and *Nablus Afule Tulkarem* The main junction of the Government Railways is at Lydda, the general offices being at Haifa In 1929 the kilometrage operated (excluding 113 kilometres Ma an Mudawara section) was 1 194 kilometres, the freight handled amounting to 569,285 tons, and the passengers carried numbering 1 329 475 The gross railway revenue was £P655,143 and the working expenses £P586 035

The chief ports are Jaffa, Haifa and Acre Harbour construction at Haifa was begun in 1929 and is now in progress In 1929, 2,663 vessels (1,975 883 tons) engaged in foreign trade entered the ports, and 2,672 (1,999,438 tons) cleared There are branches of Barclay's Bank, Anglo Palestine, Banco di Roma, and Imperial Ottoman Bank in the main towns.

Although economic conditions are still primitive, modern methods are making headway, and there are good prospects of development and progress The country is generally fertile, and cereals wine, olives and various fruits are produced, while sheep and goats thrive in the low lands, and in the mountains in time of drought In 1928-29 there were 227 Government schools with 19,449 pupils, 168 Christian schools with 15,139 pupils, and 98 Jewish schools with 9,719 pupils There are also training colleges

for teachers technical, trade and agricultural schools and a Hebrew University (with faculties of Humanities and Science) which draws about half its students from Palestine and the remainder from Poland, Russia and Rumania

TRANSJORDAN

Emir H H Abdullah G B E K C M G, second son of King Hussein of Hejaz *appointed* April 1921

Transjordan consists of the 4 Districts of *Maan Kerak Balqa* and *Ajlun*, and is under the same mandate as Palestine It is bounded on the west by Palestine, on the north by Syria on the east by Iraq and on the south by Hejaz and Nejd and has access to the Red Sea at Akaba No census has yet been taken, but it is estimated that the total population is 300,000, of whom 130,000 are settled, 120 000 semi nomads, and 50 000 nomads, the great majority are Moslems The area is unknown, as the boundaries are not definitely determined The extreme west of the country is fertile, and agricultural and pastoral industries are carried on, but the rest of the country is almost entirely desert. The Hejaz Railway runs (with the exception of the first few miles) through Transjordan territory from Deraa to Kalaat el Mudowwara where it enters Hejaz territory and continues to Medina There is a Legislative Council of 6 official and 16 elected members constituted in 1929

RHODESIA

The total area of Rhodesia is about 440 000 square miles and the total population is nearly 2 500 000 (1931) The territory is named after *Cecil Rhodes*, the founder of the British South Africa Company, and extends from Lake Tanganyika and the Congo watershed in the north to the Limpopo River in the south

SOUTHERN RHODESIA

Southern Rhodesia is that part of the territory named after Cecil Rhodes lying south of the Zambesi River the political neighbours being Northern Rhodesia and Portuguese East Africa on the N the Transvaal and Bechuanaland on the S and W and Portuguese East Africa on the E The total area is 150 344 square miles and the population (1931) 1 109 018 of whom 49 910 are Europeans The native population is 1 055 600 with 4 108 Asiatics and other coloured persons including those of mixed race The total number of European births in 1931 was 2,182 (a rate of 23 58 per 1 000) and of deaths 417 (8 32 per 1 000) the marriages numbering 542 (21 72 per 1 000) Responsible Government was instituted in Southern Rhodesia on Oct 1 1923. The Government is administered by a Governor appointed by the Crown with an Executive responsible to the Legislature which consists of a Legislative Assembly but that body may pass a law constituting a Legislative Council, in addition

The laws in force in the Cape Colony up to June 10, 1891 were adopted for Southern Rhodesia so far as they are applicable Subsequent legislation has been by Proclamation of the High Commissioner by ordinances passed by the Legislative Council, and by Acts of the Legislature Municipal self government has been established in Salisbury, Bulawayo Gwelo, Umtali and Gatooma.

The main arteries of communication are the Rhodesia and the Mashonaland Railways, the total mileage of which at Sept. 30, 1932, was 2,669 miles (including 1,348 miles operated within the boundaries of Southern Rhodesia). The former is a continuation of the line from Cape Town to Vryburg, *viâ* Kimberley, and was opened to Bulawayo in November, 1897, the distance from Cape Town being 1,362 miles. A line connecting Bulawayo with Salisbury

(301 miles) was completed in Oct 1902. From Salisbury the Mashonaland Railway runs eastwards to Umtali and is continued by the Beira Railway Companies to the port of Beira (Portuguese) a total distance of 374 miles. The main northern extension of the railway was constructed from Bulawayo. It taps the Wankie coalfields and crosses the Zambesi at the Victoria Falls (282 miles). Branch lines primarily constructed in the interests of established mines are:—Salisbury Sinoia (83 miles) Mt Hampden Junction Shamva (73 miles) Gwelo Selukwe (24 miles) Bulawayo West Nicholson (104 miles) Gwelo Umvuma Victoria (123 miles) and Somabula Shabani (63 miles). There is also a short branch line Bulawayo Matopos. To provide facilities for the transport of passengers and goods in areas in process of development not directly served by existing railways a system of road motor services has been organised. In September 1932 routes covering 1 552 miles were in operation.

Southern Rhodesia is rich in mineral deposits and it abounds in traces of the ancient gold workers. The first regular crushing returns began in September, 1898 and the gold produced to December 31 1931 was of the value of £77 372 019. The output for the year ended December 31 1931 was valued at £2 273 875. Silver copper coal diamonds lead chrome iron asbestos mica platinum corundum and other minerals have also been produced in considerable quantities. Though the climate is sub tropical the average altitude makes it well suited for European occupation and it possesses all the essential characteristics and facilities necessary for successful agriculture and cattle raising and for the cultivation of European fruit trees cereals and vegetables in addition to tobacco cotton, and the indigenous products of the country. The staple crop is maize and tobacco cotton and citrus fruits are largely exported. The total area under cultivation in 1931 was 437 453 acres (maize 273 372 tobacco 16 145, cotton 8 979). The export of citrus fruit in 1931 was 155 449 boxes. Cattle (2 582 460 on Dec 31 1931) thrive well and the annual shows at Bulawayo and Salisbury are regarded as among the premier shows of beef cattle in South Africa. The exports of cattle in 1931 were 10 280 head. Dairy products sold include butter 1 819 920 lb. milk 1 182 366 gallons cheese 146 261 lb. and eggs 845 640 dozen. In addition to the main industries of mining and farming there are creameries cotton ginneries bacon factories oil soap and candle factories cement and lime works and many other undertakings. Land is cheap and may be had on favourable terms. Considerable efforts have been made by the Government during recent years to increase the number of new settlers. During the years 1925–27 settlers and dependents numbered 941 (396 under Empire settlers scheme and 545 from High Commissioner's Office etc.). In addition a further 1 004 men and youths obtained situations on the land in 1925–27. This scheme is (1932) temporarily in abeyance.

Complete courses of primary and secondary education up to the standard of matriculation of the South African Universities are provided in the Government schools. For European children there are 87 Government and Government aided schools (1 vocational 12 secondary and 74 primary). Children in rural areas, where the population is too scanty for a school, are provided for by Government grants to tutors or governesses. The total number of European children in all types of schools at the end of 1931 was 9 213. There are seven schools for children of mixed race, with 706 pupils, and native education conducted by mission agencies with Government aid is provided in 1 422 schools with 107 122 pupils. Grants in aid of native education in 1931–32 amounted to £50,093. The total educational (other than native) expenditure being £278 378 in the calendar year 1931.

SALISBURY the capital is situated on the Mashonaland plateau altitude 4 880 ft. (total population census 1931 28 800 including 9 637 whites). BULAWAYO the largest town in Matabeleland altitude 4 460 ft. (total population of 31 000 including 11 818 whites). Other centres are Umtali Gwelo Gatooma Que Que Wankie, Fort Victoria Selukwe and Hartley.

NORTHERN RHODESIA.

Northern Rhodesia lies to the North of the Zambezi its political neighbours being Tanganyika and the Belgian Congo on the north Nyasaland and Portuguese East Africa on the east, Southern Rhodesia and South West Africa on the south and Portuguese West Africa on the west. The country comprises an area of 287 950 square miles and with the exception of the Luangwa Zambezi and Kafue Valleys the altitude in most places exceeds 4,000 feet. The permanent European population in May, 1931 was computed at 13 846 the native population was estimated (Dec. 31 1931) at 1,372,235. Much of the country is suitable for farming, and contains large areas of good arable and grazing land. Over 2,500,000 acres of land are under settlement by white farmers. The chief crop grown is maize. Other crops are tobacco coffee wheat, oil seeds, and

* Excluding expenditure out of loan funds.

citrus Stock raising is carried on by many farmers The native owned cattle in the territory is estimated at 353 062 and European owned 99,144 Copper, zinc vanadium, lead, gold, mica and coal have been discovered, and scientific prospecting is being carried on over large areas The copper deposits have attracted much capital, the Roan Antelope and the Nkana mines having commenced output while others are expected to follow The copper mines of Northern Rhodesia appear likely to produce a large proportion of the world's supply, while zinc and vanadium production are on a considerable scale Many species of game are to be found, and good sport at a moderate cost is available for the big game hunter but the area is now open for hunting are somewhat restricted The trunk line of the Rhodesia Railway system traverses Northern Rhodesia from Livingstone to the Belgian Congo border The Zambezi Kafue, Chambesi and other rivers are navigable for a considerable portion of their courses There are 44 post offices 18 of which are money order offices The main telegraph and telephone route lies alongside the railway from Victoria Falls Bridge to the Congo border with branches from Ndola to Luanshya Ndola to Nchanga and from Nkana to Mufulira Fort Jameson is connected with the Nyasaland system and Kasama and Abercorn with the Nyasaland and Tanganyika systems Aeronautical wireless stations at Mpika and Broken Hill are equipped for communication with aircraft in flight (900 metres wave length) as well as for point to point communication on short wave Short wave equipment has been installed at Fort Jameson Livingstone and Mongu Lealui All wireless stations maintain a public service and a licensed station at Kansanshi Mine is open for restricted public service

The administration of the territory is in the hands of a Governor appointed by the Crown assisted by an Executive Council of five official members There is a Legislative Council of 16 members, with a majority of official members The seat of Government is at Livingstone near the Victoria Falls, on the Zambezi The country is divided into 9 Provinces for fiscal and administrative purposes The most important centres are Livingstone Broken Hill Fort Jameson Lusaka Mazabuka Abercorn Kasama, Fort Rosebery Ndola Luanshya and Mongu Lealui

ST HELENA

probably the best known of all the solitary islands in the world is situated in the South Atlantic Ocean 955 miles S of the Equator, 760 S E of Ascension 1 140 from the nearest point of the African Continent 1 800 from the coast of S America and 4 477 from Southampton in 15 55 S lat and 5 42 W long It is 10½ miles long 6½ broad and encloses an area of 47 square miles with a population (Census 1921) of 3 747 St Helena is of volcanic origin and consists of numerous rugged mountains the highest rising to 2 700 feet interspersed with picturesque ravines Although within the tropics the south east trades keep the temperature mild and equable St Helena was discovered by the Portuguese navigator Juan de Nova Castella, on May 21 1502 (St Helena's Day) and remained unknown to other European nations until 1588 It remained uninhabited until the Dutch colonised it circ 1645 The English East India Company seized it in 1651 but it was retaken by the Dutch in 1672 In 1673 it was again taken from the Dutch and was held by the Company who had obtained a charter for its possession from Charles II until 1834 (with the exception of the period 1815 to 1821 during which the British Government held it as a residence for the Emperor Napoleon who died there May 5 1821), when it was ceded by them to the Crown It was formerly an important station on the route to India but its prosperity decreased after the cutting of the Suez Canal A phormium (flax fibre) and lace making industry has been established St James's Bay on the north west of the island, possesses a good anchorage

Ascension (Resident Magistrate E A Willmott) an isolated island in the South Atlantic (3 417 miles from Plymouth 760 from St Helena and 900 from Cape Palmas on the African coast), is of volcanic origin, the peak rising to the height of 2,820 feet, situated 7° 55 55 ′S lat and 14° 25 5 ′ W long It is said to have been discovered by a Portuguese named Joao de Nova Gallego, on Ascension Day, 1501 and two years later was visited by Alphonse d'Albuquerque, who gave the island its present name Its extreme length is 7½ miles, and extreme breadth 6 miles, with an area of about

38 square miles, and, being situated in the heart of the S.E trade winds, its climate is dry and salubrious up to 2,800 feet, but above that height to its limit it is damp and foggy It remained uninhabited till 1815 when the English took possession of it in 1931 the population was about 150 The island was administered by the Board of Admiralty until Oct 27 1922, when by Royal Letters Patent it became a Dependency of St Helena and was transferred to the Colonial Office Georgetown, the capital is situated in a small bay on the N W coast Ascension is visited by the sea turtle from January to May which lay their eggs in the sand the sooty tern or wide awake use the island as a nesting place about every eighth month

The government of St Helena is administered by a Governor, with the aid of an Executive Council of 4 members the Governor alone making all ordinances

SEYCHELLES

The Seychelles Islands, in the Indian Ocean, which number altogether 90, were occupied by the French about 1742, captured by a British ship in 1794, and were finally assigned to Great Britain in 1820. By letters patent of Sept 1903 they were erected into a separate colony The principal islands of the group are Mahé, Praslin, Silhouette, Curieuse, and La Digue, and the total area of the islands, with dependencies, is estimated at

156 square miles, of which Mahé occupies nearly 56 square miles; the most important of the dependencies are the Amirantes, Farquhar Islds., Coetivy, Aslove and the Aldabra Group. The population was estimated (Dec. 31, 1932) at 27,786. At the census of 1931 the population of Mahé was 21,977, Praslin 2,476, La Digue, 1,225, other islands 1,736. Victoria, the capital, on the N.E. side of Mahé, has an excellent harbour, and the lighthouses in the vicinity have been fitted up with modern automatic lights. Although only 4° S. of the Equator. the islands are healthy, the death-rate in 1931 being 13·53 per 1,000. There are 27 Roman Catholic and Church of England primary schools; there are also 2 secondary schools.

The principal exports are copra, vanilla, cocoanuts, cocoanutoil, tortoise-shell, cinnamon, essential oils, soap, and guano. Aldabra, one of the dependencies of the Seychelles, and about 680 miles from Mahé, is famous for the gigantic land tortoises, whilst the unique double coco-nut, *Coco de Mer*, is found in Mahé, and, in larger quantities, in Praslin, where there is a famous valley. The Governor is assisted by an Executive Council of 4 members (2 *ex-officio* and 1 nominated official and 1 unofficial), and by a Legislative Council of 3 official and 3 unofficial members.

SIERRA LEONE.

The peninsula of Sierra Leone, situated on the West Coast of Africa, was ceded to Great Britain in 1787 by the native chiefs for the purpose of being used as an asylum for the many destitute negroes then in England. At a somewhat later date the Colony was used as a settlement for Africans from North America and the West Indies, and great numbers of Africans rescued from slave ships have from time to time been liberated and settled there. The Colony has a coast-line of 210 miles, with an estimated area of 4,000 square miles, and a population (1931) of 98,422, of whom 420 were resident Europeans. Of the rest, more than half are the descendants of liberated Africans, while the remainder belong to the neighbouring tribes; a babel of tongues is thus to be heard in the streets of Freetown. The total area of the Colony and Protectorate is about 30,000 sq. miles, and the total population about 1,770,000. In 1896 a Protectorate was declared over the territory adjoining the Colony to the northward and eastward. The extreme depth of the Protectorate from north to south is about 210 miles, lying between 7° and 10° N. lat., and the extreme breadth from east to west is 208 miles, between 10' 25' and 13° 16' of W. long. Its estimated area is 25,925 sq. miles, and its population about 1,692,636. For administrative purposes the Protectorate is divided into 2 Provinces, under Provincial Commissioners, assisted by 2 Senior District Commissioners, and 28 District and Assistant District Commissioners. The principal peoples are the Limbas and Korankos in the north, the Temnes in the centre, and the Mendis in the south.

The principal exports are palm kernels, kola nuts, palm oil, and ginger; piassava, hides, and rice are also exported. The value of the palm kernels exported in 1931 reached £449,742. The chief imports are cotton goods, coal, apparel, hardware, provisions, and tobacco. Freetown, the capital, possesses the finest and most important harbour in West Africa.

A railway runs inland from Freetown to Pendembu, a distance of 227½ miles, and a branch line 83 miles in length extends in a north-easterly direction from Bauya to Makeni. Motor roads are now being opened up in the Colony and Protectorate, in the Colony connecting the various towns and villages with the port, and in the Protectorate as feeder roads to the railway. There are (1931) 1,929 miles of combined telegraph and telephone service.

Sierra Leone is a Crown Colony, possessing a Legislative Council partly elected and partly nominated by the Crown, with full power to legislate for the Protectorate as well as for the Colony. The Governor is advised by an Executive Council.

SOMALILAND

(The Somaliland Protectorate)

Somaliland occupies the North Eastern Horn" of the African continent jutting out into the Indian Ocean along the south of the Gulf of Aden, and is divided between Great Britain, France and Italy while the interior is subject to Abyssinia The British Protectorate declared in 1884 contains about 68 000 sq miles its boundaries being defined by treaties with Abyssinia, France and Italy, the northern coast as far as 49° E and the 8th parallel of N latitude are the limits on the north and south The population, mainly consisting of Somalis, a Muhammadan people is estimated at 344 700 The Protectorate garrison is now confined to a Camel Corps 400 strong and a Police force of 550, the Dervish power having been finally broken in 1920. The chief products of British Somaliland are cattle sheep goats hides skins and gum There is wireless communication with Aden The Protectorate was transferred to the administration of the Colonial Office on April 1 1905

Chief Clerk, H L Smith 750

Auditor T A Williams 1,100

The Office of High Commissioner in and for South Africa was created by Letters Patent in 1878 In 1879 a second High Commissioner was appointed, to whom was assigned South Eastern Africa including Zululand and Amatongaland, but this arrangement ceased in 1881, when a Special Commissioner for Zulu affairs was appointed who was also Governor of Natal (which now includes Zululand and Amatongaland) The High Commissioner for South Africa, who under the Commission of 1889 was the officer for the time being administering the Government of the Cape, now represents the Crown in all matters occurring in South Africa beyond the limits of the Union and of Southern and Northern Rhodesia The High Commissioner is Governor of Basutoland, and supervises the affairs of the Bechuanaland Protectorate and of Swaziland Prior to October 1 1923 Southern Rhodesia was administered by the British South Africa Company and the High Commissioner exercised certain powers of control under the Southern Rhodesia Order in Council 1898 Upon the establishment of responsible government the Order in Council 1898 lapsed but under the Southern Rhodesia Constitution Letters Patent certain of the High Commissioner's previous powers and functions in regard to native administration were reserved to him and the Southern Rhodesia Order in Council, 1920, whereby the Native Reserves were vested in the High Commissioner, was continued in full force and effect On April 1, 1924 the functions which the High Commissioner had exercised in Northern Rhodesia during the British South Africa Company's administration of that Territory were with the assumption of the administration by the Crown, transferred to the Governor of Northern Rhodesia

The Office of High Commissioner which was formerly held by the Governor of Cape Colony, was, by a Commission dated October 6 1900, vested in Lord Milner and by a similar Commission, dated March 15 1905 in Lord Selborne During the years 1910 1930 the Office was vested by separate Commission in the successive Governors General of the Union of South Africa This arrangement ceased upon the termination of the period of office of Major General the Earl of Athlone K G Sir Herbert Stanley, G C M G , was then appointed by His Majesty to be High Commissioner for South Africa, and he holds that office concurrently with the office of High Commissioner in the Union of South Africa for His Majesty's Government in the United Kingdom

BASUTOLAND

(The Territory of Basutoland)

Basutoland is an inland Native Territory of South Africa, bounded North and West by Orange Free State, East by Natal, and South by Cape Colony, with an area of 11,716 square miles The Census of 1921 showed 495,937 natives and 1,603 whites, 1,069 coloured and 172 Asiatics

The territory is well watered and enjoys a good climate It is one of the finest grain producing districts in South Africa, and the abundant grass enables the Basuto to rear immense

herds of cattle, sheep and goats, the mohair produced being of excellent quality The Maluti Mountains, forming a part of the great Drakensberg chain, occupy most of the country, which is elevated, broken, and rugged Basutoland has been called "The Switzerland of South Africa and contains amongst its natural wonders the *Maletsunyane Falls* (670 feet)

The Territory is governed by a Resident Commissioner under the direction of the High Commissioner for South Africa, the latter possessing the legislative authority which is exercised by proclamation The chiefs adjudicate on cases between natives, with a right of appeal to the magistrates' courts, where all cases between Europeans and natives are brought The final court of appeal in the Territory is the Resident Commissioner's Court, appeal from which lies direct to the Privy Council The revenue is derived from Customs, native tax, income tax on Europeans, post office and licences Telegraph offices have been opened at Butha Buthe Leribe, Peka, Teyateyaneng, Maseru, Morija Mafeteng, Mohale's Hoek, Quthing and Qacha's Nek There are 597 native schools, with an average attendance (1931) of 41,366, a large proportion being in the schools of the French Protestant Mission, there are also 9 white schools The education vote for 1931–32 was £48 955 The chief articles of export are wool and mohair, cattle and hides the imports being chiefly blankets groceries and hardware

BECHUANALAND

(*The Bechuanaland Protectorate*)

The Bechuanaland Protectorate is a country of British South Africa, in the centre of the vast tableland stretching north to the Zambesi

The Protectorate is bounded on the south and east by the Cape and Transvaal Provinces of the Union, on the north and north east by Southern Rhodesia, the Zambesi and Chobe (Linyanti) Rivers, and on the west by South-West Africa. It is about 500 miles long and 550 miles broad, with a total area of about 275 000 square miles, the *Caprivi Zipfel* was attached to the Protectorate for administrative purposes by Proclamation (1922), but was re transferred to S W Afri a Sept 1, 1929. The population at the Census of May, 1921, was 152,983, of whom 1 743 were Whites, 52 Indians, 1,003 Coloured and 150 185 Natives

The climate is healthy during part of the year Malarial fever is prevalent during February, March, and April, but with ordinary precautions is not seriously detrimental to health The country is essentially pastoral, although Kaffir corn, mealies, beans, pumpkins and melons are sown, and when the rainfall is adequate crops are reaped Cattle thrive, and numbered 426 344 at the Census of 1921 Much of the country is thick bush The High Commissioner for South Africa has the power of making laws by proclamation for the Protectorate where he is represented by a Resident Commissioner The population is almost entirely a native one, the principal tribes being those of Tshekedi Regent during the minority of Seretse (Bamangwato), of Molefi Pilane (Bakgatla), of Kgari Sechele (Bakwena), of Bathoen (Bangwaketsi) of Seboko Mokgosi (Bamalete), and of Mathibe (Batawana)

The railway from Kimberley to Vryburg and Mafeking traverses the Protectorate on its way to Rhodesia There is a telegraph line from Cape Province through from Mafeking *via* Gaberones and Francistown to Bulawayo and Salisbury The chief European centres are Lobatsi, Gaberones, Francistown, and Serowe, whither the late Chief (Khama) and all his people moved in 1901 from Palapye The headquarters of the Protectorate Administration are at Mafeking, Cape Province

SWAZILAND

(*The Swaziland Protectorate*)

Swaziland (called by the natives *Kwa Ngwane*) lies between the Drakensberg and Lebombo Mountains in British South Africa. The Transvaal Province forms a boundary on the south, west and north, the eastern boundary being Zululand (Province of Natal) and Portuguese East Africa. The total area is 6,705 square miles, and the population (1921) 112,952, of whom 2,205 are whites, the remainder being

Ama Swazi Bantus (or Swazis) Estimated European population (1932) 2 725 Swaziland is divisible into three longitudinal regions the mountainous regions of the west, with an approximate altitude exceeding 4 000 feet, the Middle Veld, about 2 000 feet lower and the Low Veld, bounded on the east by the Lebombo Mountains, with an average altitude not exceeding 1,000 feet The country is well watered and healthy, the annual rainfall averaging 55 inches, the mean temperature being 68° Fahr (30°–90°). The soil is generally fertile, particularly so in the Low and Middle Veld The whole of the territory forms excellent grazing for cattle, and cattle ranching on a large scale has been commenced by several companies There were about 372 400 head of cattle in the territory at the end of 1931 In the winter season sheep are brought to Swaziland for grazing from the high table lands of the Eastern Transvaal

The agricultural products are, maize (the staple product) tobacco, millet, ground nuts, beans, pumpkins, and sweet potatoes Cotton growing from jassid resistant seed is becoming important The country possesses considerable mineral wealth, including gold tin coal, copper and asbestos During the year ended Dec 31 1931 77 tons of cassiterite in valued at £8 875 were exported

Mbabane, the headquarters of the Administration, is situated on the hills at an altitude of 4,000 feet There are townships in the districts at Bremersdorp Hlatikulu, Stegi and Goedgegun there are schools for Europeans at various centres

There is a daily South African Railway motor omnibus service between Breyton and Mbabane (89 miles) Bremersdorp and Stegi (43 miles) Piet Retief and Hlatikulu (57 miles), and Goedgegun to Hluti (33 miles) There are post offices, and telegraph and telephone offices at all the chief centres

STRAITS SETTLEMENTS

(*See* MALAYA)

THE SUDAN

The Sudan extends from the southern boundary of Egypt, 22° N lat to the northern boundary of Uganda, 3° 36′ N lat, and reaches from the French Sahara about 19° 10 E (at 22° N) to the north west boundary of Eritrea (Italian) in 38° 30′ E (at 18° N) The greatest length from north to south is approximately 1,300 miles, and from east to west 1,200 miles The northern boundary is the 22nd parallel of North latitude on the east lie the Red Sea, Eritrea and Abyssinia, on the south lie the British Protectorate of Uganda and the Belgian Congo, and on the west French Equatorial Africa The total area is about 1,008,100 sq miles, with a population of about 5 600,000, partly Arabs, partly Negroes, and partly Nubian of mixed Arab Negro blood with a small foreign element, including some 3,000 Europeans The Arabs and Nubians are all Muhammadans, as are some of the Negroes, but the latter are generally pagans The *Gamberla enclave* (within the boundaries of Abyssinia) is leased from the Abyssinian Government as a trading post. The *Nile* enters at Nimule, in Mongalla Province, as the *Bahr el Jebel*, and leaves the Sudan at Wadi Halfa From the Atbara confluence to the Mediterranean the river has a course of close on 1 600 miles and from its sources to the confluence its length may be reckoned at 2 400 miles giving a total waterway of 4 000 miles Between Khartoum and Wadi Halfa occur five of the six *Cataracts*, the remaining (first) cataract being in Egypt at Assuan

Government —The Sudan is administered by a Governor General aided since 1910 by a Council nominated from amongst the Officials of the Government All Ordinances and Laws are made by the Governor General in Council No duties may be levied on imports from Egypt, and duties on imports *via* the Red Sea ports may not exceed those levied in Egypt The Sudan is divided into 14 provinces (*Mudirias*) under governors (*Mudirs*) Each province is subdivided into districts with one (or more) District Commissioners in charge of each Native administrative officials are employed under the District Commissioners *Civil Justice* is administered by a Chief Justice and four puisne judges one of whom is also Registrar General of Lands There are also Province and District Judges who are usually the Governors and District Commissioners of Provinces but there are also District Judges who are professional lawyers in some of the more important centres. Appeals lie from the District Judges to the Province Judges or the High Court, and from the Province Judges and the High Court to the Court of Appeal which consists of three judges of the High Court The system of the law administered is "justice equity and good conscience" in all cases in which there is no special enactment There is no general code of civil and commercial law such as is in force in Egypt and many Continental countries The religious law of Islam is administered by the Mohammedan Law Courts in matters of inheritance, marriage, divorce and family relations generally amongst the Moslem population There are District and Province Courts under District and Province Kadis and a High (Mahkama) Court at Khartoum presided over by the Grand Kadi. *Criminal Justice* is administered chiefly by the Governors and District Commissioners and Mamours of Provinces and Districts all of whom are magistrates The Judges of the High Court and District Judges also have criminal jurisdiction as magistrates The more serious offences are tried by courts consisting of three magistrates, and many native notables have been made magistrates for the purpose of sitting as members of such courts The decisions of such courts require confirmation by the Governor of the Province or the Governor-General, who exercise powers similar to those of confirming officers in Courts Martial, and to them also appeals lie Courts of Sheiks or Chiefs in all parts of the country have varying powers of

limited jurisdiction in accordance with native customs. The Sudan is garrisoned by native troops, forming the Sudan Defence Force. A small garrison of British troops is quartered at Khartoum. The *Police* are locally enlisted and are under Provincial administration.

Education.—In addition to *khalwas* there are 87 *kuttabs* (vernacular schools) attended by 8,943 pupils, and 10 *primary schools*, where instruction is given in English as well as Arabic, attended by about 1,200 pupils, a *secondary school* at Khartoum (Gordon College), a *teachers training school* and *technical or trade schools*, at Omdurman, and Atbara. There are also 22 *elementary vernacular schools for girls*, and a *training college* for girls teachers.

Production.—The principal grain crop is *dura* (great millet), which is the staple food of the people in the Sudan, and is also used as cattle and poultry food elsewhere. Egyptian cotton has been successfully established, and increasing quantities are being produced annually. *The Gezira Irrigation Scheme* at present (1930) enables an area of 630,000 acres to be cultivated between the Blue and White Niles, one third of which is under cotton. The necessary water is stored by the Sennar Dam on the Blue Nile, about 170 miles south of Khartoum. Cotton cultivation in the irrigated area is managed by a syndicate, and is one of the largest cotton growing schemes in the world (198,000 feddans in 1930). The Sudan is the chief source of the world's supply of gum arabic. Natural salt fields on the Red Sea coast near Port Sudan supply the whole needs of the country and maintain an export trade with Abyssinia. Work has been commenced on a new scheme for the further expansion of salt production on a large scale in this area. Other products include sesame, senna leaves and pods, ground nuts, dates, hides and skins, and gold.

Communications.—The railways and steamers throughout the country are administered by a Government department. During the past few years nearly 500 miles of new railways have been built, while other transport has been revolutionised by the opening up of a net work of motor roads spreading all over the country during the dry season. In 1931 there were 1,597 miles of railways open for traffic. The gauge is 3 ft. 6 in. Since the opening of the eastern railway the Red Sea port of Port Sudan receives much of the trade which formerly passed northwards. A line from Sennar Town crossing the Sennar Dam, was completed during 1929 and affords an alternative route (498 miles) for produce of the Southern provinces to Haiya Junction, 126 miles W. of Port Sudan. There are over 2,000 miles of the various reaches of the river Nile and its tributaries under navigation by a fleet of shallow draught steamers and barges. Three of these routes are only practicable in the flood season, June to September, but communication with the Kenya and Uganda Railways is maintained throughout the year by means of a motor service over the Juba Nimule road, which connects with the regular fortnightly sailings of the Sudan Nile Service and the Uganda Lake Albert Service. Frequent services are also provided by private enterprise over the Juba Aba Road, connecting with the road system of the Belgian Congo. During the dry season (December to March) private enterprises also operate motor car services between Juba and Kampala (600 miles) and Juba and Nairobi (800 miles). In the interior of the country there are other dry season motor roads. All the principal towns are in direct telegraphic communication with Khartoum, the total mileage of telegraph lines being 5,737 miles in 1928. There are 80 stationary and 16 travelling Post and Telegraph offices, and 10 wireless telegraphy offices.

Finance.—The revenue is derived mainly from land tax, animal tax, royalties on gum and ivory, customs and railways, posts, telegraphs and steamboat services.

	1930	1931
Revenue	*£E4,693,623	*£F4,398,628
Expenditure	4,693,623	*4,398,628
Total Exports .	4,953,282	1,733,795
Total Imports .	6,177,410	3,761,023
Imports from U.K.	2,201,956	1,164,485
Exports to U.K.	3,289,780	781,327

The principal export is cotton, the value of which, together with cotton seed, amounted to £L645,449 or 37 p. per cent. of the value of the total exports. Gum arabic, £E602,753. Other exports are sesame, cattle, hides and skins, dates, ground nuts, dom nuts, *dura*, salt, senna, ivory and gold.

CAPITAL KHARTOUM at the junction of the White and Blue Niles The town contains a large mosque for Mohammedans a cathedral and the Gordon College with extensive Government buildings Population 42 240 Opposite Khartoum on the Blue Nile is Khartoum North (102 512) and on the White Nile is Omdurman (102 983), the former Mahdist capital

TANGANYIKA TERRITORY.

TANGANYIKA TERRITORY has a coast line of about 500 miles and an estimated area of 373 500 square miles The Sultan of Zanzibar's rights over the narrow strip of coast territory were acquired by Germany in 1890 for a payment of 4 000 000 marks The coast line extends from the mouth of the Umba to the mouth of the Rovuma River

The native population consists mostly of tribes of mixed Bantu race and was enumerated for the whole area (April 1931) at 4,107,000, the coloured population (other than native) being 14,991 In 1931, the native population of Tanganyika Territory was estimated at 5,022,640 The total white population is about 8,228 According to German law every native born after 1905 is free, but a mild serfdom was continued under German rule Legislation for the abolition of the status of slavery was enacted on June 9 1922

The amount allocated to education in 1931 was £127,211, further sums being contributed by native administrations In 1931 there were 94 Government schools for Africans, with 6,105 children in average attendance and 3 345 Mission schools with average attendance of 105 791 pupils Two schools are maintained by the Government for the education of European children, one a day school at Dar es Salaam, and the other a boarding school at Ngare Nanobi, in the Northern Province Assistance is given to 4 kindergarten schools at Tabora Dodoma, Mpwapwa and Tanga, to 3 Dutch schools in the Arusha district to 2 Roman Catholic schools in Dar es Salaam and Tabora and to German schools in Northern Tanga and Iringa Provinces 45 Indian schools with enrolment of 2,399 pupils are in receipt of financial assistance The Government publishes a monthly journal printed in Swahili to disseminate news and useful information among the vernacular speaking population

The total area under forests is about 4 138 square miles of which 4 075 square miles are included in the Government Forest Reserves, and about 63 square miles are privately owned Non native plantations are mainly for the production of sisal fibre and coffee with small areas under tea and tobacco minor crops being cotton maize and coconuts Native production consists chiefly of coffee bananas, cotton ground nuts, rice, millet maize cassava and pulses

In 1931 there were 5 099 438 cattle, 2 233 287 sheep and 3,250 783 goats in the Territory. The value of minerals produced in 1931 was—diamonds £9,698 gold £60 183 salt £36 524, mica £2 600 and tin £1 987 Companies desiring to investigate the mineral resources can obtain information and assistance from the Mines Department Dar es Salaam

The chief exports are sisal cotton, coffee, ground nuts hides skins copra, gram, simsim, bees wax ghee diamonds and gold the chief imports being cotton piece goods, iron and steel manufactures foodstuffs machinery building materials kerosene and motor spirit, sugar, rice, spirits and cigarettes

	1930 31	1031 32
Revenue	£1 749,478	£1 522 368
Expenditure	2,102 501	1,820 928
	1930	1931
Imports	£3 982 605	£2 495 596
Exports	2 897 938	1,890,722

The Southern Brigade headquarters, Signal Section and S & T Corps, one company of 1st (Nyasaland) Bn the 2nd (Nyasaland) Bn, and 6th (Tanganyika) Bn of the King's African Rifles, are stationed in Tanganyika Territory There is a Police Force of 1 840 of all ranks

The chief seaports are Dar es Salaam, Tanga, Lindi Mikindani, and Kilwa, all of which are accessible to ocean going vessels In 1931, 478 steamers exclusive of coastal boats) of 2 075,815 tons, and 3 906 dhows of 58,429 tons entered and cleared at the various ports from places beyond the Territory. There are two railways of metre gauge in the Territory The Tanga Railway from Tanga to Arusha *via* Moshi (272 miles) The Kenya and Uganda Railways connect with this railway at Kahe Junction The Central Railway from Dar es Salaam to Kigoma (772 miles), with a branch line from Tabora to Mwanza (235 miles). There is also a branch line from Manyoni to

Kinyangiri (93 miles) *viâ* Singida Steamers run on Lakes Victoria Nyassa and Tanganyika Dar es Salaam is in telegraphic communication with many inland centres and with the adjoining territories Nyasaland Kenya Uganda and Northern Rhodesia Cable communication exists between Dar es Salaam and Zanzibar, and communication with the Belgian Congo is effected by wireless between Kigoma and Albertville There is a wireless station at Dar es Salaam for communication with shipping and stations for dealing with aircraft are installed at Mbeya Dodoma and Moshi, which are ports of call for Imperial Airways Mail Service London to Capetown There are 131 post offices and postal agencies (101 of which have telegraphic facilities), and 142 telegraph offices Telegraph Money Order and savings bank business is conducted at 23 head offices and postal order and ordinary money order business at 21 sub offices Telephone exchanges are established and trunk telephone communication is in operation between 30 inland centres and also with Mombasa

(*Joint Franco British Administration*)

The total area is about 43 040 square miles, with an estimated population of 920 000 The British sphere consists of an area of about 13,041 sq miles with a population estimated (1931) at 293 714 excluding 43 Non Africans The mandated sphere adjoins the eastern frontier of the Gold Coast and is administered as part of it

TRISTAN DA CUNHA

is the chief of a group of islands of volcanic origin lying in lat 37° 6 S and long 12° 2 W, discovered in 1506 by a Portuguese admiral (Trisao da Cunha) after whom they are named The main island is about 2 000 miles W of the Cape of Good Hope, 4 000 miles N E of Cape Horn and about 1 500 miles S S W of St Helena It was the resort of British and American sealers from the middle of the 18th century and in 1760 a British naval officer visited the group and gave his name to Nightingale Island On August 14 1816 the group was annexed to the British Crown and a garrison was placed on Tristan da Cunha but this force was withdrawn after a few months, Corporal William Glass (*died* 1853) remaining at his own request, with his wife and two children This party with two masons imported for the purpose of housing the garrison formed the present settlement In 1827 five coloured women from St Helena, and afterwards others from Cape Colony joined the party The inhabitants are of mixed blood, but the British strain is predominant In 1885 many of the able bodied men were drowned through the upsetting of a boat and in 1886 a grant of stores and provisions was made by Parliament In 1921 the inhabitants numbered 127 and they are stated to be very long lived The principal settlement (Edinburgh) is in a fertile tract in the north west of the island its name being in honour of a visit from the Duke of Edinburgh in 1867 The inhabitants raise crops and possess cattle, sheep and pigs The oldest inhabitant acts as Governor Communication with the outside world is infrequent and the occasional visits of steamers are the only opportunities afforded to the inhabitants for the replenishment of comforts In spite of periods of distress the inhabitants refuse to leave the island for the Cape of Good Hope, to which they are attracted by offers of land

INACCESSIBLE ISLAND is a lofty mass of rock with sides 2 miles in length the island is the resort of penguins and sea fowl

THE NIGHTINGALE ISLANDS are three in number, of which the largest is 1 mile long and ¾ m wide and rises in two peaks 960 and 1 105 ft above the sea level respectively The smaller islands Stoltenhoff and Middle Isle, are little more than huge rocks. Numbers of seals and sea elephants visit these islands

GOUGH ISLAND (or Diego Alvarez), in 40° 20′ S and 9° 44′ W, lies about 250 miles S S E of Tristan

da Cunha. The island is about 8 miles long and 4 miles broad, with a total area of 40 square miles, and has been a British possession since 1816. The island is the resort of penguins and has valuable guano deposits. There is no permanent population.

THE UGANDA PROTECTORATE.

The territories now comprised within this Protectorate came under British influence in 1890, and a portion of them was for a time administered by the Imperial British East Africa Company. In 1894 a British Protectorate was declared over the kingdom of Uganda and some of the adjoining territories. The present limits are approximately as follows:—On the north, the Uganda-Sudan boundary; on the east, a line drawn from Mt. Zulia, on the Sudan boundary, along the Turkana escarpment over the top of Mt. Elgon, and along the west boundary of the Colony of Kenya and the eastern shores of Lake Victoria; on the south, by Tanganyika Territory (late German East Africa); and on the west, by the eastern boundary of the Belgian Congo. Within these boundaries lie part of the Victoria Nyanza, part of Lake Edward, the whole of Lake George, half of Lake Albert, the whole of Lake Kioga, the whole of Lake Salisbury, and the course of the Nile from its exit from Lake Victoria to Nimule, where the Sudan commences. Total area, 94,204 square miles, including 13,616 square miles of water.

For administrative purposes, the Protectorate is divided into 4 Provinces:—

(1) *Eastern Province*, comprising the districts of Busoga, Bugwere, Bugishu, Budama, Teso, and Karamoja.

(2) *Northern Province*, comprising the districts of Bunyoro, Gulu, Chua, Lango, and West Nile.

(3) *Western Province*, comprising the districts of Toro, Ankole, and Kigezi.

(4) *Buganda Province* (with islands in Lake Victoria) comprising the districts of Mengo, Masaka, Mubende, and Entebbe. Owing to sleeping sickness, the islands of Lake Victoria were entirely depopulated, and the inhabitants (about 20,000) settled on the mainland in fly-free districts; but the work of repopulating these islands was undertaken and completed in 1921 and 1922, and natives and their cattle have been repatriated.

The whole Protectorate is under direct administration; but the native kings or chiefs, whose rights are in some cases regulated by treaties, are encouraged to conduct the government of their own subjects. The province of *Buganda* is recognised as a native kingdom under a *Kabaka* (H.H. Sir Daudi Chwa, K.C.M.G., grandson of the celebrated Mutesa). He is assisted in the government by three native ministers and a *Lukiko*, or native Council, and each county and district chief also has his *Lukiko* to assist him in local government and in the administration of justice. In Buganda (and in *Bunyoro*, *Ankole* and *Toro*, also ruled over by paramount chiefs, as well as in most of the other parts of the Protectorate more directly administered), purely native matters are dealt with by the various *Lukikos*, but in serious cases there is an appeal to British courts. For Europeans and non-natives justice is administered by His Majesty's Courts. The principal British representative is the Governor, who (with the assistance of the Executive and Legislative Councils) makes Ordinances for the administration of justice, the raising of revenue, and other purposes. There are local British courts of justice, and a High Court with civil and criminal jurisdiction. The Appeal Court consists of the judges of the High Courts of Kenya, Uganda, Nyasaland, Zanzibar, and Tanganyika Territory. There is an armed constabulary force, under a British Commissioner of Police and British officers. There is also a battalion of the King's African Rifles stationed in the Protectorate.

The total population of Uganda (Census of May 1931) is given as 3,553,534, composed as follows: Natives, 3,536,267; Asiatics, 14,150; Europeans, 2,001, and others, 1,116. At first educational work was entirely in the hands of the various Missionary Societies, who still receive grants towards scholarships, &c., for students and teachers; their efforts have for some years been supplemented by Government, which has also established a University College for natives at Makerere, Kampala. About 2,000,000 natives speak Bantu languages, the most important of which is Luganda, the language of the Baganda tribe, after whom the Protectorate is named. Swahili is also widely spoken. There are a few pygmies living near the Semliki river and the Mufumbiro mountains; the rest of the natives belong to the Nilotic, Hamitic and Sudanese groups.

	1930	1931.
Revenue	£1,412,242	£1,399,913
Poll-tax	522,972	516,808
Customs	324,763	304,128
Expenditure (excl. loans)	2,040,294	1,451,564
Total Exports	2,060,453	1,978,262
Special Imports	1,614,164	1,308,726

The Customs Services are now merged in those of Kenya (*q.v.*). The export trade is mainly in cotton (£1,503,307 in 1931), coffee, chillies, oil-seeds, rubber, ivory, tin ore and hides and skins. The trade is chiefly with Great Britain, the United States, and India.

Nile steamers ply to Juba, which is connected by a motor road with Nimule, the Sudan port of the Kenya and Uganda Railway Marine Service on the Albert Nile and Lake Albert. Passengers are transported between these two places by the Sudan Government Railways motor service. A regular steamer service is maintained by the *Kenya and Uganda Railway Administration* on Lake Kioga, between Masindi Port and Namasagali, the terminus of the Busoga railway; and on Lake Victoria between Kisumu and Entebbe and Port Bell and the other Uganda ports. The Lake Albert Marine, which has already been mentioned, provides a weekly service on the Nile between Butiaba and Nimule during the season (Oct.–Feb.), and a fortnightly service on Lake Albert between Butiaba and the Belgian port of Kasenyi. The Railway Administration therefore provides a through service from Jinja and Kisumu to the Sudan and the Belgian Congo. The *Busoga Railway*, from Jinja (on Lake Victoria) to Namasagali, a point on the Nile below the rapids, which was completed in 1912, has recently been merged in the main line of the K. & U. Ry., which now runs from Kampala *vid* Eldoret to Nakuru, where it joins the old line to the coast. The continuation of this main line to Kampala has now been completed, and a further extension from Tororo Junction to Soroti *vid* Mbale was opened in 1929. There is a railway from Port Bell to Kampala,

7¾ miles in length There is a fleet of Government motor vans and there are aeroplane landing grounds at Entebbe Jororo and Jinja Good all weather motor roads connect the principal administrative centres Hotels exist at Kampala, Jinja Jororo Masindi Fort Portal and Masaka

The unit of currency is the shilling, and the lower coinage is on a cental basis

In 1920 Executive and Legislative Councils were constituted and these came into being in Jan., 1921 The former consists of 6 appointed members and the latter includes the former, with the addition of unofficial members and is presided over by the Governor The head quarters of the British administration is at ENTEBBE, the chief commercial centres are Kampala (Buganda) and Jinja (Eastern Province)

ZANZIBAR

(*The Zanzibar Protectorate*)

Sultan, H H Seyyid Sir Khalifa bin Harub, KCMG, KBE, *succeeded* Dec 9, 1911

The Zanzibar dominions became independent in 1856 under the rule of Seyyid Majid, a son of Seyyid Said, Sultan of Muscat and Zanzibar They formerly extended along the mainland as far south as Tunghi Bay and north as Warsheikh but since the cession of the coast line from Ruvuma to Vanga including the island of Mafia, to Germany in 1890 and of the Benadir and Kismayu Coasts to Italy in 1904 and 1924 respectively they are now confined to the islands of Zanzibar and Pemba, a coastal strip from Vanga to Ras Kiamboni (Dick's Head), the islands of Tumbatu Mandja Patta and Siu The Zanzibar dominions on the mainland are under the administration of H M Government through the Governor and Commander in Chief in the Kenya Colony and Protectorate (*q v*). Zanzibar has been a British Protectorate since November 1890 On July 1 1913 the Protectorate was transferred from the Foreign to the Colonial Office

The population of Zanzibar and Pemba (Census of 1931) was 235 428 the area of the former being 640 square miles and of the latter 380 square miles

As the centre of the Arab power Zanzibar from the beginning of the 19th century until quite recently dominated the trade of East Africa The islands possess practically a monopoly in cloves (the export of which was valued at Rs 97 83 967 in 1931) and produce quantities of copra (exports in 1931 Rs 19 95 690) In addition Zanzibar serves as a storehouse for the East African coast where both imports and exports are received and distributed Of late years its importance as a port of transhipment and distributing centre has decreased owing to the development of the mainland, to the opening up of the coast ports to direct steamship service with Europe and to the transfer to Aden of the seat of trade with the Benadir coast Recent figures however tend to indicate that the island will continue from the very fact of its geographical position to retain control of the local traffic—of that portion of the trade which goes to small towns up and down the adjacent mainland coast There are 241 miles of roads throughout the Protectorate suitable for motor traffic

The principal imports are rice, grains groceries, sugar tobacco copra, petroleum and piece goods the exports are cloves and copra, in addition to re exports of previously imported rice grain, copra and piece goods

The city of Zanzibar, on the island of the same name, is the largest in East Africa, and

tage of ocean going s[illegible]
the port in 1931, 2 770 998 and 3 562 dhows (69 886 tons) Zanzibar provides the best water supply on the East Coast of Africa, and it is much in demand for shipping supplies

* In 1930 a separate classification was provided for Mexicans who, up to that date, had been counted with the white population. The number of Mexicans reported in 1930 (1,422,533) is included for that year in the figure for "Other races," and its inclusion accounts for most of the increase between 1920 and 1930. It is estimated that the 1920 figure for the white population included 700,541 persons who would have been counted as Mexicans in 1930. If these are deducted from the 1920 total, there is obtained what might be termed an adjusted figure, 94,120,374, which is more closely comparable with the 1930 figure for the white population.

BIRTHS AND DEATHS.

The annual compilation of mortality statistics for that part of the Continental United States known as the "Registration Area" began with the calendar year 1900. This area at that time included 40·5 per cent. of the total population, and in 1930 96·3 per cent. The birth registration area was established in 1915; it included at that time 32·1 per cent. of the total population, and in 1930, 94·7 per cent. The following table shows the number of births and deaths in the respective Registration Areas, with rates per 1,000 of the estimated population, for the calendar years 1923 to 1930:—

Calendar Year.	Births * Number	Rate per 1,000	Deaths * Number	Rate per 1,000
1923	1,792,646	22·2	1,193,017	12·2
1924	1,930,614	22·4	1,173,990	11·7
1925	1,878,880	21·5	1,219,019	11·8
1926	1,956,068	20·7	1,285,927	12·3

1930	2,203,979	18·9	1,343,365	11·3

* Exclusive of still-births.

IMMIGRATION AND EMIGRATION.

From 1820 to 1932, 37,894,727 alien immigrants landed in the United States. In the fiscal year ended June 30, 1932, 35,576 immigrant and 139,895 non-immigrant aliens were admitted, a total of 174,871. During the same year, 103,895 emigrant and 184,362 non-migrant aliens, departed, a total of 287,657. The net decrease for the year was 112,786.

MARRIAGE AND DIVORCE.

The Law of Divorce differs in many of the States, while South Carolina has no Divorce Law. In general, adultery, cruelty, abandonment (desertion), habitual drunkenness, and imprisonment on conviction of felony, are legal causes of divorce.

	Marriages Total.	To Wife	Divorces Granted. To Husband.	* Total.

PHYSIOGRAPHY.

The Republic occupies nearly all that portion of the North American Continent, between the Atlantic and Pacific Oceans, in latitude 25°-49° North and longitude 67°-124° 30' West, its northern boundary being Canada and the southern boundary Mexico.

Its coast-line has an estimated length of about 5,565 miles on the Atlantic, 2,730 miles on the Pacific, 3,641 miles on the Gulf of Mexico, and 1,050 miles on the Great Lakes. The principal river is the mighty Mississippi-Missouri, traversing the whole country from north to south, and having a course of 1,700 miles to its mouth in the Gulf of Mexico, with many large affluents, the chief of which are the Yellowstone Platte, Nebraska, Arkansas, Ohio

small; among the former may be noticed the Hudson, Delaware, Susquehanna, Potomac, and Savannah; of the latter, the Columbia, Sacramento, and Colorado. The Alabama and Colorado of Texas fall into the Gulf of Mexico, also the Rio Grande, a long river partly forming the boundary with Mexico. The areas of the water-basins have been estimated as follows:—Rivers flowing to the Pacific, 644,040 square miles; to the Atlantic, 488,877; and to the Gulf of Mexico, 1,683,325 square miles, of which 1,257,547 are drained by the Mississippi-Missouri. The chain of the Rocky Mountains separates the western portion of the country from the remainder, all communication being carried on over certain elevated passes, several of which are now traversed by railroads; west of these, bordering the Pacific coast, the Cascade Mountains and Sierra Nevada form the outer edge of a high table-land, consisting in part of stony and sandy desert and partly of grazing land and forested mountains, and including the Great Salt Lake, which extends to the Rocky Mountains. Eastward the country is a vast, gently undulating plain, with a general slope southwards towards the partly marshy flats of the Gulf of Mexico, extending to the Atlantic, interrupted only by the Alleghany Mountains, of inferior elevation, in the Eastern States. Nearly the whole of this plain, from the Rocky Mountains to some distance beyond the Mississippi, consists of immense treeless savannahs and prairies of luxuriant grass. In the Eastern States (which form the more settled and most thickly inhabited portion of the country) large forests of valuable timber, as beech, birch, maple, oak, pine, spruce, elm, ash, walnut; and in the south, live oak, water-oak, magnolia, palmetto, tulip-tree, cypress, &c., still exist, the remnants of the forests which formerly extended over all the Atlantic slope, but into which great inroads have been made by the advance of civilisation. The Mississippi valley is eminently fertile. The mineral kingdom produces much ore of iron, copper, lead, zinc, and aluminium; the non-metallic minerals include immense quantities of coal, anthracite, petroleum, stone, cement, phosphate rock, and salt. Precious metals include gold and silver, raised mainly in Colorado, California, and Alaska (gold), and Colorado, Montana, Utah, and Idaho (silver). The highest point is Mount Whitney at 14,496 feet above sea level, and the lowest point of dry land is in Death Valley, 276 feet below sea level; these two points are in California, only 86 miles apart. The mean elevation of the 48 States is approximately 2,500 feet.

GOVERNMENT.

The United States of America is a Federal Republic consisting of 48 States and 1 Federal District (of which 13 are Original States, 7 were admitted without previous organisation as Territories, and 28 were admitted after such organisation), and of 2 organised Territories.

THE CONSTITUTION.—By the Constitution of Sept. 17, 1787 (to which ten amendments were added on Dec. 15, 1791, and eleventh to nineteenth Jan. 8, 1798, Sept. 25, 1804, Dec. 18, 1865, July 28, 1868, March 30, 1870, Feb. 25, 1913, May 31, 1913, Jan. 29, 1919, and Aug. 26, 1920), the government of the United States is entrusted to three separate authorities—the Executive, the Legislative, and the Judicial.

THE EXECUTIVE.

THE *Executive* power is vested in a President, who is elected every four years, and is eligible for re-election. The mode of electing the President is as follows:—Each State appoints, in such manner as the Legislature thereof directs (they are now elected by popular vote on the *first Tuesday after the first Monday in November* of the year preceding the year in which the Presidential term expires), a number of electors, equal to the whole number of Senators and Representatives to which the State may be entitled in the Congress; but no Senator or Representative, or anyone holding office under Government, shall be appointed an elector. The electors for each State meet at their respective State Capitals on the *second Monday of the January* following, and there vote for a President by ballot. The ballots are then sent to Washington, and opened on the *second Wednesday of February* by the President of Senate in presence of Congress, and the candidate who has received a majority of the whole number of electoral votes cast is declared President for the ensuing term. If no one has a majority, then from the three highest on the list the House of Representatives elects a President, the votes being taken by States, the representation from each State having one vote. There is also a Vice-President, who, on the death of the President, becomes *ex officio* President for the remainder of the term. In case of the removal or death of both President and Vice-President, a statute provides for the succession as shown below, so that the State can never be without a Head or Ruler.

The President must be 35 years of age and a native citizen of the United States. He receives a salary of $75,000, with a travelling allowance of $25,000. Executive duties:—

(1) He is Commander-in-Chief of the Army and of the Navy (and of the Militias when they are in Federal service), and he commissions all officers therein.

(2) With the consent of the Senate, he appoints the Cabinet officers and all the chief (and many minor) officials.

(3) He exercises a general supervision over the whole Federal Administration and sees that the Federal Laws are duly carried out. Should disorder arise in any State which the authorities thereof are unable to suppress, the aid of the President may be invoked.

(4) He conducts the Foreign Policy of the Republic, and has power, 'by and with the advice and consent of the Senate, to make Treaties, provided two-thirds of the Senators present concur." The Declaration of War rests with Congress.

(5) He makes recommendations of a general nature to Congress, and when laws are passed by Congress he may return them to Congress with a veto. But if a measure so vetoed is again passed by both Houses of Congress by a two-thirds majority in each House, it becomes law, notwithstanding the objections of the President.

THE PRESIDENT.*

President of the United States (1929–1933), Herbert Clark Hoover, of California, *born* at West Branch, Iowa, Aug. 10, 1874, graduated mining engineer, Leland Stanford Jr. University, 1895; Chairman of the American War Relief Committee, London, Eng., 1914–15; Chairman of Commission for Relief in Belgium, 1914–19; U.S. Food Administrator, 1917–19; Secretary of Commerce, 1921–28. *Republican.*

1. *Vice-President*, Charles Curtis, of Kansas (*born* Jan. 25, 1860), *elected Vice-President* Nov. 6, 1928. *Republican.*

THE CABINET.

(In order of succession to the Presidency, after the Vice-President.)

2. *Secretary of State*, Henry Lewis Stimson, of New York, (*born* 1867), *appointed* March 5, 1929
3. *Secretary of the Treasury*, Ogden L. Mills, of New York (*born* 1884), *appointed* Feb. 10, 1932.
4. *Secretary of War*, Patrick Jay Hurley, of Oklahoma (*born* 1883), *appointed* Dec. 9, 1929.
5. *Attorney-General*, William De Witt Mitchell, of Minnesota (*born* 1874), *appointed* March 5, 1929.
6. *Postmaster-General*, Walter Folger Brown, of Ohio (*born* 1869) *appointed* March 5, 1929.
7. *Secretary of the Navy*, Charles Francis Adams, of Massachusetts (*born* 1866), *appointed* March 5, 1929. [March 5, 1929.
8. *Secretary of the Interior*, Ray Lyman Wilbur, of California (*born* 1875); *appointed*

Secretary of Agriculture, Arthur M. Hyde, of Missouri (*born* 1877), *appointed* March 5, 1929.
Secretary of Commerce, Roy D. Chapin, of Michigan (*born* 1880), *appointed* Aug. 8, 1932.
Secretary of Labour, William Nuckles Doak (*born* 1882), Dec. 9, 1930.

* The *Presidential Election*, Nov. 8, 1932 resulted as shewn on p. 869.

THE LEGISLATURE.

The Legislative power is vested in two Houses, the Senate and the House of Representatives the President having a *veto* power, which may be overcome by a two thirds vote of each House The Senate is composed of two Senators from each State, elected by the people thereof for the term of six years and each Senator has one vote and Representatives are chosen in each State by popular vote, for two years The number of Representatives for each State is allotted in proportion to its population—at present 1 for 281,000 The *Senate* consists of 96 members The salary of a Senator is $10 000 per annum with mileage at 20 cents per mile each session The *House of Representatives* consists of 435 representatives besides a delegate from Alaska a delegate from Hawaii 2 resident commissioners from the Philippines and a resident commissioner from Porto Rico The salary of a Representative is $10 000 per annum with mileage as for Senators By the XIXth Amendment sex is no disqualification for the Franchise

THE SEVENTY SECOND CONGRESS
(March 4, 1931– March 3 1933)

President of the Senate, Charles Curtis *Kansas* $15 000
Speaker of the House of Representatives John Chance Garner *Texas* 15,000

LIBRARY OF CONGRESS
(National Library)
Capitol Hill Washington D C

The Library of Congress was established in 1800 and destroyed by fire in 1814 In 1815 purchase of Jefferson collection formed basis for a new collection Partially destroyed by fire 1851, and replenished in 1851 2 Since that date increased (1) by regular annual appropriations by Congress (now $125 000) (2) by deposits under the copyright law (3) by gifts and exchanges, (4) by the exchanges of the Smithsonian Institution, the library of which was in 1866 (then 40 000 volumes now over 550 000 volumes) deposited in the Library of Congress, with the stipulation that future accessions should follow it The collection is the largest in the Western Hemisphere, but statistics of the four largest libraries in the world are not sufficiently uniform to tell their order in respect to numbers The Library of Congress now contains 4,477 432 volumes (plus in 1931 32 185 143) The building was first occupied in 1897, and in 1931 it contained about 627 674 square feet (nearly 14½ acres) of floor space A considerable addition to the building is now under construction The total cost to June 30 1932, is approximately $7 869 000 The book stacks, including the new stack built over the south east and north east interior courts contain a little over 162½ miles of shelving The library is maintained by Congress the appropriation for 1932 33 being $2,129 647 An auditorium for chamber music (the gift of Mrs F S Coolidge) was opened in 1925 and in the same year the Library of Congress Trust Fund Board was created under an Act of Congress This Board is permitted to accept and administer gifts and bequests of personal property in the interests of the Library of Congress, its collections and its service

DEFENCE.

The President is Commander in-Chief of both Navy and Army, the former being controlled by a Secretary of the Navy, and the latter by a Secretary of War

THE ARMY OF THE U S.

The present authorised strength of the Regular Army is: Commissioned officers 12,402, warrant officers 973, enlisted men (approximately) 118,750, exclusive of the Philippine Scouts. The actual strength of the entire active Army of the United States on June 30, 1932, including retired personnel on active duty at the time, was 133,200, of whom 12,314 were commissioned officers, 973 warrant officers, and 119,913 were enlisted men. These figures include the 6,472 enlisted men of the Philippine Scouts. The Army is made up entirely of volunteers

1932	251,144	186,797	437,941	232,509,429

The total disbursement in pensions since the War of Independence to June 30, 1932, is $8,636,487,623, of which $7,600,321,525 has been paid on account of the Civil War

World War Pensions.

Disbursements in claims arising out of service in the World War between April 6, 1917, and July 2, 1921, are not included in the above totals (*See* "Ordinary Expenditures" under "Finance," *post*)

By Executive Order of July 21, 1930, the Veterans Bureau, the Bureau of Pensions, and the National Home for Disabled Volunteer Soldiers, were consolidated in accordance with the Act of Congress, approved July 3, 1930, by the President. The combined organisation is known as the *Veterans' Administration*, under the direction of Brigadier General Frank T Hines, formerly Director of the Veterans Bureau, now Administrator of Veterans' Affairs

THE NAVY OF THE U S.

On October 1, 1932, the Navy of the United States consisted of the following seagoing vessels 14 battleships, not "over-age"; 1 battleship, "over-age", 8 heavy cruisers, not "over age", 1 heavy cruiser, "over age"; 10 light cruisers; 3 aircraft carriers, 28 destroyers, not "over age", 194 destroyers "over-age", 12 light mine layers, 4 mine layers, 37 mine sweepers, 54 submarines, not "over-age"; 28 submarines "over age", 25 eagles, 24 submarine chasers, 4 gunboats, 8 river gunboats, 2 converted yachts, 8 destroyer tenders, 7 submarine tenders, 2 aircraft tenders; 3 repair ships; 5 store ships, 3 colliers, 19 oilers; 2 ammunition ships, 6 cargo ships, 2 transports, 2 hospital ships, 34 tugs, 6 submarine rescue vessels, 7 miscellaneous auxiliaries, and 27 unclassified vessels.

On the above-mentioned date there were under construction 7 heavy cruisers, 1 aircraft carrier, 2 submarines and 8 destroyers. In addition to the foregoing new construction, there have been authorized 8 cruisers; 4 destroyers; 1 Neff submarine; and 1 transport, the construction of which has not been begun.

Information as to characteristics, costs, &c., available for publication concerning naval vessels mentioned above, may be found in the *Ships' Data Book*.

EDUCATION.

State School Systems, 1929–1930.

In 1929-30 the total number of children in the United States 5 to 17 years of age was 32,577,322,

of whom 25,678,015 (12,957,487 boys and 12,720,528 girls) were enrolled in public elementary and secondary schools, and (1928-30) 2,776,344 were enrolled in private elementary and secondary schools, and in private commercial and business schools. The average daily attendance in the public schools was 21,264,886, the average length of school term was 172·7 days, and the average number of days attended by each pupil enrolled was 143·0 days. In 1929-30, 854,263 teachers (141,771 men and 712,492 women) were employed. The average annual salary of all teachers was $1,420. The total number of buildings used as school houses was 247,289, and the estimated value of all public school property was $6,211,327,040.

The total money received for school purposes, excluding balances on hand, was $2,088,556,837 Of this amount, $27 526,517 was received from permanent school funds and from the rent of school lands, $329,312,434 from State taxes or State appropriation, $1,645,687,651 from local tax or appropriation, and $86,040,235 from all other sources, State and local. The total payments, excluding payments of bonds, were $2,326,790,384 This amount includes expenditures for sites, buildings, furniture, libraries and apparatus, $370,877,969; for salaries of superintendents, supervisors, principals and teachers, $1,295,201,424; and for all other purposes, $650,710,991.

Compulsory Attendance Laws, 1930.

Every State in the Union has a compulsory school attendance law. In general, children are obliged to attend school from 7 to 14 years of age, and those from 14 to 16 must attend school or secure employment certificates. The required attendance each year varies from eighty days in two States to the full term in thirty-six States. In all States there are, connected with the local administrative units, officers charged with enforcing the compulsory attendance law, known in the majority of States as the truant or attendance officers.

Universities, Colleges and Professional Schools, 1929-30.

Of the 1,078 universities, colleges, and professional schools, 246 are public institutions and 832 under private control or management. The total number of instructors in both private and public institutions was 71,722 (55,861 men and 15,861 women). The public institutions enrolled 390,397 undergraduate and graduate students (244,764 men and 145,613 women). The private institutions enrolled 581,187 undergraduate and graduate students (359,459 men and 221,728 women). In general engineering, 8,506 students were enrolled; in chemical engineering, 6,474; in civil engineering, 11,563; in electrical engineering, 15,647; in mechanical engineering, 11,397; and in mining engineering, 1,459.

The total number of baccalaureate degrees conferred in 1929-30 was 91,623 (51,160 men and 40,463 women); altogether 26,832 graduate degrees were conferred (16,693 men and 6,139 women); 1,397 honorary degrees were conferred.

The schools of theology enrolled 13,045 students and reported 1,251 graduates; law schools, 41,426 students and 8,874 graduates; schools of medicine, 21,964 students and 4,769 graduates; schools of dentist y, 8,160 students and 1,798 graduates; schools of pharmacy, 10,906 students and 2,299 graduates; and schools of veterinary medicine, 884 students and 135 graduates.

Teachers' Colleges and Normal Schools, 1929-30.

In 1929-30, 331 teachers' colleges and normal schools reported to the United States Office of Education. These schools are chiefly concerned with the training of elementary teachers. Of this number 273 are public institutions, and 58 are private institutions; 140 are teachers' colleges, 134 are public, and 6 are private institutions (schools granting a degree after four years' work beyond high school); 66 are State normal schools; 26 are city normal schools; 47 are county normal schools; and 52 are private normal schools. The total number of instructors in all teachers' colleges and normal schools was 14,473. The total number of students enrolled was 279,195 (60 935 men and 218,260 women). Of this total enrolment, 264,257 students are in normal training courses. The number of graduates from the normal training courses was 7,038 men and 42,189 women, making a total of 49,227. 11,073 bachelor's degrees were also conferred, 3,609 on men and 7,464 on women. Practice or model schools are usually operated in connexion with these normal schools, or the public schools are used for this purpose. The total enrolment in these model schools, so far as reported, was 90,601. The total receipts for normal schools (1929-30) were $69,983,932. The total number of volumes in the libraries was 4,005,076.

Nurse Training Schools, 1926-27.

The number of nurse training schools has increased very rapidly since 1900. At that time 432 schools reported to the Office of Education. In 1930-31 the number of such schools reporting was 1,844. The number of pupils enrolled in these schools in 1930-31 was 100,429 and the number graduated 18,623. Of the schools reporting, 66 are in hospitals for the insane. The capacity of the hospitals in which all nurse training schools reporting are located, is 428,472 beds, and the average daily number of patients is 325,319. In 1930-31 a large majority of schools required a minimum age requirement for admission of only 18 or 19 years. In general hospitals two-thirds of the schools required 8 hours of duty daily in 1930-31. In hospitals for the insane, about a fourth required 12 hours duty, a fourth 10 hours, and less than a third, 8 hours.

The remuneration granted the pupils in general hospitals is usually less than $200. In the first year 45 per cent. of the schools pay less than $20 per month, and more than 50 per cent. pay from $20 to $25 per month during the second and third years. About 15 per cent. pay no remuneration at all. In the schools in hospitals for the insane the remuneration usually exceeds $400. In the first year of the course 48 per cent. of the schools pay between $25 and $30 a month.

More than 89 per cent. of all the nurse training schools in general hospitals offer a three-year course. In hospitals for the insane, about 80 per cent. of the schools offer a three-year course, and the remaining schools offer a two-year course. 87 per cent. of the general training schools require four years of school work for admission.

Of the nurse training schools reporting, about 10 per cent. are affiliated with colleges or

universities By this co operation an excellent opportunity is afforded to the training schools to secure for their pupils a high type of instruction in technical and academic subjects

Public High Schools, 1929–30.

In 1929–30, 22,237 public high schools reported to the Office The total number of teachers in these secondary schools was 213,306 * (74 532 men and 138 774 women) The total number of pupils enrolled in these schools was 4,145 669 (1,991,202 boys and 2 154 467 girls) The total number of coloured pupils included in the preceding figures is 118,897 In the first year of the course 1,460 459 pupils were enrolled, in the second year 1 132 061, in the third year 852 012 and in the fourth year 684,985 pupils, including post-graduate and special pupils In the 7th and 8th elementary grades organised as a part of junior high schools, 1,066,510 pupils were enrolled The number of graduates reported was 591 719 (267,298 boys and 324,421 girls)

There were 16,460 regular high schools that reported a four year curriculum In these four year high schools there are 2 652,471 pupils enrolled (1,270,199 boys and 1 382,027 girls) In addition, there are 1 842 junior high schools, with 1,036,919 pupils (517,255 boys and 519 664 girls), 2,287 junior senior high schools, with 979,176 pupils (471,101 boys and 508,075 girls), and 648 senior high schools, with 543,813 pupils (264,261 boys and 279,552 girls)

Private High Schools and Academies, 1929–30

The number of pupils in private high schools and academies, in general, has increased slowly but steadily. In 1900 the number of students enrolled in these schools was 110,797 In 1929 30 the number enrolled was 269,249 The number of schools reporting in 1900 was 1,978 and the number reporting in 1930 was 2,760. The total number of instructors in these private high schools in 1929 30 was 22 003 (8,577 men and 13 426 women) In this group of schools, more than any other, there is a tendency for the schools to be either for boys or girls exclusively, rather than co educational Of the schools reporting in 1930, 504 were for boys only, 873 were for girls only Altogether, 116 of the schools had military drill in 1928, enrolling 16,528 students

* Includes 9 277 men and 30 756 women teachers in junior high schools

Leading Industries (Ranked by Value of Products) in Principal Industrial Cities for 1929.

New York.—Clothing, women's, not elsewhere classified; Printing and publishing, newspaper and periodical; Clothing (except work clothing), men's, youths' and boys', not elsewhere classified; Printing and publishing, book and job; Fur goods; Bread and other bakery products; Meat packing, wholesale; Millinery; Perfumes, cosmetics, and other toilet preparations; Foundry and machine-shop products, not elsewhere classified; Electrical machinery, apparatus and supplies; Knit goods. Cane sugar refining and Gas manufacturing (illuminating and heating) are among the leading industries in this city, but their rank cannot be given without the possibility of disclosing (by comparison with Census reports) approximations of the data for individual establishments.

Chicago.—Meat packing, wholesale; Foundry and machine-shop products, not elsewhere classified; Printing and publishing, book and job; Steel works and rolling mills; Printing and publishing, newspaper and periodical; Clothing (except work clothing), men's, youths' and boys', not elsewhere classified; Bread and other bakery products; Confectionery; Furniture, including store and office fixtures. Electrical machinery, apparatus and supplies is one of the leading industries in this city, but its rank cannot be given without the possibility of disclosing (by comparison with Census reports) approximations of the data for individual establishments.

Detroit.—Motor vehicles, not including motor-cycles; Motor vehicle bodies and motor vehicle parts; Nonferrous metal alloys and products, not including aluminium products; Foundry and machine-shop products, not elsewhere classified; Meat packing, wholesale; Machine-tool accessories and small metal-working tools, not elsewhere classified.

Philadelphia.—Electrical machinery, apparatus and supplies; Printing and publishing, newspaper and periodical; Knit goods; Clothing (except work clothing), men's, youths' and boys', not elsewhere classified; Sugar refining, cane; Foundry and machine-shop products, not elsewhere classified; Bread and other bakery products; Worsted goods; Clothing, women's, not elsewhere classified; Cigars and cigarettes. Petroleum refining is among the leading industries in this city, but its rank cannot be given without the possibility of disclosing (by comparison with Census reports) approximations of the data for individual establishments.

Cleveland.—Motor vehicle bodies and motor vehicle parts; Steel works and rolling mills; Foundry and machine-shop products, not elsewhere classified; Electrical machinery, apparatus and supplies; Meat packing, wholesale; Paints and varnishes; Blast furnaces; Clothing (except work clothing), men's, youths' and boys', not elsewhere classified. Motor vehicles, not including motor-cycles, is among the leading industries in this city, but its rank cannot be given without the possibility of disclosing (by comparison with Census reports) approximations of the data for individual establishments.

St. Louis.—Motor vehicles, not including motor-cycles; Meat packing, wholesale; Boots and shoes, other than rubber; Boot and shoe cut stock, not made in boot and shoe factories; Tobacco, chewing and smoking, and snuff; Electrical machinery, apparatus and supplies; Foundry and machine-shop products, not elsewhere classified; Bread and other bakery products. Motor vehicle bodies and motor-vehicle parts, and Patent or proprietary medicines and compounds are among the leading industries in this city, but their rank cannot be given without the possibility of disclosing (by comparison with Census reports) approximations of the data for individual establishments.

Baltimore.—Smelting and refining, copper; Meat packing, wholesale; Clothing (except work clothing), men's, youths' and boys', not elsewhere classified; Nonferrous metal alloys and products, not including aluminium products; Tin cans and other tinware, not elsewhere classified; Sugar refining, cane; Fertilizers; Foundry and machine-shop products, not elsewhere classified; Bread and other bakery products.

Los Angeles.—Petroleum refining; Motion pictures, not including projection in theatres; Rubber tyres and inner tubes; Meat packing, wholesale; Foundry and machine shop products, not elsewhere classified; Printing and publishing, newspaper and periodical; Bread and other bakery products.

Buffalo.—Motor vehicles, not including motor-cycles; Flour and other grain-mill products; Meat packing, wholesale; Motor vehicle bodies and motor vehicle parts; Foundry and machine-shop products, not elsewhere classified; Feeds, prepared, for animals and fowls; Nonferrous metal alloys and products, not including aluminium products.

Milwaukee.—Motor vehicle bodies and motor vehicle parts; Motor vehicles, not including motor-cycles; Meat packing, wholesale; Engines, turbines, tractors and water-wheels; Foundry and machine-shop products, not elsewhere classified; Boots and shoes, other than rubber; Knit goods; Leather, tanned, curried and finished; Bread and other bakery products.

Boston.—Boot and shoe findings, not made in boot and shoe factories; Printing and publishing, newspaper and periodical; Sugar refining, cane; Clothing, women's, not elsewhere classified, Printing and publishing, book and job; Clothing (except work clothing), men's, youths' and boys', not elsewhere classified; Confectionery; Bread and other bakery products. Foundry and machine-shop products, not elsewhere classified, and Cutlery (not including silver and plated cutlery) and edge tools are among the leading industries in this city, but their rank cannot be given without the possibility of disclosing (by comparison with Census reports) approximations of the data for individual establishments.

Pittsburgh.—Steel works and rolling mills; Bread and other bakery products; Foundry and machine-shop products, not elsewhere classified; Canning and preserving, fruits and vegetables, pickles, jellies, preserves and sauces; Meat packing, wholesale; Printing and publishing, newspaper and periodical. The blast furnaces industry is among the leading industries in this city, but its rank cannot be given without the possibility of disclosing (by comparison with Census reports) approximations of the data for individual establishments.

Akron —Rubber tyres and inner tubes

Newark — Electrical machinery apparatus and supplies Paints and varnishes Leather tanned, curried and finished Meat packing wholesale Foundry and machine shop products not-elsewhere classified Chemicals not elsewhere classified Jewelry Bread and other bakery products Gold, silver platinum reducing and refining, not from the ore is among the leading industries in this city but its rank cannot be given without the possibility of disclosing (by comparison with Census reports) approximations of the data for individual establishments.

Cincinnati — Meat packing, wholesale Clothing (except work clothing), mens, youths and boys' not elsewhere classified Foundry and machine shop products not elsewhere classified Bread and other bakery products Printing and publishing newspaper and periodical The following industries are among the leading industries in this city but their rank cannot be given without the possibility of disclosing (by comparison with Census reports) approximations of the data for individual establishments Machine tools Motor vehicles not including motor cycles, Electrical machinery apparatus and supplies

San Francisco —Coffee and spice roasting and grinding Motor vehicles, not including motor cycles Cigars and cigarettes Printing and publishing newspaper and periodical Canning and preserving, fruits and vegetables pickles jellies, preserves and sauces Printing and publishing, book and job, Meat packing, wholesale, Bread and other bakery products Foundry and machine shop products, not elsewhere classified Cane sugar refining, and Bags other than paper not made in textile mills are among the leading industries in this city, but their rank cannot be given without the possibility of disclosing (by comparison with Census reports) approximations of the data for individual establishments

Motor Vehicle Industries —The value of the complete passenger cars and business vehicles manufactured in 1929 was $3 113 208 531 of parts and accessories $1,393 487 573, and of tyres and tubes $672 050,001 The number of complete passenger cars produced was 4 388 315 and of complete business vehicles 393 553 while 70 354 787 tyres and 74 043 041 inner tubes were also manufactured in 1929 The motor vehicle and tyre factories gave employment to 530 711 wage earners, who received $860 164 593 in wages in 1929 The number of motor vehicles registered in 1929 in the U S A was 26 501 443 The gasoline produced in 1929 amounted to 18 238 122 000 gallons and that consumed to 15 617,784 000 gallons The taxes levied on motor vehicles by the Federal, State and Municipal Governments in 1929 amounted to $928 155 062 The number of motor vehicles exclusive of those shipped as parts for assembly, exported in 1929 was 546 202

PUBLIC ROADS.—On Dec. 31, 1930, the total length of public roads was 3,009,066 miles, approximately 693,559 miles of which were surfaced roads. In 1930 the total expenditures for highways were approximately $1,680,493,095.

SHIPPING.—On June 30, 1932, the mercantile marine of the U.S. (vessels of 500 gross tons and over) consisted of 350 sailing vessels of 480,289 gross tons; 1,867 steam and motor vessels of 9,653,333 gross tons, a total of 2,217 vessels of 10,133,622 gross tons. In the year ended June 30, 1932, sailing and steam vessels of 70,393,499 tons entered at the various ports of the U.S.; of this total 26,465,860 tons were American and 43,927,639 tons foreign. The tonnage cleared from the various seaports was 70,441,374, of which 26,345,321 tons were American and 44,096,053 tons foreign.

POSTS AND TELEGRAPHS.—On June 30, 1932, there were 48,159 post offices in the U.S. handling 26,544,351,951 "pieces" of mail matter, of which amount 26,186,137,125 were domestic and 358,214,826 foreign. The telegraphs and telephones are not operated by the U.S. Government.

WEIGHTS, MEASURES AND CURRENCY.

The *Weights and Measures* in common use are shown on page 560. The Metric System of Weights and Measures is permissive, but is little used. The unit of *currency* is the *dollar* of 100 *cents*. The rate of exchange with sterling will be found on p. 548.

INDIAN POPULATION.

In 1930 the enumerated and estimated Indian population of the United States, exclusive of Alaska, was 340,541 by blood (Oklahoma containing 121,884, Arizona 47,072, New Mexico 28,113, S. Dakota 23,726, California 19,197, Montana 14,238, North Dakota 10,794, Washington 12,572, Wisconsin 11,705, and Minnesota 15,767, and the 38 remaining States less than 10,000 each). Total disbursements authorised for the fiscal year ended June 30, 1932, for Indian Service are $23,162,400. In addition to this the sum of about $5,000,000 is to be paid over to the Indians from receipts for oil and other leases, interest on trust funds, &c. The total wealth of U.S. Indians under the nominal control of the Indian Bureau on June 30, 1928, amounted to $1,716,815,123, of which $920,108,386 was tribal, and $796,708,737 individual.

RECLAMATION.

Commissioner, Elwood Mead, Interior Dept. Building, 19th and F, N.W., Washington, D.C. Employees: Washington Office, 55; Field, 1,500 to 2,000. Expenditure per year about $10,000,000.

The Bureau of Reclamation was organised as a bureau of the Interior Department, under the Reclamation Act of June 17, 1902. It is engaged in the investigation, construction and operation of irrigation works in 15 arid and semi-arid States of the far West. Twenty-seven projects, comprising about 3,000,000 acres, are under construction or operation, and the major works aid in serving an additional 1,500,000 acres under private canals purchasing stored water from the government reservoirs. The funds for this work have come chiefly from repayments by the water users, from oil leasing and other mineral operations, and from the sale of public lands. The money expended is returned to the fund by graduated payments of settlers.

The Bureau has built 17,623 miles of canals, ditches and drains (including 167,985 canal structures). There have been constructed 140 storage and diversion dams with an aggregate volume of 23,202,000 cubic yards, including the *Owyhee Dam* (405 feet high), Oregon, on the Owyhee River, the highest dam in the world; *Arrowrock Dam* (349 feet high), Idaho, on the Boise River, and the *Elephant Butte Dam* (306 feet high), New Mexico, on the Rio Grande. The Bureau has built 142 tunnels, 1,477 miles of road, 120 miles of railroad, 4,044 miles of telephone line, 22 power plants, and 3,308 miles of transmission lines. The construction cost to June 30, 1932, was $213,296,710. This work has involved the excavation of 311,466,000 cubic yards of materials, and the Bureau has used 5,862,000 barrels of cement.

Nearly 650,000 persons are living on the 42,568 farms irrigated by the Bureau, and in the project towns and cities. Of the 3,000,000 acres above referred to, 1,553,000 acres were irrigated and 1,520,000 acres were harvested in 1932, producing crops worth $40,554,037, or an average of $26·70 per acre. The 1,293,889 acres of additional lands using stored water yielded crops worth $33,406,340 more.

Public land farm units on the several projects are opened for settlement from time to time as canals are extended to make irrigation water available. Under present law, soldiers and sailors of all wars have a preference right of 90 days to enter these farms.

Information in regard to farms available for settlement may be obtained by addressing, Commissioner, Bureau of Reclamation Dept. of the Interior, Washington, D.C.

The Bureau issues the "Reclamation Era," an illustrated monthly publication, containing articles of interest to irrigation farmers and engineers, and numerous settlement and other booklets. An annual report is also issued, and other publications from time to time, relating to various phases of the work.

An engineering library of about 6,000 manuscript and printed volumes on the subject of irrigation is maintained in the Washington office of the Bureau. This library contains descriptions of the construction and operation

of the projects, with numerous photographs and maps, plans, specifications, cost data and results of original experimental investigations, and is available for consultation by those interested. The bureau also maintains a photographic file of about 40,000 negatives of scenes on the projects from the beginning of construction through the period of settlement and development.

GOVERNMENT PRINTING OFFICE, North Capitol and G Streets, Washington, D.C.

The Government Printing Office of the United States was established by Congress in 1860 and has been in continuous operation since that time. The buildings have a floor space of 22 acres, and together with the machinery and equipment which they contain, represent an expenditure of approximately $10,100,000. The annual cost of operation and maintenance is over $14,700,000, including the Public Documents Division. There are over 4,800 persons annually employed in the various divisions of the office, which now operates on the 5-day week plan, at a total yearly compensation of over $10,000,000. In addition to doing all of the printing and binding ordered for Congress, the office executes all the printing and binding required by the various executive departments and independent establishments of the U.S. Government. The office has the largest battery of type-setting machines in the world including 174 linotype machines, 2 Ludlow material casters, 100 monotype key-boards an 130 monotype casting machines, which produce about 2,750,000,000 ems of type in fiscal yea 1932. The 192 presses of the office are credite with 2,190,000,000 chargeable impressions, no including 212,000,000 on money order forms an 1,366,000,000 on postal cards. During the yea the office handled approximately 80,000 separat jobs. In addition to the execution of all kind of printing and binding, this office produce 11,167,000 square inches of electrotypes an stereotypes, and 702,000 square inches of hal tones and linecuts, supplied blank paper t other Government establishments at a cost o $725,000, and manufactured its own printin and writing inks, rollers, glue, type and typ metal, some of these supplies being furnishe to various branches of the Government. I also has one of the largest industrial cafeteria and recreational rooms in the United States.

Public Printer, George H. Carter, *Iowa** $20,00

Dependencies of the U S A.

HAWAII

The Hawaiian (or Sandwich) Islands form a Territory of the U S and consist of a chain of 20 islands in the N Pacific Ocean between 18° 55′—22° 16 N lat and 154° 4 —160° 30 W long The nine inhabited islands are —

Island	Sq miles	Pop (1930)
Hawaii	4 016	73 325
Oahu	598	202,887
Maui	728	48 756
Kauai	547	35 806
Molokai	261	5 032
Lanai	140	2 356
Niihau	97	136
Kaho lawe	69	2
Molokini	3	

The total population (Census of 1930) was 368 336 an increase of 112 424 since 1920 of the total 121 072 were aliens

The islands were discovered by Capt Cook in 1778 (he was killed there in 1779) and formed a kingdom under native rulers until Queen Liliuokalani was driven from the throne in 1893 a republic being proclaimed in 1894 In 1897 the group was annexed by the U S being organized as a Territory on June 14 1900 The Governor is appointed by the President of the U S There is a Senate of 15 and House of Representatives of 30 members the Territory sending a Delegate to Congress at Washington D C

The group is of volcanic origin and contains many craters Haleakala on Maui being the largest in the world Kilauea and Mauna Loa on Hawaii are active volcanoes with Mauna Kea (13 823 ft above mean sea level) extinct The islands are very fertile and rice cane sugar pineapples coffee bananas and other tropical and sub tropical products are abundantly grown

Revenue (1929 1930)	$12 530 357
Expenditure (1929 1930)	11 666 956
Debt (June 30 1930)	31 705 000
Total Exports (1930 1931)	115 829 180
Total Imports	90 962 311
Exports to U S	106 098 975
Imports from U S	82 469 322

Governor (1929 1933) Lawrence M Judd *assumed office* July 5 1929

CAPITAL, Honolulu, on the island of Oahu pop (1930) 137 582 Hilo on the island of Hawaii, has a population of 19 468

THE PHILIPPINE ISLANDS

are situated between 4° 40 21° 10 N lat and 116° 40 126° 34′ E long, and are distant about 500 miles from the south east coast of the continent of Asia Their total land area is 114 400 square miles of which total 103,288 square miles are contained in the eight largest islands the 7 075 other islands having a combined area of 11 112 square miles At the Census of 1918 the population was ascertained to be 10 314,310 almost all of Malayan stock, of whom (in 1928) 8,724 965 are Roman Catholic, 4 000 000 are Aglipayan, 200 000 are Protestant (and 1918) 443 037 are Muhammadan, 508 596 are Pagan, 24,263 are Buddhists and all others 5,454 Of the foreign born residents about three quarters are Chinese, and of the white population over one half are from the United States (6 931 in 1921)

The Philippine Islands were discovered in 1521 by the Portuguese navigator Magellan, who was slain by the natives of Mactan In 15 Spain undertook the conquest of the island which were named 'Filipinas, after the son of the King of Spain and in 1571 the city of Manila was founded by the conquistador Legaspi, who subdued the inhabitants of almost all the islands their conversion from barbarism and paganism being undertaken by the Augustinian friars in Legaspi's train In 1762 the capital of the Spanish colony was occupied by a British force, but in 1764 the newly acquired territory was restored to Spain In the nineteenth century there were frequent disturbances in the islands and at the outbreak of the Spanish American War of 1898 a rebellion under Aguinaldo a native leader, had just died down Aguinaldo was deported, but on his return his assistance was accepted by Admiral Dewey the commander of the American Pacific fleet after the annihilation of the Spanish vessels in Manila Bay on May 1 1898 Manila was captured by the American troops under General Wesley Merritt on Aug 13 1898 and the Islands were ceded to the United States by the *Treaty of Paris* of Dec 10 1898

On Aug 31 1928 the Philippine Scouts, which form a part of the United States regular Army consisted of 88 officers and 6 239 enlisted men On the same date the regular Army in the Philippines (other than the scouts) consisted of 512 officers and 3 788 enlisted men many of these officers being on duty with the scouts The Philippine constabulary, which is under the Philippine Government in Oct, 1928, consisted of 397 officers and 6 119 enlisted men All enlisted men in the scouts and constabulary are natives of the Islands while almost all the constabulary commissioned personnel are Filipinos

In 1927 the income of the Philippine Government was $39 842 988 and the bonded indebtedness $74 800 000 The expenditure on education in 1927 amounted to $13 809 753 for public schools only the University had an enrolment of 7 533 students and there were 1 099 306 pupils enrolled in the public schools The principal exports are sugar abaca (Manila Hemp) coconut oil copra tobacco embroideries desiccated coconut lumber and timber, copra meal and maguey the imports being cotton and its manufactures iron and steel and their manufactures mineral oils meat and dairy products automobiles and accessories wheat flour silk and its manufactures paper and its manufactures and coal

	1929
Total Imports	$146 326 859
Total Exports	169,119,397
Imports from U S	87,362 503
Exports to U S	122,275 672

Ports —Capital, Manila in the island of Luzon population (1928) 324 582 The next largest towns are Cebú (86 154) Legaspi (32,670), Iloilo (67 147), and Zamboanga (47 305), there are several others with populations from 25 000 to 40 000

Governor General, Col Dwight F Davis, *assumed office at Manila* July 8 1929.

GUAM

Guam, the largest of the Ladrone or Marianne Islands in the North Pacific Ocean, lies in 13° 26 N lat and 144° 39′ E. long, at a distance of about 1,506 miles east of Manila, the capital of the Philippine Islands, and forms a naval

station between that dependency and the United States The area of the island is estimated at 225 square miles, with a population of 20 857 of whom 19 611 are classed as native, 485 of the naval station and 761 other than native The natives are of Chamorro stock mingled with Filipino and Spanish blood The language is a Malay dialect containing many Spanish words but English is fast becoming the language of the island

CAPITAL, Agana Port of entry, Apra

WAKE AND MIDWAY ISLANDS

Wake Island annexed in 1898 has an area of about 1 sq mile and lies in the N Pacific about 2 000 miles from Hawaii on the direct route to Hong Kong

Midway Islands with a total area of 28 sq miles and a population (1930) of 35 lie in the N Pacific about 1 200 miles from Hawaii The group is administered by the U S Navy Dept

PUERTO RICO

Puerto Rico (Rich Harbour) is an island of the Greater Antilles group in the West Indies and lies between 17° 50′ 18° 30′ N lat and 65° 30′ 67° 15′ W long with a total area of 3 435 square miles and a population of 1 543 913 at the census of 1930 Three fourths of the population are of Spanish descent and about one fourth coloured The island is about 100 miles from west to east and 40 miles from north to south at the western end, narrowing towards the eastern extremity The capital is 1 400 miles distant from New York and 982 miles from Key West Puerto Rico was discovered in 1493 by Christopher Columbus It was explored by Ponce de León in 1508 and he was made Governor of the island in 1509 It continued a Spanish possession until Oct 18, 1898 when it was ceded to the United States as a result of the Spanish American War Sugar is grown in the low lying districts and tobacco and coffee on the slopes of the hills fruits cotton, maize sweet potatoes rice and yams are also grown The trade is principally with the U S About 344 miles of railroad were in operation in June, 1931 and there are good harbours at San Juan and Ponce The legislative functions are vested in a legislature which consists of 2 elective houses the Senate composed of 19 members (2 from each of the 7 senatorial districts and 5 senators at large) and the House of Representatives composed of 39 members (1 from each of the 35 representative districts and 4 elected at large) The term of the Legislature is 4 years The Governor is appointed by the President of the U S and holds office at the pleasure of the President A Supreme Court of 5 members is also appointed by the President There is a Cabinet composed of 7 heads of Departments, two appointed by the President and five by the Governor The Governor also appoints all inferior judges Great improvement has been made in the progress and welfare of the Island during the present century—the Island is self supporting free public schools are established throughout a system of good roads reaches every important city and town, public buildings are attractive and well built health and sanitary measures are in force The capital, San Juan had 114 715 inhabitants in 1930 other towns being Ponce (53 430) Mayaguez (37,060) Arecibo (12,863), Bayamon (12 986), and Caguas (19 792)

TUTUILA AMERICAN SAMOA

American Samoa consists of the island of Tutuila Annuu Ofu, Olosega Tau and Rose Islands, with a total area of about 56 square miles and a population of 10 055 in 1930 distributed (1930) as follows —Tutuila and Aunu'u, 7 809 Tau 1 243, Olosega, 438 Ofu 466 Rose Island uninhabited, and Swain's Island (annexed May 13 1925) 99

Tutuila the largest of the group has an area of about 40 square miles and contains a magnificent harbour at Pago Pago the capital and seat of government The remaining islands have an area of about 16 square miles Copra is the only export of importance

VIRGIN ISLANDS

The three islands St Thomas, St John, and St Croix in the Virgin Island group West Indies formerly the possessions of Denmark, were purchased by the United States from Denmark for the sum of $25 000 000 and proclaimed January 25 1917 The total area of the islands is 132 sq miles with a population in 1930 of 22 012 *St Thomas* (28 sq miles) has a population of 9 834 *St Croix* (84 sq miles) has a population of 11 413 the capital being Christiansted (or Bassin) *St John* (20 sq miles) has a population of 765 the capital being Cruz Bay St Croix exports sugar St Thomas is famous for its bay rum

CAPITAL St Thomas contains one of the finest harbours in the West Indies accommodating vessels of large draught and has a large coaling and oil refuelling station The climate of the Virgin Islands is delightful at all times, and particularly so during the winter months

Governor Paul M Pearson
Government Sec Boyd J Brown

THE PANAMA CANAL

The administrative organisation for the canal is known as The Panama Canal Its headquarters are at Balboa Heights Canal Zone with the Governor of the Panama Canal (Colonel Harry Burgess U S A) at its head

The first suggestion for a canal across the Isthmus of Panama was made by a Spanish engineer in 1530 and surveys were actively engaged upon by various private companies between the years 1825 and 1890 In 1876 a concession for the construction of a canal was granted to a French promotion corporation, which conducted surveys during a period of two years and reported to an international congress held at Paris in May 1879 over which Ferdinand de Lesseps presided This congress advised the construction of a canal at sea level, and in 1881 the work was undertaken by the Universal Interoceanic Panama Canal Company of which de Lesseps was nominal head The amount of work to be accomplished proved to be greater than was estimated and resulted in the failure of the company, a receiver being appointed in 1889 A new company was formed to carry on the work and excavation was resumed in 1894 This was continued until May 4 1904 when the United States Government took possession of the effects of the French company in Panama

Congress authorised the President in 1902 to purchase the effects of the French company for $40 000,000 Meanwhile a treaty was negotiated with the Government of Colombia for the cession, upon payment of $10,000,000, of the

territory through which the canal was to be constructed. The failure of the Colombian Government to ratify this treaty led to the secession of Panama on November 3, 1903. The new Government was immediately recognised by the United States, and a treaty was signed on February 26, 1904, in which rights of sovereignty over a strip of land ten miles in width, extending across the Isthmus, were ceded to the United States. The canal is built through the centre of this territory. In 1922 a treaty between Colombia and the U.S. provided for the payment to Colombia of $25,000,000 in satisfaction of all claims arising out of the Canal controversy. The independence of Panama was recognised by this treaty.

Including the purchase of rights, payments to Panama, and construction and operation of the canal and its adjuncts, the total appropriations by Congress to June 30, 1931, were $532,387,285. The net revenue from tolls and other revenues (including business operations), to June 30, 1931, aggregated $151,636,478.

The Canal was opened to commercial traffic Aug. 15, 1914, and was closed from Sept. 18, 1915, to April 15, 1916.

Fiscal Year	No. of Transits.	Canal. Net Tons.	Cargo Tons.
1915	1,075	3,792,572	4,888,454
1916	758	2,396,162	3,094,114
1917	1,803	5,798,557	7,058,563
1918	2,069	6,574,073	7,532,031
1919	2,024	6,124,990	6,916,621
1920	2,478	8,546,044	9,374,499
1921	2,892	11,415,876	11,599,214
1922	2,736	11,417,459	10,884,920
1923	3,967	18,605,786	19,567,875
1924	5,230	26,148,878	26,994,710
1925	4,673	22,855,151	23,958,836
1926	5,197	24,774,591	26,037,448
1927	5,475	26,227,815	27,748,215
1928	6,456	29,752,637	29,630,709
1929	6,413	29,837,794	30,663,006
1930	6,185	29,980,614	30,030,232
1931	5,527	27,792,146	25,082,800

The canal is fifty statute miles long (44·08 nautical miles), and the channel is from 300 to 1,000 feet wide at bottom. It contains 12 locks, and transit from sea to sea occupies 10 to 12 hours (passage through locks 5 hours). The least width is in Culebra Cut, and the greatest in Gatun Lake, where the channel can be made much broader at any time by the cutting down of trees and a small amount of dredging. The water depth when the surface of Gatun Lake is at 85 feet above sea-level varies from 85 feet in some parts of Gatun Lake to 41 feet in the Atlantic entrance. The depth through Culebra Cut is 45 feet.

THE PRESIDENTIAL ELECTION OF 1932

The Presidential Election of 1932 was held on Nov 8 (being the first Tuesday after the first Monday in November of the year preceding the year in which the Presidential term expires) The *Republican* candidate was Herbert Clark Hoover, of California, who was standing for a second time (having been elected President in November, 1928) the *Democratic* candidate being Franklin Delano Roosevelt, of New York, who was *born* in New York in 1882 entered the New York State Legislature as a Senator in 1910, and was appointed Assistant Secretary of the Navy in Woodrow Wilson's Administration (1913-1921) At the Presidential Election of 1920 Senator Roosevelt was nominated for Vice President, in 1928 he was elected Governor of New York State, and in 1930 he was re elected Governor At the Presidential Election of 1932 Governor Roosevelt was elected President of the United States by a very large majority, and the biennial elections for the Senate and for the House of Representatives holden on the same day returned a large number of Democrats, so that in both Houses of the Legislature the new President's party will be in the majority The composition of President Roosevelt's Cabinet had not been officially announced at the time of going to press

Vice Consuls	300–600	50–150	100 200

AFGHANISTAN

King of Afghanistan, H.M. Muhamed Nadir Shah Ghazi, *born* 1880, *acceded* Oct. 16, 1929.

Minister in London, H. E. Sardar Ahmad Ali Khan, 31 Princes Gate, S.W. 7.

Afghanistan lies on the N.W. frontier of India. Estimated area, 245,000 sq. miles, and pop. 6,380,500. It is bounded on the W. by Persia (boundary fixed 1857 and 1904), on the S. by Baluchistan (boundary fixed 1896–7), on the N by Asiatic Russia (boundary fixed 1886 7 and 1893–5), and on the E by the N.W. Frontier Province (boundary fixed 1895). The northern boundary runs from Zulfikar on the Persian frontier to Kushk, the Russian railway terminus on the branch line from Merv, and thence N.E. to the Oxus, which forms the boundary from Khamiab to Lake Victoria, whence the line to the Chinese frontier was fixed by the Pamir agreement of 1895. The Indo-Afghan frontier was settled by the Durand agreement of 1893. On this frontier from the Pamirs to the Gomal Pass are many Pathan tribes, who are much influenced by mullahs.

Mountains, chief among which are the Hindu Kush, cover three-fourths of the country, the elevation being generally over 4,000 feet. There are three great river basins, the Oxus, Helmand, and Kabul. The climate is dry, with extreme temperatures. The population is very mixed. The Durranis have predominated since 1747, especially in Kandahar; next come the Ghilzais (military and commercial) and the Tajiks (aboriginals, who are cultivators or retail traders). All are Sunni Muhammadans, except the Hazaras and Kizilbashes, who belong to the Shiite sect. The national tongue is Pushtu, but Persian is more universally spoken.

Afghanistan is divided into five major provinces, Kabul, Kandahar, Herat, Turkestan, and Badakshan (with Qataghan, Kafiristan (now Nuristan), and Wakhan), and four minor provinces, the Eastern, Southern, Farah, and Maimena, which are under governors, with subordinate nobles and judges, police, and revenue officers. Amir Abdurrahman (1880–1901) established a strong central government, with a regular civil and military organisation, including offices for public works, posts, police, finance, trade, &c. He first formed a national army, paid and controlled by himself. Considerable quantities of rifles and artillery have been purchased in Europe and the army now consists of about 35,000 to 40,000 regulars. A small Air Force is maintained. Factories for arms and ammunition, and for various commercial products, have been erected in Kabul. The Afghan laws are based on the "Shariat," or Islamic law and tribal custom. Recently steps have been taken to develop education, hitherto controlled by the mullahs. Two schools under French and German superintendence respectively have been opened and a large number of middle and primary schools in the provinces. Most of the people are industrious cultivators, and the country has become fairly settled, peaceful, and prosperous. There are generally two crops a year, one of wheat (the staple food), barley, or lentils, the other of rice, millet, maize, and *dal*. Afghanistan is rich in fruits. Sheep and transport animals are bred. Silk, woollen, and hair cloths and carpets are manufactured. Salt, silver, copper, coal, iron, lead, rubies, lapiz lazuli, and gold are found. The roads are generally unsuitable for wheeled traffic, but are being improved. Goods are conveyed by pack animals. The chief trade routes to India are the Khyber Pass route, from Kabul to Peshawar (210 miles), and the road from Kandahar to Chaman (70 miles). The Sind-Pishin railway is now completed to the Baluchistan-Persian frontier. The exports to India are mainly fruits and nuts, raw wool, skins and *ghi*; while the imports therefrom are chiefly cotton yarn and piece goods, metals, leather goods, tea, and sugar. There is a large export of wool to Persia and Russia, cotton and silk goods, sugar, &c., being taken in exchange. The annual revenue is unknown, and consists largely of payments in kind. It may amount to £2,000,000. There are taxes on land, a grazing tax, customs duties, stamps, fines, receipts from State lands, monopolies, and factories, and mining royalties.

As the result of a British mission to Kabul in 1904–5 the engagements which had existed with the Amir Abdurrahman since 1880 were renewed by the treaty of March 21, 1905. By the Anglo-Russian Convention of August, 1907, Russia declared Afghanistan outside the Russian sphere of influence. The Amir Habibullah Khan was assassinated on February 20, 1919; his brother, Nasrulla Khan, seized the throne by a *coup d'etat* and temporarily held the reins of government at Kabul, but the Amir's third son, Amanulla Khan, soon after declared himself, and was recognised as King. Afghan troops crossed the Indian frontier on May 2, 1919, on which the Indian Government took immediate steps to expel them; fighting followed and Dakka was occupied by British troops, but overtures were

made by King Amanulla and a treaty of peace was signed in August. By this treaty Afghanistan is left officially free and independent. By treaty of Nov. 22, 1921, Great Britain and Afghanistan agreed to respect one another's internal and external independence; to recognise boundaries then existent, subject to a slight re-adjustment near the Khyber; to receive Legations at London and Kabul and consular officers at Delhi, Calcutta, Karachi, Bombay and Kandahar and Jalalabad respectively. The Afghan Government import free of customs duty such material as is required for the strengthening of their country. The export of goods to British territory from Afghanistan is permitted without payment of customs duty. A Trade Convention was concluded and Afghanistan adhered to the International Postal and Telegraphic Union. In 1929 Amanulla Khan, whose modernist reforms had brought on him the charge of infidelity, was expelled. After a usurpation of some months by a local freebooter Kabul was captured (Oct. 1929) by Nadir Shah.

CAPITAL, *Kabul* (about 80,000). The chief commercial centre is Kandahar (60,000). Other provincial capitals are Herat (30,000), Mazar-i-Sharif (46,000), and Khanabad (5,000).

FLAG: Black, red, green.

British Envoy Extraordinary and Minister Plenipotentiary, Sir Richard Roy Maconachie, K.B.E., C.I.E. (1929).
Counsellor, Maj. W. K. Fraser-Tytler, M.C.
Military Attaché, Maj. A. E. Farwell.
Surgeon, Maj. H. H. Elliot, M.B.E., M.C.
Secretary, Capt. A. E. H. Macann.
Oriental Secretary, Khan Sahib Sikander Khan.
British Consul at Jelalabad, Mufti Abdul Latif Khan.
British Consul at Kandahar, Khan Bahadur Saiyyid Siddiq Hassan.

ALBANIA.

(Shqipenia.)

King of the Albanians, Zog I, b. 1895; *elected President*, Jan. 31, 1925; *proclaimed King*, Sept. 1, 1928.

Prime Minister (Mch. 4, 1930), Pandeli Evangjeli.
Minister for Foreign Affairs, Hussein Bey Vrioni.

Minister in London, His Excellency Djemil Bey Dino.
Legation, 22 Pont Street, S.W.1. [Sloane 6689].
Sec. of Legation, Çatin Saraçi.
Consul-General in London, Edwin Cripwell, 119, Finsbury Pavement, E.C. 2. [Met. 8615.]

Albania (the former Turkish Province of Scutari and parts of Kossovo and Yanina) lies on the west of the Balkan peninsula of south-eastern Europe, the western boundary being the Adriatic; total area about 11,000 to 12,500 sq. miles; total population (Census of 1930) 1,003,104. The political neighbours are, on the north and east, Yugoslavia, and on the south-east and south, Greece. Albania was declared independent by a National Assembly at Valona, Nov. 28, 1912, and its independence was confirmed by the *Treaty of London* of Dec. 20, 1912. The first King of Albania (Prince William of Wied) abandoned the throne in Sept. 1914, having been in power only six months, and during the Great War the country was invaded by troops of the Central Powers and of the Allies, and remained in a state of anarchy. After the Armistice a National Council at Durazzo established a provisional government, supported by an Italian military occupation of the country. The independence of the country was reaffirmed and guaranteed by the Supreme Council of the Allies. The provisional government was in power until 1920, when a revolt overturned it and set up a new government which remained in power until upset by a further revolution in December, 1924. A new Constitution was proclaimed on Jan. 21, 1925, under which Albania became a Republic under a President (elected for 7 years), with a Council of Ministers, a Senate, and a House of elected Representatives. On Sept. 1, 1928, the Constituent Assembly proclaimed the country a democratic monarchy and offered the crown to Ahmed Bey Zogu, the President, who assumed the title of Zog I, King of the Albanians; the Senate then ceased to exist, and a High Council of State was formed of 10 members appointed by the King.

The country is very primitive, agriculture and sheep and goat rearing being the principal industries, and olives and olive-oil, grains and tobacco the principal products; but there is some mineral wealth which remains largely undeveloped. A harbour, under construction at Durazzo to accommodate vessels up to 7 metres draft alongside the quays and 4 metres elsewhere, is expected to be completed in the summer of 1933.

Archivist, F. W. Borman.
Albanian Secretary (local rank), Triphoni Toni.

BRITISH CONSULAR OFFICER.

Durazzo—Vice-Consul (local rank of and Secretary), Edward H. L. Hadwen.
,, *Pro-Consul*, F. W. Borman.

* In July, 1931, the Albanian Government accepted the offer of the Italian Government of annual loans of 10,000,000 Gold Francs, maximum for 10 years, making a total maximum of 100,000,000 Gold Francs, from 1931.

ANDORRA.

A miniature Republic in the Pyrenees, with an area of 175 sq miles, and a population of 5 500, it is under the joint suzerainty of France and Spain There is a Council of Twenty four, elected by certain of the inhabitants, a judge and two lay vicars appointed by France and the Spanish Bishop of Urgel

ARABIA

Arabia is a peninsula in the south west of the Asiatic continent, forming the connecting link between Asia and Africa and lies between 30° 30 —60° E long and 12° 45—34° 50 N lat The north western limit is generally taken from Akaba, at the head of the Gulf of Akaba, to a point in the Syrian Desert about 150 miles north east, and thence northwards to a point about 50 miles due east of Damascus The remaining land boundaries are in the form of a horse-shoe, encompassing the Syrian Desert, and descending in a south easterly direction to the head of the Persian Gulf and thus excluding the whole of Mesopotamia and the Euphrates Valley The other boundaries of Arabia are the Red Sea and Gulf of Aden, the Arabian Sea, and the Persian Gulf and Gulf of Oman Generally speaking, the peninsula consists of a plateau sloping from south west to north east towards the Euphrates Valley, except that the broad south eastern promontory, which encloses the Persian Gulf contains a coastal range in the Sultanate of Oman

The total area is estimated at 1 200 000 sq miles (of which nearly one half is occupied by the Syrian, Nafud and Dahna deserts), and the total population is believed to be about 5,000 000 The various Arab States are shown below —

THE KINGDOM OF SAUDI ARABIA

King of Saudi Arabia (Jan 11, 1926), H M Abdul Aziz Ibn Abdul Rahman al Faisal Al Saud, G C I F , *born* 1880

Minister in London His Excellency Sheikh Hafiz Wahba 42 Eaton Place S W 1 (Sloane, 3898)
1st Sec , M Mahmood Riyad Zada
2nd Sec , M Youssef Salama

In the 18th century Nejd was an independent State and the stronghold of the Wahhabite sect It subsequently fell under the Turkish yoke, but in 1913 the present King threw off Turkish rule and captured from the Turks the Province of Hasa In 1921 he added to his dominions the territories of the Rashid family of Shammar which he captured by force of arms, and in 1925 completed the conquest of the Hejaz, and accepted the surrender of the greater part of Asir, the whole of which is now *de facto* part of the Kingdom

Nejd ('Plateau') has no definite frontiers, but may be said to extend over about 800,000 square miles of Central Arabia, including the Nafud ard Dahna Deserts and reaches eastward to the Persian Gulf (Hasa) The population is largely nomadic and is estimated at 1,275,000 Arabs, negroes and half breeds, the majority being Muhammadans of the Wahhabite movement There is little agriculture, but wheat and barley are grown the principal industry is camel and sheep raising The exports are woven cloaks, dates, live stock hides and skins The capital is Riyadh, and the principal trading centres are Hufuf, on the Persian Gulf littoral (30,000), Shaqra, Anaisah, Buraida Hail and Hauta (Central), which have populations of 8,000 to 10,000. The only ports (Persian Gulf) are Qatif and Ojair which are suitable only for sailing craft Riyadh is a station on the Pilgrims trans Arabian caravan route from Hasa to Mecca, and contains a large mosque, the "Westminster Abbey" of the Wahhabis

The *Hejaz* extends from Asir in S to Transjordan in N , and from the Red Sea, the Gulf of Akaba in the W to the ill defined boundaries of Central Arabia The coastline on the Red Sea is about 800 miles, and the total area is about 112 500 sq miles, with a population of from 350 000 to 400,000, including many nomad tribes On the coast are the small ports of El Wedj, Yambo Rabigh and Jedda (the chief port of the country and the pilgrims port), which contains the reputed 'tomb of Eve, the mother of mankind and inland are many settlements through which runs the course of the Hejaz Railway The *Oasis of Khaibar*, east of the railway, contains a considerable population descendants of former negro slaves with a centre at Kasr el Yahudi The importance of the Hejaz depends upon the pilgrimages to the holy cities of Medina and Mecca *Medina* (*Al Medina* 'The City') 820 miles by rail from Damascus, and the present terminus of the Hejaz Railway has a permanent population of about 20 000 and is celebrated as the burial place of Muhammad, who died in the city on June 7 632 (12 Rabia A H 11) The Mosque of the Prophet (500 feet in length and over 300 in breadth) contains the sacred tomb of Muhammad *Mecca*, the birthplace of the Prophet, is 55 miles east of the seaport of Jedda, by road, and about 200 miles south of Medina, and has a fixed population estimated at 60 000 The city contains the great mosque surrounding the *Kaaba*, or sacred shrine of the Muhammadan religion, in which is the black stone given by Gabriel to Abraham, placed in the south east wall of the Kaaba at such a height that it may be kissed by the devout pilgrim *Jedda*, the principal port, has a considerable trade in hides, mother of pearl, coffee and carpets The course of the *Hejaz Railway* runs from Medina in S through the Syrian Desert to Damascus and Beirut, and is connected with the projected Baghdad Railway at Aleppo

Asir extends, geographically, from a line drawn inland from Lith on the southern limit of Hejaz to the northern boundary of Al Yemen (about lat 17° 15 N) and includes the seaboard down to lat 16° Its breadth extends about 180 miles eastwards to Bishah in the north and to the boundary of the Beni Yam in the south According to Arabian geographers, Asir is part of Al Yemen The territory includes the Farsan Islands The maritime lowland is interspersed with fertile areas near the wadis, which afford pasturage and bear grain. The capital is Sabia, a small inland town

The total cost to the British Government of the subsidies paid to King Ibn Saud during the years 1917 to 1923 is approximately £542,000 No subsidy was paid before 1917 or after 1923, and the subsidy was given in the first instance in consideration of assistance in the war against Turkey The later payments were made subject to the following conditions —

(1) That Ibn Saud reframed, and restrained his adherents from aggressive action against the Hejaz Kuweit, and Iraq

(2) That he afforded co operation in the matter of the Hajj (pilgrimage to Mecca) by maintaining the safety of pilgrim routes to his territory

3) That he consented to be guided generally by the wishes of His Majesty's Government in regard to his foreign policy and to co operate with them in promoting their own policy which had for its object the maintenance of peaceful conditions in Arab countries and the promotion of the economic interests of both parties

No terms of repayment were suggested

By the *Treaty of Jedda* (May 20 1927 Great Britain recognized Ibn Saud as an independent ruler King of the Hejaz and of Nejd and its Dependencies

CAPITAL OF NEJD Riyadh, OF HEJAZ Mecca.

THE PRINCIPALITY OF KUWAIT

Ruler, Sheikh Sir Ahmad al Jabir as Subah K C I E, C S I, *acceded* March 1921

Kuwait (or Koweit) has been semi independent for many years and is in treaty relation with British India It extends along the shore of the Persian Gulf from Mesopotamia to Najd (El Hasa) The important harbour and gulf port of Kuwait the capital (pop 60 000) is an entrepôt for goods for the interior and for the export of horses, pearls wool &c It was designated as the terminus of the Berlin Constantinople-Baghdad railway as originally projected in 1903 The trade of Kuwait (1929 30) was valued at £71 825 for imports and £182 900 for exports

British Political Agent Lt Col H R P Dickson C I E

THE SULTANATE OF OMAN

Sultan, H H Saiyid Said bin Taimur, *born* Aug 13 1910, *succ* Feb 10, 1932

Oman (area undefined estimated pop 550,000) is a Muhammadan State in S E Arabia Its seaboard is nearly 900 miles long, and extends from Dibbat (on the W side of Cape Mussandam) round Ras Rajir (200 miles N of Socotra) with the exception of a small strip of the E coast of the Mussandam Peninsula from Dibbah to Khor Kalba, which is in the administration of the minor chiefs of Trucial Oman The Sultanate extends inland to the borders of the Great Desert but of late years the Omanis have become autonomous and are now subject to the Imam of Oman

The interior is for the most part mountainous, the high country extending down to the sea coast in a series of arid rocky heights, though vegetation exists on the higher mountains N W of Muscat the sea coast littoral tract is fertile and prosperous and date groves extend along it for over 100 miles This strip is known as the Batinah Coast The remainder of the coast, with one notable exception is barren and forbidding and rarely visited by Europeans

Gwadur, a port on the Makran Coast and a small tract of country round it, also owns allegiance to Muscat It is the last remnant of the Omani possessions on the Persia side of the Gulf The population is chiefly Arab, but includes also a considerable foreign element—Indians Persians, Baluchis and Swahili negroes The Sultan is in treaty relations with, and subsidised by, the Government of India, who have a political agent at his capital The Sultan is pledged not to cede territory to any Power but the British Government Muscat has a considerable trade, amounting in 1931 32 to Rs 5 444 445 Dates and dried fish are the chief export, and rice, wheat coffee cotton and silk goods the chief imports The capital, Muscat (with the sister town of Matrah) has an estimated population of 12 500

Muscat—British Consul and Political Agent, Major Gerald P Murphy, *per annum* Rs 2 400

THE IMAMATE OF YEMEN

Imam Yahya Muhammad Hamid ud din, *born* 1869

Yemen occupies the S W corner of Arabia between Asir and the Aden Protectorate, with an estimated area of 74 000 square miles and a population of 3½ millions Under Turkish rule, it was divided into the vilayet of Sana, Taiz, and Hodeida and it extends inland to the borders of the Hadramut The highlands and central plateau of Yemen and the highest portions of the maritime range form the most fertile part of Arabia, where wheat, barley, millet, coffee and oats, are extensively grown The chief port of Yemen is Hodeida which is noted for the export of coffee shipped from Hodeida to Masawa and Aden and thence to Europe The trade from Yemen perhaps exceeds that of the remainder of Arabia The Imam is the head of the Zeidi sect of the Shiah Division of the Muhammadan religion, about half of his subjects are Zeidis the remainder being Shafais, over whom he rules by *force majeure* alone On the withdrawal of the Turks from Yemen, the Imam took over occupation of the territory bordering on the Aden Protectorate populated by the Shafai sect of Sunni Muhammadans and also the Tihama, or coast lands from S of Hodeida to Sheikh Said Since 1920 the Imam of Yemen has been gradually encroaching on the Aden Protectorate, which is populated by tribes of the Shafai sect, but has now been ejected by air action from Aden, in support of the Protectorate tribes In 1925, the Imam occupied Hodeida, which had been evacuated by the Idrisi and later took the ports of Midi and Lohaya together with the intervening country between the highlands and the coast, all of which is populated by Shafai tribes The rule of the Imam is very unpopular with the Shafais owing to his exactions About 60 miles to the south of Sana is the town of Dhammar, an ancient seat of learning

CAPITAL Sana, population, about 40,000.

BAHRAIN

Ruler, H E Sir Isa bin Ali Al Khalifah, K C I E

Heir Apparent and Regent, H E Shaikh Hamid bin Isa Al Khalifah C S I

Financial Adviser, C Dalrymple Belgrave

Political Agent Capt C G Prior, I A

Asst to do, Khan Bahadur Abdul Haiy Alhashimi

Bahrain is the largest of a group of islands (Bahrain Muharaq Sitra, Nabi Saleh and some uninhabited islets) half way up the Persian Gulf near the Arab Coast (El Hasa) Bahrain is the headquarters of extensive pearl fisheries and a distributing centre for the adjacent mainland

Pearls are the principal export, varying in value from 1 to 2 millions sterling per annum. The principal imports are rice, cottons, dates, sugar and spices. The people (about 115,000) are Muhammadans. Bahrain has been in treaty relations with the Government of India since 1820. In 1880 the ruler engaged not to make treaties with any other state and in 1923 the active control of affairs was handed over to the present regent.

CAPITAL, Manama; population, about 20,000.

THE HADRAMUT TRIBES.

The coastal region of Southern Arabia, between Yemen and Aden on the west and Oman on the east, and extending inland (northwards) to the Dahna Desert, contains a coastal strip of some 550 miles. Parallel with the coast (at a distance of 50 miles from the Arabian Sea) is an extensive plateau inhabited by the Hadharim, an ancient people of Arabian stock (Hadoram was the son of Joktan, *Genesis* x, 27). There are many settlements on the coast and in the interior, but the latter are being steadily enveloped by the sand of the northern desert. There are sacred shrines near Kasm (Qabr Hud) and Shibam (Qabr Sālih). The eastern districts, known as Mahra and Gara, are very sparsely populated. The estimated area of Hadramut is 80,000 sq. miles, and its Muhammadan population, of independent Arab tribes, is estimated at 150,000. The most important Coastal Chief is the *Sultan of Shehr and Mokalla* (H.H. Sultan Omar bin Awadh) who is in treaty relations with Great Britain. Inland, the most important tribe is the Kathiri, whose chief towns are Saiwun and Terim. The Kathiri are noted as travellers and traders, and many of them are settled and carry on commerce at Singapore and Java. A long-standing feud between the Kathiri and the Qa'iti (by whom the former were expelled from the coast) was settled by treaty in 1919 on the initiative of the Aden Government. Under this Treaty the Ka'iti *Sultan of Mokalla* permits access to the port of Mokalla on the part of Kathiri traders. Agriculture and cattle raising are the principal industries, together with the cultivation of dates, indigo and tobacco.

TRUCIAL COAST.

The independent tribes on the *Pirate Coast*, which partly encloses the Persian Gulf from Ras-el-Kheima to Odeid, are bound under treaties with the Government of British India to maintain a maritime truce for the prevention of piracy and slavery, and for the cessation of hostilities at sea. Hence their chiefs are sometimes called the "Trucial" chiefs. The British Political Resident in the Persian Gulf is the recognised arbiter and adviser of these tribes, and peace is maintained by the British flag. In 1892 these tribes agreed not to enter into relations with, or cede territory to, any other Power than the British. The trade of the coast ports largely consists in exports of pearls to India *vid* Lingah and Bahrain.

ARGENTINE REPUBLIC.

(República Argentina.)

President, General Augustin P. Justo, *assumed office*, Feb. 20, 1932.
Vice-President, Dr. Julio Roca.
Min. for Foreign Affairs, Dr. Carlos Saavedra *Interior*, Dr. Leopoldo Melo.
Finance, Dr. Alberto Hueyo.
Justice and Public Instruc., Dr. Manuel de Iriondo.
Agriculture, Dr. Antonio A. de Tomaso.
War, Col. Manuel A. Rodriguez.
Marine, Capt. Pedro S. Casal.
Public Works, Dr. Manuel R. Alvarado.

Ambassador in London, His Excellency Señor Dr. Don Manuel Malbran, 11 Lowndes Square, S.W. 1.
Counsellor, Señor Don Carlos Miguens.
First Secretary, Señor Dr. Don Pablo Santos Muñoz.
2nd Secretary, Señor Dr. Don Mariano A. Barrenechea.
Military Attaché,
Naval Attaché,
Air Attaché,
Civil Attaché, Señor Don Julián Duggan.
Agricultural & Commercial Counsellor, Señor Dr. Don Anebal Fernandez Beypo.
Consul-General, Señor Don Mario Molino Salas, 7 Gower Street, W.C 1.

There is a Consulate-General at *Dublin*, and there are also Consulates at *Liverpool, Southampton, Cardiff, Newcastle-upon-Tyne, Newport*, and *Glasgow*; and Vice-Consulates at *Aberdeen, Belfast, Bristol, Hull, Manchester, Middlesbrough*, and *Swansea*.

Argentina is a wedge-shaped country, occupying the greater portion of the southern part of the South American Continent, and extending from Bolivia to Cape Horn, a total distance of nearly 2,300 miles; its greatest breadth is about 930 miles. It is bounded on the north by Bolivia, on the north-east by Paraguay, Brazil, and Uruguay, on the south-east and south by the Atlantic, and on the west by Chile, from which Republic it is separated by the Cordillera de los Andes. (For the statue of Christ the Redeemer *see* Chile.) On the west the mountainous Cordilleras, with their plateaus, extend from the northern to the southern boundaries; on the east are the great plains, those in the north are thickly wooded and are known as *El Gran Chaco*, and further south lie the treeless pampas, which together constitute *La Plata*, extending from the Bolivian boundary in the north to the Rio Negro; and south of the Rio Negro are the vast plains of Patagonia. Argentina thus contains a succession of level plains, broken only in Cordoba by the San Luis and Cordoba ranges, in the north-western states by the eastern spurs of the Andes, and in the southern portion of the Province of Buenos Aires by the Tandil Hills (about 1,000 ft.) and the Sierra Ventana, near Bahia Blanca (about 3,000 ft.). The Paraná River, formed by the junction of the Upper Paraná with the Paraguay River, flows through the north-eastern states into the Atlantic, and is navigable throughout its course; the Pilcomayo, Bermejo, and Salado del Norte are also navigable for some distance from their confluence with the Paraná. In the Province of Buenos Aires the Salado del Sud flows south-east for some 300 miles into Samborombon Bay (Atlantic). In the south the Colorado and Rio Negro rise in the extreme west and flow across the pampas into the Atlantic, many similar streams in Patagonia (notably the Chubut and Santa Cruz) traversing the country from the Andes to the Atlantic.

The Republic is composed of 14 provinces and 10 territories, comprising in all about 1,138,000 square miles, with a population of 11,658,717 in 1931. Immigration is encouraged and comes principally from Spain and Italy, but legislation, introduced in 1919, requires intending immigrants to produce certificates of good character and ability to work. In 1931 the immigrants numbered 353,889, and the emigrants numbered 337,113. The climate is moderate. Spanish is the language of the country.

Government.—The estuary of La Plata was discovered in 1515 by Juan Díaz de Solis but it was not until 1534 that Pedro de Mendoza founded Buenos Aires. In 1810 (May 25) Spanish rule was defied and in 1816 (July 9) the Independence of Argentina was declared by the Congress of Tucumán. In 1853, after more than thirty years of disturbances and civil wars, the country settled down, and is now a well-governed and progressive Republic. The constitution dates from 1853 (revised 1859) and is modelled on that of the U.S. of America, but each province enjoys practically complete autonomy. The executive is in the hands of the President, who selects his Cabinet. The National Congress consists of a Senate of 30 members and of a House of Deputies of 158 members. Members of Congress receive $518 000 (paper) *per annum*.

Production.—Of the total area about one third is suitable for agriculture and cattle raising. The principal productions are wheat, maize, oats, linseed, sugar, wine, wool, hides, cattle, sheep, and horses. There were (1930) 32,211 855 cattle, 44,413,221 sheep, 9 858,111 horses, 1 039 420 mules (1930), 5,647,396 goats (1930), and 3,768,738 pigs (1930). The exports are made up entirely of pastoral and agricultural products, with the exception of quebracho, copper, manganese, and wolfram. In 1931 the exports of wheat were 6,638,682 metric tons, oats 644,766, casein (1930) 13 990, cotton (1931) 25,018 tons, linseed 1,880 274 maize 9,767,201 metric tons, butter (1931) 23 209 tons, wool (1931) 129,838 tons, sheepskins (1931) 21,613 tons, chilled meat (1931) 352 227 tons, frozen meat (1931) 83 682 tons, frozen mutton and lamb (1931) 83 043 tons. Oil has been found in various parts of the Republic and is worked to a considerable extent in the neighbourhood of Comodoro Rivadavia in the Department of Escalante. The Argentine State Oilfields produced 873,582 cubic metres in 1931, the output of private companies was approximately 987,822 cubic metres in 1931.

Communications.—There were (1931) 24,787 miles of railroad open. The railroads are almost entirely in the hands of British companies, and absorb about £234,000,000 of British capital. Telegraphs about 75,250 miles, mostly Government lines. There are 22 wireless stations, of which one is reserved for communication between England and the Argentine. There are aeroplane services between Argentine centres, neighbouring Republics and Europe and North America. The principal ports are Buenos Aires, Rosario, La Plata, and Bahia Blanca. In 1931, 3,226 vessels (11,547,715 net tons) entered at all ports; of the total, 5,116,496 net tons (43 38 per cent.) were British.

Defence.—The Navy consists of 2 super-Dreadnought battleships (reconstructed in 1925), 5 destroyer leaders, 4 destroyers, 4 coast defence ships and auxiliary vessels, 2 light cruisers, and 3 submarines. Strength about 800 officers and 14,000 men. The principal naval base is at Puerto Belgrano, near Bahia Blanca, and there are minor bases at La Plata and Buenos Aires, while a new submarine base is being built at Mar del Plata. The naval aviation base is at Puerto Belgrano, with a subsidiary base at Punta Indio. The Army is organised in 5 divisions, and numbers about 1,500 officers and 25 000 men on a peace footing. Each divisions would consist of about 40,000 men on a war footing.

Education.—*Primary* Education is secular, free and compulsory from the ages of 7 to 14. The scattered population of the country districts constitute a problem in attendance which is being gradually solved. *Secondary* Education is controlled by the National Government in National Colleges numbering 51 in 1929, with 17,600 students, average annual fees $45 (paper), in Normal Schools, numbering 86 in 1923, with 30,000 students who pay no fees, and in 60 Special Institutes for Commerce, Arts and Crafts, Mining, Agriculture, &c. There are *National Universities* at Cordoba, Buenos Aires, La Plata, and Tucuman, and Faculties at Santa Fe, Rosaria and Paraná.

Consul General, Charles D Seligmann

Prior to the War the Austrian Empire joined to the Kingdom of Hungary was the largest Empire, next to Russia on the continent of Europe, situated between 42°–51 N lat and 9° 30—26 20' E long It embraced an area of 240,456 sq miles, and a population (1914) of nearly 53 000 000 At the conclusion of the Great War the territories of Austria comprised an area of 32 175 square miles with a population (1923) of 6 534 482 (estimated Dec 31, 1927 at 6 678 527) Before the armistice of Nov 11 1918, the Hungarians, Czechoslovaks, Poles Jugoslavs and Rumanians had seceded from the "Dual Monarchy" The Emperor Karl withdrew from the exercise of government" by proclamation (Nov 11 1918) and a Republic of German Austria was declared Nov 12, 1918

Under the *Treaty of St Germain* (Sept 10 1919) the political neighbours of Austria are Germany and Czechoslovakia on the N, Italy and Yugoslavia on the S, Switzerland on the W and Hungary on the E

Under the new Constitution (Nov, 1920), Austria became a Republican Federation of eight Provinces —

	Area (sq miles)	Population 1931
Lower Austria and Vienna	7,560	3,350 082
Upper Austria	4 627	918,006
Carinthia	3,679	403,722
Styria	6 320	1,085 475
Salzburg	2,765	237 384
Tyrol	4 881	328,491
Vorarlberg		150,231
Burgenland (West Hungary)		300,234
Total	32,175	6 732 625

Under the Constitution the Bundesrat and Nationalrat were constituted, a government formed, and a President elected Vienna was later formed into a separate Province The elections resulted in a majority for the *Christian Socialists* over the *Social Democrats*, the *Pan Germans* coming next in order In June, 1921, the Ministry resigned in favour of a non party Government, which gave way (May, 1922) to a Christian Socialist Pan German Coalition Government under Doctor Seipel (a priest) Elections were held again in October 1923, March 1927, and November 1930, and a similar Government was returned on each occasion

Complete religious liberty is one of the fundamental laws of the new Republic The prevailing religion is Roman Catholic

Defence—During the War of 1914 18 about 5,000 000, all ranks were passed into the common Army of Austria Hungary The total casualties exceeded 2 500 000, of whom over 700 000 were returned as killed Under the *Treaty of St Germain* the military, naval and air forces were demobilised and reduced to minimum requirements and all warships were surrendered to the Allies, those under construction being broken up Service in the Republican Army is by voluntary enlistment for twelve years

Education—Primary education is compulsory and free, the children in attendance at schools numbering about 720,000 in 1927 Secondary education is provided in gymnasia, and real schools and there are universities at Vienna, Graz and Innsbruck

Finance—The finances of Austria went from bad to worse for four years after the Armistice owing to heavy deficits and incessant inflation The deficit on the State Budget was estimated in July, 1922, at considerably more than one billion crowns, and by Oct 1922, the exchange value of the crown had sunk to about one fifteen thousandth of its nominal value, £1 being equal to 325 000 crowns (in place of 24 22) The circulation on Sept 30 1922, was over two billion crowns In September and October, 1922, the League of Nations worked out a scheme for the restoration of the Austrian finances within two years under the control of a High Commissioner appointed by the League, the Governments of Great Britain France, Italy, and Czechoslovakia agreeing to guarantee four fifths of a loan of 520 000,000 gold crowns (about £25 000 000) in order to fill the deficit in the Budget during the two years The guarantees for the remainder were given by other powers and a short term loan of £3,500,000 was issued in March, 1922 In the following June the big League of Nations loan was successfully floated, nearly one half in London, about £5 000 000 in New York and the rest in various continental capitals The sum actually received amounted to over £26,500,000 About £11,000,000 was used to repay the previous short term loans made in 1922 and 1923 The High Commissioner, Dr Zimmerman, appointed by the League of Nations to supervise the carrying out of their scheme for the reconstruction of Austria, entered on his office in Dec 1922 Great progress has been made since in reducing Government expenditure and increasing the revenue. Thus about 79 000 superfluous officials were dismissed or pensioned off by the end of December, 1924, and on the completion of the work of reconstruction Dr Zimmerman left Vienna in July,

1926. The issue of uncovered bank-notes was stopped on Nov. 18. 1922, and the Austrian crown was stabilised at about Crs. 345,000 = £1. In 1925 a new currency was introduced, the unit being the Austrian *schilling* (=10,000 paper Crowns), the rate of exchange in Sept., 1931, being 34 56 *sch.* = £1 sterling Since the Armistice (Nov. 11, 1918), the British Government has advanced about £10,000,000 to the Republic. The favourable condition of the Austrian State lasted until 1929, but in 1930 there was a small deficit on working account and in 1931 measures were passed to reduce expenditure and increase revenue.

	1930	1931
Receipts	£43,600,000	£42,440,000
Current Expenditure	44,000,000	48,920,000
Working Surplus ...	...	...
Deficit	400,000	6,480,000
Capital Expenditure	7,200,000	2,800,000

Since 1930 Austria is being continuously affected by the general trade depression which causes an increase in the number of unemployed, a falling off in production and foreign trade, and a decline in the revenue In May 1931 the leading bank, the Oesterreichische Credit Anstalt, got into difficulties and had to be supported by the Government In order to relieve the strain on the Austrian National Bank, the Bank of England advanced £4,300,000 to the Austrian Government on June 16. In August 1931 the Austrian Government applied to the League of Nations to make an enquiry into its situation, and experts were sent, at the Conference of Lausaune (1932) the offer was made to facilitate the raising of a loan of not more than 300,000,000 *sch* for Austria, under certain conditions, to which the Austrian Government subsequently agreed.

	1930	1931
Total Imports	£79,283,000	£64,000,000
Total Exports	54,574,000	38,800,000
Imports from U. K.	2,708,000	2,180,000
Exports to U. K. ..	2,950,000	2,700,000

Communications—In Sept., 1923, there were about 4,140 miles of railway (exclusive of narrow gauge lines). The mercantile marine was considerable in 1914, but the new Republic is land-locked.

Industries—The principal industry is agriculture, the chief products being wheat, barley, oats, rye, maize, and potatoes. Forestry and stock raising are important. The forests are principally coniferous trees. The live-stock includes horses, cattle, sheep, pigs, and goats The vine is extensively cultivated. The most important mineral production is that of iron ore, magnesite, and salt, there are also lead, zinc, copper, common and brown coal, and graphite The principal manufactures are woollens, cottons, steel, wood-work, brewing, and machinery.

CAPITAL, Vienna, on the River Danube. Pop. (1931) 1,824,912, other large towns are Graz (152,706), Linz (102,081), and Innsbruck (56,402).

Prior to the War the Austrian Empire joined to the Kingdom of Hungary was the largest Empire, next to Russia, on the continent of Europe, situated between 42°–51 N lat and 9° 30 –26 20 E long It embraced an area of 240,456 sq miles, and a population (1914) of nearly 53 000 000 At the conclusion of the Great War, the territories of Austria comprised an area of 32 175 square miles with a population (1923) of 6 534 482 (estimated Dec 31, 1927 at 6 678 527) Before the armistice of Nov 11 1918, the Hungarians, Czechoslovaks, Poles Jugoslavs and Rumanians had seceded from the 'Dual Monarchy" The Emperor Karl withdrew from the exercise of government" by proclamation (Nov 11 1918) and a Republic of German Austria was declared Nov 12, 1918

Under the *Treaty of St Germain* (Sept 10 1919) the political neighbours of Austria are Germany and Czechoslovakia on the N, Italy and Yugoslavia on the S, Switzerland on the W and Hungary on the E

Under the new Constitution (Nov 1920), Austria became a Republican Federation of eight Provinces —

Province	Area (sq miles)	Population 1931
Lower Austria and Vienna	7,560	3,350,082
Upper Austria	4,627	918 006
Carinthia	3,679	403 722
Styria	6 320	1 025 475
Salzburg	2,765	237 384
Tyrol	4 881	338,491
Vorarlberg	1 010	150,231
Burgenland (West Hungary)	1,533	300,234
Total	32,175	6 732,625

Under the Constitution the Bundesrat and Nationalrat were constituted, a government formed, and a President elected, Vienna was later formed into a separate Province The elections resulted in a majority for the *Christian Socialists* over the *Social Democrats* the *Pan Germans* coming next in order In June, 1921, the Ministry resigned in favour of a non party Government, which gave way (May, 1922) to a Christian Socialist Pan German Coalition Government under Doctor Seipel (a priest) Elections were held again in October 1923, March 1927, and November 1930, and a similar Government was returned on each occasion

Complete religious liberty is one of the fundamental laws of the new Republic The prevailing religion is Roman Catholic

Defence—During the War of 1914 18 about 5 000 000, all ranks were passed into the common Army of Austria Hungary The total casualties exceeded 2 500 000, of whom over 700 000 were returned as killed Under the *Treaty of St Germain* the military, naval and air forces were demobilised and reduced to minimum requirements and all warships were surrendered to the Allies, those under construction being broken up Service in the Republican Army is by voluntary enlistment for twelve years

Education—Primary education is compulsory and free, the children in attendance at schools numbering about 720,000 in 1927 Secondary education is provided in gymnasia, and real schools and there are universities at Vienna, Graz and Innsbruck.

Finance—The finances of Austria went from bad to worse for four years after the Armistice owing to heavy deficits and incessant inflation The deficit on the State Budget was estimated in July, 1922, at considerably more than one billion crowns, and by Oct 1922 the exchange value of the crown had sunk to about one fifteen thousandth of its nominal value, £1 being equal to 325 000 crowns (in place of 24 22) The circulation on Sept 30 1922, was over two billion crowns In September and October, 1922 the League of Nations worked out a scheme for the restoration of the Austrian finances within two years under the control of a High Commissioner appointed by the League, the Governments of Great Britain, France, Italy, and Czechoslovakia agreeing to guarantee four fifths of a loan of 520 000,000 gold crowns (about £25 000 000) in order to fill the deficit in the Budget during the two years The guarantees for the remainder were given by other powers and a short term loan of £3,500,000 was issued in March, 1923 In the following June the big League of Nations loan was successfully floated, nearly one half in London, about £5 000 000 in New York and the rest in various continental capitals The sum actually received amounted to over £26,500,000 About £11,000,000 was used to repay the previous short term loans made in 1922 and 1923 The High Commissioner, Dr Zimmerman, appointed by the League of Nations to supervise the carrying out of their scheme for the reconstruction of Austria, entered on his office in Dec 1922 Great progress has been made since in reducing Government expenditure and increasing the revenue. Thus about 79,000 superfluous officials were dismissed or pensioned off by the end of December, 1924, and on the completion of the work of reconstruction Dr Zimmerman left Vienna in July,

1926. The issue of uncovered bank notes was stopped on Nov 18 1922, and the Austrian crown was stabilised at about Cts 345,000 = £1. In 1925 a new currency was introduced, the unit being the Austrian *schilling* (=10,000 paper Crowns), the rate of exchange in Sept., 1931, being 34 56 *sch* = £1 sterling. Since the Armistice (Nov 11 1918), the British Government has advanced about £10 000,000 to the Republic. The favourable condition of the Austrian State lasted until 1929, but in 1930 there was a small deficit on working account and in 1931 measures were passed to reduce expenditure and increase revenue.

	1930	1931
Receipts	£43 600,000	£42 440 000
Current Expenditure	44 000 000	48 920,000
Working Surplus		
Deficit	400 000	6 480,000
Capital Expenditure	7,200 000	2 800 000

Since 1930 Austria is being continuously affected by the general trade depression which causes an increase in the number of unemployed, a falling off in production and foreign trade and a decline in the revenue. In May 1931 the leading bank, the Oesterreichische Credit Anstalt, got into difficulties and had to be supported by the Government. In order to relieve the strain on the Austrian National Bank the Bank of England advanced £4 300 000 to the Austrian Government on June 16. In August 1931 the Austrian Government applied to the League of Nations to make an enquiry into its situation and experts were sent; at the Conference of Lausanne (1932) the offer was made to facilitate the raising of a loan of not more than 300 000,000 *sch* for Austria, under certain conditions, to which the Austrian Government subsequently agreed.

	1930	1931

A Kingdom of Western Europe, with a total area of 11 750 square miles and a population Dec. 31, 1930 (including Eupen and Malmédy) of 8 129 824. Belgium is bounded on the N. by the Kingdom of the Netherlands, on the S. by France, on the E. by Germany and Luxemburg and on the W. by the North Sea. The kingdom formed part of the "Low Countries (Netherlands) from 1815 until Oct. 14 1830, when a National Congress proclaimed its independence, and on June 4, 1831, Prince Leopold of Coburg was chosen hereditary king. The separation from the Netherlands and the neutrality and inviolability of Belgium were guaranteed by a Conference of the European Powers, and by the *Treaty of London* (April 19,

1839), the famous "Scrap of Paper," signed by Austria, France, Great Britain, Prussia, The Netherlands, and Russia. On Aug. 2, 1914, the Germans invaded Belgium, in violation of the terms of the treaty; the main object of this act was to turn the French frontier defences and reach Paris before French resistance could be organized, but the Germans were foiled by the heroic defence of the forts at Liége, which gave the French and English armies time to establish contact and block the way to Paris. The invaders, however, ultimately over-ran nearly the whole of Belgium, and the Belgium army was entrenched during the remainder of the war period behind the river Yser. The Germans were ousted from the country shortly before the armistice of Nov. 11, 1918. About 10,000 persons were added in 1919 by the cession of Moresnet and part of Malmédy by Germany, and the district of Eupen, with the remainder of the district of Malmédy, were ceded by Germany and annexed by Belgium (Sept. 20, 1920) after a plebiscite, thus adding a further 50,000 to the inhabitants. In addition, the Grand Duchy of Luxemburg joined Belgium in an economic union when it ceased after the war to form part of the German *Zollverein*.

Belgium is inhabited by two distinct races, the Flemish, of Germanic stock, and the Walloons, of Latin stock. Flemish is spoken in the provinces of West Flanders, East Flanders, Antwerp, Limburg, and the northern half of Brabant, and French in the provinces of Hainalt, Namur, Luxemburg, Liège, and the southern half of Brabant. The town of Brussels is bilingual, and the upper classes everywhere speak French. The official languages are both Flemish and French, and also German in the districts acquired after the war. Nearly all the inhabitants are, at least nominally, Roman Catholics.

Belgium has a frontier of 831 miles, and a seaboard of 42 miles. The Meuse and its tributary the Sambre divide it into two distinct regions, that in the west being generally level and fertile, whilst the table-land of the Ardennes, in the east, has for the most part a poor soil. The "polders" near the coast, which are protected by dikes against floods, cover an area of 193 sq. miles. The highest hill, Baraque Michel, rises to a height of 2,230 feet, but the mean elevation of the whole country does not exceed 536 feet. The principal rivers are the Scheldt and the Meuse. Brussels has a mean temperature of 50° F. (summer 65°, winter 37°).

GOVERNMENT.—The constitution jointly vests the legislative power in the King, the Senate, and the Chamber of Representatives. The 154 senators (with the exception of 40 elected by the provincial councils and 20 elected by the senators themselves) and 187 representatives are elected by the people, the former for eight, the latter for four years. Universal male suffrage, with plural voting up to three votes by property and educational qualifications, was introduced by the Electoral Law of 1894, proportional representation being secured by an Act of 1900. In April, 1919, the Belgian Parliament decided as an emergency measure to hold 1919 elections on a "one man one vote" basis for Senate and Chamber. (Unmarried widows of soldiers killed before Jan. 1, 1919, or failing widows, the mothers; widows or mothers of civilians shot by enemy; women imprisoned by enemy for patriotic acts, also voted.) This Parliament, anomalous, and unconstitutionally elected, was required to make constitutional the machinery by which it was elected; *i.e.*, to revise article 47 of the Constitution. This was done (Feb. 7, 1921) and a new Chamber was elected in 1925. The present Chamber (elected in May, 1929), consists of 77 Catholics, 28 Liberals, 70 Socialists, 11 Frontists (extreme Flemish Nationalists), and 1 Communist. Deputies receive 42,000 francs a year and a free pass over the railways. There are in addition representative Provincial and Communal Councils, elected on a somewhat more liberal franchise.

PRODUCTION.—Agriculture and forestry are important industries, the chief crops being oats, rye, wheat, potatoes, barley and sugar-beet. Belgium is essentially a manufacturing country, and it is largely dependent upon foreign supplies for its food. The mineral kingdom yields coal, iron, zinc, lead, and copper. The leading industries are collieries, quarries, and metallurgic (Mons, Charleroi, Liège, Namur, Hainaut, Brabant, and Limbourg), glass, textiles (Ghent and Verviers), lace (Brussels, Mechlin, Bruges, &c.), flour and starch mills, sugar, distilleries, breweries, &c.

DEFENCE.—In 1928 a new Recruiting Law was passed, entailing compulsory service for an average of 12 months, including rappels. The annual contingent is fixed at 44,000, and the Army consists of a Field Army of 3 Corps, each of 2 Divisions, and 1 Cavalry Corps of 2 Divisions.

EDUCATION.—Schools are maintained by communal taxation, with provincial and State grants, while many are under ecclesiastical control, Roman Catholic largely predominating. There are 134 State high schools, including 44 for girls, and numerous private institutions. Special schools abound. The Universities of Ghent and Liege are maintained by the State; those of Brussels and Louvain are free institutions. After considerable opposition, Ghent University, which had in the past given its teaching and transacted its business in French, was in 1930 turned into a purely Flemish institution. It had already been made bi-lingual in 1923.

Revenue (1931)	*Francs* 10,291,447,655
Expenditure (1931)	12,614,533,806
Debt (Dec. 31, 1931):—

Total	52,962,099,502
Imports (1931)	*Francs* 23,964,359,000
Exports (1931)	23,235,797,000
Imports from U.K. (1931) ...	1,957,552,000
Exports to U.K. (1931)	4,914,998,000

The imports in 1931 were: manufactured articles (7,095,781,000 francs), raw materials (10,858,148,000), foodstuffs and beverages (5,570,625,000), and live animals (217,390,000); the exports were: raw materials (7,887,870,000 francs), manufactured articles (13,009,396,000), and foodstuffs and beverages (2,025,205,000) and live animals (213,808,000).

COMMUNICATIONS.—In 1931 there were 5,147 kilometres of normal gauge railways, 4,823 of which were operated by the National Railway Company; the length of light railways (narrow gauge) at the end of 1931 was 5,188 kilometres,

* Including Debts to Foreign Governments.

4,632 kilometres (of which 1,000 are electrified) being in operation. In 1930 there were 9,600 kilometres of telegraph line, with 48,000 kilometres of telegraph wire. The navigable rivers and canals have a length of 1,992 kilometres (1931), and there are 10,309 kilometres of State and provincial roads. Most of the maritime trade of Belgium is carried on in foreign bottoms, the mercantile marine consisting (1931) of 162 vessels (529,747 tons), in addition to which there were (1930) 552 fishing boats. In 1931, 17,555 vessels entered at Belgian ports (tonnage 27,793,141). The principal port and commercial entrepôt is Antwerp, on the River Scheldt. Other ports are Ostend, Ghent, Bruges, Nieuport, Blankenburg and Zeebrugge. The vexed question of the navigation of the Scheldt, the mouth of which is entirely in Netherlands territory, has lately been the subject of negotiations between the Belgian and the Netherlands Governments, which have not yet (Nov. 1932) reached a conclusion.

The Capital, BRUSSELS, had a population (Dec. 31, 1930) of 885,924 (with suburbs). Other towns with over 100,000 inhabitants are Antwerp, the chief port (451,334); Ghent (208,539), which has large cotton and flax spinning mills, and is the second port of importance after Antwerp, while its flower shows are famous; and Liège (169,566) the centre of the iron industry. Brussels is 224 miles from London; transit, 8 hrs.

THE BELGIAN CONGO.

Governor-General, His Excellency Lieutenant-General Auguste Constant Tilkens.

The Independent State of the Congo, founded in 1885, became a Belgian Colony on Nov. 15, 1908. Situated between long. 12°–31° E. and lat. 5° N.–13° S, the colony comprises an area of 909,654 sq. miles, with a native population (1930) of 9,584,936. The European population (Jan., 1932) was 22,482, of whom 15,034 were Belgians, 1,493 Portuguese, 1,473 Italians, — British, 658 Greek Americans, 554 French, 348 Dutch, 202 and 1,226 others of various nationalities.

The Congo River is navigable for large vessels from its mouth at Banana to Matadi (95 miles), where the European steamers discharge and recharge their cargo; but between that place and Leopoldville, on Stanley Pool, there occur rapids and falls which have been avoided by a railroad 249 miles in length. A narrow-gauge line runs from Boma to Tchela in the Mayumbe (86 miles). Above Leopoldville the river and its numerous affluents are navigable by steamer for about 7,000 miles, the falls on the Upper River being avoided by a metre-gauge line from Stanleyville to Ponthierville (78 miles), and another from Kindu to Kongolo (355 kilometres). Another line from Kabalo to Albertville on Lake Tanganyika (170 miles) connects the West Coast of Africa with British East Africa and the East Coast. The Katanga-Bukama Railway (446 miles) links up the Rhodesian Railway system with the steamers plying on the Upper Congo River, connecting with both the East and the West Coast. The Bukama-Port-Franqui Railway (702 miles) commenced in 1923 and opened in 1928 makes it possible to travel by train direct from Cape Town to the river Kasai, a distance of 3,400 miles. This new route plays an important part in the export of copper from the Katanga mines, its possibilities being limited only by the capacity of the Port of Matadi. Other railways are Kindu-Kongola (223 miles), Aketi-Bor[illegible] miles), Charlesville-Makumbi (56 mil[illegible] Manono-Mayumba (32 miles), making a total for the Colony of 2,112 miles. A new line has been completed from Katanga to join the recently completed Benguela Railway in Portuguese Angola, and work has been started on a line from Stanleyville to Lake Albert which will provide the last link to direct river and rail communication between the Cape and Cairo. Regular air services are established from Boma to Leopoldville, Luebo and Elisabethville, from Luebo to Kabalo and from Leopoldville to Coquilhatville. Motor roads total over 6[illegible] miles. The most important motor road is *Route Royale Congo-Nil* (563 miles) from Djamba, on the Ruki, to Redjaf, on the Nile. Another runs from Bukama (*vid* Kanda-Kanda and Luebo) to Djoko-Punda, on the Kasai (625 miles). A complete system of telegraphic communication has been established throughout the Colony and is connected with the international system.

The West Coast District has rather scanty rain (40 inches), but on the Mayumbe Hills and in the whole interior the rainfall averages between 60 and 80 inches, and the country is very fertile and productive. Sleeping sickness, once very prevalent and destructive, is now decreasing. Extensive forests cover the central districts; oil palms are plentiful everywhere, and supply an ever-increasing trade in palm-oil and palm-kernels. Cotton, cocoa, rubber and coffee are successfully planted. The Colony is rich in minerals. Extensive radium deposits exist in the Katanga, where there are enormous deposits of copper, but the smelters have been practically at a standstill since 1932. Bukama is the centre

of an extensive tin belt and alluvial and reef gold are found in the North eastern Congo Diamond bearing gravels are worked in the south The chief exports are palm kernels and palm oil cotton cocoa gum copal rubber ivory copper gold tin radium and diamonds Capital Leopoldville (pop 2 432 whites) Principal towns Boma (pop 377 whites) Elisabethville (Katanga) (pop 2 624 whites) Stanleyville Eastern Province (610 whites) Coquilhatville (517 whites)

BOLIVIA

(Republica Boliviana)

President, Dr Daniel Salamanca (*assumed office*, March 4 1931)
Vice President, Senor José Luis Tejada Sorzano

Envoy Extraordinary, Minister Plenipotentiary in London Señor Don Carlos Victor Aramayo 16 Grosvenor Place W 1
1st Secretary, Senor Don Mamerto Urriolagoitia
Secretary (Specially Attached), Señor Don Eduardo Aramayo
Financial Counsellor, Senor Carlos Navarro
Military Attaché Col Melchor Brito
Attaché Pastor Flobet
Consul General, Senor Don Mamerto Urriolagoitia 16 Grosvenor Place W 1

The Republic of Bolivia extends between lat 8° and 23° S and long 57° 30 and 73° W, and its area is officially estimated at 594,460 square miles (other estimates giving an area of 708 195 square miles) with an estimated population of 2 911 283 The Republic derives its name from its liberator, Simon Bolivar (born 1783 died 1830)

The chief topographical feature is the great central plateau (6 500 square miles) over 500 miles in length, at an average altitude of 12,000 feet above sea level, between the two great chains of the Andes which traverse the country from south to north, and contain, in Illampu (Sorata), and Illimani, two of the highest peaks of the western hemisphere The total length of the navigable streams is about 12 000 miles the principal rivers being the Itenes, Beni Mamoré and Madre de Dios

Mining and agriculture are the principal industries the mineral productions being very valuable The ancient silver mines of Potosi are now worked only for tin but gold partly dug and partly washed is obtained on the Eastern Cordillera of the Andes the tin output is after that of the Straits Settlements the largest in the world while copper antimony wolfram bismuth salt and sulphur are also found Its agricultural produce consists chiefly of rice barley maize cotton coca indigo india rubber cacao potatoes cinchona bark, medicinal herbs &c Manufactures are in a very undeveloped state The principal exports are tin and silver ores crude rubber copper ores, bismuth lead ores wolfram wool coca hides and antimony the chief imports are iron and steel products textiles machinery sugar flour and coal There are (1929) 1 314 miles of railways in operation and the construction of a line from Cochabamba to Santa Cruz in two sections of 115 and 110 miles respectively is in the preliminary stages There are 4 000 miles of telegraph wire, and wireless services between Riberalta La Paz Cobija Capitanli (Chaco) There is direct railway communication to the sea at Antofagasta (2 days) Arica (1 day) and Mollendo (2 days) and also to Buenos Aires (3½ days), branch lines run from Oruro to Cochabamba and from Rio Mulato to Potosi Construction on the railway between La Quiaca (on the Argentine frontier) and Atocha (in Bolivia) is now completed There is through railway communication with Buenos Aires from La Paz Communication with Peru is effected by rail to Guaqui and thence by steamer across Lake Titicaca to the railroad at Puno The principal line is the Antofagasta and Bolivia railroad (719 miles), and a line from La Paz to the province of Yungas (the first section of which is open) may eventually connect with the steamers on the rivers Beni Mamoré and other tributaries A line from Potosi to Sucre the legal capital, is under construction and trains run to Betanzos

Bolivia is without a sea coast having been deprived of the ports of Tocopilla Cobija Mejillones, and Antofagasta by the 'Pacific War of 1879–1882 (*see* Chile) The Peace Army amounts to about 5 000 all ranks the War Effective being about 105 000.

Brazil, the most extensive State of South America, discovered in 1500 by Pedro Alvares Cabral, Portuguese navigator, is bounded on the north by the Atlantic Ocean, the Guianas Colombia and Venezuela, on the west by Peru, Bolivia, Paraguay, and Argentina, on the south by Uruguay and on the east by the Atlantic Ocean and extends between lat 5° 10′ N and 33° 45′ S and long 34 45′ and 73° 59 22′ W, being 2,327 miles from north to south, and 2,321 from west to east, with a coast line on the Atlantic of 3,577 miles The Republic comprises an area of 3,298,870 square miles, with a population (Census 1920) of 30,635,605, estimated at 39,103,956 in 1928

The northern States of Amazonas and Pará are mainly wide, low lying forest clad plains The central state of the Matto Grosso is principally plateau land and the eastern and southern States are traversed by successive mountain ranges interspersed with fertile valleys In the extreme south, towards the interior, the land rises by gentle gradations to the height of 2,000 to 5,000 feet above sea level The principal ranges are *Serra do Mar* in Sao Paulo, the *Serra Geral* (Caparao 9,393 feet) between Minas Geraes and Espirito Santo, the *Serra do Mantiqueira* (Itatiaya, 9,163 feet), and the *Serra do Espinhaço* (Itacolumi, 5,748 feet), in the south east of Minas Geraes, the *Serra do Paranán*, between Goyaz and Minas Geraes, the *Serra dos Aymores*, which divide Espirito Santo from Minas Geraes, and the *Serra da Gurgueia, Branca* and *Araripe*, which envelop Piauhy.

Brazil is unequalled for its rivers. The *River Amazon* has tributaries which are themselves great rivers, and flows from the Peruvian Andes to the Atlantic with a total length of some 4,000 miles Its principal northern tributaries are the *Napo* and Marañon, the *Putumayo* or *Ica*, *Rio Branco Rio Negro*, and *Japura*, its southern tributaries are the *Juruá*, *Purus*, *Madeira* and *Tapajos*, while the *Xingu* meets it within 200 miles of its outflow into the Atlantic The *Tocantins* and *Araguaya* flow northwards from the Plateau of Matto Grosso and the mountains of Goyaz to the Gulf of Pará The *Parnahyba* flows from the encircling mountains of Piauhy into the Atlantic The *São Francisco* rises in the South of Minas Geraes and traverses Bahia on its way to the Eastern coast between Alagoas and Sergipe The *Paraguay* rising in the south-west of Matto Grosso forms a boundary with Bolivia on its way through Paraguay to its confluence with the *Parana* which rises in the mountains of that name and divides Brazil from Paraguay On the Iguassu, which unites with the Upper Parana at the Brazil Argentine-Paraguay boundary, are the majestic *Falls of the Iguassu*, and on the Sao Francisco are the no less famous falls of *Paulo Affonso*

GOVERNMENT —Brazil was colonised by Portugal in the early part of the sixteenth century, and in 1822 became an independent empire under Dom Pedro, son of the refugee King João VI of Portugal, the centenary of Brazilian independence being celebrated by an International Exhibition at the capital (Sept 7, 1922, to July 2, 1923) On Nov 15, 1889, Dom Pedro II second of the line, was dethroned and a republic was proclaimed The constitution rests on the fundamental law of Feb 24, 1891, which established a federal republic under the name of *Estados Unidos do Brazil* The President and Vice President are elected for 4 years by the direct votes of all male Brazilians over 21 years who can read and write they are ineligible for the succeeding term They are aided, as an executive, by a Council of Ministers, who are responsible to the President and not to the legislature Congress consists of a Senate of 63 members and of a Chamber of Deputies of 212 members, members of both houses are paid The language of the country is Portuguese, foreign languages being read and spoken in the following order —French, Italian, English, German and Spanish

PRODUCTION —The minerals are very considerable and valuable, comprising gold, silver, iron, diamonds, topazes, and other precious stones. The immense iron deposits have been scarcely touched Manganese is exported, and there are important deposits of monozite sand Low-grade coal deposits are in the south Its agricultural produce is abundant and its forests are immense. Cattle raising is an important industry, the number being 34,270,324 (Census of 1920). The chief products of the country are coffee, maize, sugar, raw cotton, hides and skins, cocoa, oleaginous fruits, *herva maté*, rubber and tobacco the rubber comes from the more northern provinces, especially the valley of the Amazon, and is shipped from Pará and Manáos, coffee coming chiefly from Sao Paulo Tobacco and cocoa are grown largely, especially in Bahia Cotton is being largely cultivated Sugar cane is grown in large and increasing quantities in the northern provinces, Pernambuco being the centre of the sugar-producing zone. The exports include also meat,

hides, maize, beans, and *herva-maté* (tea). The principal imports are machinery, wheat, iron and steel products, cotton goods, and coal and coke.

Foreign trade of Brazil, 1930:—

DEFENCE.—The peace effective of the Army is about 54,910 all ranks. The Navy consists of 2 Dreadnoughts, 1 battleship, 11 destroyers, 1 tender, 4 submarines, and some small vessels and aircraft.

EDUCATION.—*Primary* education is carried out by private initiative and at the cost of municipalities and States, in some cases with a Federal subsidy; there were 1,783,571 pupils in 1928. *Secondary and Technical* education is carried out by Federal, State and Municipal authorities, with 2,440 pupils in Federal schools, 7,975 in State and Municipal institutions, 42,061 in private schools, and 24,688 in technical institutes in 1928. Higher education (11,661 students in 1928) is carried out by Federal and State governments at the State *University* of Rio de Janeiro, and at the University colleges at Manáos (Amazones) and Curityba (Paraná) and other private colleges.

COMMUNICATIONS.—In January, 1930, there were 19,840 miles of railway open. Length of telegraph lines, about 75,000 miles. In 1928 steam and sailing vessels of 44,154,937 tons (of which 8,790,384 were under the British flag) entered Brazilian ports, the principal harbours being Manáos, Pará, Maranhão, Pernambuco, Maceio, Bahia, Victoria, Rio de Janeiro, Santos, and Rio Grande.

1st Sec., M. Ilia Boyadjieff.

The Kingdom of Bulgaria is bounded on the north by Rumania, on the west by Yugo-Slavia and Greece, on the east by the Black Sea, and on the south by Greece. The total area is stated at 39,824 square miles, with a population (Dec. 31, 1930) of 5,944,000. The prevailing religion of the Bulgarians is the Eastern Orthodox Church. For secular purposes, the Gregorian (Western) Calendar is in use.

A Principality of Bulgaria was created by the *Treaty of Berlin* (July 13, 1878) and in 1885 Eastern Roumelia was added to the newly-created principality. In 1908 the country was declared to be an independent kingdom, the area at that date being 37,202 square miles, with a population of 4,337,500. In 1912-13 a successful war of the *Balkan League* against Turkey increased the size of the kingdom, but in August, 1913, a short campaign against the remaining members of the League reduced the acquired area, and led to the surrender of about 2,000 square miles to Rumania. On Oct. 12, 1915, Bulgaria entered the War on the side of the Central Powers by declaring war on Serbia. She thus became involved in the defeats of 1918, and on Sept. 29, 1918, made an unconditional surrender to the Allied Powers. On Nov. 29, 1919, she signed the *Treaty of Neuilly*, which ceded to the Allies her Thracian territories (later handed over to Greece) and some territory on the western frontier to Yugoslavia.

GOVERNMENT.—The executive power is vested in the Tsar, and is exercised by a Council of Ministers, appointed by him. The legislature is a single chamber National Assembly or *Sobranye* of representatives (1 per 20,000 inhabitants), elected for a maximum term of four years by adult manhood suffrage. Members receive 12,000 *leva* a month and free railway travel.

PRODUCTION.—About 80 per cent. of the population is agricultural, farming and small holdings, the principal crops being wheat, rye, barley, oats, maize, beans, tobacco, oleaginous seeds and sugar beet. The rearing of the silkworm is an important industry. The live-stock includes sheep, goats, cattle, pigs, horses, asses and mules. Rich and extensive brown and black coal deposits produce about 1,500,000 tons yearly for home needs, mainly from the State mine at Pernik. Certain areas are well mineralised with copper, lead, zinc, iron, manganese, etc., and also rock salt and bituminous shales. There is a variety of thermal and mineral springs, several of which have been modernised. The only minerals worked on a commercial scale are copper and lead. Local industry, encouraged by tariff protection and other inducements, is rapidly expanding, and cotton and woollen textiles, chemicals, leathers, timber, oils, soaps and metal articles are being produced. The exports consist chiefly of cereals, oil seeds and cake, leaf tobacco and cigarettes, eggs, poultry, dairy produce, live-stock, flour, attar of roses, silk cocoons, minerals, nuts and skins. Imports include raw materials for textile and other industries, cotton and woollen piece goods, metals, agricultural and industrial machinery and appliances, motor cars, rolling stock, chemicals, tanning materials, leathers, mineral and vegetable oils, paper, timber, earthen and glass ware, colonial goods and food products.

DEFENCE.—Before the War of 1914-1918 service in the Army was universal and compulsory and on a peace footing it numbered about 58,000, all ranks. During the War (Oct.-1915 Sept. 1918) about 560,000 passed into the ranks of the Army. By the *Treaty of Neuilly* the Bulgarian Army is limited to 20,000 all ranks.

EDUCATION is free and compulsory and the proportion of attendances is good; the number of illiterates in Bulgaria is comparatively small. There are several technical schools. Sofia has an Agricultural College and a Universities.

COMMUNICATIONS.—On Dec. 31, 1930, there were 15,015 miles of roads of which 10,090 miles were open, 4,055 miles under construction, and 868 miles traced. Of roads in actual use 4,718 miles were State and 4,716 miles Communal. There were 1,507 miles of normal and 296 miles of narrow gauge railway open in 1929. In 1930 there were 578 post and telegraph offices, 551 telephone exchanges with 17,225 subscribers (7,901 in Sofia). The principal Black Sea ports are Varna and Bourgas; and Rustchuk, Svistov, Vidin and Lom on the Danube. In 1930 the vessels engaged in foreign trade cleared at Black Sea ports numbered 768 (1,381,440 tons).

CHILE.

(República de Chile)

President (1932 1938) Señor Don Arturo Alessandri

Ambassador in London, Señor Don Enrique Villegas
Chancery, 3 Hamilton Place Park Lane W 1
1st Secretary of Embassy Don Luis Renard
and Secretary, Don Manuel Pereira
Commercial Counsellor Don Jorge Buchanan
Commercial Attaché Don Santiago Monk
Consul, Don Humberto Videla 76 Victoria Street, S W 1

A State of South America of Spanish origin lying between the Andes and the shores of the South Pacific extending coastwise from the Rio Sama to Cape Horn south, between lat 17° 15 and 55° 59 S and long 66° 30' and 75 48 W Extreme length of coast line about 2 800 miles Its extreme length is about 2,800 miles with an average breadth north of 41°, of 100 miles The great chain of the Andes runs along its eastern limit with a general elevation of 5 000 to 15 000 feet above the level of the sea but numerous summits attain a great height—the highest being in Aconcagua Provincia 7,019 metres (23 025 feet) with many others over 20 000 feet The chain however lowers considerably towards its southern extremity The Andes form a boundary with Argentina, and at the head of a trail leading from Chile to Argentina has been erected a statue of *Christ the Redeemer* 26 feet high made of bronze from old cannon to commemorate the peaceful settlement of a boundary dispute in 1902 There are no rivers of great size and none of them are of much service as navigable highways In the north the country is arid Chile is divided into 16 provinces and 2 territories (Aysen and Magallanes) and the aggregate area is estimated at 289,798 square miles In 1929 Chile signed a treaty ceding the province of Tacna to Peru but retained the province of Arica in return for a payment to Peru of £1,200,000

The population (Census of 1930) was 4,287 445 Included in the population are four distinct racial divisions (*a*) the Spanish settlers and their descendants (*b*) the indigenous Araucanian Indians Fuegians and Changos, (*c*) mixed Spanish Indians and (*d*) European immigrants who were represented in 1920 by 25,962 Spaniards 12,360 Italians, 7,200 British and Irish 8,950 Germans, 7 200 French and 5 000 Syrians In 1929, the births numbered 176 030 (40 1 per 1000) marriages, 42,004 (9 6 per 1000), and deaths 110,006 (25 1 per 1000)

GOVERNMENT — Chile was discovered by Spanish adventurers in the 16th century, and remained under Spanish rule until 1810 when a revolutionary war, culminating in the *Battle of Maipu* (April 5 1818), achieved the independence of the nation The present constitution was voted by an overwhelming majority at the plebiscite held on Aug 30, 1925, and superseded that of May 25, 1833 It was drafted by a Committee appointed *ad hoc* by President Alessandri. In accordance with the new Constitution the President is to be elected by direct vote of all Chilean citizens who have the right to vote The National Congress consists of a Senate of 45 members and of a Chamber of a number of Deputies to be fixed by a new electoral law in 1925 There is universal suffrage for persons who have attained the age of 21 can read and write and are on the electoral roll

PRODUCTION, &c —Agriculture and mining are the principal occupations Wheat maize barley, oats, beans peas, lentils wines tobacco, hemp, Chile pepper, potatoes onions and melons are grown extensively, the vine and all European fruit trees flourish the exportation of fruit to the United States is increasing yearly Excellent wines are produced and the Government is taking steps to develop their exportation The live stock includes (1930) 2 387 940 cattle, 6 263,482 sheep 788 831 goats and 331 156 swine The mineral wealth is considerable the country being extremely rich in copper ore iron ore and manganese ore The production of bar copper in 1931 was 215 696 tons Chile being the second greatest copper producing country in the world The rainless north yields more especially nitrate of soda, iodine, borate of soda, copper gold and silver, a large number of mines yielding both being in actual work in Tarapaca, Guanaco, and Cachinal in Atacama, and Caracoles in Antofagasta the centre copper, iron manganese and silver and the south, iron and coal (1 107 266 tons of coal were mined in 1931) In 1931 the production of nitrate was 1 125 921 tons the exports of this fertilizer being in the same period 1,454 600 tons Early in 1930 a law was passed constituting a national nitrate company, to be called Compania de Salitre de Chile (*Cosach*) with a capital of £75 000,000 with State participation to take over the whole of the nitrate industry the export tax being abolished, and its place in the budget taken by a fixed payment to the Government during the first three years, and after that by the Government's share in the company's profits There are smelting works for copper and silver, tanneries, corn and saw mills starch, soap, biscuit rope, glassware, paints, mineral waters, boot and shoe, hosiery, hat, cloth cheese furniture, candle match brush cordage and paper factories breweries and distilleries and the domestic industry furnishes cloth embroideries baskets, and pottery The many ports favour commerce and 13 lines of steamers connect the country with Panama and the Magellan Strait direct with Europe, a passage to Liverpool occupying from 30 days The staple articles of export are nitrate of soda, iodine, oats, borax, frozen meat, wheat, copper bars and ores silver ores, corn, flour, hides, wool, barley, honey and beans The imports include silks woollens and other textiles food, and agricultural and mining machinery, and motor vehicles

COMMUNICATIONS — There were (1931) 5,542 miles of railway, of which 1,755 miles are British controlled In 1931 there were 19,825 miles of telegraph, 910 post offices, and 5,250 miles of telephone, with 13 public wireless stations The mercantile marine (1931) numbers 128 vessels (180,745 tons) In 1931 663 vessels (2 002 821 tons) entered Chilean ports from abroad, and 14,637 coasting vessels (21 872,861 tons), legislation was passed in February, 1932, reserving the coasting traffic to vessels of the Chilean mercantile marine

DEFENCE.—All able bodied male citizens from 20th to 45th year must serve in the army for a training period. The peace effective of the active army is 19,000. The Air Force has a peace strength of 136 machines with 150 pilots and 1 000 mechanics. The navy consists of 1 battleship (recently renovated) 1 ironclad 3 cruisers 11 destroyers and 9 submarines with a complement of 6 000 officers and 8 000 other ranks.

EDUCATION is free and in July 1920 elementary education was made compulsory: there are 4,232 schools attended by 479 761 children out of a total on the registers of 662 706. There are 3 Universities (2 in Santiago and 1 in Concepción). The National Library contains about 300 000 volumes. The language of the country is Spanish and the religion is Roman Catholic.

AREA AND POPULATION

Territory	Square miles	Population
China Proper	1 532 800	414 011 519
Tibet	463 320	6 500 000
Chinese Turkestan	550 580	2,491,000
Mongolia	1 360 000	4 000,000
Total	3 906 300	427,002,519

The estimated foreign population of China was as follows in 1930: British 13 015 Japanese, 255 686 Russian 65 361 American 6,875, Portuguese 2,320 German 3 006 French 8 575, the total being 361,940. Out of a total of 7,982 foreign firms in China 725 were British 1,142 Russian 3 940 Japanese, 184 German, 377 American, and 229 French (in 1923).

Chinese civilisation is the oldest in the world, and its government based upon that of the family remained unchanged in its root idea until the revolution of 1911-12, by which the

autocracy of the Emperor and the power of the bureaucracy were merged into a Republican form of government For more than 2 000 years the Emperor was the supreme head of the State legislating by edict in matters great and small In the seventeenth century the *Ming Dynasty* was overcome by the *Manchus* from the north who have now become almost entirely absorbed by the conquered race The conditions and practices of the autocracy were preserved by the Manchus but for many years the civil service had become the power in the Empire and the central authority was but loosely exercised over the provincial and district administration Many reforms were initiated or promised in the last few years of the Imperial rule, and an executive body was actually created, while a legislature was promised At the close of the year 1911 the party of the reform forced the Imperial dynasty to a "voluntary abdication, and a Republic was proclaimed

China became a Republic on Feb 12, 1912, with a President and Vice President and an Executive Ministry, and a Legislature of a Senate (*Isan Yuan*) and a House of Representatives (*Chung Yuan*) of 264 members and 596 members The government of the 18 provinces is entrusted to civil and military governors, the latter (*Tuchun*) ranking first and holding practically all the powers of government, under them each province is subdivided into circuits superintended by *Taoyins* or intendants, and again into districts All the territorial officials are appointed by the central Government, and the provincial governors, though free to act independently in many matters of local detail and finance are responsible to the central Government at Peking in all important questions and especially so in foreign affairs The *Treaty of Kiakhta*, 1915, between China Russia, and Outer Mongolia recognises the Hutukhta Khan as Ruler of Outer Mongolia, while China as the Suzerain Power, appoints Residents at Urga and three other towns *Mongolia* has since developed into an independent self governing republic

On Oct 1, 1930, *Weihaiwei* the island of *Liu Kung* and certain other islands, leased to Great Britain in 1898, were restored to China The area comprised in the lease was about 285 square miles with a population of about 170,000 On Jan 15, 1931, the Belgian concession at Tientsin was also formally restored to China

The revolution of 1911 brought out a victorious general in the person of Yuan Shih kai, but from his death in 1916 until June 1928 his subordinates and their successors fought for supreme power Presidential elections were held and their results disputed and the Parliament elected in 1913 held occasional meetings in 1924, but its measures were not carried into effect The Emperor (who had lived in the Imperial Palace since his enforced abdication) was stripped of his title and driven out of the Capital in 1924, and such government as existed in 1927 was centred in Peking (for Northern China), while the Kuomentung (People's National Party) was represented by a Nationalist Government at Canton (for Southern China) In June 1928 Peking was captured by the Nationalists, and the capital of the country was transferred to Nanking, and on October 10, 1928 (the anniversary of the outbreak of the Revolution at Wuchang in 1911), Chiang Kai shek, the commander in chief of the victorious Nationalist armies was installed as President of the Republic The constitution promulgated in 1928 provides for government by five Councils (*Yuan*) Executive, Legislative, Judicial, Examination and Control

EDUCATION —In 1924 there were 190,000 schools in operation, with 6,500 000 pupils There is a University in Peking In 1928 there were upwards of 1,250 Chinese newspapers and magazines, published at regular periods, in Peking Shanghai, Tientsin and the other large centres, in addition to English and other Foreign daily newspapers

COMMERCE —The net trade of the open ports is stated as follows in *Haikuan taels*

Year	Imports	Exports	Total
1924	569 241,382	356,226 629	925 468,011
1927	1,012 932,000	918,620,000	1,931,552,000
1928	1 212 635 000	1,103 185,000	2,315 820,000
1929	1,265 778 821	1 015,687 218	2,281,466,039
1930	1,309,755,742	894 843 594	2,204 599,336
1931	1 427,576,380	887,450 938	2,315,027,318

The import of Indian opium is now prohibited

External Trade, 1930
Haikwan Taels

Country	Imports from	Exports to
Great Britain	123 953,000	64,035,000
India	84 209,000	19 294,000
Hong Kong	93 656 000	135,616 000
Malaya	9 537,000	15,532,000
France	22 550 000	34 068,000
Germany	86,940,000	25,850,000
Japan	296,809,000	239,496,000
U S S R	3 190,000	3,329,000
U S A	321 341,000	123,400,000

COMMUNICATIONS —Of the total area of China about half consists of table lands and mountainous districts where communication and travel are difficult and dangerous In the remaining districts the principal means of communication from E to W is afforded by the rivers, and from N to S by the Great Canal

Railways —The length of the railways is less than 8,000 miles inclusive of the Manchurian lines, or less than one fifth (per 100 sq miles) of those available in Turkey

Shipping —The China Merchants Steam Navigation Co have a fleet of 31 ships of an aggregate tonnage of 60,000. Besides this there are a large number of small vessels engaged in the coasting trade and on the Yangtse In 1930 the total tonnage of the 180 981 vessels and junks entered and cleared at Chinese ports was 155,605,954 tons Of these ships 49 402 (37,246,927 tons) were British, 33,755 (45,630,705 tons) Japanese, and 6,638 (6,490,351 tons) U S A In June, 1918, a vessel of 14,750 tons, constructed at the Kiangnau Dock and Engineering Works at Shanghai, was launched and supplied to the order of the United States Shipping Board

Telegraphs are being rapidly constructed by the Central Government, and Peking is in communication overland with Europe and Tibet, the line being extended to Lhasa. There are about 53,000 miles of land lines and several high power wireless installations Telephones, Municipal and long distance, are in general use

in the settled and trade areas, and wireless telephony has been installed in the large centres

CUSTOMS AND POSTS.—The Chinese Maritime Customs is the controlling service this body consists of nearly 1 000 Europeans a large proportion of them British subjects all under the control of the *Inspector General* (F W Maze) By an Imperial Decree of May 1906 the Maritime Customs Dept was transferred from the Foreign Board to the Board of Revenue and two Chinese Administrators General were appointed But the change has not materially affected the powers hitherto exercised by the Inspector General In addition to the collection of dues at the Treaty Ports this service manages the lighting and navigation thereof and keeps a small fleet of cruisers to enforce its regulations The Chinese Post Office formerly a branch of the Customs was transferred in 1911 to the Ministry of Communications, and a Foreign Co Director General, with a considerable foreign staff, was appointed, letters can be sent all over the 18 provinces at a uniform rate of 3 cents for 20 grammes The number of post offices (1929) was 12 265 In 1929, 725 000 000 postal packets and 7,000 000 parcels were handled

BUDGET (1930–1931)

Revenue	*Taels* 500 000 000
Expenditure	640 000,000

Chinese Debt (Jan 1920)

War Loans outstanding	£30,000,000
Boxer Indemnity do	48,000 000
Railway Loans do	40 000 000
General Loans do	50 000 000
Japanese Loans do	30 000 000
Short term Loans do	17 000,000
	£215,000,000

At Dec 31 1930 according to the official statement of the Ministry of Finance the total external debt was 1 651,320 000 *taels* (including arrears of capital and interest) The internal debt was approximately 950,000 000 *taels*

OUTLYING TERRITORIES

Mongolia has an estimated area of about 1 360 000 square miles, and a population of 3 000 000 to 5,000 000, of whom the greater number are Buddhists In 1915 Mongolia threw off its allegiance to China, and by the Treaty of Kiakhta was recognised as an Autonomous Republic Negotiations with Russia after the 1917 revolution, led to an alliance and by Treaty (May 31, 1924) the U S S R acknowledge the suzerainty of China over Outer Mongolia

North West (or Outer) *Mongolia* covers an area of about 360,000 square miles, and consists of an elevated plateau bounded by the Russian Altai range (N W) the Sayans (N E) the Kentei (S E), and the Ektagh Altai (S W) The plateau contains many lakes and is watered by numerous rivers, among which are the headwaters of the Yenisei, the Irtish and the Selenga Agriculture is almost unknown but excellent pasture provides grazing grounds for numerous cattle and sheep, and particularly for transport animals (camels and oxen) The exports are wool, hides and skins, and gold The chief centres are Urga (Kuren or Ulan Buotr Khoto, "Town of the Red Knight"), Uliassutai, and Kobdo, all of importance as trading centres on the main caravan routes. Part of Outer Mongolia has declared itself independent of its suzerain as the Republic of *Tannu Tuva* The districts affected lie between the Sayan and Tannu Ola ranges, the capital of the Republic being Chem Beldei (or Krasny Red Town)

Inner Mongolia covers an area of about 1 000,000 square miles and includes the *Gobi* (Desert) or *Shamo* (Sand Desert) which covers nearly one third of the total area and in the extreme south east the *Ordos* Desert bounded on the south by the Great Wall of China and encircled on the north by part of the main stream of the Hwang ho river In the north east of Inner Mongolia rises the Keru lun which flows into the Dalai Nor in Manchuria Agriculture is carried on wherever Chinese influence has been exerted but is mainly confined to the south eastern borders The principal industry (as in North West Mongolia) is sheep and cattle raising and the breeding of camels oxen and horses for transport in order to supply the caravan routes from China to Siberia. The centres of population depend mainly upon the overland commerce of China and Eastern Russia across the Gobi, the general direction of the caravan routes being from south east to north west The principal centres are Kalgan, Kuku khoto Kulu erghi Dolon Nor and Biru khoto In the north east Keru lun (on the river of that name) is a junction of the southern routes from the Chinese province of Pechili and the western route from Urga in N W Mongolia

Tibet (area 750 000 square miles pop 3 000 000) borders on British India (See p 757)

Chinese Turkestan (or *Sinkiang*) has a total area of 600 000 square miles and a population estimated at 2 000 000 It includes *Zungaria* and Chinese *Tartary* and provides sheep cattle and transport animals for the caravan routes The chief centres are Kashgar and Urumchi (See p 757)

CAPITAL OF THE CHINESE REPUBLIC Nanking Population (1928) 1 000 000

Nanking selected as the capital of China in 1928 in place of Peking is the principal city in the province of Kiangsu and the seat of the provincial government of Kiangsu Nan (embracing the three provinces of Kiang su Kiang si and Ngan hui About 1000 A D it was named Kiang nan, but in 1368 this was changed to Nanking (Southern Capital) The city is built on the south bank of the Yangtse Kiang river, about equidistant from Canton and Peiping, and is connected by railway (192 miles) with Shanghai *Peiping*, the former capital, had an estimated population of 1,300,000 in 1921

Shanghai comprises (*a*) the *International Settlement* administered by the Shanghai Municipal Council (for the defence of which British forces were despatched) the estimated population being (1930) 1,011 051 (Foreigners, 36,472 Foreign Defence Forces, 4,083, Chinese, 971,397) (*b*) the *French Concession*, an independent [illegible]stration, population (1930) 456,015 (Foreigners, 15 149, Chinese 440,866), and (*c*) the *Shanghai City*, *Chapei* and *Nantao* areas surrounding these settlements population (1930) 1,689,100, (Foreigners, 9,790, Chinese, 1,679,320) —a grand total for Shanghai of 3,157,066.

The population of the principal ports is estimated as follows —Amoy, 400,000, Canton 1,370,000; Changsha, 1,272,000, Chingkiang 500,000, Chungking, 1,021,600, Foochow, 1,500,000 Hangchow, 729,950, Hankow, 290,000, Ichang

450 000, Kiukiang 380 000 Kiungchow, 500 000 NANKING, 1 300 000 Ningpo 2 200 000 Shanghai 3 160 000 Soochow, 1 100 000 Tientsin, 838 000 Taingtau 310 000 Wanhsien 752,000 Wenchow, 1 750 000 Wuchow, 350,000

COLOMBIA
(Republica de Colombia).

President (1930-1934) Dr Enrique Olaya Herrera *born* 1882, *assumed office* Aug 7 1930

Envoy Extraordinary and Minister Plenipotentiary in England, Senor Dr Don Alfonso Lopez
Counsellor, Don Jorge Garces
Attaché, Sr Dr Don Bernardo Samper
Consul General Don Alejandro Lopez 7 Sicilian Avenue, Southampton Row W C 1
Consul General in Liverpool, Senor Don Carlos Vernaza 41 North John Street

The Republic of Colombia lies in the extreme north west of South America having a coast line on both the Atlantic and Pacific Oceans It is situated between 4° 40 S to 12° 25 N lat and 68 to 9 W long, with an estimated area of 461 606 square miles and a population (Census 1928) of 7 851 000 of whom more than one half are whites and half castes The country is intersected by three great ranges of the Andes, known as the Western Central, and Eastern Cordilleras the second contains the highest peaks, but the latter is the more important, as it consists of a series of vast table lands, cool and healthy This temperate region is the most densely peopled portion of the Republic

The principal rivers are the Patia, Cauca, Magdalena, Caquetá and Putumayo The Patia flows through the famous *Mamma Gorge* of the

Western Cordilleras and one of its tributaries (the Carchi, or Upper Guaitara) is spanned by the Rumichaca Arch, or *Incas Bridge* of natural stone. On the Tunza is the Great *Fall of Tequendama*, 480 feet in height.

The Colombian coast was visited in 1502 by Christopher *Columbus*, and in 1536 a Spanish expedition under Quesada established a government of certain coastal communities under the name of New Granada which continued under Spanish rule until the revolt of the Spanish American colonies of 1811–1824. In 1819 *Simon Bolivar* (born 1783 died 1830) established the Republic of Colombia consisting of the territories now known as Colombia, Panama, Venezuela and Ecuador. In 1829–1830 Venezuela and Ecuador withdrew from the association of provinces, and in 1831 the remaining territories were formed into the Republic of New Granada. In 1858 the name was changed to the Granadine Confederation and in 1861 to the United States of Colombia. In 1886 the present title was adopted. In 1903 Panama seceded from Colombia and is now a separate Republic.

The Colombian forests are extensive, among the trees are mahogany, cedar, fustic and other dye-woods and medicinal plants. The mineral productions are emeralds, gold, silver, platinum, copper, iron, lead and coal; petroleum is available in enormous quantities, and in the year 1931 the output was 18 236 000 barrels. It is possible that new oilfields will shortly be opened near the Venezuelan frontier. The principal agricultural products are coffee, cotton, plantains and bananas, and in some parts tobacco, wheat and other cereals. Manufactures for home consumption consist of woollen and cotton stuffs. The chief exports are coffee, petroleum, gold, bananas and hides.

The standing army consists of about 10,000 men; the navy has been nearly abolished. Railroads are in their infancy, about 1 900 miles being open in 1932 with 23 206 (1931) miles of telegraph; there are also (1932) 1 880 miles of national roads, in addition to departmental (some macadam) and 'dirt' roads (passable by motors in dry weather only). There is a daily passenger and mail service (German) between Bogota and Barranquilla, and a bi-weekly service in connexion with Pan American Airways to the U.S. New York can be reached in 3½ days and mail is delivered in England 11 or 12 days after leaving Bogotá. There are wireless stations at Barranquilla, Bogotá, Medellin, Cali and Cucuta.

Roman Catholicism is the established religion, but all religions are tolerated. Spanish is the language of the country.

COSTA RICA

(República de Costa Rica.)

President (1932–1936) Ricardo Jiménez Oreamuno, *assumed office* May 8 1932

Min. of Foreign Affairs Leonidas Pacheco

Minister in London (vacant)

Consul General, London Jose Vargas Porras, 33–36 King William Street, E.C. 4

Consul John C. Eagers

The Republic of Costa Rica the most southern state of Central America extending across the isthmus between 8° 17' and 11° 10' N. lat. and from 82° 30' to 85° 45' W. long. contains an area of about 23 000 English square miles and a population (Jan. 1 1931) of 516 031.

For nearly three centuries (1530–1821) Costa Rica formed part of the Spanish American dominions, the seat of government being at Cartago. In 1821 the country joined in the War of Independence, and from 1824–1839 it was one of the United States of Central America.

The principal agricultural products are coffee, bananas, rice, maize, sugar cane, potatoes, cocoa and beans, the soil being extremely fertile. The chief exports (1931) are coffee (£2 169,807) bananas (£681,031) cacao, gold and silver bullion, skins and hides, fresh fruit and timber. The imports are dry goods, hardware, provisions, railway materials, machinery, paints, and general merchandise (in 1931, 52 per cent from United States, 11 from United Kingdom, 10 per cent from Germany).

The chief ports are Limon, on the Atlantic coast, through which passes the bulk of the

important banana trade with the U S and U K, as well as by far the larger part of the other exports and imports, and Puntarenas on the Pacific coast. In 1931, 514 vessels (1,290,853 tons) entered at Costa Rican ports. About 420 miles of railroad were open in 1929. In 1930 there were 205 post offices, and 205 telegraph offices (3 wireless), with 2,612 miles of telegraph and telephone line. A considerable amount of English capital is embarked in the Republic. Spanish is the language of the country.

Cuba (the largest of the "West India Islands) lies between 74° and 58° W long, and 19 and 23° N lat, with a total area of 44,178 sq miles and a population of 3,661,582 (June 30, 1930).

The island of Cuba was visited by Christopher Columbus, during his first voyage, on October 27, 1492, and was then believed to be part of the Western mainland of India. Early in the 16th century the island was conquered by the Spaniards, to be used later as a base of operations for the conquest of Mexico and Central America, and for almost four centuries Cuba remained under a Spanish Captain-General. The slave trade was abolished early in the 19th century, and the slaves were emancipated from 1880 1886. The government of Spain was marked by a generally corrupt administration, complicated by internal unrest fomented by external influences and the various attempts at independence met with severe military repression. The separatist and autonomous agitation culminated in the closing years of the 19th century in a fierce and bloodthirsty war, and although a conciliatory movement was evinced by the Madrid authorities in 1897, the struggle was continued by the party of separation in the island. In 1898 the government of the United States put into execution a threat of interference by the despatch of the battleship *Maine* to Havana harbour, and in February of that year the vessel was sunk by an explosion, the cause of which appears likely to remain an unsolved mystery. On April 20, 1898, the U S Government demanded the evacuation of Cuba by the Spanish forces, and a short Spanish American war led to the abandonment of the island, which was occupied by U S troops from Jan 1, 1899, to May 20, 1902, Cuba was under U S military rule, and reforms of the widest and most far reaching character were instituted. On May 20, 1902, an autonomous government was inaugurated with an elected President, and a legislature of two houses. The island was, however, again the prey of revolution from July to Sept, 1906, when the U S Government resumed control. On Jan 28, 1909, a republican government was again inaugurated.

Of the total area of 28,000 000 acres, there were (1932) 3 051 470 acres under sugar, about 500 000 acres under tobacco, sweet potatoes and bananas. Rice, coffee, cocoa and maize are also grown and tropical fruits (oranges, coco nuts, pineapples, &c) flourish. The chief agricultural products of the island are tobacco and sugar, sugar crop (1930 31) 3,122,000 tons, the chief product of the forests is mahogany, while cedar is also used for boxing, the tobacco crop. The live stock includes about 4 500,000 cattle and 600,000 horses, the vast savannahs of Central Cuba being particularly suitable for cattle ranges.

3,800 miles of railroad are open and about 6,000 miles of telegraph line, there are about 2,200 miles of roads.

Spanish is the language of the island.

Part of the Austro Hungarian Monarchy declared its independence on Oct 28 1918 as the Czechoslovak Republic and ten days later the *Narodni Výbor* (National Council) of Czechoslovakia took over the administration of the independent territories The political neighbours of the Republic are Austria and Hungary on the S, Germany and Poland on the N, Germany on the W, and Poland and Rumania on the E Within these limits are the former Austrian Provinces of Bohemia and Moravia and part of the Province of Silesia and Northern Hungary from the Danube (at Bratislava on the Austrian frontier) to the Carpathians (at the headwaters of the Ung River in the eastern slope of Mt Vereczka)—a total area of about 54,877 sq miles with a population (Census of 1930) as under —

Bohemia	7 106,766
Moravia and Silesia	3 563 157
Slovakia	3 330 885
Subcarpathian Russia	725 350
Total	14,726,158

Of the total population it is estimated that 65 5 per cent are Czechoslovaks 23 3 per cent Germans 5 5 per cent Magyars 3 4 per cent Ruthenians and 0 5 per cent Poles The new State was recognised by Austria in 1918 and by Hungary on March 10, 1919 The National Assembly consisting of a Senate and a Chamber of Deputies is elected by universal adult suffrage of both sexes The executive power is exercised by a Council of Ministers appointed by the President The Constitution guarantees religious and political freedom About 80 per cent of the people are Roman Catholics

By the Peace Treaty Czechoslovakia acquired about 80 per cent of the whole industry of the former Austrian Empire It has several rich coalfields and possesses valuable mineral resources which notably in Slovakia have not yet been fully developed Radium gold silver iron graphite and lead are all mined while the whole country is rich in mineral and thermal springs Bohemia has rich deposits of clay kaolin and sand The whole country is well farmed and agricultural production is on a very high level of excellence In foodstuffs however the country is not self supporting Thirty three per cent of the total area of the country is forest land and both in the productiveness of the forests and the quality of the timber the forest wealth of the Republic is enormous In its industrial development Bohemia may be compared to Belgium In Bohemia Moravia and Silesia which have a total population of 10¼ millions more than four million people are engaged in industry The various industries are well organised and as regards both machinery and modern improvements the factories are as well equipped as any in Europe Except in Slovakia and Ruthenia illiteracy is almost unknown, and both the German and Czech elements which compose the working class population are hard working, and in many cases highly skilled The new Republic possesses therefore many valuable economic advantages and it is no exaggeration to state that Czechoslovakia is in a far more flourishing state than most of its neighbours

Czechoslovakia has no direct access to the sea but has a right of access over the Elbe and Oder to Hamburg and Stettin for which purpose the Government proposes to canalise the Upper Elbe in order to connect it with the Oder and the Danube If this proposal is carried out the country will be traversed by a waterway affording a communication from the North Sea and Baltic *viâ* the Danube to the Black Sea

DANUBE COMMISSIONS

The *International Danube Commission* (Headquarters, Vienna) was created by the Treaty of Versailles (1919), the States represented under the Treaty being Austria Bavaria Bulgaria, Czechoslovakia France, Great Britain Hungary, Italy Rumania Württemburg, and Yugoslavia The Commission maintains the liberty of navigation and the equal treatment of all flags of the Danube from Ulm (Württemburg) to Braila (Rumania) and its international system, obtaining funds for administrative expenses from equal contributions of all the States represented From Braila to Sulina (the mouth of the Danube), the navigation is controlled by the *European Commission of the Danube* (Headquarters Galatz), created by the Treaty of Paris 1856 after the Crimean War the representation on this Commission is confined to France Great Britain, Italy and Rumania The river is connected by canals with the Main, a tributary of the Rhine (Ludwig Canal) a new and deeper canal is under construction to permit the passage of larger craft than at present thus linking up the whole Rhine and Danube systems across Europe from the North Sea to the Black Sea The total length of the river is about 1 738 miles and ocean going vessels reach Braila where transhipment into river barges is necessary A pilotage and river improvement service is maintained by the International Commission at the Iron Gates (headquarters, Orsova), the expenses being met by shipping dues

The chief towns on the Danube are the Black Sea port of Sulina, with Galatz (confluence of the Sereth), Braila, Turnu Severin and Orsova (Iron Gates), in *Rumania*, Russchuk, Vidin and Lom Palanka, in *Bulgaria* Belgrade, the capital of *Yugoslavia* Buda Pest, the capital of *Hungary*, Bratislava in *Czechoslovakia* Vienna (the seat of the Commission), and Linz in *Austria*, Passau and Regensburg, in *Bavaria*, and Ulm, in *Württemburg*

The financial situation of the European Commission is shown below —

	Gold francs
Receipts during 1929	4,652 556
Expenditure 1929	3 807 534

The receipts consist almost entirely of navigation dues (5 030 653 francs in 1927) The expenditure (1927) included 2 062 191 francs on the prolongation and strengthening of the embankments at Sulina and 251 507 francs in repayment of the British portion of the loan raised by the Commission in 1924

The outlying possessions and colonies of Denmark have an area of about 50,000 square miles, with about 40,000 inhabitants They include the FAROE or Sheep Islands (515 sq m, pop, 1930, 24,200) GREENLAND (ice free portion about 50 000 sq m, total area about 830,000 sq m, population, 1921, 14 400), the trade of which is a Government monopoly

Copenhagen, distant 728 miles; transit, 36 hours.

DOMINICAN REPUBLIC

República Dominicana)

President (1930), General Don Rafael Trujillo, *Sworn in*, Aug 16, 1930.

Envoy Extraordinary and Minister Plenipotentiary in London Señor Rafael Brache 67 Eaton Place, S W 1

Secretary of Legation and Consul General Señor G S Henriquez

The Republic of Santo Domingo formerly the Spanish portion of the island of that name is the oldest settlement of European origin in America The island was discovered by Christopher Columbus in December 1492 who named it "La Espanola or Little Spain In 1496 he ordered his brother Bartholomew Columbus to found the capital at the mouth of the Ozama River on the south of the island which city he called Santo Domingo The island immediately became the objective for adventurous Spanish colonists, who exploited the native Indians almost to the point of extermination for the sake of the gold found in the streams African negroes were imported for the sugar and other plantations both in Santo Domingo and Haiti and this accounts for the present large proportion of negroid blood in both countries A short time after its discovery Santo Domingo became the jumping off point for other adventurers proceeding from Spain to the newly found mainlands of the western hemisphere and this greatly diminished the importance of the island and caused an exodus to those places

In 1821 Santo Domingo broke away from Spain and declared itself independent but in 1822 it was invaded and subjugated by its negro neighbours from the west the Haitians The latter were driven out in 1844 when the Dominican Republic was definitely proclaimed by the natives, and has so remained except for an interregnum of two years (1862 1864) when the Spaniards again took possession but were eventually forced to withdraw

On November 29 1916 American military forces landed in Santo Domingo and a Military Government was proclaimed From October 21 1922, a Provisional Dominican Government was in office until July 12, 1924 when a properly elected Constitutional Government was installed with complete authority over all matters except the collection of the customs and the redemption of foreign obligations which continue to be administered by an American official

The Dominican Republic comprises an area of about 19 322 square miles with a population estimated at 1 000 000 An extensive system of motor highways, totalling nearly 700 miles of first class roads, has been built, but they have been allowed to fall into very poor condition for want of proper maintenance considerable improvements are now, however, being effected and the streets of the capital repaved There is a direct road from Santo Domingo City to Port au Prince the capital of Haiti enabling the journey from capital to capital to be made in one day There are about 150 miles of public railway and a telephone system connects practically all the towns of the republic There are six wireless stations and the All America Cable Company maintains an efficient service with all parts of the world

Sugar and cocoa beans are the most important crops, and coffee and tobacco are grown in fair quantities, the other products being mahogany furniture woods, lignum vitae, log wood, divi divi cotton, wax, honey, maize, hides and turtle shell

Of the total import trade in 1931, 57 95 per cent came from the United States, 5 5 per cent (rice) from British India, and 4 97 per cent from the United Kingdom British trade is hampered by distance (as compared with the U S) by lack of resident British merchants and industrial undertakings and by indifferent and slow steamship services from Europe

ECUADOR

(República del Ecuador)

President of the Senate in charge of the Executive Power Dr Alberto Guerrero Martinez

Minister in London, (vacant)

Chargé des Archives Sr Carlos Arrarte

Consul General in London Sr Carlos Arrarte, 23 College Hill Cannon St, E C 4

Consuls at *Liverpool Birmingham, Hull, Glasgow* and *Cardiff*

An equatorial State of South America, extending from lat 1° 38 N to 6° 5 S, and between 60 20 and 81° W long (according to the Ecuadorian geography but there are boundary disputes with Peru) comprising an area of 276 000 English sq miles

The former *Kingdom of Quito* was conquered by the Incas of Peru in the latter part of the 15th century Early in the 16th century *Pizarro's* conquests led to the inclusion of the present territory of Ecuador in the Spanish Vice-Royalty of Peru The independence of the country was achieved in a revolutionary war

which culminated in the battle of Mount Pichincha (May 24, 1822)

The Republic of Ecuador is divided into 17 provinces and one territory It has a population of about 2,000,000, mostly descendants of the Spaniards, aboriginal Indians, and Mestizoes The territory of the Republic extends across the Western Andes, the highest peaks of which are Chimborazo (20 702 ft), Ilinıza (17,405 ft), Cariluairazo (16 515 ft) Cotocachi (16,301 ft) and Pichincha (16 000 ft) in the Western Cordillera and Cotopaxi (19 498 ft), Antisana (18 864 ft) Cayambe (19 160 ft), Altar (17,730 ft) Sangay (17 464 ft) Tungurahua (16,690 ft), and Sincholagua (16 365 ft) in the Eastern Cordillera Ecuador is watered by the Upper Amazon, and by the rivers Guayaquil, Mira, Santiago Chones, and Esmeraldas on the Pacific coast There are extensive forests and the cinchona bark tree is common The *Witch broom* disease which appeared (1921) in the cocoa plantations has had a disastrous effect on the agricultural wealth of the country The average yearly output previous to 1921 was one million quintals (of 100 lb) as compared with 335,052 quintals in 1929, 387,424 in 1930 and 283 189 in 1931

Its chief products are cocoa petroleum rice, vegetable ivory, bananas, cotton, coffee india rubber sugar, orchella weed straw hats and hammocks bark, yams, tobacco fruits sarsaparilla, wheat, &c Its minerals consist of gold quicksilver, lead iron and copper emeralds and rubies are occasionally met with and sulphur is found in many parts The chief exports are cocoa petroleum, caoutchouc vegetable ivory and gold, cinchona bark Panama hats coffee, and cattle the chief imports are textile machinery, foodstuffs and manufactured goods A railroad connecting Guayaquil and Quito was opened in 1908 The *Galapagos* (tortoise) *Islands* (2 870 square miles) belong to Ecuador

In October, 1926 an American Financial Mission arrived in the country and their recommendations have been enacted as laws A new customs tariff, prepared by the Mission came into force on July 1, 1927, and produced 26,727 725 *sucres* in the year ended Dec 31, 1928, 26,249,203 *sucres* in 1929 22,287,337 *sucres* in 1930 and only 17,216 546 *sucres* in 1931 and a new monetary law reintroducing the gold standard, the currency being stabilized at 5 *sucres* = $1 U S A Central Bank was established on March 4, 1927, and a new banking law enacted Ecuador suspended the gold standard on Feb 8, 1932, and in May, 1932, introduced control of foreign exchange transactions

In November, 1927, the Swedish Match Company of Stockholm secured the exclusive right to import and manufacture matches in Ecuador for a period of 25 years in return for a loan of 8,800,000 *sucres* which sum was applied towards the establishment of a Mortgage Bank Congress of 1931 rescinded this contract, and the monopoly is now administered direct by the Government

The language of the country is Spanish

* A *Waqf* is an institution of Muhammadan Law similar to the trust of English Law When property is made *Waqf* it is dedicated expressly or implicitly to some charitable or religious object or for the benefit of private individuals. The nearest British equivalent is 'The Public Trustee'

The territory of Egypt comprises (1) *Egypt Proper* forming the N E corner of the African continent divisible into (*a*) the valley and delta of the Nile (*b*) the Libyan or Western Desert, and (*c*) the Arabian or Eastern Desert (2) *The Peninsula of Sinai* forming part of the continent of Asia, and (3) a number of *Islands* in the Gulf of Suez and Red Sea of which the principal are Tubal, Shadwan, Gafatin and Zeberged (or St John's Island). This territory lies between 22° and 32° N lat and 24° and 37° E long. The northern boundary is the Mediterranean and in the south Egypt is conterminous with the Sudan. The western boundary runs from a point on the east N of Sollûm (long 25° E) inland in a south westerly direction for some distance and then turns S along a meridian line approximately in long. 24° E until it meets the parallel of 22° N lat., which forms the N boundary of the Sudan. The E boundary follows a line drawn from Rafa on the Mediterranean (34° 15' E long.) to the head of the Gulf of Aquaba from which point the remainder of the E boundary is washed by the waters of the Gulf of Aquaba and the Red Sea. The settled land area is stated officially at 7 667 000 *feddans* (12 431 square miles) and the area of lakes at 641 000 *feddans* (1 039 sq. miles) a total of 8 308 000 *feddans* (13 470 sq. miles) but within the boundaries above mentioned is enclosed an area of about 363 181 sq. miles. The population (Census of 1927) numbered 14 168,756, distributed as under —

(†) Dahkla and Kharga Oases (‡) Including Siwa Bahriya and Farafra

Of the total population in 1917 males numbered 6 369 517 and females 6 348 7 . in 1927 males numbered 7 036 298 and females 7,096,996 (Nomads being excluded in each case).

Physical Features.—The Nile valley varies in width from less than half a mile in the southern granitic region to over 10 miles in the northern limestone region, and the cliffs in some places rise to heights of over a thousand feet above the river. The fertile lands on which the prosperity of the country depends, occupy the floor of the valley between the river and the bounding cliffs while to the north of Cairo they spread out into the irregular fan shaped formation of the Delta which comprises the six provinces of Lower Egypt with the richest soil in the country. The *Nile* has a total length of 3 470 miles from the Victoria Nyanza to its mouths. In the 960 miles of its course through Egypt it receives not a single tributary stream. The river has a regular yearly rise and fall, attaining its maximum level about the middle of September and its minimum about the end of May. At Cairo the average rise and fall is about 13 feet. Westward from the Nile Valley into Tripoli stretches the *Libyan Desert*. Though as a whole it constitutes one of the most arid and inhospitable regions of the world, the Libyan Desert contains a number of depressions wherein wells and springs furnish water in sufficient quantity to irrigate small areas and to support populations of several thousands. These depressions are the *Oases* of which the principal from S E to N W are known as Kharga Dahkla Farafra, Baharia and Siwa. On the eastern edge of the Libyan Desert a few miles south west of Cairo, stand the Pyramids of Giza, of which the highest, the *Great Pyramid* is 451 feet high. (A new pyramid making 4 in all was discovered by Prof. Selim Hassan in Feb. 1932). Close to the pyramids is the *Great Sphinx* 189 feet long. In the Eastern Desert a great back bone of high and rugged mountains extends north westward from Abyssinia to near Suez and reappears as a detached mass in the Peninsula of Sinai. Flanking this mountain chain on the west, between the axis of the range and the Nile are plateaux of sandstones and limestones dissected by wadis (dry water courses) often of great length and depth with some wild vegetation and occasional wells and springs. The roads follow the course of the main *wadis* from well to well and here are to be found small encampments of wandering Arabs. The north (Mediterranean) coast of Sinai is flat and sandy. Inland, the ground gradually rises into a highly dissected limestone plateau which extends southward for about 150 miles and terminates in the great scarp of El Tih. South of El Tih the character of the country abruptly changes the southern third of the peninsula being formed of rugged granitic mountains intersected by deep ravines. Springs and wells occur in fair abundance mostly in the *wadis* and running water (mostly brackish) is found at a few points.

Native Population.—There are three distinct elements in the native population of Egypt. The largest or "Egyptian" element is a Hamito Semite race, known in the rural districts as *Fellahin* (*fellah*=ploughman or tiller of the soil). The *fellahin* have been mainly Muhammadans since the conquest of the country in the 7th century but 834,474 Coptic Christians are enumerated in the towns and villages. These Egyptian townsmen and peasantry numbered 13 404 042 in

the total of the Census of 1917 (including 126 432 local subjects of foreign origin). A second element is the *Bedouin* or nomadic Arabs of the Libyan and Arabian deserts (32,663 Bedouins and 107,364 Sudanese and Berbarin), of whom about one seventh are real nomads, and the remainder semi-sedentary tent-dwellers on the outskirts of the cultivated land of the Nile Valley and the Fayûm. The third element is the *Nubian* of the Nile Valley between Aswân and Wadi Halfa of mixed Arab and negro blood. The Bedouins and Nubians are Muhammadans.

Foreign Population.—At the Census of 1917 the foreign residents were 205 998 of whom 30 797 were Turks, 56 731 Greeks, 40 198 Italians, 24 354 British, 21,270 French and Tunisians, 2 789 Austro-Hungarians, 4,225 Russians, 157 Germans, 23 932 other Europeans and Americans, and 1 496 Persians.

Religions.—At the Census of 1917 there were 11,623 753 Muhammadans, 1 026 107 Christians, 59,581 Jews and 8 814 other religions. The chief Muhammadan religious authorities in Egypt are the *Sheik el Gamia el Azhar* and the *Mufti el Diyar el Masriya*.

Government.—From B.C. 30 to A.D. 639 Egypt was a province of the Roman Empire, but in A.D. 640 the Christian inhabitants were subjugated by Moslem invaders and Egypt became a province of the Eastern Caliphate. In 1517 the country was incorporated in the Ottoman Empire and was governed by pashas sent from Constantinople until the beginning of the 18th century, when for about 100 years the ruler was chosen from among the Mamelukes or bodyguard. *Mohammed Ali*, who was proclaimed *Pasha* in 1805, exterminated the Mamelukes in 1811, and was eventually made hereditary governor of Egypt and the Sudan by a *firman* from the Sultan of June 1, 1841.

Rulers of Egypt since 1811.

Name	Born	Reigned
Mohammed Aly (*Wali*)	1769	1805–1848
Ibrahim (*Wali*)	1789	1848
Abbas I.	1813	1848–1854
Said	1822	1854–1863
Ismail (*Khedive*)	1830	1863–1879
Mohammed Tewfiq (*Khedive*)	1852	1879–1892
Abbas II (*Khedive*)	1874	1892–1914
Hussein Kamel (*Sultan*)	1853	1914–1917
Fuad I (*King*)	1868	1917–

Legislature.—Legislative power is exercised by the King in accordance with the Parliament within the limits laid down in the Constitution established by Royal rescript of April 19, 1923, and general elections took place for a Parliament consisting of two houses which first assembled March 15, 1924. Parliament consists of a Senate of 100 members of whom three fifths are nominated by the King, the remainder being elected (for 10 years) on the basis of 1 Senator for every 180,000 inhabitants, and of a Chamber of 150 Deputies elected (for 5 years) on the basis of 1 for every 60,000 inhabitants.

Executive.—The executive power is exercised by the King through his Ministers within the limits of the Constitution, the Ministry being held jointly responsible to the Chamber of Deputies.

Local Government.—The chief towns constitute governorships (*muhafzas*), and the remainder of the occupied country is divided into provinces (*mudirias*), which are subdivided into districts (*markaz*), each under a *mamûr*, who controls the headman (*omda*) of each village in his district. By the law of 1883 provincial councils were instituted consisting of two representatives from each *markaz* under the presidency of the *mudir* (or governor) of the province. These councils were reorganised in 1910 and were made the elementary education authority for the province, with certain restricted powers of local government.

Defence.—In 1882 a military revolt, headed by an officer of the Egyptian Army (Ahmed Arabi Pasha) assumed alarming proportions, and a British expedition was despatched to re-establish the authority of the Khedive. Meanwhile a revolt had broken out in the southern provinces headed by Sheikh Mohammed Ahmed, of Dongola, who proclaimed himself a *Mahdi* of Islam; and the British expeditionary force, sent to quell the rebellion of 1882, remained in the country as an army of occupation. The defence of Egypt is reserved by the Constitution and remains under British control, the British garrison (under the command of a British general officer) amounting to 3 cavalry regiments, 3 batteries of artillery, 2 companies of engineers, 7 battalions of infantry, and 1 armoured car company, a total of 11 420. Service in the *Egyptian Army* is nominally compulsory on all Egyptian subjects between the ages of 19 and 27, the recruits required each year being chosen by ballot, but certain classes (professors, students, Government employees, &c.) are exempt, and exemption may also be purchased for £E20, if paid before the ballot. Natives of the Sudan are enlisted voluntarily for service in the Egyptian Army, which had a strength of about 11 220 all ranks in 1927.

There is no *Navy* in the proper sense of the term; there are 3 small cruisers belonging to the Coast Guard and Fisheries service, and 4 vessels under the Ministry of Communications, while the different Government Departments possess 5 canoes on the Nile for inspection purposes.

The *Egyptian Police* (under the Ministry of the Interior) consists of City and Provincial Police, the former comprising 306 officers (75 Europeans) 476 European constables, and 6 585 men, the latter 369 officers and 6 162 men. There are also 60 859 *ghafirs*, or native night watchmen.

Education on native lines has long been given in elementary vernacular schools. The native system of education is completed by the more promising pupils at the Azhar University in Cairo, the principal University of the Moslem world. In 1930–31 there were 270 *Elementary Schools* (*Maktabs*) under Government supervision, with 42 000 pupils, and 2 481 *Maktabs* under inspection for grants in aid with 301,000 pupils. The government primary schools give a 4 years' course and prepare for admission to secondary, agricultural and other special schools. There are *Colleges* of Medicine, Law, Education, Engineering, Fine Arts, Commerce, Veterinary Science and Agriculture at Cairo, and evening classes for workmen. Much assistance is given to education by private enterprise and benevolence and foreign schools abound. The State University, founded in 1908, had 1 400 students in 1930–31.

Agriculture.—The total area of Egypt is estimated at approximately 222 400,000 English acres of which about 8,450,000 acres are formed of the alluvium brought down by the Nile from the Abyssinian hills, the remainder being

chiefly limestone desert. Only the former are cultivable, and only the portion that can be irrigated from the waters of the Nile—this portion amounts at present to 5,600,000 acres (1926), and is capable of extension (to 7,600,000 acres) by the improvement of water storage facilities and means of distribution. In 1930 the land was held as to 5,303,568 *feddâns* by 2,170,033 native owners, and as to 489,741 *feddâns* by 6,294 foreign owners. The principal crops grown during *Saîf* (summer) are cotton, rice, sugar cane, and Sorgho (a variety of maize). *Nîl* (flood) part of *Saîf*, has the date of its commencement fixed by the Irrigation Department according to the quantities of water available before the flood, which reaches its highest level in September—it generally commences in July. The principal crops are maize and rice. *Chitwi* (winter) commences in November and ends in June. The principal crops are cereals, berseem (a variety of clover) and—mainly in Upper Egypt—beans, lentils, onions and helba. The total cotton crop and the value of the quantities exported in recent years —

Year	Kantars	Export value
1924-25	7,273,974	£E57,544,253
1925-26	7,964,645	43,825,564
1926-27	7,652,189	35,961,447
1927-28	6,041,499	45,138,000
1928-29	8,070,000	41,361,000
1930-31	8,015,400	

Live Stock.—In 1930 the cattle numbered 776,008, buffaloes 795,546, horses 35,886, mules 21,105, donkeys 763,321, sheep 1,129,033, goats 643,916, and camels 166,297.

Minerals.—The riparian districts of the lower Valley of the Nile are all provided with workable mineral deposits, with the exception of abundant building materials. The mineral resources of Egypt, therefore, are situated in its otherwise barren deserts. Known deposits are chiefly situated at great distances from one another and from the Nile. This fact has retarded exploration and development, but of late years considerable progress has been made. Owing to lack of knowledge of mining, consequent upon their pursuit being entirely agricultural, the local industrial classes have had very little hand in the existing enterprises, whose capital and organisation are chiefly foreign.

Manufactures and Industries.—The principal articles of Egyptian manufacture are cotton and woollen fabrics, silks, embroideries, brass, silver and copper ware, leather goods, rugs, pottery, alcoholic beverages, sugar, perfumery and cigarettes. The principal Egyptian industries are dyeing, tanning and cement.

Railways.—The principal lines radiate from Cairo to Alexandria (and on to Rosetta), Damietta, and Ismailia (continuing northwards to Port Said and southward to Suez). From Cairo the line runs southwards for a distance of 534 miles to Shellal, the First Cataract. At this point a steamer connexion runs to Wadi Halfa, connecting the Egyptian State with the Sudan Government Railways. Westwards from Alexandria (and close to the coast) runs a line, which it is hoped to extend eventually to the frontier at Sollûm, thus joining Tripoli to Egypt. The total length of the Egyptian State Railways (excluding the Auxiliary Railways of Upper Egypt and the Western Oases Railway) on March 31, 1930, was 2,300 miles. 27,000,000 passengers and 6,000,000 metric tons of merchandise were carried during 1929-30, the net receipts being £E2,962,570. The gauge is standard (4 ft. 8½ in.), with the exception of 138 miles between Luxor and Shellal which are 3 ft. 6 in. gauge. There are two other State-owned lines in Egypt, namely, the Auxiliary Railways of Upper Egypt, consisting of 282 miles of standard gauge, and the Western Oases Railways, a length of 141 miles (75 centimetre gauge) connecting the oasis of Kharga with the Nile Valley. In addition to the Government lines, there are 865 miles of light railways exploited by public companies.

Motor Vehicles.—On Dec. 31, 1928, there were 14,122 private motor cars, 6,321 taxi cabs, and 4,045 lorries and omnibuses.

Caravan Routes.—The principal caravan routes lead to the Oases of the Libyan Desert (though Kharga can now be reached by train), whence there is a route known as the Darb el 'Arbain, leading to Dar Fûr and the south of the Sudan. There are many well known routes across the Arabian Desert to the Red Sea, that from Qena to Qoseir being probably the most frequently used.

Shipping.—For the SUEZ CANAL *see* pages 946-7.—Apart from the three great seaports of Alexandria, Port Said, and Suez, Egypt has but few harbours and anchorages adapted for large craft; the principal are those of Sollum and Matruh on the Mediterranean, Tor, Abu Zenima, Zeitia, Tomsa and Hurghada in the Gulf of Suez, and Safaga, Qosseir and Halaib on the Red Sea. The Khedivial Mail Steamship Line (which is under British management) has its headquarters at Alexandria and a depôt at Suez. The principal port is Alexandria, where 2,171 vessels (5,155,000 tons) entered and 2,178 vessels (5,287,200 tons) cleared in 1950.

Posts and Telegraphs.—There were in 1930 4,069 post offices and stations, dealing with 81,000,000 letters and post cards, and 30,000,000 newspapers, &c., and a total foreign correspondence of 58,000,000. There were on March 31, 1930, 233,000 miles of telegraph and telephone wire. A system of savings banks has been introduced, under the control of the Post Office, the actual deposits being collected in rural districts by the *sarráf* (village tax collector).

	1930-31	1931-32
Revenue	£E36,277,000	£E37,372,000
Expenditure	44,915,000	37,372,000
	1930	1931
Imports	£E47,488,760	£E31,528,800
Exports	31,941,592	27,937,120
Imports from U.K.	£9,808,000	£6,838,000
Exports to U.K.	13,910,000	10,857,000

Debt.—The *Caisse de la Dette*, a body representing the creditors of the Egyptian Treasury, has considerable powers and special privileges. The *Caisse*, appointed during an era of bankruptcy, succeeded in protecting the interests of the bondholders, but as Egypt became solvent and prosperous, its stringent regulations prevented the development of the country out of surplus revenue, a large part of which was held in suspense as contingent security for the service of the debt. Though the *Caisse* still exists, its duties are now limited to receiving the revenues necessary for the interest and for the payment of the coupons as they become due, while it also holds a considerable reserve fund (£E37,950,791 on April 30, 1931), the interest on which reduces the amount of the Treasury contribution. The

Egyptian debt was stated as follows (in £ sterling) on April 1 1930 and 1931 —

Debt	£	£
Guaranteed Debt 3½ per cent	3 994 400	3 760 400
Privileged Debt 3½ per cent	30 633 980	30 633 980
Unified Debt, 4 per cent	55 250 460	55 250 460
Total	89 878 840	89 644 840

The *Cost* of the Debt (in the Budget for 1931 32) inclusive of £E664 826 assigned to the service of the Ottoman Loans of 1855 1891 and 1899 which were guaranteed on the Egyptian Tribute was stated at £E4 101 903

CAIRO the capital (population 1927 1 064 567) stands on the L bank of the Nile about 14 miles from the head of the Delta Its oldest part is the fortress of Babylon in old Cairo with its Roman bastions and Coptic churches The earliest Arab building is the Mosque of Amr dating from A D 643 and the most conspicuous is the Citadel built by Saladin towards the end of the 12th century The bazaars are always interesting especially the Khán el Khalili the Hamzáwi and the Brass Bazaar though the Muski which leads to them is fast losing its oriental character

ALEXANDRIA (population 1927 573 023) founded B C 332 by Alexander the Great was for over 1 000 years the capital of Egypt Its great Pharos or lighthouse was one of the 'Seven Wonders of the World (*see* p 170) It now contains two royal palaces Ras el Tin and Montaza while almost the entire cotton trade of the country is here controlled by the big dealers and brokers At the census of 1927 the towns of Tanta (90 014) Port Said (104 603) Mansura (63 696) Assiut (57 132) Fayûm (52 372) Zagazig (52 351) and Damanhur (51 709), also exceeded 50 000 inhabitants

ETHIOPIA
(Abyssinia)

Emperor, His Imperial Majesty Haile Sellassie I G C B G C M G G C V O D D (son of the late Ras Makonnen Governor of Harar) *born* 1891 *crowned as Negus* Oct 1928 *proclaimed Emperor* April 2, 1930 *crowned* Nov 2 1930
Crown Prince H I H Prince Asfa Wossan eldest son of the Emperor *born* July 27 1916 *married* May 9, 1932 a daughter of Ras Sayoum

Minister in London Baitrond Zellaka Aguedlou *Legation* 83 Elm Park Gardens, S W 10

The area of Ethiopia and its dependencies is estimated at 420 000 square miles, with an estimated population of 5 to 6 millions of whom less than one half are Ethiopians and the remainder Gallas, negro tribes on the west and south frontiers, and Danakils and Somalis on the east The political neighbours are the Sudan the Italian colony of Eritrea French Somaliland British Somaliland, Italian Somaliland, Kenya Colony and the Uganda Protectorate

Ethiopia is volcanic and mountainous and contains some mineral wealth, iron and coal are not uncommon, and gold is washed in various streams while mica, platinum, salt, saltpetre, and sulphur are also procurable The lower country and deep valley gorges are very hot, the higher plateaus are well watered, with a genial climate In the hotter regions, sugar-cane, coffee, &c, flourish, in the middle zone maize wheat barley millet oranges and other fruit trees tobacco potatoes &c are cultivated and above 6 000 feet are excellent pastures with some corn cultivation There are two seasons in the year a dry winter and a rainy summer from June to September The chief river is the Blue Nile, issuing from the Tsana lake the Athara and many other tributaries of the Nile also have their rise in the Abyssinian highlands Horses mules donkeys oxen goats and sheep and camels in the lowlands, form a large portion of the wealth of the people

The Ethiopians are Christian (a branch of the Coptic Church), and their rulers claim descent from Menelek, the son of Solomon by the Queen of Sheba The government is nominally an autocracy, but the Emperor's power does not yet extend throughout the country There is very little popular literature but education shows signs of progress In addition to foreign mission schools there are 10 Ethiopian schools in the country of which 4 are in Addis Ababa The potential army numbers between 600 000 and 1 000 000 The principal pursuits are agriculture and cattle breeding the chief exports being coffee civet wax hides and gold The import duty except for non spirituous liquors and for a few articles on the free list is 10 per cent *ad valorem* there are certain heavy consumption taxes collected additionally A railway which is under French control links Addis Ababa the capital, to Dire Dawa with Djibuti 486 miles away The Government post and telephone administration is under French management, and the Italian Government have a concession that gives them control of a telegraph line from Addis Ababa to Asmara The principal towns besides Addis Ababa are Dire Dawa Harar Goré, Jimma Debra Markos (the capital of Gojam) Adua (the capital of Tigré) Gondar Sayo Aksum Antalo Dembecha and Djibe There are ancient architectural remains at Aksum Gondar, and Ankober

CAPITAL Addis Ababa (population fluctuates, but is ordinarily about 40 000) Harar, in Eastern Ethiopia has a population of about 25,000

Total imports (1931)	£753 775

A country situated on the gulfs of Finland and Bothnia, which was conquered by Russia from Sweden, and united to the Russian Empire, as an autonomous but not sovereign Grand Duchy, in 1809. When the Russian Empire broke down in 1917 Finland declared herself an independent sovereign state (Dec. 6, 1917). The following year the country sustained severe disturbances on account of the aggression of Russian Bolshevism, but succeeded in restoring order, and the relations between Finland and Russia were finally settled by the Treaty of Dorpat (Oct., 1920). The area is 149,926 square miles, with a population (1932) of 3,667,067, of whom 88·7 per cent were Finnish speaking, 11 per cent Swedish speaking, and 0·3 per cent others (mainly Lapps, leading a nomadic life in the north). Nearly all the inhabitants are Lutherans. The *Aland Archipelago*, a group of some 300 small islands at the entrance to the Gulf of Bothnia (area 557 square miles, population about 27,000), forms part of the Republic. There are 3 universities, 1 at Helsinki (Helsingfors) and 2 at Turku (Åbo) the university of Helsinki (founded 1640 at Turku and removed to Helsinki in 1828) has nearly 5,000 students, of whom about 1,000 are women. In addition, there are 1 technical and 2 commercial schools. The leading crops are rye, barley, oats, potatoes. Saw mills, wood pulp, cellulose and paper manufacture provide the chief industry, and the forests (62,400,000 acres) are a great source of wealth, there is no European country so wealthy in forests except Russia, the exports of timber in 1928 being 1,141,000 standards, wood pulp, cardboard and paper, and dairy produce are also exported. There are (1931) 3,378 miles of railroad and about 3,900 miles of telegraph, with a well developed telephone system (32 per 1,000 inhabitants). There is railway connexion with Sweden and Russia, and telephone connexion with most European countries and with U.S.A. The merchant fleet (1932) consists of 521 steamers (161,754 net tons), 152 motor vessels (18,096 net tons) and 281 sailing vessels (66,563 net tons).

Service in the Army is universal and compulsory, the peace effective being about 25,000 all ranks, there is also a volunteer organisation of Civic Guards with an enrolled strength of about 100,000.

The country was formerly governed by the Finnish Senate of 22 members, with a Diet of 4 estates elected by the people; but under the Constitution of Jan. 1, 1907, there is a single Chamber elected by universal suffrage of both sexes, women being likewise eligible for election to the Chamber. Finland was thus the first country to concede woman suffrage and representation, and it is noteworthy that it was gained without agitation.

Finland was for some years a Prohibitionist country, the only one in Europe but after popular vote Prohibition was repealed by law as from April 5, 1932.

Finnish and Swedish are the official languages.

1930	748,911	649,125
1931	730 249	680,710

	1930	1931
Birth Rate	18 1	17 4
Death Rate	15 7	16 3
Marriages (per 1,000 pop)	16 6	15 6
Do (Number)	342 698	326,358
Divorces (Number)	20 409	21,212

France has always been attractive to foreigners, of whom (1931) 2 890,893 were resident there including (in 1921) 470,873 Italians, 415,546 Belgians, 303 141 Spanish, 55,456 British, 34,027 Russians, and 30,948 Americans

GOVERNMENT —The monarchical system of government was overthrown by the *French Revolution* (1789–1793) and the First Republic endured until the Great Napoleon (born Aug 15, 1769 died May 5, 1821) founded the First Empire in 1804 The monarchy was restored in 1814 and also after the "Hundred Days of Napoleon (March 20 June 29 1815) until the Second Republic of 1848, which became the Second Empire on Nov 22 1852 On Sept 4 1870 the Emperor Napoleon III (nephew of the Great Napoleon) was deposed, and the Third Republic was set up The head of the Republic is the President, elected for 7 years by the National Assembly of the two houses of the Legislature the *Senate* of 314 members (elected by indirect vote for 9 years, one third being renewable every 3 years) and the *Chamber of Deputies* of 612 members (elected by direct vote for 4 years) Members of the legislature receive 62 000 francs a year and travelling facilities over the railways

PRODUCTION —The chief agricultural products are wheat barley, rye, maize oats, potatoes, beetroot (for the manufacture of sugar) hops, &c Fruit trees abound and are very productive, the principal being the olive chestnut, walnut almond apple, pear, citron fig, plum, &c The agricultural production is shown in the following table —

Production (*Metric Tons*).

Crop	1929	1932.
Wheat	8 705 000	6,291,000
Rye	1,002 000	750,000
Barley	1,285,000	1 000,000
Oats	5 744 000	4,400,000
Potatoes	13,429 000	14,000,000

Forestry is an important industry the principal forests being those of the Ardennes Compiègne Fontainebleau and Orléans consisting chiefly of oak, birch pine, beech, elm, chestnut and the cork tree in the south The vine is cultivated to a very great extent (924 243,000 gallons of wine were produced in 1930), as the names Bordeaux, Burgundy Champagne &c, universally testify, cider making is also an important industry and the production in 1929 amounted to 512 160 000 gallons The live stock (1929) included 15 631 140 cattle 10 452 760 sheep, and 6,101 810 pigs The mineral resources include coal pig iron copper lead, silver antimony and salt Under Article 50 of the *Treaty of Versailles*, the coalfields of the *Saar Basin* are ceded to France for 15 years at the end of which time the inhabitants are to decide by a *plebiscite* whether they will remain French, return to Germany or become a self governing community The coalfields abut on Lorraine, and have an area of 217 square miles, with a population of 640 000, and they include the towns of Saarbruck (60 000), Saarlouis (16,000), and Merzig (10,000), on the River Saar In 1921 the coal mines of France produced 30,000,000 tons, and the production of the enlarged area reached 55,000,000 tons of coal in 1930 The most important manufactures are of metals, watches, jewellery cabinet work, carving, pottery, glass, chemicals, dyeing, paper making, woollens, carpets, linen, silk and lace Glass manufacture and pottery are also important

and the sardine fisheries and the culture of oysters are a source of wealth

DEFENCE — The *National Army* of France consists of the Metropolitan Army, the Colonial Army, the Gendarmerie and Republican Guard, and of the partly native armies of Algeria Morocco, and Tunis The peace strength of the Metropolitan Army (1930-31) was 316 992 all ranks, including the (Military) Air Force (36,800) The Naval Air Force (for Coast Defence) is included in the Naval personnel In the War of 1914 1918 over 20 per cent of the French people were mobilised, and 9 717 000 all ranks passed into the Armies of France (exclusive of troops from Algeria, Tunis and Morocco) The *French Navy* was manned in 1930 by 57 415 officers and other ranks For strength *see* Tables pp 372 and 373

ARMISTICE MONUMENT —In the Forest of Compiègne is a *Carrefour de l Armistice*, from which the *Clairière de la Victoire* leads to the Armistice Monument, unveiled Nov 11 1922 The monument marks the spot where the Germans signed the armistice terms presented by Maréchal Foch, and bears the inscription *Ici le 11 Novembre 1918 succomba le criminel orgueil de l Empire Allemand vaincu par les peuples libres qu il prétendait asservir*

EDUCATION — The educational system is highly developed *Central Administration* comprises (*a*) Ministry of Public Instruction (*b*) Superior Educational Council, charged with the actual administration, (*c*) Consultative Committee (advisory) (*d*) Educational Bureaux and Inspecting Staffs whose heads report direct to the Minister *Local Administration* comprises (*a*) Territorial Academies, with inspecting staffs for all grades and (*b*) Departmental Councils presided over by the *préfet*, charged especially with *primary* education By the Law of July 1904 all congregationist institutions are to be suppressed within 10 years, and many were at once closed, some re opening under lay management (i) *Primary Secular comp and free* Age 6–13. Schools include (*a*) infants (*b*) lower primary (*c*) higher do Supplementary courses and courses for adults Lower and higher primary certificates granted Numerous private courses are aided from local funds Schools are for boys, for girls or mixed (ii) *Secondary* State lycees, communal colleges, and many private establishments 7 yrs course either (*a*) purely classical (*b*) purely modern (*c*) Latin and sciences or (*d*) Latin and modern languages Degree of Bachelor conferred on completion For females a similar organisation course 5–6 yrs Sèvres school and the Sorbonne Association well known (iii) *Special Schools* are very numerous, many public institutions being dependent on ministries other than that of Public Instruction (iv) *Universities* (State universities alone grant degrees but numerous private faculties and private institutions further higher education) Aix, Algiers, Besançon Bordeaux Caen Clermont, Dijon Grenoble, Lille, Lyon, Montpelier Nancy, Paris, Poitiers, Rennes Strassbourg, and Toulouse

COMMUNICATIONS —The length of the *Routes Nationales* in 1928 was 24,426 miles The principal rivers of France are the Seine Loire Garonne, and Rhône, the navigable waterways having a length of (1928) 6,204 miles The system of railroads in France is very extensive they are almost entirely *concédés*, and become State property after the expiration of the concession The length of lines of general interest inclusive of local lines, open for traffic on January 1, 1930, was 26,177 miles, of which over 750 miles are electrified The length of telegraph wires (1929) was 221,427 miles, and of telephone lines 120,000 miles, with nearly 1 000 000 subscribers In 1928 there were 642 744 private motor cars registered in France, of which (1926) 541,438 were touring cars. Goods transport vehicles numbered 305,387, cycle cars 27,450, motor cycles 232,201, and motor boats 3 313 In 1927 the passengers carried in civil aircraft numbered 25,857, the weight of cargoes being 1,644,000 lb (exclusive of 276,000 lb of mails)

Shipping —The gross tonnage of the French mercantile marine in 1930 was 3 530,879 gross tons of which 146 911 tons were motor vessels and 60,288 tons were sailing ships During the year 1931 the tonnage of French and foreign vessels entering French ports amounted to 57,677,000 tons, of which 14 662 000 tons were French, while the total clearings amounted to 48 267 000 tons, of which 12 128 000 tons were French The chief ports are Marseilles, Cherbourg, Le Havre, Rouen, Bordeaux Calais, Boulogne and Dunkirk A bill was passed by the Chamber in 1921 for the canalisation of the Rhone, which will make the river navigable for 1 200 ton vessels from the sea to Switzerland, and will also provide electric power and irrigation to the surrounding departments

Total	13 010 000	62 160 000

In ASIA—*French India* includes Pondicherry, on the Coromandel coast Chandernagore, on the Hooghly Karikal in the Cauvery delta, Yanaon in the Godavery delta and Mahé on the Malabar coast—the total area being 200 square miles with an estimated population of (1922) 268 000 The trade of Pondicherry and Karikal in 1927 8 was valued at £268 529 for imports £624 647 for exports, and £1,349,135 for re exports *French Indo China* comprises the possession of Cochin China and the four protectorates of Cambodia Annam, Tonkin, and Laos In 1898 9 the port of Kwang Chow Wan was also acquired on lease from China The capital is Hanoi, in Tonkin and the total area is 309 979 square miles, with a population (1922) estimated at 19,983,203 including the civil European population of about 27 500

In ASIA MINOR—The French mandatory sphere of *Syria* has a total area of about 150 000 square miles, with an estimated population of 4 500,000 (*see* also pp 949 950)

In AFRICA—*Algeria* (*see* above) is an integral part of France *Morocco* (*see* pp 928 929) is a French (and partly Spanish) protectorate

Tunis has been a French protectorate since 1881. It lies between Algeria and Tripoli, and extends southwards to the Sahara with a total area of about 45,000 sq miles and a population (Census of 1931) of 2,410,692 (Europeans 195 293, including 91,427 French civilian population, 91,178 Italians). The valleys of the northern region support large flocks and herds, and contain rich agricultural areas, in which wheat, barley, and oats are grown. The vine and olive are extensively cultivated. The principal minerals are coal, copper, lead, zinc and iron, and phosphates and marble are also worked. The chief exports are phosphates, olive oil, wheat, esparto grass, barley, beans, blankets, sponges, and dates; the chief imports are textiles and other manufactures, iron, steel, machinery and provisions. Eighty per cent of the trade is with France and Algeria. In 1930 the imports were valued at 2,107 455 000 *francs* and the exports at 1,127,233 000 *francs*. Tunis, the capital, has a municipal population of 202 405 at the Census of 1931; other towns are Sfax (39 970), Bizerta (23 206), Susa (25,324), and Kairwan (21,532). *French West Africa* extends from Mauritania to Dahomey, and has a total area of 1,509 733 square miles, and a population of 13,500,000. It consists of *Senegal* (74 000 sq miles, pop 1,250,500), capital, St Louis; the trade of Senegal in 1930 was *francs* 866,000,000 imports and *francs* 668 700,000 exports, the principal export being ground nuts. *Upper Senegal Niger* (304,000 sq miles), and the *Niger Military Territory* (533,000 sq miles), which have a total population of about 6 036 200. *French Guinea* (92 600 sq miles, pop 1,737,350). *Ivory Coast* (126,100 sq miles, pop 1,216 300) and *Dahomey* (38,000 sq miles, pop 878 500), adjoining Dahomey is the French Sphere of the former German colony of *Togoland* (23 400 sq miles, pop 800,000), while the hinterland of these colonies forms the *French Sahara*, which has an estimated area of 924,160 sq miles and a population of about 450 000. *French Equatorial Africa* consists of the *French Congo* (513,000 sq miles, pop 9,000,000) and of the French Sphere in the former German territory of *Cameroon* (267 000 sq miles, pop 2 750 000). *French East Africa* consists of the *Somali Coast* (46,300 sq miles, pop 208 000) and of the large island of *Madagascar* (226,000 sq miles pop 3,153,500) with its dependencies (Nossi Bé, Sainte Marie, Réunion, and the Mayotte Comoro Islands, and St Paul, Amsterdam, and Kerguelen Islands). Agriculture and cattle raising are the principal industries, the minerals include gold, silver, iron, copper, lead, and zinc. The chief exports are gold, cattle hark, manioc (for arrowroot) beans, hides skins, fibre, rice, timber and rubber, the chief imports are cottons, metal manufactures, wines and spirits, coal, clothing, lime and cement. The capital, Antananarivo, has a population of 75 000, other towns are Tamatave (the chief port), Majunga, Diego Suarez, Mananjary, Tuleai Andevoranto and Vohémai. Off the south east coast are the uninhabited islands of St Paul, Kerguelen and Amsterdam. There is now direct communication across French and British territory in Africa, with posts on the Atlantic and Indian ocean.

In AMERICA.—Off the south-east coast of Newfoundland are two small groups of islands, of which the largest are St Pierre and Miquelon. In the West Indies, Martinique and Guadaloupe, with Basse Terre, Marie Galante, Ile des Saintes, Petite Terre, St Bartholomew, and St Martin and in South America, Cayenne or French Guiana. Included in Cayenne is a group of islands (St Joseph, Ile Royal, and Ise du Diable) known as Isle du Salut. On *Devil's Isle* Major Dreyfus was imprisoned from 1894–1899. The total area of French possessions in North and South America is 35,320 square miles, with a population of 428,850.

In OCEANIA.—New Caledonia (7,200 sq ms, pop 50,500) is a large island with dependencies the Isle of Pines, the Wallis Archipelago, the Loyalty Islands (Mahé, Lifou, Uvea &c.), the Huon Islands, and Futuna and Alofi. The Society Islands (Tahiti, Moorea, &c.) have an area of about 650 square miles, and a population of about 14,000, the Marquesas (Nukahiva Hivasa &c.) 500 sq miles, pop 2 500. Leeward Isles (Huahiné, Raiatéa, Tahaa Bora Bora Maupiti, &c.), the Gambier Islands (Mangareva &c.), the Tubuai Islands (Rurutu, Raivavae Rimatava, &c.) Rapa Island, Makatea, and Maiao Island. The New Hebrides are under joint Franco British administration.

GERMANY

(Deutsches Reich)

President of the German Reich, General Field Marshal Paul von Hindenburg, *born* Oct 2, 1847, *re elected* April 10, 1932.

Defence, General von Schleicher
Posts and Communications, Freiherr von Eltz Rubenach
Economy, Prof Warmbold

Ambassador in London, Herr von Hoesch
9 Carlton House Terrace, S W 1
Consular Dept of the Embassy, 9 Carlton House Terrace, S W 1

AREA AND POPULATION.—The area of Germany is approximately 182,200 square miles as against 208,800 square miles in 1914. By the *Treaty of Versailles* the "Reichsland" of Elsass Lothringen and the Saar coal basin (temporarily) were ceded to France, parts of Posen and West Prussia to the newly formed Republic of Poland, North Schleswig to Denmark, and Moresnet and Malmédy to Belgium. Danzig and territory became a Free State represented in its foreign affairs by Poland. After a plebiscite, part of Upper Silesia passed to Poland. Memel and district went to Lithuania. The Colonies, which had extended over 1,035,086 sq miles in Africa, 96,210 sq miles in the Pacific, and 2,943 sq miles in Asia—a total of 1,134,239 sq miles, with a population estimated in 1914 at 15,000,000—were renounced and the delegates to the International Council at Paris allocated Togoland and Kamerun to Great Britain and France, German East Africa to Great Britain, German S W Africa to the Union of South Africa, the German Pacific possessions N of the Equator to Japan, and those S of the Equator to Australia and New Zealand. The population on June 16, 1925, was 62,592,575 (without Saar district), of whom

30,196,421 were males and 32,396,154 were females The population on Dec 1, 1910 was 54,925,993 Births in 1931 numbered 1 031 508, and deaths 725 983 births being 16 0 per 1,000 of population deaths 11 2 per thousand Religious confessions in the present area were in 1925 — Protestants 40,014,677, Roman Catholics 20,193,334, Jews 564,379 others 1 638 229 On June 16, 1925 41 4 per cent of all persons with earning occupations were engaged in industry, 30 5 per cent in agriculture 16 5 per cent in trade and communications, 4 7 per cent in the public services and the professions, 1 8 per cent in the health services and 5 1 per cent in domestic service There are 50 large towns with over 100,000 inhabitants with a population of 19 624 000, or 30 1 per cent of the total population

NATURAL RESOURCES — Forests cover 12 769,091 hectares, consisting to about three quarters of coniferous trees and are the basis of a flourishing wood and wood products industry Although a great part of North Germany is sandy and infertile, natural conditions in general favour Agriculture Grown are rye wheat, spelt, oats barley, buckwheat, maize potatoes, beans, leguminous and root plants, including sugar beet, hops, vegetables fruits, vines, flax, hemp, tape and tobacco The livestock and dairying industries have attained a high degree of perfection Mineral wealth includes coal, iron, manganese, copper, lead zinc, tin, nickel, quicksilver, gold, silver sulphur, antimony, cobalt arsenic, bismuth, wolfram, uranium, graphite, alum, boracite pyrites, petroleum, potash amber semi precious stones and china clay and salt brine springs, and medicinal waters are abundant The minette iron mines of Lorraine were lost by the Peace Treaty of 1919 and as the remaining iron ore is insufficient and in part technically unsatisfactory Germany is largely dependent upon import of iron ore

CONSTITUTION AND POLITICS — At the outbreak of war, Aug 1914, Germany was a Confederate League, bearing the name "German Empire, under the hereditary presidency of the King of Prussia holding the title of 'German Emperor' On Nov 9, 1918 the German Emperor abdicated, and the Government of the country was taken over by the Council of the People's Commissioners in Berlin In Jan 1919, elections were held to a National Assembly on the basis of universal adult suffrage (male and female) Under the new Constitution of August 11, 1919, the federal legislature consists of a *Reichstag* representing the whole nation and elected by popular suffrage (male and female), with proportional representation, and a *Reichsrat* representing the separate states. Ministries are dependent upon the support of parliamentary majorities. The people possess the right of initiative and the referendum Bills dealing with economic questions or social issues arising thereout must first be submitted to an advisory Economic Council (*Reichswirtschaftsrat*)

Between the Revolution of 1918 and 1932, the government of Germany and of most of the states was almost continuously conducted by Cabinets supported by the middle and moderate *Left* parliamentary parties, of which the Social Democrats and the Catholic Centre were the largest The extreme Conservative Nationalist parties and the Communists were in opposition Successive elections practically obliterated the moderate Conservative People's Party and the Democrats, while the Centre and Social-Democrats remained relatively stable, and the Communists gained largely at the expense of the middle parties, the National Socialistic (Hitlerite) party rapidly increased gaining great successes at the Reichstag Election of Sept 1930, and becoming the strongest party through the election of July 1932 The main party composition of this Reichstag of 607 members, was National Socialists 230 Social Democrats 133, Communists 89 Centre 75 German Nationals 37 The Election followed the dissolution of the Reichstag by the Cabinet of Herr von Papen which had displaced the Brüning Cabinet in June In August 1932 the National Socialists demanded exclusive power, but received a refusal from the President The Papen Cabinet remained in office without other party support than that of the German Nationals and under Article 48 of the Constitution decreed many drastic measures including the expulsion from office under a form of martial law of the Prussian Socialist Centre Cabinet and a scheme for trade revival chief features of which were the subsidising of Industry out of public funds and wage reductions Democratic and Socialist officials were dismissed The Cabinet proclaimed against party government, promised a revision in Conservative direction of the Constitution, and in social and cultural domains sought to reverse post war progressive policies On Sept 12 1932, the Reichstag elected on July 1 was dissolved on the ground that it intended to revoke a Government emergency decree and a Constitutional conflict resulted

EDUCATION — Education is in the competence of the states and according to the Constitution is in principal compulsory until the eighteenth year but this principle is not uniformly in force Public elementary schools number (census of 1926 27) 52 785 whereof 28 831 evangelical, 15,312 Catholic and 8 559 mixed, with 6 661 794 pupils Intermediate schools (9 to 10 years course) number 1 548 with 259 290 pupils continuation and special occupational schools, 29,652, with 2 507 000 pupils superior schools (between elementary intermediate school class and universities) 2,858 with 822,600 pupils For higher education are 23 universities, also high schools. 10 technical, 3 forestry 4 agricultural 2 veterinary 2 mining, 5 commercial, 7 pedagogic, and 11 philosophic theological, with (1928) 112,300 students whereof 13 100 women There are 14 high schools and academies for the graphic arts, and 13 high schools and academies for music

DEFENCE — By Article 160 of the *Treaty of Versailles* the German *Military Forces*, as from March 31 1920, must not comprise more than seven divisions of infantry and three divisions of cavalry, a total force of 100 000 all ranks. By Article 181 of the Treaty, the German *Naval Forces* must not exceed 6 battleships of the Deutschland or Lothringen class 6 light cruisers, 12 destroyers, and 12 torpedo boats No submarine vessels are to be included in the naval forces, and all war vessels in excess of the above numbers were to be broken up or devoted to commercial purposes Under the Armistice of Nov 11, 1918, the German High Sea Fleet surrendered to the Allies (Nov 21, 1918), and was interned in Scapa Flow, where it

scuttled by its crews By Article 198 of the Treaty the armed forces of Germany must not include any military or naval *Air Forces* and no dirigible balloons, aeroplanes sea planes or flying boats In September 1932 in a Note to France, Germany claimed equality in armaments with other Powers and received a reply referring her to the League of Nations

COMMUNICATIONS—The total length of the full gauge *Railroads* at end of 1929 was 56 426 kilometres of which all except 3,761 kilometres belonged to the German Railroads Corporation which under the *Dawes Declaration Scheme* of 1924 acquired all the lines taken over by the Republic from the states in 1921 In addition there were 1,757 kilometres of narrow gauge railroads The number of registered automobiles (July 1 1932) was 497 300, motor cycles 819 200 and motor lorries 152,400 Length of *Telegraph and Telephone Lines* 392 100 kilometres telegrams transmitted, (1930) 33 900 000, post telegraph and telephone offices 56 440 telephone subscribers 3,247 000 letters carried 5,700 millions, value of cash on delivery orders 3 498 mill m money orders 3 929 mill m The number of employés in the service of posts telegraphs and telephones was 378,198 In addition to some 6 000 miles of navigable rivers there are over 1 500 miles of canals and 1,600 miles of ship canals On January 1 1913, the Mercantile Marine consisted of 2 098 sea going steamers of 17 65 register tons and upwards (4 380 348 tons gross register) and of 2,420 sailing vessels (447,870 tons gross register) number of seamen 77 746 As a result of the War and of the Peace Treaty shipping in 1919 sank to 419 000 tons, but there has since been a rapid recovery, due mainly to native building but partly to purchases from abroad Finished new constructions of vessels exceeding 100 gross tons were in 1919 134 535 tons 1927 261 105 tons 1929, 357 600 tons 1931 176 755 tons On Jan 1, 1930 shipping had increased to 4 242 000 gross tons Recovery was helped by the establishment of eleven new yards during the War The chief ports of Germany are Hamburg on the Elbe Bremen, on the Weser Stettin on the Oder Konigsberg on the Pregel Kiel on the Baltic Emden on the Ems and Lubeck on the Patic Traffic in the chief ports has increased since the War at a great rate and now exceeds that of 1913 Arrivals at all ports were 1913 34 396 691 net tons, 1931 40 395 600 net tons Traffic in the *Kiel Canal* in 1930 was vessels 53 547, net tonnage 22 026 866

SOCIAL INSURANCE—The German scheme of social legislation gives all subordinate bread winners in Germany a legal right to pecuniary subvention when unfitted for work through sickness, accident premature infirmity or old age Insurance is compulsory This National Insurance is based on mutual insurance and self administration The Infirmity Insurance Act came into force Jan 1 1900 The insured include all persons working for wages or salary as workpeople, artisans journeymen apprentices domestic servants laundresses dressmakers, sempstresses, housekeepers charwomen overseers foremen, engineers assistants clerks and apprentices in merchants offices schoolmasters schoolmistresses tutors and governesses including foreigners working in Germany under these categories Pensions for premature infirmity are given to insured persons when unfit for work, old age pensions to all insured persons on attaining the age of 70 though still capable of work A comprehensive project of reform of the State insurance legislation became law in 1911 The new law codified previous legislation, established new Insurance Authorities reduced working class influence in the Accident Insurance organisations provided pensions for widows and orphans and made other changes of importance Another Bill extending Insurance benefits to private officials, clerical employés and others above the class of manual workers, became law in 1911 A law establishing Federal Unemployment Insurance for all persons subject to Sickness Insurance and also for seamen which is financed by equal contributions from employers and employed came into force on Oct 1, 1927 During the industrial depression 1930 32 Social Insurance finance suffered badly owing to the decline in receipts and the increase in cost of unemployment relief Premiums were correspondingly increased and benefits reduced In Sept 1932 the Cabinet received from the President authority to amend the whole Social Insurance system without parliamentary sanction

PUBLIC FINANCE—The state financial structure was radically altered after the War The Reich appropriated the chief direct taxes including income tax which had formerly been collected by the states and municipalities and the states lost the profits from their railways which were taken over by the Reich The Reich was thereby compelled to contribute to the state and municipal revenues mainly out of the yield of income and turnover taxes The financial relations between Reich and states became a matter of dispute but the promised definitive regulation has not been effected Between 1918 and 1924 all public budgets were in confusion in consequence of the currency depreciation The currency reform of Nov 1923 reacted favourably on Finance and the Reich Budget of 1924 25 was balanced The Reich was materially relieved by the automatic wiping out of the internal Debt by currency depreciation Under a later valorisation law holders of public loans were partially compensated getting 12½ per cent of the original gold value when they had acquired before July 1920, and 2½ per cent when they had acquired later, but no interest was to be paid to the latter class of holders until the Reparations liability had been discharged After 1926 27 Reich budgets again showed deficits In consequence of declining revenue due to the trade depression and to the accompanying heavy unemployment relief burden much larger Reich deficits and serious difficulties in balancing other public budgets were experienced after 1929 The *Budget Estimates* for 1932 33 (in which are not included the separately financed Railways and Posts) were —

	1 000 000 Reichs marks
Revenue	8 219
Expenditure	8,219

The German Debt

The long and short term *Debt* of the Republic on May 31 1932 totalled 11,753 million reichs marks Of this sum 734 million marks represented the outstanding liability on the Reparations Foreign Loan of (nominally) 800 million marks 3 940 million marks represented the depreciated paper mark pre war and war debts as valorised under the law of July 16, 1925, and

1,416 million marks the international 5½ per cent (Young Plan) loan of 1930

The suspension of Reparation payments at the initiative of President Hoover from July 1, 1931 on, materially relieved the Reich Budget The amount of the reparations due by Germany under the Treaty was fixed in January 1921 (by the Financial Council of the Allies at Brussels) at 132 milliards of gold marks (£6 600 000 000) payable in bonds to be redeemed by annual payments of 2 milliard gold marks, together with a sum equivalent to 26 per cent of German exports A new *Reparations Scheme* was agreed to by Germany and the Allies in August 1924, providing for annual payments rising to 2 500 million gold marks liable to increase according to an index of prosperity, the money to be supplied from (1) taxation (2) railway bonds and (3) bonds imposed on private industry In 1930 by an agreement come to at the Hague, Reparations were again revised Germany agreed to pay during a term of 37 years annuities averaging 1 989 million marks and thereafter until 1987 88 annuities varying between 1 711 million and 898 million marks Under a further agreement concluded at Lausanne in July 1932, Reparation annuities were abolished Germany undertook to hand over to the creditors 3,000 million marks of 5 per cent bonds to be marketed as soon as an issue price of 90 became practicable but not before three years or after fifteen years The creditor Governments agreed between themselves to ratify the Lausanne Agreement only if a satisfactory settlement of other international War Debts was attained

FOREIGN DEBTS —A short term foreign debts crisis began in July, 1931 owing to sudden withdrawals of credits to German banks for which the Reichsbank was unable to deliver gold or exchange Under a "standstill agreement" of February 1932 Germany was protected against any further substantial withdrawals of credits until March 1933 but she must pay and transfer the interest thereon In 1932 owing to the depletion of the Reichsbank's reserves ability to transfer interest and amortisation instalments on the long term debt was cast into doubt, and suggestions were made for interest reductions A Government census for February 29 1932 shows public and private indebtedness to abroad at 20 623 million marks whereof 10 153 millions short term (maturing before March 1933) and 10 470 millions long term In addition were foreign claims in the shape of holdings of German domestic securities and real property, which bring the total indebtedness to an estimated 25 26 milliard marks Of the 20 623 millions debt proper, 3 125 millions were liabilities of the Reich (mainly Dawes and Young loans) 1,215 state and municipal debts 6 706 millions bank debts, and 8 785 millions debts by Agriculture Industry and Communications The chief creditor countries were

	Total Claims Marks	Whereof Long Term Marks
U S A	8 392 000 000	5 165 000 000
Netherlands	3 575 000 000	1 914 000 000
Switzerland	2 761 000 000	1 146 000 000
Great Britain	2 415 000 000	1 129 000 000
France	956 000 000	482 000 000

The annual cost of service of the foreign debt (in the 12 months ending March, 1933) is returned at 1 438 million marks whereof 1 225 millions for interest and 213 millions for regular amortisation Including certain capital repayments of non recurring kind, the debt service liability to abroad in the 12 months is approximately 1 700 million marks

CURRENCY AND CREDIT —In 1919 23 the mark currency rapidly depreciated In November, 1923 was put through a *Currency Reform* consisting in the creation of a *rentenmark*, nominally worth 1 gold mark and in the stabilisation of the depreciated paper mark at 1 billion paper marks to 1 gold mark The stabilised paper mark notes have since been withdrawn from circulation and the rentenmarks are being gradually replaced by reichsmarks of pre war gold value issued by the Reichsbank as reconstituted under the Reparations settlement of 1924 Currency conditions were satisfactory until the debts withdrawal crisis of July 1931 which led to a suspension of internal gold payments and to the subjection of payments to abroad to official restriction Foreign currency in German hands was expropriated against compensation in reichsmarks By these means the stability of the reichsmark at gold parity was maintained but the Reichsbank's reserves (gold and foreign exchange) fell between May 1931 and September 1932, from 2 576 to 925 million marks, and legal cover for circulation to 25 per cent (normal legal minimum 40 per cent) Owing to the foreign and home run the Darmstaedter und National and some other banks failed By emergency decrees the Government drastically regulated credit and attained in banking a dominant position The effect of the credit crisis on industry and trade was less serious than anticipated and in 1932 confidence began to return, but payments to abroad remained subject to official sanction Bankruptcies after reaching a maximum of 1 425 in October 1931 declined in August 1932 to 499 and the number of bill protests fell in the same period to one fifth The internal value of the currency increased, the wholesale prices index falling from 141 6 in July 1928 to 95 6 in September 1932 the cost of living index from 156 5 in March, 1929, to 120 3 in August 1932

EMPLOYMENT —Employment is subject to sharp seasonal fluctuations being lowest in the summer and highest in the late winter In 1922 under the influence of the inflation activity of industry the number of unemployed fell to 16 000 After the currency stabilisation unemployment in general increased but in the prosperous year 1927 fell to 250 000 after which a new increase followed In February, 1930, were 3 366 000 unemployed February 1932, 4,971,000 February 1932, 6 128,000 September, 1932 5 100 000 In the autumn of 1932 signs of improvement were discerned

AGRICULTURE — Agriculture is the leading German occupation The cultivated area in 1932 (omitting forests) was 29 369 576 hectares, of which 4 450 129 h were rye, 2 280 351 h wheat, 3 284,524 h oats, 1 568,210 h barley 2 879,033 h potatoes and 276 665 h sugar beet The meadow area was 5 502,294 h Owing to high wheat duties and other protective measures, the area under and yield of wheat has greatly increased, whereas cultivation of rye has declined As against an average wheat crop of 3,700,000 metric tons in 1911 14 (on the present area), the estimated crop of 1932 was 5 100 000 tons, and

in wheat Germany is now self sufficing, and may have an exportable surplus Area under orchards is (1932) 53,139 h , vineyards 82 781 h The area under flax, hemp, and other industrial plants is smaller than in 1913 The livestock census of Dec 1930 showed horses 3 521,530 cattle 18 470,390 pigs 23,440,460, sheep 3,504,355 Agriculture has been financially weakened by the price fall, and has debts totalling 12,500 millio n

INDUSTRY —Industry is highly developed in all the larger German states Prussia leads in coal mining iron and steel, metalwares machinery, and electro technical articles, but manufactures comprise practically all branches The cotton works are extensive and there are numerous manufactories of silk, mixed cotton and linen fabrics, including shawls, carpets, &c , and woollens with leather, earthenware, glass, paper, and tobacco manufactures, as well as chemicals and brewing Bavaria produces machinery, jewellery, scientific instruments, pottery, wood products, paper, leather, textiles, and beer Special manufactures of Saxony are machinery, yarns and cloth, knitted goods, hosiery, furs, pottery, glass, and musical instru ments Wurttemberg has manufactures of textiles, paper, leather, firearms, clocks, and tobacco, Baden of chemicals, jewellery, and cigars The toys industry of Thuringia is important

Intense industrial activity prevailed during the inflation years 1919 23, and after a reaction a new high level was reached in 1927 after which production in the finishing branches somewhat declined while the heavy branches, including iron and steel, enjoyed prosperity throughout 1928 and 1929 In 1930 under the influence of the world depression, a rapid decline in the output of all branches began At the beginning of 1932, current industrial production was 40 9 per cent below that of the last prosperity years, the decline for steel being 60 8 per cent, machinery 57 5 per cent, motor cars 38 5 per cent, pottery 55 7 per cent, paper 22 5 per cent, finished textiles 31 9 per cent, footwear 18 per cent The production decline in the heavy industries was very great

Coal	118,624,200	153,597,600
Pig iron	6,063,100	13 102 500
Ingot steel	8,291,300	16,305,300

The financial stability of industry was badly shaken by three years of trading losses, and numerous companies were obliged to reduce their capital in order to restore equilibrium to their balance sheets A revival of industry, particularly in the consumption goods branches, set in in September, 1932

FOREIGN TRADE —Foreign trade policy has been increasingly Protectionist Immediately after the War, import duties on many articles were sharply raised, and in 1925 a new part tariff increased the duties on numerous indus trial articles, and restored the foodstuffs duties, which had been suspended in August, 1914. A Bill reducing duties, drafted in accord with the recommendations of the Geneva Economic Congress of 1927, was dropped; the duties on foodstuffs were repeatedly raised, and supple mented by compulsion to mill native grain, and in 1932 duties on numerous agricultural and industrial products (including English yarns) were heavily increased, and the intro duction of import quotas for certain agricultural products was announced

Germany's chief imports, in order of value, 1931, are oil fruits fruit, cotton, wool, dairy products, yarns, mineral oils coffee, fodder, hides, eggs, cloth, tobacco, copper, furs, iron ore, bread cereals, and wood Chief exports heavy iron and steel goods textiles and cloth ing, machinery, chemicals and dyes, electrical apparatus, non ferrous metal wares, paper and wares thereout, leather and wares thereout In 1932 Russia displaced Great Britain and Holland as Germany's chief customer

The foreign trade balance was increasingly passive until 1927, whereafter import surpluses declined Equilibrium was reached in 1929 The years 1930 and 1931 witnessed large and increasing active balances causes being the cessation of credit financed import, the reduced demand, owing to the depression, for foreign raw materials, the increasing independence of foreign foodstuffs, and the repayments of foreign debt The years 1927–31 witnessed a shift of £300,000,000 from the passive to the active side of the trade balance The movement of imports and exports (including Reparation deliveries in kind) was —

	Imports Marks	Exports Marks
1927	14,228,000 000	10,801 000,000
1929	13,447 000,000	13,483 000,000
1930	10 393 000,000	12,035,000,000
	6 632,000,000	9,600,000,000

Trade with Great Britain —

Imports from	639,000,000	453 000,000
Exports to	1,219,000 000	1,134,000,000

In the first half of 1932 import was 2,387 million export 2 989 million

SECURITIES MARKETS —All stock exchanges were closed between July 11 and Sept 3, 1931, and between Sept 18, 1931, and April 12, 1932 The official securities index, based on 100 for average quotations of 1924–26, showed for Sept 3, 1932 for stocks, 56 67, for fixed interest securities 63 62

FEDERATED STATES

PRUSSIA

MINISTRY

(*On the ground of alleged failure of duty towards the Reich, 'Reich Execution' was proclaimed against Prussia on July 20, 1932. The Prussian Cabinet of Herr Braun was expelled from office, and the Reich Chancellor was appointed Prussian Commissary*)

The Republic of Prussia comprises the larger portion of Germany, with a total area in 1924 of 113,750 sq miles and a population on June 16, 1925, of 38 120,173 (Saar district excluded)

The number of births in 1931 was against 1,209,500 in 1913. The number of in 1931 was 440,795, against 656,490 in 1913. Marriages were 325,080, against 323,709.

	1 000 000 Reichs marks.
Budget (net), 1932–33	2,024
Debt ..	894

The whole of the old *Funded* Debt of Prussia was taken over by the Republic under the

arrangement for transfer of the Prussian State Railways.

CAPITAL, Berlin, on the Spree. In 1920, by fusion of suburban municipalities and of some adjacent rural communes, was created Great Berlin with a population on June 16, 1925, of 4,013,588.

Other largest cities are Cologne, on the Rhine (698,064), Breslau, on the Oder (554,801), Essen, on the Ruhr (468,696), Frankfort, on the Main (461,849), Dusseldorf, on the Rhine (431,096), Hannover, on the Leine (422,435), and Dortmund, on the Emscher (320,256).

BAVARIA

Minister-President, Dr. Held.

The Republic of Bavaria is divided into two unequal parts. The eastern portion, comprising eleven-twelfths of the whole, is situated between 47° 16′—50° 34′ N lat and 9° 01′—13° 50′ E long., the western part, forming the Palatinate, on the left bank of the Rhine. The total area is 29,486 sq. miles, and the population on June 16, 1925, 7,411,589. The Thuringian Duchy of Coburg was incorporated in Bavaria in 1921.

	1 000 000 Reichs marks
Budget (net), 1932 33	606

CAPITAL, Munich, on the Isar. Population (1925), 680,704. Other large towns are Nuremberg, N.W. of Munich (392,494), and Augsburg, on the Wertach-Lech (165,522).

SAXONY.

The Republic of Saxony has an area of 5,856 English square miles, with a population on June 16, 1925, of 4,980,689. Its chief towns, after the capital, are Leipzig (pop. 679,322), the great book-market; Plauen (pop. 111,398), and Chemnitz (pop. 331,641), the Manchester of Saxony.

	1,000 000 Reichs marks.
Budget (net), 1932–33	417

CAPITAL, Dresden. Pop (1925), 618,684.

WURTTEMBERG.

The Republic of Wurttemberg has an area of 7,534 English square miles, and a population (in 1925) of 2,595,114, of whom 30 per cent. are Roman Catholics.

	1 000 000 Reichs marks
Budget (net), 1932–33	245

CAPITAL, Stuttgart. Population (1925), 341,461.

MINOR STATES.

Baden has an area of 5,819 square miles, with a population (1925) of 2,336,498. More than half the population are Roman Catholics. Capital, Karlsruhe, pop (1925) 145,694.

Land Thuringen. The Thuringian States, Saxe-Weimar-Eisenach, Saxe-Meiningen, Saxe-Altenburg, Schwarzburg Rudolstadt, Schwarzburg-Sondershausen, Reuss-Greiz, Reuss-Gera, and Gotha, have been constituted into a single state under the title Land Thuringen, with an area of 4,541 square miles, and a population of 1,628,398. Capital, Weimar (46,028).

Hesse has an area of 2,968 square miles and a population (1925) of 1,358,445, of whom more than half are Protestants. Capital, Darmstadt, pop. 89,[illegible]

[illegible]*rg-Schwerin*, between the Elbe and the Baltic, has a total area of 5,068 square miles, with a population (1925) of 686,838. Capital, Schwerin, pop. (1925) 48,157

Oldenburg, area 2,479 square miles, with a population (1925) of 553,670. Capital, Oldenburg, pop. (1925) 52,187.

Brunswick, 1,418 square miles, pop. (1925) 508,660. Capital, Brunswick, pop. (1925) 146,654.

Anhalt, 906 square miles, pop. (1925) 351,692. Capital, Dessau, pop. (1925) 70,316.

Lippe, 470 square miles, pop. (1925) 166,083. Capital, Detmold (16,171).

Mecklenburg-Strelitz, area 1,130 square miles, with a population (1925) of 112,052. Capital, Neustrelitz, pop (1925) 12,338.

Schaumburg-Lippe, 130 square miles, pop. (1925) 48,660. Capital, Buckeburg (6,745).

Waldeck was incorporated in Prussia in 1928.

Prime Minister and Minister of Finance, M P Tsaldaris
Justice, M Hadjithanadsis
Foreign Affairs M J Rallis
Interior General Metaxas
Communications, M Codjamanis
Public Instruction M Hadjiskos
War, General Condylis
Marine and Air Admiral Hadjikyriakos

Envoy Extraordinary and Minister Plenipotentiary in London, Monsieur D Caclamanos
Legation, 51 Upper Brook St W 1
Counsellor Christos Diamantopoulos
Secretary M John Kyndinis
Naval and Air Attaché (vacant)
Vice Consul (*in charge of Consulate General*), George Scheriadis, 131 Gower Street W C 1

A maritime Republic in the south east of Europe, bounded on the N by Albania, Yugo slavia and Bulgaria, on the S and W by the Ionian Sea and on the E by the Aegean and Turkey, with an estimated area of 50 271 sq miles and a population (census of May 15, 1928) of 6,204,684

Government—Greece became independent in 1830, after a successful insurrection against the Turkish government, to which the country had been subjected since the 15th century, and after a succession of rulers of the Glucksburg dynasty was declared a Republic by the Constituent Assembly on March 25, 1924 The legislature consists of a Senate of 120 members, and of a Chamber of Deputies (or *Boulé*) of 250 members elected for 3 years by universal manhood suffrage

Prior to the Balkan Wars of 1912 13 the area was less than 25 000 sq miles, the addition of portions of *Macedonia* and *Epirus*, *Crete* (3,950 sq miles, pop 336 151), and certain *Aegean Islands* increasing the area to 43,528 sq miles During the War of 1914 1918 Greece eventually declared for the Allies against the Central Powers, and her territories were increased by the occupation of *Thrace* (including the monastic republic of *Mount Athos*), and the islands of *Imbros* and *Tenedos* Under an arrangement with Italy, to come into effect after the ratification of the *Treaty of Sèvres*, *Rhodes*, *Cos*, and the *Dodecanese* (12 islands) were surrendered by Turkey and these were to be handed over to Greece by Italy Greece also received under the Treaty a mandate for the occupation and administration of the town and district of *Smyrna* but military operations by forces of the Angora Government, under Mustapha Kemal Pasha, recovered the mandated region in Sept 1922, the Greek forces being annihilated and Smyrna was evacuated on Sept 8, 1922 and that part of the Greek population of Asia Minor which escaped massacre by the Turks took refuge in Greece By the *Treaty of Lausanne* (1923) Greece lost Eastern Thrace (that part lying E of the Maritza river) and the islands of Imbros and Tenedos, which were retroceded to Turkey The country is thus composed of a continental portion (the southern part of the Balkan Peninsula), and of islands in the Ægean, Mediterranean, and Ionian Seas The surface is nearly all mountainous, the coasts are elevated, irregular, and deeply indented

Production—Agriculture is the principal industry and employs more than half the population The most important of the fruit trees are the olive, the vine, orange lemon fig almond, citron, pomegranate and currant vine The principal minerals are silver, lead zinc, emery, copper magnesium sulphur, salt, and marble The chief manufactures are smelting textiles, and shipbuilding The imports are cotton and other manufactures corn, timber cattle hides, sugar, salt fish, and coal The exports consist of wine, olives olive oil, tobacco currants figs, cognac, hides, lead iron ore, magnesite, iron pyrites, chrome ore emery, marble sponges and carpets

Defence—Service in the Army is universal and compulsory between the ages of 21 and 57 Both the land and sea forces were reorganised during the War of 1914 1918 and about 150,000 all ranks fought with the Allied Armies The Navy consists of 1 armoured cruiser, 1 cruiser minelayer 4 modern t b d, 7 torpedo boats and 6 submarines with 5 patrol vessels (small torpedo boats)

Education is free and compulsory, maintained by local taxation supplemented by State grants Secondary education is somewhat backward, particularly in the country districts The University at Athens is of some repute

Finance—The debt in 1912 was 1 040,900,000 *drachmæ*, and the Balkan Wars of 1912 13 added 354 960,000 *drachmæ*, the Great War added 1,028 000 000 *drachmæ*, and subsequent military operations to March, 1921, were responsible for 1 776,140,000 *drachmæ* On Dec 31, 1930, the total was stated at £40,837,922 941 *drachmæ*, requiring 3 728,861 412 *drachmæ* for debt service in the budget of 1930 31

Communications—There were (1928) 1 993 miles of railroad open for traffic There is a ship canal cutting through the Isthmus of Corinth for ships up to 1,500 tons The post offices number 1,146, telegraphs, 4,960 miles The mercantile marine consists (1931) of 547 steamships (1 407,808) tons and 729 sailing ships (58,508 tons) The principal harbours are the Piraeus (port of Athens), Syra, Patras, Salonica, Volo Corfu Calamata, Laurium, Cavalla, and Canea (Crete)

Budget, 1931–32

Total estimated receipts *Drachmæ* 10,240,512,053

HAITI
(Republique d'Haiti)

President Stenio Vincent *assumed office* Nov 28, 1930
Foreign Affairs M Albert Blanchet

Minister in London Dr Louis Baron
Consul W Haines 4 Denmark Street, W C 2

The Republic of Haiti is the western or French portion of the island of San Domingo which, next to Cuba is the largest of the West India Islands Formerly a French colony it was proclaimed independent on Jan 1 1804 and is governed under a Constitution ratified on June 12 1918 The legislature consists of a Senate and a Chamber of Deputies The President is elected by the legislature for a period of six years In 1915 a treaty was entered into with the U S A whereby certain public services of the Republic were to be controlled by U S officials The treaty expires in 1936 On Oct 1 1931 the U S officials in charge of Public Health Public Works and the Agricultural Technical Service, were withdrawn The Financial and Constabulary services still remain under U S control

The area of the Republic of Haiti is estimated at 10 204 square miles with a population estimated (Jan 1, 1927) at 2 300 200 inclusive of white foreign residents and military forces of the United States. The mountains are richly

* At par 1 *Quetzal* = $1 U S

and heavily timbered and susceptible of cultivation nearly to their summits. It is probably the most fertile spot in the West Indies whilst its harbours especially Port au Prince offer considerable facilities to foreign trade. The principal productions are coffee logwood cocoa cotton hides sugar honey gums and oilseeds these being the chief exports. It is said to contain mines of gold silver copper tin and iron. Its commercial prosperity has been almost annihilated by repeated revolutions. The principal foreign trade is carried on with the United States Great and Greater Britain France, and Germany the principal articles imported from Great Britain are piece goods jute bags hardware and agricultural tools. An armed Constabulary, urban and rural, was formed in 1916. This force is officered in part from U.S. Marine Corps and Navy and consisted (Oct. 1 1931) of 197 officers (U.S. and Haitians) and 2 950 other ranks. A coastguard service is attached to the Constabulary. There are about 135 miles of railway. In 1925-26 the entries and clearances at Port au Prince were 408 steam vessels (1 001 007 tons). French is the official language of the country, but most of the people speak a debased dialect known as Creole French.

HONDURAS

(República de Honduras.)

President, Dr. Vicente Mejia Colindres, *assumed office* Feb. 1, 1929.

Consul General in London, Señor Don Basilio de Telepnef, 15 Union Court, Old Broad St., E.C. 2.

The Middle State of Central America stretching in N. lat. between 13° 10' and 16° and W. long. between 83° 10' and 88° 40', containing 44 275 English square miles with a population estimated at 775 000 (1930).

Christopher Columbus landed at Cape Honduras in 1502 and in 1524 the country was settled by the Spaniards. In 1525 *Hernando Cortes* founded the city of Puerto Cortes and from 1539 to 1821 the country formed part of the Captaincy-General of Guatemala. From 1821 to 1839 Honduras was included in the Confederation of Central America.

The Republic of Honduras has a coast line of nearly 400 miles on the Caribbean Sea, chief ports Truxillo, Puerto Castilla, Puerto Cortes, Omoa, Roatan, Iela, and La Ceiba, but only about 40 miles on the Gulf of Fonseca on the Pacific side, chief port Amapala on Tiger Island, port on mainland is San Lorenzo 2 hours in gasoline launch from Amapala. From San Lorenzo by auto to capital Tegucigalpa 88 miles, good road 5-6 hours. Road from Tegucigalpa to the Atlantic coast has now been completed as far as Potrerillos the terminal station of the unfinished Interoceanic and is in fair condition. The journey to the lake takes from 9 to 10 hours in automobile: the lake is crossed in 1 hour by auto ferry and thence to the head of the railway at Potrerillos the road is completed cars taking from 2 to 3 hours. Potrerillos is 2 hours by rail from San Pedro Sula and 3 hours from Puerto Cortes. By taking express automobiles and express car on the railway it is now possible to make Puerto Cortes from Tegucigalpa in 24 hours thus reaching New York in 5 or 6 days. There is an aeroplane service between the capital and most of the principal towns in conjunction with Pan American Airways and aeroplanes are available to carry passengers to Iela and La Ceiba (on N. coast) to connect with steamer sailings. There are railway connections between San Pedro Sula and Iela and La Ceiba. The country is mountainous being traversed by the Cordilleras. The soil in the valleys and tablelands is very fertile the products being bananas cocoanuts mahogany fruit cattle sugar rice tobacco coffee sarsaparilla hides and skins cedar fustic rosewood and Panama wool (kapok). There is an immense amount of uncultivated land. The number of cattle is estimated at 500 000. The forests are extensive but there is a lack of communications and transport. Its mineral wealth is great the value of gold and silver exported in 1930-31 being £304 000. In 1929 there were 1 432 kilometres of railway open all on the North Coast. The language of the country is Spanish.

	1929-30	1930-31
Revenue	£1 431 430	£1 181 867

Offices of Legation and Passport Office 35B Eaton Place S W 1

By unanimous vote of the National Assembly Hungary was re constituted a Kingdom in 1920 after having been declared a Republic on Nov 17 1918 The area of present day Hungary is about 36 179 sq miles its territories being decreased from the area of the former Kingdom of Hungary (which was united to the Austrian Empire by the identity of sovereigns) through the transfer of Transylvania to the Rumanians and of Croatia and Slavonia to the new Yugoslav Kingdom (*q v*) and of Slovakia and Ruthenia to Czecho slovakia (*q v*) The population (almost entirely Magyar) was 8 683 740 (Dec 1930) The political neighbours are Czechoslovakia on the N Yugoslavia on the S, Rumania on the E, and Austria on the W

On the declaration of Republican institutions in 1918 Count M Károlyi assumed office as Provisional President, but on March 22 1919 Count Karolyi resigned, and was succeeded by a Bolshevik administration with a Soviet (Workmens Council) in which Bela Kun (or Cohen) was the dominant personality This administration was driven out of power by the successes of the Rumanian military forces (which invaded Hungary and occupied Budapest) and was followed by a Socialistic Government under Julius Peidel (Aug 1, 1919) Six days later the Socialistic Government was superseded by an administration appointed by the Archduke Joseph, who accepted office as Provisional President, Aug 7 1919 but resigned in consequence of the protests of the Supreme Council in Paris

On March 1 1920 Admiral Nicholaus von Horthy of Nagybánya was elected Governor of Hungary by vote of the National Assembly, which gave him sovereign rights with certain restrictions

In 1921, the ex king Karl made two efforts to regain the throne, remaining in the country from March 26 to April 5, and from Oct 21 until removed under escort On each occasion the Hungarian Government was informed that a Hapsburg restoration would not be tolerated by the European Powers

All religions are tolerated the greater number of Magyars are Roman Catholics, but there is a large Protestant minority The parcelling out of the great estates which was forcibly attempted during the Karolyi régime, has been continued to a small extent, but on an economic basis a land reform bill aiming at a more equitable distribution of landed property was carried out in 1920 1922, reducing by about 10 per cent the total area of large estates

A single chamber National Assembly (introduced Jan 4 1920) was replaced in Dec 1926 by a Parliament composed of a Chamber of Deputies elected by universal suffrage and an Upper Chamber which corresponds in a modified form to the Chamber of Magnates as it existed before the revolution of 1918

The greater part of the area of present Hungary consists of the Alfold or Great Plain parts of which may be considered as among the most fertile for agricultural purposes in the world, producing grain of excellent quality and supporting a number of horses cattle and swine The mountainous districts having been ceded to surrounding states by the Peace Treaty Hungary has lost the greater part of the forests and mines which formerly contributed so largely to the national wealth

No part of Hungary touches the sea The length of navigable rivers is 687 miles there are about 5 000 miles of railways and 5 800 miles of telegraph in the present Kingdom

Ambassador in London (vacant)
Chargé d'Affaires Atta Beg Amin
Embassy 22, Queen's Gate S W 7

Iraq, or *Mesopotamia* the land between the rivers (Euphrates and Tigris) extends from Kurdistan on N and N E to the Persian Gulf on the S and S E and from Persia on E to Syria and the Arabian Desert on W the approximate position being between 37½° to 48½° E long, and from 37½° to 30° N lat The territory was freed from Turkish rule during the War of 1914-18 by Anglo-Indian and British Dominion troops under Generals Nixon, Maude, and Marshall (Gen Maude succumbing to cholera after the capture of Baghdad). Under the Treaty of Lausanne ratified on Aug 6, 1923, Turkey renounced the sovereignty over Mesopotamia, and its future administration was entrusted to Great Britain by the Supreme Council of the Allies A provisional Arab Government was set up by the High Commissioner in Nov 1920 and in Aug 1921 the Emir Faisal (3rd son of ex King Hussein of the Hejaz) was elected King of Iraq, to be enthroned on Aug 23, 1921 In March, 1924 a Constituent Assembly met in Baghdad, and passed an organic law and an electoral law for the election of a Chamber of Deputies The constitution thus instituted is a Constitutional Monarchy hereditary in the family of King Faisal, with a Senate of 20 members nominated by the King and a Chamber of Deputies of 88 members elected by manhood suffrage The first Parliament under this Constitution was opened by King Faisal on July 16, 1925 An application for admission to the League of Nations came before the Assembly in 1932 and Iraq was freed from all Mandatory control through admission to the League on October 3, 1932 On June 30 1930 a new Treaty was signed at Baghdad by the High Commissioner and the Prime Minister This Treaty is of 25 years duration from the entry of Iraq into the League and regulates the relations between Great Britain and Iraq during that period on the basis of an alliance between two equal and independent States

The total area of Iraq is about 116,000 sq miles the distance from Basra in the south to Mosul in the north being approximately 500 miles At the Census of 1920 the population was ascertained to be 2,849,282, as under

Baghdad vilayet	1,360,304
Basra vilayet	785,600
Mosul vilayet	703,378
Total	2,849,282

Baghdad includes the Baghdad, Samarra, Diyala, Kut Diwaniyah Hillah and Dulaim Divisions (*Liwas*) *Basra* includes the *Liwas* of Basra Amara and Muntafik, and *Mosul* includes Mosul, Arbil Kirkuk and Suleimani (Mosul covers a great part of the ancient kingdom of *Assyria* the ruins of Nineveh the Assyrian capital being visible on the banks of the Tigris opposite Mosul)

Of the total population there were in 1920 1,146,685 Sunni Muhammadans, 1,494,025 Shiite Muhammadans 87,488 Jews, 78,792 Christians, and 43,302 other religions

The country is capable of supporting a population many times in excess of its present inhabitants if irrigation is developed and extended In 1908 certain works were undertaken, following on the report of Sir W Willcocks, and during the British occupation notable improvements were effected, the Irrigation Department is at present confining itself to small and immediately remunerative schemes The wealth of the country depends entirely upon agricultural development, and two harvests can be gathered in the year, the chief crops being wheat, barley and beans, and rice, and Indian corn, wheat averages 464lb per acre, barley 612lb, and rice over 1,000lb. In 1918-19 there were 1,547,000 acres (deriving their water from the Tigris and Euphrates) under general cultivation, an increase of 64 per cent on the previous year Cotton

growing is a developing industry and it is estimated that Mesopotamia could yield 300,000 bales annually if sufficient labour is forthcoming. A concession for the exploitation of the oil in the Baghdad and Mosul vilayets was granted to the Turkish Petroleum Company (now the Iraq Petroleum Company) in March, 1925. The results of the geological surveys made by the company suggest that Iraq may contain one of the richest oilfields in the world. A number of wells have been drilled in the neighbourhood of Kirkuk, and in October, 1927, the first "gusher" was struck and capped at Baba Gurgur. The Khanaqin Oil Company (a subsidiary of the Anglo Persian Oil Company) holds a concession which is confined to the transferred territories (an area on the N.E. frontier transferred from Persia to Turkey in 1913-14) which is an adaptation of the D'Arcy concession held by the A.P.O.C. Since the war oil has been struck near Khanaqin and the field is considered a promising one. The Khanaqin Oil Company have opened a refinery near to Khanaqin town which produces sufficient petrol, kerosine and crude oil for the needs of Iraq.

The *Euphrates* (which has a total length of 1,800 miles from its source to its outflow in the Persian Gulf) is formed by two arms of which the Murad Su (415 miles) rises in the slopes of the Ala Dagh a mountain of Eastern Lizerum and flows westwards to a junction with the Kara Su, or Frat Su (275 miles) the latter rising in the north-west of Erzeroum in the Dumlu Dagh. The *Tigris* has a total length of 1,150 miles from its source to its junction with the Euphrates at Garmat Ali, 70 miles from the Persian Gulf and rises in two arms south of the Taurus mountains in Kurdistan uniting at Eil, where the boundaries of the vilayets of Diarbekir, Van and Bitlis conjoin.

Communications and Trade.—The country is being opened up and existing communications improved and secured. Schools, hospitals and dispensaries have been established under British auspices. Basra was equipped with wharves, railway sidings &c., for military purposes, and is thus suited for commerce. The chief imports are textiles, sugar and tea and the chief exports are dates, wool and barley.

The Baghdad Railway.—In 1899 the Anatolian Railway Company obtained a concession from the Sultan of Turkey for the construction of a railway from Konieh (the eastern terminus of the Anatolian Railway) to the Persian Gulf at Koweit *viâ* Baghdad a total length of 1,550 miles, with a single track of 4 ft. 8½ in. gauge. Its projected course was from Konieh to Adana, thence S.E. to Aleppo, Jerablus (where it would cross the Euphrates and enter Iraq), and Mosul, and thence S. down the right bank of the Tigris to Baghdad and the Persian Gulf. The section Konieh-Eregli-Bulgurlu (124 miles) was opened in Oct. 1904, and at the outbreak of the Great War about 1,200 miles (out of the total of 1,550 miles) were in operation, with gaps in important sections (notably in the hills N.W. of Aleppo and in the desert W. & S. of Mosul). The line crosses the Euphrates at Jerablus and is open to goods and passenger traffic as far as Nisibin. The track actually extends a further 10 miles into Syrian territory in the direction of Mosul. Railheads at Nisibin and Kirkuk are connected by a motor service, and through bookings by this route from Europe to Baghdad are obtainable. The first through train from Basra to Baghdad left Basra on Jan. 13, 1920. The total length of line open at that date was 945 miles compared with 1,113 miles during the War, some unimportant lines having been disused since the cessation of hostilities with Turkey since that time lines have been laid from Baghdad to Kerbala and Baghdad to Kirkuk. The line to Kirkuk will be extended to Mosul.

Capital.—The chief city is Baghdad the former capital of the Abbasside dynasty, one of the Caliphs of that dynasty being Haroun al Rashid of the Arabian Nights. Baghdad has an estimated population of 270,000, other towns being Basra 85,000 and Mosul (opposite the site of Nineveh) 90,000.

	1929-30	1930-31

A Kingdom in the South of Europe consisting of a peninsula the large islands of Sicily and Sardinia the island of Elba and about 70 minor islands (with certain dependencies hereinafter noted) It is bounded on the N by the Republics of Switzerland and Austria on the S by the Mediterranean on the E by the Adriatic and Yugoslavia &c and on the W by France and the Ligurian and Tyrrhenian Seas The total area of the kingdom of Italy in 1914 was 110 623 sq miles and by the *Treaty of Versailles* (June 28 1919) Italy gained from Austria Hungary the Trentino (about 4 000 sq miles) and Trieste (with about 1 000 sq miles of the Adriatic Sea board)

The total area of the Kingdom of Italy was estimated (Dec 1927) at 119 743 square miles with a population of the census of March 29 1931 of 42 158 817 There is a large settled and floating population of Americans and English

By a treaty signed at Rome (Jan 27 1924) the *Free State of Fiume* came to an end Yugoslavia's sovereignty over Port Baros and the Delta is established by the treaty and Italy acquired the town and harbour works of Fiume together with a narrow strip of hinterland Italy agreed to lease to Yugoslavia the Thaon di Revel quay at a rental of one gold lira for 50 years the railway station being established as an international frontier station Fiume is now the capital of the newly created Italian Provincia del Carnaro and has the status of an Italian provincial town

The Italian peninsula is traversed throughout its length by the chain of the Apennines the Alps form its northern limits dividing it from France, Switzerland Germany Austria and Yugoslavia *Mont Blanc* (15 782 feet) the highest peak of the Alps is in the French Pennine Alps, but within the Italian borders are Monte Rosa (15 217 feet) and several peaks from 12,000 to 14 000 feet The chief rivers are the Po, the Adige the Tiber and the Arno

GOVERNMENT Italian unity was accomplished under the House of Savoy, after an heroic struggle from 1848 1870 in which the great patriots *Mazzini* (*born* 1805 *died* 1872) and *Garibaldi* (*born* 1807 *died* 1882) were the principal figures It was completed when Lombardy was ceded by Austria in 1860 and Venice in 1866, and through the evacuation of the Papal States by the French in 1870 In 1872 the King of Italy entered Rome, and that city was declared to be the capital The government was that of a constitutional monarchy with a legislature of two houses—the *Senate* (of 385 life members appointed by the King) and the *Chamber of Deputies* of 536 members (elected by adult manhood suffrage) Under the reforms instituted by Signor Mussolini an entirely new and complex form of government has been built up—the Fascist syndical corporative state The Senate and Chamber are retained but the latter are elected *en bloc* a list being drawn up by the Fascist Grand Council and submitted to the electorate for acceptance or rejection as a whole The basis of the composition of the list is roughly equal representation of capital and labour, the essence of the syndical corporative idea being that the State should take charge of the economic development and functioning of the country

PRODUCTION — Agriculture (including the growing of grapes olives and chestnuts) is the principal industry Italian wines are numerous and celebrated and olives and olive oil are furnished by Tuscany, Liguria and the province of Bari while fruit abounds and is largely exported The cultivation of the silkworm forms an important industry Among the principal minerals are iron lead zinc copper manganese and antimony ores sulphur gypsum aluminthus alum and boracic acid Silver is found in Sardinia and some gold in the Alps Salt and tobacco are Government monopolies

The principal exports are cotton silk and woollen tissues motor cars olive oil wine candied citron sienna earths pastes coral rags boracic acid raw and thrown silk hemp cattle straw hats rice iron, zinc and copper ores sulphur marble fruit vegetables fresh and prepared meats poultry chemical products woods roots &c, for dyeing and tanning artistic works &c The imports chiefly consist of cotton, wheat, coal coke chemicals colonial produce yarns jute and manufactured goods, woollens raw silk silkworms eggs and cocoons, machinery iron and steel in bars, plates and rails hardware, raw hides horses and cows fixed oils, salt fish dye stuffs tobacco earthenware &c The manufactures are woollen cotton, silk, hemp and linen yarns and tissues, motor cars, rubber tyres and tubes leathers straw and felt hats furniture chemical products, paper, agricultural and other machinery prepared meats artistic works (such as mosaics pottery Venetian glass alabaster ornaments) &c Sugar is extracted from beet in large quantities for home consumption

DEFENCE —The *Army* consists of 30 Infantry Divisions and 2 *Divisioni Celeri* Cavalry and Cyclists) organized in 11 Army Corps, but a large number of Units and Services *e g*, Bersaglieri, Alpini Tanks &c, are not included in these formations During summer months (with two classes of conscripts with the colours) the strength is about 400 000 in winter months 200 000 (with one class) Age of liability for recall to Military service was raised in 1929 and brings total numbers available in case of war to 4 000 000–4 500,000 men The National Militia (Black Shirts) are also part of the Land Forces of Italy Their establishment is 300,000,

but only a small percentage are on permanent service, the remainder being in civil employ, ready for duty whenever required. The Militia supplies 2 Battalions to each Infantry Division in war. On May 24, 1915, Italy declared war on Austro Hungary, and on Aug 27 1916 a state of war was declared to exist with Germany. The cost of the war to Oct 31, 1918, amounted to 48 milliards of lire (£1,920,000,000). During the War of 1914 1918 over 15 per cent of the population were mobilised, and 5,250,000 men passed into the Armies of Italy. The *Navy* includes 5 modern and 1 pre Dreadnought battleship, 16 cruisers 1 aircraft carrier, 11 flotilla leaders, 60 destroyers 47 torpedo boats, 42 submarines 12 gunboats and despatch vessels, 2 river gunboats and 46 minesweepers and minelayers. The peace *personnel* of the Italian Navy is about 45 000 all ranks. Spezia and Pola the chief naval and military ports of the kingdom, are securely fortified. The *Air Force* consists of 110 squadrons of aircraft of which 10 are employed in the colonies. The official first line strength of aircraft is 973 machines with 1 further 100 in reserve. The *personnel* for 1929 includes 941 officers and 18,631 other ranks the expenditure for 1929 30 being 700 million *lire*, of which 60 million is for *Civil Aviation*.

EDUCATION.—Primary Education is free and compulsory, and evening continuation classes are also compulsory for military recruits. It is maintained by local taxation and State grants. Secondary education is generally State maintained and schools are increasing in number. Several of the Universities are of very ancient foundation.

COMMUNICATIONS. On July 31 1930 there were 10 407 miles of railway open for traffic 1 022 being electrified and 352 in course of electrification; the post offices (1929) numbered 11 228 and there were (1929) 40 855 miles of telegraph line. The sea going commercial marine (1929) consisted of 1 396 steamers (3 212 302 gross tons) and 2,692 sailing vessels (168 279 tons). In 1929 248 379 ships (77 177 450 net tons) entered Italian ports; the clearances were 248 494 (77,185,386 net tons).

ITALIAN COLONIES &c

Libia—the Turkish vilayet of Tripoli and the mutessarifat of Benghazi on the northern coast of Africa were occupied by Italy in 1911 12 and under the Treaty of Ouchy (Oct 1912) the sovereignty of the province was transferred to Italy the spiritual headship over the Muhammadan population remaining vested in the Caliph Tripoli is the most easterly of the Barbary States extending from the frontiers of Tunis to those of Egypt a distance along the coast line of nearly 1 100 miles and inland to the south a distance of about 800 miles The transferred territory comprises the four subprovinces or Mutessarifiik of Tripoli Khoms Tibesti el Ghat and Fezzan and also of Benghazi or Cyrenaica a total area of 810 000 square miles with a population of about 1 000 000 There are no rivers in the country and, the rainfall being precarious a good harvest can only be reckoned on every four or five years Early dates olives oranges lemons and vines of fine qualities are produced and the principal imports are metals British and other European manufactures tea beads wine and spirits besides a number of articles for barter in Wadai Bornu and the Western Sudan whither caravans proceed from Tripoli The principal articles of exports are ostrich feathers ivory skins sponges hides esparto grass wool cattle and horses The ancient ruins in Cyrenaica at Cyrene Ptolemais and Apollonia are interesting to explorers as well as those at Leptis Magna which is close to Khoms or 70 miles from the city of Tripoli a four sided arch erected to the Emperor Severus and a Roman market place were uncovered in Leptis Magna in 1931 32 The population of Benghazi consists of Arabs Greeks Maltese and a few Levantines The commerce in cereals wool cattle for Malta and other agricultural produce is considerable when a sufficient rainfall causes good harvests The capital of Tripolitania is Tripoli (population 60 000) and of Cyrenaica Benghazi (population 35 000)

Governor of Cyrenaica and Tripolitana Marshal Badoglio

Eritrea is a Red Sea colony and extends from Ras Kasar 18 2 N to Ras Dumeira 10 42 N and is bounded on N W by the Anglo Egyptian Sudan on S by Abyssinia and on S E by French Somaliland It consists of a triangular portion of barren and sandy lowland with a coast line along the Red Sea of about 700 miles and covers a total area of 64 000 square miles with a population of about 510 000 of whom about 3 500 are Europeans The capital is Asmara Massowa being the chief port where there is a good harbour The principal products are potash skins and salt of great value as being the monetary currency of Southern Abyssinia

Governor of Eritrea, H E Duke Astuto di Luchesi

Somaliland—Italian Somaliland comprises a coastal strip on the Gulf of Aden and the Indian Ocean from 11° N lat to the Equator, and is bounded on the N by the Gulf of Aden, on E by the Indian Ocean and on W by British Somaliland Abyssinia, and British E Africa The total area including the territory of Jubaland (and the port of Kismayu) transferred from Kenya by Great Britain in 1925 is about 220 000 sq miles and the population is estimated at 900,000 Agriculture and cattle rearing are the principal industries The capital is Mogadisho on the Indian Ocean

Governor of Italian Somaliland Signor M Rava

Tientsin—Italy obtained in 1902 a concession of land fronting the Peiho river (China) with a total area of 20 square miles and a population of about 10 000 natives

Aegean Dependencies—*Rh des Egeo and the Dodecanes* (12 islands occupied by Italy in 1912 during the war with Turkey viz —Stampalia Scarpanto Caso Piscopi Nisiro Callimno Lero Patmo Cos Simi Calchi, and Lipsi) The seat of administration is at Rhodes (Rodi) and the total population is about 100,000

MANCHURIA

(Manchukuo)

President (*Chih Cheng* = Administrator) *of the Manchurian Republic*, Henry Pu *born* Feb 7 1906 (succeeded as Chinese Emperor Nov 10 1909 decree of abdication by Dowager Empress Feb 12 1912) *Installed* as President of Manchuria, at Ching hun March 9 1932

Manchuria lies north east of China proper, and is bounded north and north east by Siberia west by Inner Mongolia south east by Chosen (Korea) and south by the Gulf of Pechihli and the Yellow Sea The new state comprises the following provinces —

Province	Sq Miles	Est Population
Liaoning	71 430	15 000 000
Kirin	103 477	9,000,000
Heilungkiang ..	225,107	5 000 000
Total .	400 014	29 000,000

The province of Heilungkiang occupies the greater part of Northern Manchuria, with Tsitsihar as capital Kirin lies to the north east, with its capital at Kirin Liaoning (formerly Feng tien) occupies the southern part, with Mukden as capital, and is separated from Korea by the Yalu river, with a seaboard washed by the Gulf of Pechihli and the Yellow Sea

Manchuria consists mainly of fertile agricultural land, and about half the cultivable land is worked principally under soya beans and other pulse kaoliang (the main food of the people) millet maize wheat and rice, cotton and tobacco are also grown The live stock (1930) included 1 605 000 cattle 2 438 000 horses 2 641,000 sheep and 7 507 000 pigs wool and furs are largely exported and lumbering is an important industry Mineral products include salt, coal, iron ore lead copper, gold and manganese There are several well equipped factories, including oil and flour mills (wheat flour being one of the principal exports) iron works and silk and other factories The *South Manchurian Railway* (leased to and worked by Japan), the Chinese Eastern Railway Peiping Mukden Railway and other lines have a total length of 4 125 miles

The principal towns are Mukden, with a population estimated in 1930 at 408 000, Dairen (390 000), Harbin (384 000) Kirin (191,000), Antung (143 000) Port Arthur (135 000) CHANGCHUN, the capital in the province of Kirin (128,000), Newchwang, (110 000) and Tsitsihar (90 000) The principal harbours are Dairen (Japanese), Port Arthur and Antung (on the Yellow Sea) and Newchwang (or Yingkow) and Hulutao (on the Gulf of Pechihli)

The finances of the three provinces are estimated in 1929 as under in *silver Yuan* (about 2s in 1929) —

	Rev	Exp
Liaoning	35 000 000	32 600,000
Kirin	23 500 000	15 000 000
Heilungkiang	10 222 000	6 354,000

The foreign trade of Manchuria in 1929 was stated at 329 603 869 *Haikwan Taels* for Imports, and at 425 651 491 for Exports and Re Exports, a total of 755 255 360 H T In 1929 the exports and re exports were taken as under —

Minister in London Señor Don Alberto Mascarefias 48 Belgrave Square S W 1
Consul General in London Señor Don Gustavo Luders de Negri 8 Halkin Street S W 1

Mexico occupies the southern part of the continent of North America with an extensive seaboard to both the Atlantic and Pacific Oceans extending from 15 to 32 30 N lat and 87° to 117 W long and comprising one of the richest and most varied zones in the world It comprises 27 states 3 territories and the federal district of Mexico making in all 31 political divisions comprehending an area of 768 883 square miles with a population (1930) of 16 404 030 Mexico is rich in archæological remains and work is proceeding in every district to remove the earth covering which for many centuries has kept them from view Near the City of Mexico are a number of pyramids built to a great extent with boulders from the river beds The *Pyramid of the Sun* (now called Tonatiuh) is 761 feet from N to S and 725 feet from E to W and rises to a height of 216 feet The *Pyramid of the Moon* (now called Meztli) is 426 feet × 511 feet and rises to 150 feet The staircases vary in construction between terrace and terrace and are found to be intact Other places of interest are near Oaxaca Papantla Zempoala on the Continent and Uxmal Chichen Itza and other points on the E side of Yucatan

The two great ranges of North America the Sierra Nevada and Rocky Mountains are prolonged from the north to a convergence towards the narrowing Isthmus of Tehuantepec their course being parallel with the west and east coasts The surface of the interior consists of an elevated plateau between the two ranges with steep slopes both to the Pacific and Atlantic (Gulf of Mexico) In the west is the Peninsula of California with a mountainous surface separated from the mainland by the Gulf of California. The Sierra Nevada known in Mexico as the *Sierra Madre* terminates in a transverse series of volcanic peaks from Colima on the west to Citlaltepetl (El Nevado de Toluca) on the east The low lying lands of the coasts form the *Tierra Caliente* or tropical regions (below 3 000 feet) the higher levels form the *Tierra Templada*, or temperate region (from 3 000 to 5 000 feet) and the summit of the plateau with its peaks is known as *Tierra Fria* or cold region (above 5 000 feet) The only considerable rivers are the *Rio Grande del Norte*, which forms part of the northern boundary, and is navigable for about 70 miles from its mouth in the Gulf of Mexico and the *Rio Grande de Santiago*, which runs from Lake Chapala to the Pacific The remaining streams are governed by the formation of the land and run in mountain torrents between deep cut cañons or barrancas The largest fresh water lakes are *Chapala* (70 miles long and 20 miles wide) and *Patzcuaro* and *Coelmulco* In the north west are saline lakes amid bare and dry regions The climate varies according to the altitude the rainy season lasting from June to October Yellow fever sometimes occurs at Merida, Yucatan

The earliest invaders or *Toltecs* gave place in the 13th century to the *Aztecs*, who were conquered in the 16th century by Spanish adventurers under *Hernan Cortes* * Spanish rule was established at *Tenochtitlan*, a 14th century Aztec city (now Mexico) and Mexico remained a Spanish dominion until its freedom was asserted by a revolutionary war 1810 1821 From 1837 1848 the province of Texas gave rise to hostilities with the United States terminating in a three years war and a cession of the disputed territory to the victorious northern States In 1810 a Republic was proclaimed but Iturbide declared himself Emperor in 1821 He was shot in 1824 and a Republic was again established In 1862 the French troops came to Mexico and in 1864 an Empire under Ferdinand Maximilian of Austria was declared In 1867 the downfall of the Empire and the death of the Emperor gave rise to the new Republic which has endured to the present day The most prominent of modern Presidents is *Porfirio Diaz* who ruled (except during 1880 4) from 1876 to May 25 1911 Since the fall of Diaz internal disturbances in which eleven Presidents have figured have continued with varying degrees of intensity and considerable friction (amounting almost to a state of war) has arisen with the United States On July 15 1914 Venustiano Carranza assumed control of the executive but his anti foreign attitude and legislation together with the seizure of many properties (a few of which belonged to British subjects) led to a refusal of the British Government to grant recognition of his administration The degree to which Carranza departed from his declaration of neutrality during the Great War undoubtedly influenced the British Government when this policy was adopted Carranza was overthrown by a further revolution in 1920 and is believed to have been shot by the insurgents After the fall of Carranza the executive power was assumed by de la Huerta as provisional President and on Dec 1 1920 General Obregon, whose *coup d'etat* had caused the downfal of Carranza became head of the Republic The determination of the new government to uphold the Carranza constitution of 1917 which has led to confiscatory measures in connection with nationalization of the petroleum of the country, and contains (among other departures from the accepted comity of nations) provisions which restrict the rights of foreigners caused the British American French and Belgian governments to adopt a policy of non recognition of the Obregon administration The expropriation without payment of compensation, of several hundreds of private properties in pursuance of the Obregon agrarian policy called forth strong protests from foreign Powers but all the Powers except Great Britain eventually recognised the Obregon administration General Obregon was afterwards assassinated In 1925 relations between Great Britain and Mexico were re established and an Anglo Mexican Special Claims Commission has since met and concluded its labours in February, 1932

Vera Cruz Tampico, Progreso, and Puerto Mexico are the chief ports on the Atlantic or Gulf of Mexico and Acapulco Manzanillo Mazatlan, Salina Cruz, and Guaymas on the Pacific.

* The remains of *Hernan Cortes* have been definitely located in the Temple of Jesus Mexico City They are contained in a marble vault with the funeral garments

There were 16 110 miles of railroad open on Sept 1 1926, and 54,670 miles of telegraph The railroads have in a large measure been built by American and English companies The Highway Commission of Mexico had constructed (to Dec 31 1928) 247 kilometres of road finished with asphaltic treatment 332 kilometres lacking only bituminous treatment and 720 kilometres open to traffic but still in various stages of construction There is a network of 50 000 kilometres of old roads of which about 12 000 are impassable It is proposed (1932) to spend 130 000 000 *pesos* on the completion of 9 000 kilometres of highways throughout the Republic The international highway from Laredo Texas to Mexico City is passable during the dry season (Nov to May) only The city of Mexico is linked with Puebla Tampico Vera Cruz Toluca, and Saltillo by telephone the line is now extended to the U S border and thence is connected to Canada and Europe The city is connected by wireless to U K and Europe The principal air routes from Mexico City are to Brownsville and El Paso (Texas) to Merida (Yucatan) and to Mazatlan (Sinaloa) *viâ* Torreon

The principal agricultural crops are maize beans wheat barley Chile pepper sugar, coffee, cotton tobacco vanilla flax grapes and all kinds of tropical fruit The maguey or Mexican aloe yields a favourite beverage *pulque* other species of the same plant supply pita flax and sisal hemp (henequen) The forests abound in mahogany rosewood ebony and caoutchouc trees The mineral wealth is very great silver and gold copper lead and quicksilver iron and coal are the leading products of the mines, and Mexico produced 50 150 610 barrels of petroleum in 1928 The mineral production is stated at —

Mineral	Kilograms	
	1930	1931
Gold	20 808	19 700
Silver	3 272 288	2 730 652
Lead	332 930 625	231 848 320
Copper	73 411 608	55,542 754
Zinc	124 083 519	124 781 093
Mercury	166 241	259 267
Antimony	3 032 711	5 653 722
Arsenic	9 970 791	6 747 308
Graphite	5 652 507	3 258 175

Petroleum Production

Year	Barrels	Year	Barrels
1927	64 120 000	1930	39 600 000
1928	50 151 000	1931	33 050 000
1929	44 688,000		

Woollen and cotton spinning and weaving the making of footwear, and other branches of industry are encouraged by high protective duties The imports nevertheless, consist very largely of textile manufactures Of the exports 20 per cent consist of silver and gold while 35 per cent represents the value of petroleum and its derivatives mainly shipped from Tampico Other important exports are copper, lead and zinc also sisal hemp (henequen) coffee cotton resins fresh vegetables and dried vegetables

The monetary system has now been placed on a silver basis with a silver *peso* = 50 cents U S currency or 24 58*d* but in actual fact is worth less than 30 cents U S gold there is a large amount of silver currency in circulation In Sept 1922 the Mexican Government undertook to set aside for the service of the debt the sum of 30 000 000 gold *pesos* in 1923 rising by 5 million gold *pesos* annually to 50 million gold *pesos* in 1927 However this agreement with the International Commission of Bankers was amended in 1925 after the Government had found it necessary to suspend the service of the debt in June 1924 The effect of the 1925 agreement was to eliminate the debt of the National Railways of Mexico from the public debt thereby reducing this from 1 561 million Mexican gold *pesos* to 890 millions as at Dec 31 1925 Furthermore the 1925 agreement provided for the postponement of payment of the 75 million *pesos* (which had not been met in 1924 and 1925) until 1928 1935 Service of the debt was resumed in 1926 but again suspended a further agreement was signed on Dec 22, 1931, providing for resumption of payments on Jan 1, 1934 In addition to the 890 millions above mentioned, other items which have not been included in the debt agreement of Sept 1922 as amended in 1925 amounted to 108 millions as at Dec 31, 1925 thus making a grand total of 998 million *pesos* Mexican gold A total sum of $45 000,000 has been received by the committee of bankers The total debt funded and floating and interest was stated to be $1 253 105 699 as at Dec 31 1928

The language of the country is Spanish

MOROCCO

(Moghreb el aksa 'The Farthest West')

French Protectorate and Spanish and International Tangier Zone

Sultan, Sidi Mohamed, *b m* 1909, *proclaimed* Nov 20, 1927

Morocco, the largest of the Barbary States, is situate in the north west of the African Continent, between 27° 36° N lat and 1° 11° 40 W long, with a total area estimated at 218 525 square miles, and a population of about 5,300 000 Morocco is traversed from the Atlantic coast in the south west to the Algerian frontier in the north east by five parallel ranges, known generally as the *Atlas Mountains* Between the various ranges lie well watered and fertile plains the lower slopes of the northern flanks of the mountains being well wooded, while the southern slopes are exposed to the dry winds of the desert and are generally arid and desolate The most northerly point of Morocco is the peninsula of Ceuta, which is separated from the Continent of Europe by the narrow strait of Gibraltar The Jebel Musa dominates the promontory and with the rocky eminence of Gibraltar was known to the ancients as *The Pillars of Hercules* the western gateway of the Mediterranean Between 32° N and 30 N is the headland Ghir which encloses a bay containing the port of Agadir, formerly known as the 'Gate of the Sudan

The climate of Morocco is generally good and healthy especially on the Atlantic coast the country being sheltered by the Atlas Mountains from the hot winds of the Sahara The extremes of temperature in Tangier and Mogador are 92° Fahrenheit in the summer and 37° in the winter, with a rainy season from November to April, but the summer heat figures at all the intervening ports (Larache Kenitra Mehedia, Rabat Sale Fedalah Casablanca, Mazagan and Saffi) are markedly higher the last named port being the hottest The Mediterranean coast is drier and less temperate, but not unhealthy while the plains of the interior are intensely hot

Government—France is the paramount power and represents the Sultan of Morocco in all foreign relationships, but the country is divided into three zones—the *French Zone* the *Spanish Zone* and the *International Tangier Zone* Spain has had relations with Morocco for many centuries The northern portion of Morocco as defined in the Franco Spanish Treaty of 1912 forms a Spanish sphere of influence which extends over the whole of Northern Morocco, with the exception of the International zone round Tangier In this sphere occurred the joint Franco Spanish military operations against Abd el Krim the Riff leader which culminated in the surrender of Abd el Krim in May 1926, and the final pacification of the French and Spanish zones in the following year Ceuta (on the Mediterranean coast, opposite Gibraltar) in 35° 54' N lat and 5° 18 W long has been a Spanish possession since the close of the 16th century, and forms part of the administrative province of Cadiz and the adjacent Alhucemas and Zafarin islands are Spanish possessions A special international *régime* was designed for Tangier before the War by negotiations between the British, French and Spanish Governments, but the outbreak of the War prevented this *régime* from being put into operation A new Convention instituting the *International Zone* of Tangier was however signed by the three governments at Paris on Dec 18 1923 and was brought into force on June 1, 1925 The Convention was modified by a Protocol signed at Paris July 25, 1928 by the three Powers and Italy, who thereby adhered to the Convention Both instruments have been adhered to by Belgium The Netherlands Portugal and Sweden, but the United States have not yet (Aug, 1932) signified their acceptance, and therefore retain their Capitulatory rights in the International Zone The Convention provides for a complete international administration of the zone, except as regards native affairs which are reserved to the Shereefian authority

Production, Industry, &c—Among the agricultural products are wheat, barley, maize, beans, peas, birdseed, linseed, coriander, cum-

imn, fenugreek, esparto and hemp and the northern slopes of the Atlas produce many fruits, principally figs almonds, pomegranates lemons, olives, oranges and grapes the latter growing also in the plains The live stock includes large quantities of horses, cattle sheep and goats, while the egg industry is of import ance Important deposits of coal manganese iron ore, lead and zinc as well as other minerals in smaller quantities, have been prospected but their exploitation awaits transport facilities Gold and silver are also found Phosphates are exported in increasingly large quantities and constitute a great source of wealth for the French zone The trade of Morocco is chiefly with France and Algeria, Great Britain Italy and Spain, the chief imports being cottons sugar motor vehicles, petroleum building materials and soft goods, the exports being grain phos phates eggs, hides and skins, and wool The unit of currency in the French protectorate is the Moroccan *franc* which is closely allied to the French *franc*, while in the Tangier zones the franc the *peseta* and the *Hassani peseta* are all current, and in the Spanish zone the two last of these currencies

Communications—The French Protectorate authorities are engaged in the serious develop ment of normal gauge railways in their zone and (Oct 1931) 1 140 kilometres of normal and 1,300 kilometres of narrow gauge track are in working order In addition the completion of the Tangier Fez full gauge system gives through service between Tangier and the principal towns of the French zone Telegraphic com munication is established by submarine cables from Tangier to Cadiz Gibraltar Rio Martin, Melilla Tarifa and Oran also between Casa blanca and Brest There are wireless stations at Tangier, Tetuan (military) Rabat and Casablanca Inland lines have been built by the French connecting all important places in their zone, as well as to the borders of the Spanish zone and the latter line is being extended to Tangier The chief roads in the Tangier and Spanish zones are those linking Tangier to Ceuta viâ Tetuan in the North and to Arzila Larache and the French zone in the South The French zone is well equipped with good main and secondary roads Air Services are maintained between Casablanca and Toulouse (daily), and Casablanca and Dakar (weekly)

The principal *Harbours* are Casablanca and Ceuta (for Tetuan) Tangier, Larache, Rabat Mazagan Saffi Kenitra and Mogador

External Trade—The imports into the *French Zone* in 1931 were valued at 2,083 292 000 francs, and exports from French zone 1931 766,042,000 francs The imports into the *Tangier Zone* (1931) were valued at 93,229,030 francs and the exports from the zone at 22 276 275 francs No customs statistics for the *Spanish Zone* have been published for many years

CAPITAL of French zone, Rabat, population 52 000 (Fez in the North and Marrakesh in the South being the old capitals of the Sultans) The *French Resident General* is M Lucien Saint

CAPITAL of Spanish zone, Tetuan, population 30,000 (principal ports, Larache and Rio Martin, for Tetuan)

CAPITAL of International zone, Tangier, population 45 000

Other towns (with populations exclusive of French army of occupation) are Fez (107,843), Marrakesh (193 582), Meknes (56 770) Salé (25 821) Casablanca (161 113) Rabat with Salé (77 821) Mazagan (19,601) Saffi (26,158), and Oudjda (29 220)

Netherlands India comprises the islands of *Java* and *Madura*, the island of *Sumatra* the *Riouw Lingga Archipelago* (which with Karimon Anambas Natuna Islands Tambelan and part of Sumatra forms the Residency of Riouw) the islands of *Bangka* and *Billiton* part of the island of *Borneo Celebes Island* the *Moluccas Islands* (Ternate Halmaheira Buru Ceram Banda Timor Aru Babar Tenimber Wetar) part of *New Guinea* part of *Timor Island* and the islands of *Bali* and *Lombok* with a total area of 730 000 sq miles and a population estimated at 53 000 000 The administrative capital is Batavia (pop about 260 000)

Governor General Jonkheer Dr B C de Jonge *appointed* 1931

Java and Madura (51 000 sq miles pop 1930 40 000 000) furnish sugar tobacco tea coffee tin rubber and other products for exportation The outlying islands are frequently administered by their own princes subject to the directions of a Netherlands Resident There was (1929) a colonial army of 1 293 officers and 37,100 men The colonial revenue for 1931 was estimated at fl 833 524 000 and the expenditure at fl 887 102 000 The trade of Netherlands India was valued in 1929 at fl 1 487 801 000 for exports and at fl 1 166 305 000 for imports The trade with Great Britain in 1930 was valued at £4 510 420 for imports from and at £6 586 271 for exports to Great Britain

BRITISH CHAMBER OF COMMERCE FOR NETHERLANDS EAST INDIES Batavia Java

II *Netherlands West Indies* —

Netherlands West Indies comprise the mainland colony of *Surinam* (Dutch Guiana) in South America and certain islands in the West Indies known as the Colony of Curaçao (Curaçao Bonaire Aruba part of St Martin St Eustatius and Saba) with a total area of 400 sq miles and a population estimated (1929) at 65 750 The administration capital of Surinam is Paramaribo (pop 50 000) the capital of Curaçao is Willemstad (pop 21 000)

NICARAGUA

(República de Nicaragua)

President (1929 1932) Señor Don José Maria Moncada *assumed office* Jan 1 1929 (until Dec 31 1932)

Minister in London, Señor Don Eduardo Perez Triana 4 Moorgate, E C 2
Vice Consul F V Cook 15 Union Court E C 2

The largest State of Central America with a long seaboard on both the Atlantic and Pacific Oceans situate between 9° 45—15° N lat and 83° 40'—87° 38' W long containing an area of 51,660 English square miles and a population (1930) of about 750 000, of whom about three quarters are mixed blood and the rest Indians including the Mosquitos, who dwell on the Atlantic littoral and were formerly under British protection

Nicaragua was discovered by Columbus in 1502, and was overrun by the Spaniards under Davila in the first quarter of the 16th century, forming part of the Spanish Captaincy General of Guatemala until 1821 when its independence was secured The present constitution rests on the fundamental law of Nov 10 1911 (amended 1913) and is that of a centralised republic The President is elected by direct suffrage for four years

The chief products are coffee bananas sugar timber (cedar mahogany, rosewood &c) tobacco maize rice beans cocoa hides gold and silver Considerable quantities of foodstuffs are imported as well as cottons and other manufactures principally from the United States which also take the greater part of the exports

There are (1930) 160 miles of railway 2 842 miles of telegraph and 3 216 miles of telephone and a powerful wireless station was completed at Managua in 1924 Good roads are very few and transportation especially in the rainy season (May Nov) is attended with great difficulties

Corinto on the Pacific coast is the chief port of the country, handling about 70 per cent of the total trade Bluefields and Puerto Cabezas, on the E coast are mainly concerned with the shipment of bananas and timber to New Orleans Owing to defective communications the Atlantic littoral is practically isolated from the rest of the Republic and the chief centres of population

Education is backward at least 60 per cent of the population being illiterate

The official language of the country is Spanish

Norway an independent kingdom founded in 872 (fundamental law of May 17 1814) was united with Sweden under the same King from Nov 4 1814 to June 7 1905 when the union was dissolved The Parliament of 150 members is called the 'Storthing' which is divided into two sections chosen by itself to discuss projected Bills called Odelsting and Lagting Norway the western and northern portion of the Scandinavian peninsula is about 1 100 miles in length its greatest width about 250 miles It is divided into 20 provinces or fylker and comprises an area of 124 455 sq miles with a population (1931) of 2 831 267 The coast line is extensive deeply indented with numerous fiords and fringed with an immense number of rocky islands The surface is mountainous consisting of elevated and barren table lands, separated by deep and narrow valleys The cultivated area is about one fortieth part of the country forests cover nearly one fourth the rest consists of highland pastures or unin habitable mountains.

The chief industries are agriculture and forestry manufactures, fisheries and shipping Agriculture and forestry give employment to one third of the population Manufactures are aided by great resources of water power estimated at 9 200 000 kw, of which 13 per cent are utilized The quantity of fish caught by Norwegian fishing vessels is of late years greater than that of Gt. Britain and more than 60 per cent of the whale oil production of the world is from Norwegian Companies The imports consist chiefly of foodstuffs raw materials for the manufacturing industries and coal and fuel oil The chief exports are fish oil and other products of the fisheries condensed milk, tinned goods pulp paper, iron ore and pyrites stone cement, calcium carbide nitrate of soda, aluminium ferro alloys, nitrate of lime, zinc, cyanide &c

Defence—Service in the National Militia is universal and compulsory The peace strength is about 10 000 all ranks In time of war all males between the ages of 18 and 55 are liable for service The Navy consists of 4 ironclads 17 torpedo boats, 3 destroyers, 9 submarines and several minelayers There are 60 seaplanes and seroplanes

Education is compulsory and free between the ages of 7 and 14, schools being maintained by local taxation with State grants in aid The attendance is high Secondary schools are provided by the State by local authorities, and privately There are many special schools and industrial and technical institutes The University of Oslo was attended in 1931 by 3,615 students

Communications—The total length of railways open in 1932 was 2 407 miles of which 229 miles were private lines The length of telegraphs and telephones in 1931 was 35 625 miles (State, 22 320) with 580 400 miles of wire (State 425 250 miles) The mercantile marine Jan 1 1932 consisted of 4 000 vessels of 2 401 700 net tons The gross earnings of the Norwegian mercantile marine in foreign traffic amounted in 1931 to about 411 500 000 *kroner*

SVALBARD

(Spitsbergen and Bear Island.)

By Treaty (Feb. 3, 1920) the sovereignty of Norway over the Spitsbergen (Pointed Mountain) Archipelago was recognised by the Great Powers and other interested nations, and on Aug. 14, 1925, the Archipelago was officially taken over by Norway.

The Svalbard Archipelago lies between 74°-81° N. lat. and between 10° 35' E. long., with an estimated area of 24,295 square miles. The archipelago consists of a main island, known as West Spitsbergen (15,200 sq. miles), North East Land closely adjoining and separated by Hinlopen Strait, the Wiche Islands, separated from the mainland by Olga Strait, Barents and Edge Islands, separated from the mainland by Stott Fjord (or Wybe Jansz Water). Prince Charles Foreland, to the W., Hope Island, to the S.E. Bear Island (68 square miles) 127 miles to the S., with many similar islands in the neighbourhood of the main group. The principal mineral is coal. In 1931 the coal export was about 206 000 tons. The wintering force in 1931-32, was 436 strong, the archipelago is also visited by hunters for seal, foxes and polar bears.

Svalbard revenue (1932-33)	*kroner*	70 000
do expenditure (1932-33)	,,	70,000

South Cape is 370 miles from the Norwegian Coast. Ice Fjord is 520 miles from Tromsö, 650 miles from Murmansk, and 1,300 miles from Aberdeen. Transit from Tromsø to Green Harbour (the postal station, with a high power Telefunken wireless station) 2½ to 3 days, from Aberdeen 5 to 6 days.

JAN MAYEN, an island in the Arctic Ocean (70° 49'—71° 9' N. lat. and 7° 53'—9° 5' W. long.) was joined to Norway by law of Feb. 27, 1930.

BOUVET ISLAND, in the Antarctic (54° 26' S. lat. and 3° 24' E. long.) was declared a dependency of Norway by law of Feb. 27, 1930.

PETER I.st's ISLAND, in the Antarctic (68° 50' S. lat. and 90°35' W. long.) was declared a dependency of Norway by resolution of Government, May 1, 1931.

PANAMA

(Republica de Panama.)

President (1932-1936), Señor Dr. Don Harmodio Arias, *assumed office* Oct. 1, 1932.
Secretary of Government and Minister of Justice, Señor Colonel Don Juan Antonio Jiménez.
Foreign Affairs, Señor Don Juan Demóstenes Arosema.

Minister in London, Señor Don Narciso Garay (resides in Paris).
Consul-General in London, Señor Don I. J. Valdés, Jr., 23a Finsbury Pavement House, E.C.2.

Panama, formerly one of the nine Departments of Colombia, revolted in Nov. 1903, and established a separate Government. The area of the Republic is 31,890 square miles, the population 442 486 (excluding Canal Zone). The soil is extremely fertile, but there is little cultivation and nearly one half of the land is unoccupied. The chief crops are bananas, coconuts, cacao, coffee, and cereals. The imports are almost entirely manufactured goods and foodstuffs. A railway 47 miles in length joins the two oceans.

Revenue (Budget March 31, 1931-Feb. 28, 1933)	£4,107,265
Expenditure (Budget March 31, 1931-Feb. 28 1933)	£4,107,265
Imports (1931)	$13,492,459
Exports (1931)	$2 607,713
Imports from U.K. (1931)	$1 029,896
Exports to U.K. (1931)	$215,492

The total value of supplies purchased for the *Canal Zone Commissaries* for the fiscal year ended June 30, 1931, was $7,275 817 (U.S.$).
The language spoken is Spanish.

CAPITAL, Panama. Population (1930), 82,827. Colon (1930) 33,460.

PAPAL STATE, The

(Stato Città Vaticana.)

Sovereign Pontiff (260th) His Holiness Pope Pius XI. (Achille Ratti) *born* at Desio, March 31, 1857 *elected* Pope (in succession to Benedict XV.) Feb. 6, 1922.

The office of the ecclesiastical head of the Roman Catholic Church is vested in the Pope of Rome who is the Sovereign Pontiff of the Western Church. The Papal States were incorporated with Italy from 1860 to 1870, and the territory of the Papacy was confined to the palaces of the Vatican and the Lateran and the Villa of Castel-Gandolfo. In 1870 the incorporation of the Papal States in Italy left the temporal power of the Pope in suspense until the treaty of Feb. 11, 1929, which recognised the full and independent sovereignty of the Holy See in the City of the Vatican. Accompanying the treaty were conventions regulating the condition of religion

and of the Catholic Church in Italy and agreeing to pay 750 000 000 *lire* in cash and the income at 5 per cent on 1 000 000 000 *lire* state bonds as a final settlement of the claims of the Holy See against Italy for the loss of temporal power

An inland State of South America situate between 20°—6° 30 S lat and 54°—62° W long The area of Paraguay (exclusive of the Chaco) is computed at 61 600 square miles and it contains a population estimated in 1930 at about 850,000

Paraguay was visited in 1527 by Sebastian Cabot and in 1535 was settled as a Spanish possession In 1811 Paraguay declared its independence of Spain and from 1814 1840 was governed by Francia a Paraguayan despot who was succeeded by Lopez 1840–1862 In 1862 Francisco Solano Lopez succeeded his father and in 1864 declared war against Brazil Argentina and Uruguay being involved in the struggle Against these three nations Lopez conducted a five years war, which terminated in his defeat and death at the *Battle of Cerro Cora* March 1 1870 This dogged struggle reduced the country to complete prostration and the population which was 800 000 in 1857 is alleged to have fallen in 1870 to 250 000 of whom barely 30 000 were men The present constitution was adopted at the close of the war and under its provisions the head of the executive is the President, elected by an electoral college for four years and ineligible for office for eight consecutive years after the expiration of his term A Vice President is similarly elected and succeeds automatically in the case of the death expulsion or absence of the President There is a Cabinet of 5 members

Paraguay proper consists of a series of plains, intersected by abrupt ranges of hills, some of which reach in altitude of 2 000 to 3 000 feet above sea level The Paraguay and Alto Paraná rivers are navigable at all seasons for vessels of 6 to 7 feet draft Many of the tributary streams are also navigable for much of the year The Pilcomayo river is navigable for small craft for 180 miles from Asuncion but is liable to shrink unduly with drought Paraguay is a country of grassy plains and dense forest the soil being marshy in many parts and liable to floods while the hills are covered for the most part with immense forests The streams flowing into the Alto Parana descend precipitously into that river In the angle formed by the Parana Paraguay confluence are extensive marshes, one of which, known as "Neembucu or endless, is drained by *Lake Ypoa* a large lagoon south east of the capital The *Chaco* lying between the rivers Paraguay and Pilcomayo and bounded on the north by Bolivia, forms the subject of a long standing dispute with that country, it is practically a dead level though a slight and uniform rise westward is now known to exist and suffers much from floods and still more from drought

The chief agricultural products are tobacco, oranges and cassava (manioc) maize, rice sugar cane, ground nuts, and other tropical and sub tropical plants The forests contain many varieties of timber but only cedar and a few of the best known hardwoods find a market abroad Stock raising lumbering cotton and tobacco growing, and the gathering of *Yerba* (Paraguay tea) are the principal industries The chief articles of export are hides, timber yerba maté, tobacco, quebracho extract cattle and meat products, oranges and petit grain oil The Army numbers 2,000 to 3,000 men A railway 232 miles in length which belongs to an English company connects Paraguay with the Argentine railway system The journey from Asuncion to Buenos Aires (985 miles) occupies 53 hours. Train ferries enable the run to be accomplished without break of bulk. River

* Adrian IV (Nicholas Brakespeare the only Englishman elected Pope was born at St Albans, elected Pope on the death of Anastasius IV 1154 died 1159

steamers also connect Buenos Aires and Asuncion (3 to 5 days) The language is Spanish

Persia—called by the natives Iran—comprises an area of 628,000 sq miles, with a population estimated at 10,000,000

Persia is mostly an arid table land, encircled, except on the east, by mountains, those in the north rising to 18 700 ft The central and eastern portion is a vast salt desert The only navigable river is the Karun, which was opened to foreign navigation from Mohammerah to Ahwaz in 1888 Caravans and pack animals are also being superseded by motor transport of passengers and goods on the road between Tehran Khanikin, Tehran Pahlevi (Enzeli) Tehran Tabriz, Tehran Meshed, Meshed Zahedan (Duzdab) and Tehran Bushire There are 334 miles of railway open including 80 miles in the North from Ahabad Shahi to Bandar Shah, and 156 miles in the South from Bandar Shappur to Dizful

The chief products are cereals, cotton, gums dried fruits silk tobacco and opium The minerals (little worked) are salt iron, coal, copper lead sulphur, &c with turquoises Oilfields in Southern Persia have been successfully worked by an English company since 1902 The only important manufacture is that of woollen carpets (mostly a domestic industry) but shawls silks and cotton fabrics are also produced There are extensive forests in the north and west Sheep and goats are numerous and good wool is produced The Persians are mostly Shiah Muhammadans, but there are many adherents of Bahaism (an eclectic form of Deistic religions) and Armenian Christians The laws and popular education are based on the precepts of the Koran, but efforts are being made to approximate the educational system more closely to European models Persia is divided into provinces, of which the principal are under Governors or Governors General

Owing to increasing popular discontent with a corrupt and incompetent administration and an extravagant Court a nationalist movement began in Dec 1905 In Aug, 1906, the Shah Muzaffer ud Din admitting the need for reforms granted a Constitution He was succeeded in 1907 by his son Muhammed Ali Shah, who was deposed by the National Assembly in 1909 to be succeeded by his son Sultan Ahmad Shah (under the regency of Nasr ul Mulk until 1914) As a result of the energy of Prime Minister H H Reza Khan the authority of the Persian Government was re established over almost the whole of Persia by means of a disciplined army of 8 000 cavalry and 22,000 infantry with 94 guns and 200 machine guns, and a number of aeroplanes and armoured cars On Oct 31 1925 the Shah Ahmed Mirza, who had been absent from the country for some time, was deposed by the National Assembly which handed over the government to the Prime Minister On Dec 13 1925 the Constituent Assembly elected Reza Khan Pahlavi Shah of Persia The Shah took the oath on Dec 15 and was publicly proclaimed and was crowned on April 25 1926

The revenue is mainly derived from land tax, Crown lands customs,duties and from monopolies of sugar, opium, matches, tea and tobacco. The oil royalties are kept apart from the general revenue Part of the proceeds from the sugar and tea monopolies is earmarked for the construction of railways In 1930 31, about £422,000 was so expended British commercial interests in Persia exceed those of any other country, the trade between the British Empire (including India) and Persia amounting to nearly 45 per cent of the total trade of the country (1930–31), inclusive of oil

The leading imports into Persia are cotton fabrics tea, sugar and motor vehicles the principal exports are heavy oils, petrol, carpets opium, gum, fruits cotton and rice All foreign trade was in Feb 1931 declared to be a State monopoly, and restrictions on imports and on exchange transactions were imposed

1930 31	
Revenue	*£6 740,808
Foreign Debt (March, 1931)	1,601,259
Imports	9,535 632
Exports	17 221,411
Imports from Brit Empire	4 336 722
Exports to Brit Empire	7 682 415

Defence —Persia now possesses an army, well equipped on modern lines of approximately 48 000 all ranks and a small fleet in the Persian Gulf

Foreign Relations —By the Anglo Russian Convention of Aug 1907 Great Britain and Russia mutually engaged to respect the integrity and independence of Persia while marking out certain regions in S E and N W Persia respectively in which each had for geographical and economic reasons special interests

In March 1921 Persia signed a treaty with the Russian Soviet Republic, which provides (*inter alia*) for mutual diplomatic and consular representation, restores to Persia Enzuch and Ashurada, annuls all concessions previously granted to Russians in Persia hands over the Russian Discount and Loan Bank to the Persian Government, cancels all Persian debts to Russia denounces all previous Russo Persian treaties, abolishes the "capitulations" as regards Russian subjects in Persia, and denounces all treaties made between Russia and third Powers regarding Persia Further treaties were signed in 1927 and 1931

In 1922 the Persian Government engaged a number of American advisers (under Dr Millspaugh) for the supervision and direction of the country's finances Considerable strides were made by the country under this new régime a balanced budget and a programme for gradual development of the country's resources having been evolved Dr Millspaugh's contract came to an end A State Bank was started in 1929 under German control, a certain number of Belgians are employed in the Ministry of Finance and in the Customs Administration

In May 1928, the capitulatory régime came to an end, at the same time a new Tariff Convention was signed, giving Persia Tariff autonomy

Peru is a maritime Republic of South America, situated between 1° 31′ 29″ and 19° 13′ S latitude and between 69° and 81° 29′ W. The territory between 17° 49′ S and 19° 13′ S was

*(Converted at average rate of exchange 1930-31 (85 *krans* = £1)

occupied by Chile, as the result of the Pacific War of 1879–1882. In 1929 the Province of Tacna was returned to Peru, Chile retaining the Province of Arica. The area of the Republic is estimated at 358,000 square miles (including 6,000 square miles for Tacna), and the population (1931) at 5 550 000. It is bounded on the north by Ecuador and Colombia, as the latter claims a territory in the Amazonian basin, on the east by Brazil and Bolivia, and on the south by Chile and Bolivia.

Peru was conquered in the early 16th century by Francisco Pizarro (born 1478 died 1541) who subjugated the Incas (a tribe of the Quichua Indians), who had invaded the country some 500 years earlier and for nearly three centuries Peru remained under the Spanish rule. A revolutionary war of 1821–1824 established its independence, declared on July 28 1821. The constitution rests upon the fundamental law of Oct. 18, 1856 (amended Nov. 25, 1860), and is that of a democratic Republic under a newly drawn constitution of 1919. The President is elected for five years by direct vote of the people and under an amendment to the Constitution (1927) may be re-elected indefinitely. The Constitution is again to be amended by the Constituent Assembly, for which elections are held (as also for President) in Oct. 1931.

The country is traversed throughout its length by the Andes, running parallel to the Pacific coast, the highest points being *Huascaran* (22,050 feet) *Huandoy* (21 100 feet) *Arequipa* (or Misti) volcano (20,013 feet), *Huaican* (20 000 feet), and *Lurima Tocora*, and *Sarasara*, all over 19,000 feet. There are four distinct regions, the *costa* west of the Andes the *sierra* or western slopes of the Andes the *punas* or mountainous wastes below the region of perpetual snow and the inward slopes (*montaña*) and boundless forests of the Amazonian basin. The coastal area lying upon and near the Pacific is not tropical, though close to the equator being cooled by the Humboldt Current. Its chief products are sugar, cotton, petroleum, wool, hides and skins, and it contains the chief towns and most of the white population. In the barren mountain section are to be found minerals in great richness and variety which await improved transport facilities before their production can be considerably increased. It is inhabited by Indians in a low state of civilization. Upon the eastern slope of the Andes are to be found very large tracts suitable for cultivation and stock-raising, at present almost wholly unexplored owing to lack of communication, but efforts have been made in recent years to open up an routes. This part of the country should show most interesting developments in the future. The tropical lowlands lie east of the Andes towards the borders of Brazil, and consist mainly of unexplored or little known country inhabited by Indians in a savage state. There are here dense jungles, of which the principal commercial product is wild rubber. The mineral production in 1930 was as follows:—Gold (*Kg* 2,766), silver (*Kg* 478 664), copper (48,205 tons), lead (19 744 tons), zinc (11,274 tons) vanadium (479 tons), antimony (59 tons), and petroleum (96,500,000 *soles*). The Lobos and other islands on the Pacific coast provide guano (95,000 tons in 1930).

The principal imports are foodstuffs, cotton, woollen, linen and silk goods, drugs, earthen and stone wares, machinery, explosives, metal and manufactures thereof, stationery, paper manufactures, timber and wheat. The chief exports in 1930 were petroleum and derivatives (86 906 651 *soles*) minerals (72 026 947 *soles*) cotton (41 511,966 *soles*), and sugar (25 525,836 *soles*).

The total length of the railways open (1929) was 2 851 miles of which 1 195 miles are under the control of the Peruvian Corporation. There is also steam navigation on Lake Titicaca and the River Desaguadero. The eastern rivers are also navigated to some extent by steam craft. Wireless telegraphy stations have been established in many places. There is considerable activity in air services. The Naval Air Force maintains services to Iquitos and other places in the interior. The coast district is served by a national company and by the Chile U.S.A. route. Peru National Air Mails are carried by Peruvian military machines.

Defence.—The Army is recruited by voluntary enlistment supplemented by conscription and numbers about 8,000 of all ranks, the Navy includes 2 cruisers built at Barrow, a destroyer bought from the French Government, and 4 submarines built in U.S.A. There is a military aerodrome at Chorrillos (near Lima) and a seaplane station at Ancon.

Language.—Spanish is the official language of the country but native dialects (of which Quichua is the most important) are spoken by a considerable portion of the Indian population.

The Republic of Poland was proclaimed at Warsaw in November 1918 and under the *Treaty of Versailles* (June 28 1919) the assentors to the Covenant of the League of Nations and the signatories of the Treaty of Peace guarantee the independence of the Republic which is reconstituted within the limits of the 18th century Polish Commonwealth This State extended in the year 1772 over an area of about 886 000 sq miles and included a population of about 13 000 000 The political boundaries of the Republic are the Baltic Sea Germany (East Prussia) and Lithuania in the N Czechoslovakia in the S Rumania in the S E Soviet Russia in the E and Germany in the W The present area of the Republic may be estimated at 150 000 sq miles with a population estimated (Jan 1, 1932) at 32 132 936 (of whom 22 208 076 or 69 1 per cent are Poles, and 9 924 860 or 30 9 per cent other nationalities). The predominant religion of the people is Roman Catholic but all faiths enjoy equality, and there are a considerable number of Protestants and a very large number of Jews

In 1919 hostilities broke out between Poland and Soviet Russia, and after initial successes the "Red" armies of Bolshevik Russia appeared (in August 1920) likely to deal a crushing blow at Polish independence, the capital (Warsaw) being in peril of capture A dramatic counter attack by the Polish troops at the critical period reversed the nature of the campaign and Poland was enabled to conclude peace on favourable terms

Government—A Republican form of government was adopted by the Constituent Assembly in 1919, the Chief of State exercising the executive authority through a Ministry responsible to the Legislature The Legislature consists of a Diet (*Sejm*) elected by universal adult (male and female) suffrage, and of a Senate elected by adult (male and female) suffrage of those over 30 years of age The Constitution voted on March 17, 1921, is very liberal Since Marshal Piłsudski's *coup d'état* of May 12 1926 amendments have been inserted in the Constitution conferring on the President of the Republic the power of legislation by decree at times when the Diet is not sitting, subject to subsequent ratification by the Diet

Production—Mining cotton metal work, agriculture, sugar forestry and stock raising are the principal industries the chief crops being rye wheat, oats barley potatoes and sugar beet, the live stock includes cattle horses sheep and pigs There are valuable coal mines in Upper Silesia Congress Poland and Little Poland (Galicia) zinc lead ore mineral and potassium salts and in Galicia (Borysław) are famous oil fields the output of crude oil (1930) was 663 6 metric tons The chief manufactures are textiles those of minor importance being machinery and metal works chemicals and leather The exports are principally coal timber spelter agricultural produce and textiles the imports being raw wool cotton and jute, woollen and cotton goods, and machinery

Defence—The peace effective of the army is 17 000 officers and 250 000 other ranks A small navy, for coastal defence has been organized

Education—Education is compulsory and free and there is considerable voluntary effort in addition to the work of the State Secondary education is conducted on a high level with good attendances and there are universities at Cracow (founded 1364) Warsaw, Lwow Poznań, Lublin and Wilno Polytechnics at Warsaw and Lwow, and an Academy of Science at Cracow

Communications—There are about 10 000 miles of railway and over 25 000 miles of telegraph line, with well developed telephone systems in all the large centres Over 4 000 miles of navigable waterways exist on the Vistula Narew Bug Warta and Pilica, of which about 1 100 are navigable by steamers The free city of Danzig is within the Polish Customs area free transit for Germany being guaranteed A purely Polish port is also being constructed at Gdynia, north of Danzig, with a total water area of 470 495 acres, and an estimated maximum handling capacity of 6 to 7 million tons a year, when complete During 1931 Gdynia handled 5,300 000 tons of goods Direct railway communication is being built linking Gdynia with Upper Silesia and Czechoslovakia on the one hand, and with Rumania and the Black Sea on the other

Portugal lies between 36° 58—42 9 12′ N lat and 6° 11 48 —9° 29 45 W long, being 302 miles in length from N to S, and averaging about 117 in breadth from E to W Continental Portugal contains an area of 34 500 square miles, with a population in 1930 of 6 190 000 and the Portuguese Colonies a total area of 800,400 square miles with a population estimated at 10 384 381 The Azores and Madeira are regarded not as colonies, but as a part of continental Portugal

From the close of the eleventh century the government of Portugal was a monarchy, and for many centuries included the Vice Royalty of Brazil, which declared its independence in 1822 In 1910 an armed rising in Lisbon drove the King, and Royal family into exile, and the National Assembly of Aug 21, 1911 sanctioned a Republican form of government and adopted a constitution with a President elected by Congress for 4 years a Congress of two chambers, and an executive appointed by the President, but responsible to the Legislature (Ex King Manoel of the House of Braganza was *born* Nov 15 1899 and succeeded on the assassination of his father Feb 1 1908 *died* at Fulwell Park, Twickenham Middlesex July 2 1932)

The chief agricultural products of continental Portugal are wheat barley oats maize flax, hemp and the vine in elevated tracts in the low lands rice olives oranges lemons citrons, figs, vines and almonds There are extensive forests of oak chestnut sea pine and cork the cultivation of the vine and the olive being among the chief branches of industry the rich red wine known to us as port is shipped from Oporto Its mineral products are important copper lead tin antimony coal manganese iron slate and bay salt which last from its hardness and purity is in demand Its manufactures consist of gloves silk woollen linen, and cotton fabrics metal and earthenware goods tobacco cigars &c The exports consist to the extent of 30 per cent of wine which is the chief industrial product of the country, others are cork cattle tin copper ore fruits oil sardines, and salt The imports are manufactured goods hardware cotton and woollen stuffs, machinery, wheat sugar dried fish coal &c The mercantile marine (1931 numbered 43 steam vessels (above 1 000 tons) with a tonnage of 188 871 Railways 2 140 miles in extent were open for traffic in 1931 and there were 5 742 miles of telegraph line in 1930

Defence—Service in the militia is universal and compulsory The peace effective is about 35 000 War strength about 150 000 The Navy consists of a few small ships of old pattern Air Fleet 84 aeroplanes

Education is free and nominally compulsory between the ages of 7 and 15 but is not strictly enforced and about 54 per cent of the population above 7 years old are illiterate Secondary education is conducted in State lyceums There are also military, naval and other special schools There are Universities at Coimbra Lisbon and Oporto

Commercial Secretary, M. N. Holban.
Consul-General, (vacant).
Consul-Gen. (*Hon.*), M. G. N. Gologan, 5–7 St. Mary Axe, E.C. 3.

Rumania is a kingdom of South Eastern Europe formerly the classical *Dacia* and *Scythia Pontica*, territory roughly defined by the three great rivers Danube, Theiss, and Dniester, whose central point is the line of the Carpathians. The kingdom is divided into the 7 Provinces of The Banat, Transylvania, Bukovina, Bessarabia, Muntenia, Oltenia and Moldavia. Rumania has its origin in the union of the Danubian principalities of *Wallachia* and *Moldavia* (and the addition thereto of a strip of Southern *Bessarabia*) under the *Treaty of Paris* (April, 1856). The principalities remained separate entities under the suzerainty of the Turkish Empire until 1859, when Prince Alexandru Ion Cuza was elected Prince of both Principalities, still under the suzerainty of the Porte. Prince Cuza abdicated in 1866 and was succeeded by Prince Charles of Hohenzollern-Sigmaringen, in whose successors the crown is now vested. By the *Treaty of Berlin* (July 13, 1878) a new Principality (consisting of the two above mentioned) was recognised as an independent State, and part of the *Dobrudja* (which had been occupied by the Rumanians) was incorporated in the new Principality. On March 27, 1881, the former Principality was recognised by the Great Powers as a Kingdom. Rumania is not a "Balkan" State She took no part in the military operations of the Balkan League against Turkey in 1912–13. Her unexhausted military power secured for her a readjustment of her south-eastern (Dobrudja) frontier in 1913. In the War of 1914 1918, Rumania fought on the side of the Allies from Aug 27, 1916, and after many vicissitudes (due mainly to the sudden collapse of the Russian Armies in 1917), she emerged in triumph at the cessation of hostilities. Her territories were greatly increased as a result of the War, and the *ante bellum* area of the Kingdom (74,461 sq miles) may now be estimated at 123,000 sq miles, and the 1925 population of 7,897,311 has been increased to 18,057,074 (1930 census) The dominating religion is that of the Greek (Orthodox) Church

GOVERNMENT.—The government is that of a Constitutional Monarchy, the legislative assembly consisting of a Senate (56 members) elected for 4 years, and of a Chamber of Deputies (361 members) elected for 4 years by universal suffrage, provision being made for the proportional representation of minority parties. The executive is entrusted to a council of ministers.

PRODUCTION.—The soil of Wallachia, Bessarabia, and Moldavia is among the richest in Europe. The agricultural produce consists of wheat, maize, millet, oats, barley, rye, beans, and peas. The wheat crop for 1931 was 3,682,792 metric tons. rye 354,648, maize 6,063,333, barley 1,414,395, and oats 670.237 metric tons. Vines and fruits are abundant. The fertile plain of Transylvania yields large crops of maize, wheat, rye, oats, flax, and hemp, and the rich lands of Bessarabia produce wheat, maize, barley, flax, tobacco, water melons, fruit, and grapes. Agriculture and sheep and cattle raising are the principal industries of the kingdom, but the climate of this part of South-Eastern Europe is of the Continental character, with intense winter cold and summer heat, and fierce summer droughts sometimes defeat these principal industries. The forests of the mountainous regions are extensive (17,851,401 acres), and the timber industry is important. The country is rich in minerals, and produces petroleum, salt, coal, lignite, iron, gold, and mica; the workers in the oilfields are the largest single unit of workers in any one industry; the production of crude oil was 1,885,225 metric tons in 1913, 3,669,354 metric tons in 1927, 4,300,000 metric tons in 1928, 4,827,278 metric tons in 1929, 5,792,322 in 1930, and 6,657,803 in 1931. Manufactures are in their infancy, and the imports are chiefly manufactured goods, textiles, machinery and metals; the exports consist principally of wheat, barley, maize, oats, petroleum, timber, cattle, salt and hides. All large estates have been expropriated and divided among the peasants.

DEFENCE.—Service in the *Army* is universal and compulsory In the War of 1914 1918 over 900,000 all ranks passed into the Armies of Rumania, and of this number over 25 per cent. were killed or returned as "missing." At the resurgence of Nov. 1918, an army of 400,000 was again in the field This force was the deciding factor in the Rumano Hungarian question, and it drove the Bolshevik dictator (Bela Kun) into exile from Buda Pest There is a small *Navy* on the Black Sea and on the Danube (30 vessels).

EDUCATION is free and nominally compulsory, there being 19,374 schools with 1,612,763 in attendance. Secondary schools are well attended. There are also special schools and Universities at Bucharest, Jassy, Cluj, and Cernauti. A Government High School of Commerce was opened in 1913.

COMMUNICATIONS.—In 1930 there were 7,364 miles of railway open for traffic in the whole kingdom: railway communication requires great development in order to cope with the problem of carrying the cereal crops to the shipping ports. There are 23,000 telegraph and telephone offices. The mercantile marine consists of about 120 steamers and 600 sailing vessels The Black Sea ports are Sulina and Constantza; the latter is linked with the interior by a railway.

SALVADOR

(República de El Salvador)

President (1931 1935) General Maximiliano Hernandez Martinez *assumed office* Dec 3 1931
Vice President (vacant)
Foreign Affairs Education, and Justice, Senor Dr Don Miguel Angel Araujo
Interior Development Agriculture Labour Health and Charity General Salvador Castaneda Castro
Finance Public Credit Industry and Commerce Señor Dr Don Miguel Tomás Molina
War Marine and Aviation Colonel Joaquin Valdes

Consul General Señor Don Samuel Jorge Dawson 7 Union Court Old Broad Street E C 2

The Republic of Salvador extends along the Pacific coast of Central America for 170 miles with a general breadth of 43 miles and contains an estimated area of 13 176 square miles, with a population estimated in 1931 at 1 437 157 It is divided into 14 departments In 1931 there were 67 445 births and 33 226 deaths

Salvador was conquered in 1526 by Pedro de Alvarado and formed part of the Spanish viceroyalty of Guatemala until 1821 In 1840 the Republic broke away from the federation of Central American States The government is based upon a written constitution and is composed of (*a*) the Executive power which is exercised by the President, (*b*) the Legislative power which is in the hands of the National Assembly, and (*c*) the Judicial power, which rests ultimately with the Supreme Court Elections take place once every four years and the President is ineligible for a successive term

The surface of the country is very mountainous many of the peaks being volcanoes The highest peak is the Santa Ana volcano (8 300 feet) Much of the interior has an average altitude of 2 000 feet The lowlands along the coast are generally hot and unhealthy, but towards the interior the altitude tempers the severity of the heat and much has been done in recent years to improve sanitary conditions and services There is a wet season (winter) from May to October and a dry season (summer) from November to April Earthquakes have been frequent in the history of Salvador, the most recent being that of 1919, when great damage was done to the capital and other towns

The principal river is the Rio Lempa There is a large volcanic lake (Ilopango) a few miles to the east of the capital while further away and to the west lies the smaller but very picturesque lake of Coatepeque which appears to have been formed in a vast crater flanked by the present Santa Ana volcano The eastern spur of this volcano forms the peak of Izalco, which is in an almost constant state of volcanic activity and (on account of its visibility from the ocean) is known as The Lighthouse of the Pacific

The chief industry is the cultivation of coffee which is grown under shade trees principally on the slopes of the volcanoes Cane sugar is also produced as well as maize indigo rice, balsam, &c Cotton growing on a large scale was commenced in 1924 but on account of the ravages wrought by insects it was practically abandoned after two seasons In the lower altitudes towards the east henequen is produced The principal exports are coffee (sometimes over 90 per cent of total value) sugar indigo balsam, henequen hides and skins The chief imports are cotton textiles flour iron and steel goods lard motor cars manures jute sacks chemical products cement petrol, thread A British railway nearly 100 miles in length connects Acajutla with the capital and with the important coffee centre of Santa Ana A line from the port of La Union (on the Gulf of Fonseca) to the capital was opened in 1922 Two new lines were opened in 1927 one from the capital to Santa Lucia a suburb of Santa Ana, tapping the upper Lempa Valley the other from the coffee centre of Ahuachapan to Santa Lucia A new line from Santa Lucia to Acajutla (in Guatemala) was opened to traffic in 1930 and affords continuous railway communication between San Salvador and Guatemala City and Barrios During 1924 26 the re draining and re paving of most of the capital were completed, and plans have been made for the macadamizing or paving of several hundred miles of rural roads many of which are now impassable during the rainy season There is a good motor road between the port of La Libertad and the capital while motor transportation is usually possible in the dry season between the capital and Guatemala City over the International road opened in 1923. The Pan American Airways maintain regular services connecting San Salvador with the U S *via* Guatemala Mexico Brownsville and *via* Havana Miami and connecting with Panama *via* Honduras Nicaragua Costa Rica

There are 202 post offices and 257 telegraph offices There is a wireless (receiving and transmitting) station at the capital, and during 1926 a broadcasting station was inaugurated

The language of the country is Spanish

BRITISH CHAMBER OF COMMERCE FOR SPAIN, 8 Rambla de los Estudios, *Barcelona* (Branch, 9 Calle Marqués de Cubas, *Madrid*)
Madrid, 1,150 miles, transit, 45 to 50 hours.

The Balearic Isles, Ceuta, Melilla and the Canary Islands, are *integral parts* of *Spanish territory*

The BALEARIC ISLES are an archipelago of 15 islands in the Mediterranean, the largest

being Majorca Minorca Iviza and Formentara the total area is 1 935 square miles with a population (1923) of 342 402 The archipelago forms a province of Spain the capital being Palma in Majorca

CEUTA which forms part of the Province of Cadiz is a fortified port on the Moroccan coast opposite Gibraltar The total area is 5 miles with a population of 35 219

MELILLA is a town on a rocky promontory of the Riff coast connected with the mainland by a narrow isthmus Melilla has been in Spanish possession since 1492 and is an integral part of Spanish territory The population is 50 170

The CANARY ISLANDS are an archipelago in the Atlantic off the African coast consisting of 7 islands and 6 uninhabited islets The total area is 2 807 square miles with a population of 473 497 The Canary Islands form a Province of Spain the capital being Santa Cruz in the island of Teneriffe

Spanish Colonies

The Spanish Colonies consist of certain settlements in and islands round the coast of Africa with a total area of close on 82 400 square miles and a population exceeding 275 000

FERNANDO PO (*Isla de Formoso*) lies in the Bight of Biafra in 3° 12 N lat and 8 48 E long about 20 miles distant from the west coast of Africa and is a mountainous island (Pico de Santa Isabel, 10 800 feet) with forests of oil palm ebony, mahogany and oak and sugar cane cotton, and indigo Cocoa coffee sugar tobacco vanilla and kola nut are cultivated and large quantities of cocoa and other products are exported With its dependencies it has an area of about 800 square miles and a population estimated at 24 000 The capital is Basile and the largest town Port Clarence (1 500 inhabitants) Dependencies are —

Annobon Island (*Anno Bom*) in the Gulf of Guinea in 1° 24′ S lat and 5° 35 E long, population 1 391

Corisco Islands consisting of Corisco Elobey Grando, and Floby (the) lie in Corisco Bay and export ebony logwood and other forest produce Total population 96 072

RIO DE ORO AND ADRAR (Capital, Villa Cisneros) is a possession on the north west coast of Africa between Cape Bojador and Cape Blanco of approximately between 21° 20 26 N lat, and extending eastwards to about 13° W long The territory is part of the waterless Sahara with a sparse population of wandering Muhammadan Arabs population 253.

Rio Muni (or *Spanish Guinea*) is a coastal settlement of West Africa between Cameroon and French Congo (1 N —2° 10 N lat) extending about 125 miles inland The inhabitants are Bantu tribes, and the principal settlements are at the mouths of the Muni Benito, and Campa rivers, and at Bata on the coast

SPANISH MOROCCO — Spain exercises a protectorate over a part of Northern Morocco (*see* Morocco), and on the Moroccan seaboard are certain Spanish *presidios*, formerly used as convict settlements

Alhucemas is a settlement on the bay of that name and includes six islands, population 322

Peñon de la Gomera (or *Peñon de Velez*) is a fortified rocky islet about 40 miles west of Alhucemas Bay population 398

Spanish Southern Morocco — Ifni, on the Atlantic coast of Morocco about 100 miles south of Agadir affords access to the interior of south west Morocco but has no great trade at present.

Ile Clafarinas (or Zaffarines) are a group of three islands near the Algerian frontier, about 2 miles north of Cape del Agua, population 318

THE SUEZ CANAL

The Suez Canal —The *Compagnie Universelle du Canal Maritime de Suez* (1 Rue d'Astorg, Paris VIII) is an Egyptian company authorised in 1856 and confirmed in 1866 with a capital of 200 000 000 francs in 400 000 shares of 500 francs each The British Government acquired from the Khedive in 1875 a total of 176 602 shares (cost £4 000 000 value March 31 1932 £52 902 396) Since 1924 each 500 franc share has been divided into two 250 franc shares

The Suez Canal was opened in 1869 The total length of the canal is 101 miles with a minimum width of 45 metres (147 ft 8 in) the maximum draught of water allowed for vessels using the canal is 10 06 metres (33 feet) The average time for the transit through the canal is 13 hours 26 minutes By a convention signed in Oct 29 1888 the canal was exempted from blockade, and vessels of all nations whether armed or not are to be allowed to pass through it in peace or war The management of the canal is entrusted to a council of 32 administrators of whom 10 are British (three representing H M Government and seven the shipowning interest)

British Commercial Directors T Harrison Hughes (*Vice President of the Company*) Sir A an G Anderson K B E Sir John Cadman, G C M G Sir August Gayzer Bt Rt Hon Sir L S Harcourt G B E K C M I Sir E Wyldbore Smith Sir Thomas Royden Bt C H

Representing H B M Govt Sir Ian Malcolm K C M G Sir J T Davies K C B, C V O The Earl of Cromer G C I G C I E, C V O

The following table shows the number and tonnage of vessels which have passed through the Suez Canal since 1920 with the percentage of British vessels —

Year	No of Vessels	Net Tons	British Tonnage
			%
1922	4 345	20,743 245	64 5
1923	4 621	22 730 162	62 8
1924	5 122	25 109 882	59 7
1925	5,337	26 761 935	59 9
1926	4 980	26,060,377	57 4
1927	5 545	28 962 048	57 1
1928	6 084	31,905,902	56 8
1929	6 274	33 406,014	57 1
1930	5,761	31,668 769	55 58
1931	5 366	30 027,566	55 36

The tonnage of the *merchandise* carried was 25,776 000 tons in 1913, 17 047,000 tons in 1929, and 25,33,2000 tons in 1931 Details of the

nationality of the vessels passing through the Canal in 1931 are appended —

	No of Vessels	Net Tons	Per cent (Tonnage
British	2 976	16,624 352	55 36
German	568	3 314 750	10 04
Netherlands	444	2 848 368	9 49
French	354	2 084 035	6 94
Italian	286	1,424 095	4 74
Japanese	196	1 153 133	3 84
Norwegian	151	745 740	2 48
United States	103	624 535	2 08
Swedish	79	383 254	1 28
Danish	70	366 532	1 22
Russian	62	175 494	0 59
Danzig	11	87 336	0 29
Belgian	23	83 056	0 28
Greek	25	52 609	0 18
Yugoslavian	9	40 249	0 14
Finnish	2	9 988	0 03
Egyptian	4	4 074	0 01
Portuguese	1	3 677	0 01
Chinese	1	2 128	0 007
Lettonian	1	561	0 002
Totals	5 366	30 027 966	100 00

The transit receipts in 1870 were 5 718,756 fr (gold) and in 1931 931 305 507 fr (paper)

The rate of transit dues as from Nov 15 1931 is 6 fr (gold) per ton and 3 fr (gold) for vessels in ballast

The net dividends for the year 1931 amounted on the ordinary 250 fr shares to 466 fr 64 c (507 fr 78 c *au nominatif*) and on the Actions de Jouissance to 417 fr 47 c (456 fr 06 c *au nominatif*)

The 5 366 vessels included in the total for 1931 are grouped under the following categories —

	No	Net Tonnage
Merchant vessels (laden)	2,776	14 289 740
Mail steamers	1 706	11 835 886
Warships and transports	255	842 840
Government chartered vessels	25	174 314
Merchant vessels in ballast	614	2,905,186
	5 366	30 027,966

The Helvetia of the Romans a Federal Republic of Central Europe, situated between 45° 50′—47° 48′ N lat and 5 58′—10 30 E long It is composed of 22 Cantons of very dissimilar size united under a Constitution dated 29 May, 1874, and comprises a total area of 15,950 square miles, with a population of 4 066 400 in 1930 who are divided between Roman Catholics 41 per cent and Protestants, 57 per cent, Jews numbering 21 000 and others 43 000 The population is formed by three nationalities distinct by their language as German 71 per cent, French 21 per cent, Italian 6 per cent, and Romansch (Grisons) 1¹ per cent It is the most mountainous country in Europe, having the Alps covered with perennial snow and glaciers, rising from 5 000 to 15 213 feet in height not only along its southern and eastern frontiers but through out the chief part of its interior and the Jura mountains in the north west. Agriculture is followed chiefly in the valleys where wheat oats maize, barley, flax, hemp, and tobacco are produced and nearly all English fruits and vegetables are grown The forests cover about one fifth of the whole surface The chief industries comprise the manufacture of silks artificial silks and silk ribbons wool, cotton and cotton ribbons linen embroideries, straw plait, machines, paper, chemicals chocolate, condensed milk dyestuffs, and tobacco while the metallurgical electrical and pharmaceutical industries are also extensive, clocks and watches have long been the staple products of Geneva and Neuchatel In 1931 there were 3,650 miles of railway in operation 270 miles of telegraph

* The President is elected in December and remains in office from 1 Jan —31 Dec , he is *generally* succeeded by the Vice President

line (14,300 miles of circuit), 21,050 miles of telephone line (1,045,000 miles of circuit), and 4,004 post-offices.

The legislative power is vested in a Parliament, consisting of two Chambers, a National Council of 187 members, and a Council of States of 44 members; both Chambers united are called the Federal Assembly, and the members of the National Council are elected for four years, an election taking place in October. The executive power is in the hands of a Federal Council of 7 members, elected by the Federal Assembly, presided over by the President of the Confederation. The President has a salary of 35,000 francs; the Vice-President and other members of the Federal Council 32,000 francs each. The members of the Federal Council are elected for four years; each year the Federal Assembly elects from this council the President and the Vice-President; they are elected for one year, the five other members for four years. Not more than one of the same canton may be elected member of the Federal Council.

Defence: Militia. Active Army, 12 yrs.; initial trg., 65–90 days. Subsequently 11 days per ann.; *then* Landwehr, 8 yrs.; 1 trg., 11 dys. for dismtd. branches only; *then* [Landsturm to age 48]. *War Strength*, Militia, 140,600; Landwehr, 65,000; Landsturm, 57,000.

Education.—Control by cantonal and communal authorities. No central organ. Illiteracy rare in Protestant cantons. (i.) *Primary*. Free and nominally compulsory, but attendance is not strictly enforced in the essentially Roman Catholic cantons. School age varies. (ii.) *Secondary:* Age 12–15 for boys. Schools numerous and well-attended, and there are many private institutions. (iii.) *Special schools* make a feature of commercial and technical instruction. (iv.) *Universities*: Bale, Berne, Fribourg, Geneva, Lausanne, Zurich, and Neuchâtel.

SYRIA AND LEBANON.

Syria.—British forces, together with small French and Arab detachments, drove the Turks out of Syria and Lebanon in 1918, and occupied those districts and the district of Cilicia. By decision of the Supreme Council of the Allies the districts in question were entrusted to France, to be administered under a mandate (Cilicia was restored to Turkey by the French in 1922).

The Emir Feisal (son of the ex-King of the Hedjaz and, since 1921, King of Iraq) had from the outset assumed the administration of the districts of Aleppo, Hama and Homs, which had been assigned as Independent Arab districts under an earlier agreement of May, 1916, between France and Great Britain (the *Sykes-Picot Agreement*), and it was intended to allow the Emir to remain under French guidance, but on March 8, 1920, the "Syrian Congress" at Damascus declared Syria independent, and the Emir Feisal was crowned King of Syria. The action of the Syrian Congress did not receive the sanction of the Allied Powers, and General Gouraud occupied Damascus, Aleppo, Hama and Homs. The Emir Feisal left the country, and afterwards became King of Iraq (*q.v.*). The French Mandatory Zone was first divided into the four autonomous states of Great Lebanon, Damascus, Aleppo and the Alaouites (the region round Latakia), each having a French adviser responsible to the High Commissioner at Beyrout. The latter three States were later grouped together to form the *Syrian Federation*, with a nominated Council. The Federation has now been abolished. *Damascus and Aleppo* have been amalgamated into a single State, and the *State of the Alaouites* (now known as the *Government of Latakia*) is again independent. The *Jebel Druze* forms a small independent State. The form of government differs in each of the actual States, but the guiding principle in each is French control.

Syria is a geographical term for part of the former Turkish territories in Asia Minor, its political neighbours being Turkey, Iraq and Palestine on the north, east and south, with a western coastline washed by the Mediterranean Sea. The estimated area is about 60,000 sq. miles, with a population of about 3,000,000,

of whom the greater number are Orthodox Muhammadans, with a proportion of Shiites and Druses The products of Syria are wheat, tobacco, fruit, wine silk, liquorice, copper and brass goods, there is little cultivation without irrigation, the inland districts being cut off from the moisture-laden winds by a mountain barrier running parallel with the coast The mineral wealth is believed to be unimportant, but there is a certain amount of bitumen The principal Syrian towns are Damascus (est pop 300,000), Aleppo (250,000) Homs (70,000), and Hâma (60,000) Damascus contains the Mosque of the Ommayedes and the tomb of Saladin, and in the south western quarter is "The Gate of God, through which the pilgrimage to Mecca used to pass while the "street called Straight" (Acts ix, 11) runs E to W through the city Damascus is an important commercial centre, and among its industries are metal work and mother of pearl inlay, and also native made silk and cotton stuffs At *Baalbek* (Heliopolis) on the western slopes of the Anti Lebanon range (35 miles N N W of Damascus), are ruins of 1st to 3rd century Roman temples (the Circular Temple, the Great Temple and the Temple of Bacchus), and in the vicinity of the ruins is the largest cut stone in the world (60 × 17 × 14 feet), weighing 1,500 tons The railway system consists of a line from Beyrout to Damascus (narrow gauge) with a connexion at Rayak for Homs, Hama and Aleppo (standard gauge) The line from Tripoli to Aleppo, *viâ* Homs, was reopened in 1921 A narrow gauge tramway runs from Beirut to Mameltein along the coast From Damascus there is railway communication with Palestine and with Transjordan, and the Syrian railways link up with the Baghdad railway at Aleppo Road communications between Beyrout and Baghdad, *viâ* Damascus have been developed by the opening up of the desert motor routes Baghdad is now within 24 hours of Damascus by car, and a weekly air service has been opened for mails and passengers.

In the autumn of 1925, following a revolt of the Jebel Druze in the Hauran, rioting took place in Damascus on Oct 18, and the city was bombarded by French artillery when part of the Azm palace and parts of the "Street Called Straight" were destroyed by shell fire or burned Soon after the receipt of news of the disturbances in Syria, the High Commissioner (Gen Sarrail) was recalled by the French cabinet. A long period of disorder followed but in Sept, 1927, public security was practically normal In June, 1930, the French High Commissioner promulgated a new republican constitution for the State of Syria After somewhat difficult negotiations between the French and the Nationalists elections were eventually held in 1932 and the Parliament elected

Beirut is the residence of the French High Commissioner and the capital of the Lebanese Republic *Damascus* was the Federal capital, and has become that of the new State of Syria *Latakia* is the capital of the Government of that name, formerly known as the State of the Alaouites

The Lebanese Republic (the former Turkish provinces of Lebanon and Beirut), declared a State by the High Commissioner, under the title of *Etat du Grand Liban*, in 1920, but the constitution was suspended as a measure of economy in 1932, M Debbas remaining in control without the assistance of Parliament The State extends along the Mediterranean littoral from the Palestine frontier to Nahr el Kebir (15 miles N. of Tripoli) and is bounded on E by the Great Central Depression, known as the Bekaa, in which flow the rivers Orontes and Litani Its total length is about 120 miles, and its width varies from 30 to 35 miles The estimated area of the Lebanese Republic is about 4,300 square miles, with an estimated population of 579,778. The products of the soil are olives, wheat grapes oranges and mulberry trees. Great efforts are being made to develop the district as a summer resort The capital is Beirut (pop 150 000), which is the chief seaport and commercial centre, and the seat of the French mandate Tripoli, the next important town and seaport, will be one of the Mediterranean termini of the Iraq Petroleum Company's pipe line now under construction Minor ports are Jumieh, Tyre and Sidon The national flag is the French tricolour with a Cedar of Lebanon on the white band

Economic Affairs, Celal *Bey*.
Agriculture, Muhlis *Bey*.
Customs and Monopolies, Ali Rana *Bey*.

President of the National Assembly, Kâzim Pasa

Turkish Ambassador in London His Excellency Mehemet Munir *Bey*, 69 Portland Place, W 1
Counsellor Nurettin Ferruh *Bey*
1st Secretary Muzaffer Kâmil *Bey*
3rd Secretary Cemil Vafi *Bey*
Commercial Counsellor Kuntoglu Faik *Bey*
Archivist Ali Riza *Bey*
Consul in London, Durru Mazhar *Bey*, 10 Lower Sloane Street S W 1
Chancellor, Abdulahat *Bey*

The Turks belong to the Turanian Race which comprises the Manchus and Mongols of North China, the Finns and the Turks of Central Asia Their numbers probably exceed 50 000 000, with the same language religion and culture but the actual Turkish State occupies only a small part of the area inhabited by the Turkish Race the remainder being in Soviet Russia China Afghanistan and Persia Under the Seljuks (Turkish rulers in Anatolia) the conquest of Asia Minor was completed in the 11th century The Seljuks were succeeded early in the 14th century by the Osmanli dynasty, which remained in power until the Great War

During the 15th 16th and 17th centuries the Ottoman Empire was one of the strongest Powers in the world extending from the Caspian Sea to the Adriatic and Hungary and from the Indian Ocean to Morocco and the Sudan It comprised Asia Minor half of Soviet Russia, the Ukraine, the Crimea the Balkan States and the whole of Arabia The Black Sea the Mediterranean the Red Sea and the Aegean were dominated by Turkish ships, and the Ottoman dominions included not only the Byzantine Empire but the greater part of the whole Roman Empire

For two centuries preceding the Great War disintegration had reduced the power and extent of the Turkish Empire and during the Great War its boundaries were further restricted Iraq, Syria and Arabia passing into other hands under the treaty of Sèvres Attempts to wrest further territory were defeated by Gazi Mustafa Kemal who won a decisive battle at Afion the results of which were confirmed at the Lausanne Conference

Turkey now extends over an area of 410 000 sq miles from Adrianople to the Caucasus and Persia and from the Black Sea to the Mediterranean Syria and Iraq

Turkey in Europe (23 975 sq kilometres = 9 256 sq miles) consists of Eastern Thrace, including the cities of Istanbul (Constantinople) and Adrianople and is separated from Asia by the Bosphorus at Constantinople and by the *Dardanelles* (Hellespont)—about 40 miles in length with a width varying from 1 to 4 miles—the political neighbours being Greece and Bulgaria on the west

Turkey in Asia (738 761 sq kilometres = 285 246 sq miles) comprises the whole of Asia Minor and extends from the Aegean Sea to the western boundaries of Georgia, Erivan and Persia, and from the Black Sea to the Mediterranean and the northern boundaries of Syria and Iraq This area corresponds approximately with *Anatolia* ('Land of the Rising Sun' or Orient) and includes *Cilicia* north of the Gulf of Alexandretta, assigned to France by the Allies, but restored to Turkey by the French Cilicia is generally fertile and produces wheat, cotton, wool sesame, &c., and is capable of considerable agricultural development, the chief port of Cilicia is Mersin

Population — The first general census of Turkey was taken on Oct 28 1927 and showed the population of the Republic to be 13 660,275, the excess of women over men being approximately 500 000 The population of each of the 8 Regions into which the country is divided was given as follows —

Region	Sq kil	Population	Per Sq kil
Black Sea	73 621	2 174 425	29
Marmora & Egean	92 744	2 746 069	29
Mediterranean	56 279	753 639	13
Turkey in Europe	23 975	1 044 306	43
Western Anatolia	71 180	1,303,114	18
Central Anatolia	228 791	3 499 707	15
S E Anatolia	40 125	604 303	14
Eastern Anatolia	176 621	1 534,712	8
Total	762 736	13 660 275	18

Government — Sultan Muhammad VI, the last of the Osmanli rulers fled from Constantinople to Malta on Nov 20 1922 and the Sultanate was abolished by the National Assembly On Oct 29 1923 * the National Assembly declared Turkey a Republic and elected Gazi Mustafa Kemal President On March 3 1924, the Assembly passed a law abolishing the office of Caliph and ordering all members of the Ottoman dynasty to leave Turkish territory The Grand Assembly is a single chamber legislature elected for four years and delegates its executive power to ministers acting in its name and responsible to it for their actions

Religion — The majority of the inhabitants are Moslems There are numerous Christians (of the Latin and Eastern rites) in Istanbul (Constantinople) and a considerable number of Jews On April 10 1928 the Grand National Assembly passed a law in virtue of which Islam ceased to be the State religion of the Republic On Nov 1, 1928 the Grand National Assembly passed a bill establishing the neo Latin alphabet in place of Turkish characters Education is nominally compulsory and free There are primary schools, training schools for teachers, and at Istanbul a university founded in 1900

Production — Although the soil of Asia Minor is generally fertile agriculture is still very primitive in centres that are not served by railways The peasant is, however gradually adapting himself to the more modern methods, particularly in the vilayet of Aydin Adana and Mersin The *live stock* in 1929 was 12 124 031 sheep, 8 878 406 goats 2 804 685 buffaloes 4 718 803 cattle 496 954 horses 849 485 asses 74 803 camels and 496 060 buffaloes Cereals are abundantly produced, as well as tobacco raisins, figs, cotton, opium, beet sugar nuts olives valonea and liquorice root and many varieties of fruit are grown Samsun is the chief centre of the tobacco growing industry, which is also of importance at Izmir (Smyrna), Ismit and Bursa (Brussa) The export of merchandise is considerable and consists principally of opium,

* Turkish National Holiday Oct 29 is observed throughout the Republic as a National Holiday

tobacco, cotton, carpets, gums, mohair, wool, hazel-nuts, raisins and figs. The forests should be a source of wealth, but scientific exploitation is disregarded; beech, pine, oak, elm, chestnut, lime, plane, alder, box, poplar and maple are among the chief varieties of trees. The mulberry is planted for the silk-worm industry, which centres round Bursa and Ismit, and this industry, which declined after the war, is now reviving. The mineral wealth of Asia Minor is stated to be considerable, but is almost undeveloped. Chrome ore, zinc, manganese, antimony, copper, borax, corundum (emery), coal and lignite, silver and arsenic, are among the minerals produced.

Communications.—In Europe Turkey has about 208 miles of railway, known as *The Oriental Railway* and run by a French Company. In Asia Minor the position as regards railways is the following:—

Lines under Exploitation.

	Klm
Izmir-Aydin (British)	610
Smyrna-Kasaba (French)	703
Bozanti-Aleppo-Nisibin	632
Mudanya-Bursa (narrow gauge)	41
Anatolian Railway	1,031
Mersin-Tarsus-Adana	67
Baghdad Railway	445
Angora-Kayseri-Sivas	590
Samsun-Sivas	380
Kutahya-Balikesir	220
Fevzi Pasha-Malatya	253
Samsun-Çarşambia, narrow gauge	37

Lines under Construction.

Ulu Kişla to Kayseri.
Filios to Irmak
Malatya to Argana Maden.

There is also a line from Sari Kamiş to the Russian frontier (78 miles, Russian broad gauge) and a narrow gauge line from Sari Kamiş to Erzurum (156 miles), but both lines are in a bad state of repair.

It is the intention of the Turkish Government to construct the following lines, but no contracts have yet been granted: Eregli—Filios (about 35 miles); Sivas—Erzurum (about 300 miles); Ada Pazari—Bayindir (about 160 miles). There are electric trams in Istanbul, Scutari and Izmir. In 1932 the mercantile marine consisted of 215 steam and motor vessels, with a total net tonnage of 132,784.

	1931 32.	1932 33

Floating Debt from £T5,000,000 to		£T10,000,000
External Loan (Turch-American)		£T30,000,000
" " (Zurich)		£T4,000,000

	1931.
Total Imports	£T126,659,893
Total Exports	127,274,807
Imports from U.K.	10,361,400
Exports to U.K.	10,850,161

Note.—The National Debt figures include Turkey's share of the repartitioned Ottoman Public Debt. The agreement reached between the bondholders and the Turkish Government for the resumption of the services of the Ottoman Public Debt was ratified by the Grand National Assembly on November 30, 1928; negotiations are taking place (1932) between the Turkish Government and representatives of the Foreign Bondholders with a view to a revision of the agreement.

The *Ottoman Public Debt* is administered by a Council: S. C. Wyatt (*Delegate of British and Netherlands Bondholders*), M. F. de Closières (*French*), M. B. Nogara (*Italian*), Vacant post (*Turkish*), A. H. Reid (*Ottoman Bank*). *Commissary*, Zekiai Bey; *General Manager*, M. Morel (*acting*) Mr. Wyatt and M. de Closières preside alternately. Negotiations are in progress with a view to the fixation of the Debt on the basis of a revised agreement.

CAPITAL OF TURKEY, ANKARA (Angora), an inland town of Asia Minor, about 200 miles E.S.E. of Istanbul, with a population (Census 1927) of 74,784. Ankara (or Ancyra) was the capital of the Roman Province of *Galatia Prima*, and a marble temple dedicated to Augustus (now in ruins) contains the *Monumentum (Marmor) Ancyranum*, inscribed with a record of the reign of Augustus Caesar. A new city is being laid out on modern lines, with parks, statues and avenues. ISTANBUL (Constantinople), the former capital, was the Roman city of Byzantium, and was selected by Constantine the Great as the capital of the Roman Empire about A.D. 328, and renamed by him; it became capital of the Eastern Roman

Adana 72,652, Bursa (Brusa) 61,451, Konya 47,286, Gazi-Ayintap 39,571, Kayseri (Cesarea) 39,544, Edirne (Adrianople) 34,669, Eskişehir 32,103, Diarbekir 31,511, Erzurum 30,801, and Samsun 30,333. There are also 14 localities with 20 to 30,000 inhabitants, 39 with 10 to 20,000, and 79 with 5 to 10,000 inhabitants.

FLAG: Red, with white crescent and star.

The smallest Republic in South America on the east coast of the Rio de la Plata situate in lat 30°—35° S and long 53° 25 57° 42 W containing an area of 72 180 square miles and a population on Dec 31 1931 of 1 908 082

Uruguay resisted all attempted invasions of the Portuguese and Spaniards until the beginning of the 17th century and 100 years later the Portuguese settlements were captured by the Spaniards From 1726 1814 the country formed part of Spanish South America and underwent many vicissitudes during the Wars of Independence In 1814 the armies of the Argentine Confederation captured the capital and annexed the province, and it was afterwards annexed by Portugal and became a province of Brazil On Aug 25 1825, through the heroism of the 33 liberators (whose memory is perpetuated in the name of the province of *Treinta y Tres*), the country threw off the Brazilian yoke This action led to war between Argentina and Brazil which was settled by the mediation of the United Kingdom, Uruguay being declared an independent state in 1828 In 1830 a Republic was inaugurated, with a Constitution of Sept 10, 1829 The President is elected by the legislature for a term of 4 years and is ineligible for a consecutive period of office By an amendment to the Constitution (which came into force March 1, 1919) an administrative council was appointed to share the Executive power with the President

The country consists mainly (and particularly in the south and west) of undulating grassy plains The principal chains of hills are the Cuchilla del Haedo, which crosses the Brazilian boundary and extends southwards to the Cuchilla Grande of the south and east In no case do the peaks exceed 2,000 feet. The principal river is the *Rio Negro* (with its tributary the Yi), flowing from north east to south west into the Rio de la Plata The boundary river *Uruguay* is navigable from its estuary to Salto, about 200 miles north, and the Negro is also navigable for a considerable distance Smaller rivers are the Cuarein Yaguaron Santa Lucia, Quequay, and the Cebollati On the south east coast are several lagoons, and the north east boundary crosses (the Brazilian) Lake Merim The climate is extraordinarily healthy, with great uniformity of temperature, the summer heat being tempered by the breezes of the Atlantic and the geographical position causing a high thermometer in winter

Wheat barley and maize are cultivated The wealth of the country is obtained from its pasturage which supports large herds of horned cattle (7 127 912 in 1930) and sheep (20 558,124 in 1930), the wool of which is of excellent quality Gold mines exist at Cunapirú The exports are entirely animal products, and include frozen and preserved meat wool hides, horn hair, tallow, and jerked beef the imports are principally machinery textiles and clothing, food substances and beverages coal oil, timber, fuel and blood stock The principal imports from the U K are woollen and cotton goods hardware, and coals There are 1 729 miles of railway open (1929) of which 1 564 miles are in British hands, and three short lines owned by the State, 45 kilometres of the State line from San Carlos to Garzón have been opened and 73 kilometres from San Carlos to Rocha are now open to traffic, and (in 1930) 7 508 miles of telegraph, with 48 375 miles of telephones There were 995 post offices, dealing with 136 053 701 letters and packets The language spoken is Spanish

The Union of Soviet Socialist Republics —The federal system was adopted by the 10th All Russian Congress of Soviets on Dec 31, 1922 The Soviet Union covers the greater part of the area of the former Russian Empire from which the independent states of Finland, Poland Estonia, Latvia and Lithuania have also been formed The greater part of the remaining territory forms the Russian Socialist Federal Soviet Republic (R S F S R) which is in union with other Soviet Republics in Russian territory to form the Soviet Union Prior to the War of 1914 18 the *Russian Empire* of the Tsar Nicholas II covered more than 8 500,000 square miles, with a population of about 183,000,000

Area and population of the constituent Republics of the Soviet Union are —

	Republic	Sq miles	Population
I	R S F S R (Moscow)	7,638 004	111 630 000
II	Ukraine (Kharkov)	174 372	31 608 000
III	Transcaucasia (Tiflis)	71,899	6 517 000
IV	White Russia (Minsk)	49,041	5 290,000
V	Turkmenistan (Polterask)	188 609	1 156,000
VI	Uzbekistan (Iaskent)	63,640	4,754 000
VII	Tajikistan (Stalinabad)	56,108	1,188,000
		8,241,673	162,143,000

The rural population forms 80 per cent. of the whole

According to the latest census returns (Jan 1, 1928) the total population was 146,964 366, of whom 71,010 659 were males and 75,953 707 females The returns include 29 498 persons over 100 years of age (12 340 men 17 158 women)

The Union is governed by the Congress of Soviets of the Union and during the intervals of sessions the supreme authority is vested in the Central Executive Committee of the Union which consists of the Council of the Union and the Council of Nationalities The regular session of the Union Soviet Congress is convened by the Central Executive Committee (*Tsik*) of the Union once a year *The Council of the Union* consists of 371 members elected by the Soviet Congress of the Union from among the representatives of the several constituent republics, counted in proportion to the population of each republic *The Council of Nationalities* is formed of representatives of the constituent and autonomous Soviet Socialist Republics on the basis of 5 representatives from each and of representatives of the autonomous Provinces of the R S F S R on the basis of 1 representative from each The composition of the Council of Nationalities as a whole must be confirmed by the Congress of Soviets of the Union

(The autonomous Republics of Ajaria and Abkhasia and the autonomous Province of Southern Ossetia send one representative each to the Council of Nationalities)

The regular sessions of the *Tsik* meet three times a year and in the intervals the supreme authority is vested in its *Presidium* formed by the *Tsik* of the Union of 21 members amongst whom are included the whole of the Union Council Presidium and the Presidium of the Council of Nationalities

Chairman of Presidium, Michael Ivanovitch Kalinin (*R S F S R*), G I Petrovsky (*Ukraine*), M Musabekoff (*Transcaucasia*) A G Tcherviakoff (*White Russia*) M Aitakoff (*Turkmenistan*) M Khairula Khodzhaieff (*Uzbekistan*) M Nusiatulla (*Tajikistan*).
Secretary, A S Yenukidsky

Representatives are elected to the Soviet Congress of the Union by indirect voting each village *Soviet* sending representatives to a *Volost Soviet*, the *Volosts* to *Uyezd* (district) *Soviets*, the *Uyezds* to Government *Soviets* and the last-named to the Congress of Soviets of the Union The cities and townships *Soviets* send representatives to the Congress of Soviets Union on the basis of 1 deputy for each 25,000 electors whereas the provincial *Soviets* send 1 deputy for each 125,000 inhabitants

The principal executive and administrative organs of the *Tsik* of the Union are The Council of People's Commissaries the Council of Labour and Defence, and the Supreme Court of the Union

The People's Commissariats of the Union are divided into (1) *Federal* People's Commissariats for the entire Union and (2) *Joint* People's Commissariats of the Union *Federal People's Commissariats* of the Union are (1) War and Marine, (2) Foreign Affairs (3) Foreign Trade, (4) Transport, (5) Post and Telegraph The *Joint People's Commissariats* are (1) Supreme Council of National Economy, (2) Finance, (3) Internal Trade, (4) Labour, (5) Workers and Peasants' Inspection The *Federal Commissariats* have their representatives in the constituent republics, who are directly subordinated to them The *Joint Commissariats* exercise their functions

through corresponding Commissariats of the several constituent republics on their territories

Each of the constituent republics has within its territory its own Congress of Soviets, its Central Executive Committee (*Tsik*) and Council of People's Commissaries (*Sovnarkom*), the latter consisting of Chairman, Vice Chairman and the following Commissaries (1) Chairman Supreme Council of National Economy, (2) Finance (3) Internal Trade (4) Labour, (5) Workers and Peasants Inspection (all these are subordinate to the People's Commissaries of the Union) (6) Agriculture, (7) Education, (8) Health (9) Social Welfare (10) Justice (11) Internal Affairs (the latter six independent) and Boards including, with an advisory or deciding vote according to the decision of the respective *Tsik* the representatives of Federal Commissariats of the Union *i.e.*, of Foreign Affairs Foreign Trade War and Marine Transport, Post and Telegraph

The *Council of Labour and Defence* (*Soviet Truda i Oborony*, or *S.T.O.*) is attached and subordinate to the *Sovnarkom* and in addition to a general direction of commissariats in their economic and military activity has the power to ratify statutes of joint stock companies and trusts

The *Supreme Court of the Union* is attached to the Central Executive Committee and has power and jurisdiction (1) to promulgate authoritative opinions on questions concerning general Federal legislation to the constituent republics (2) to adjudicate controversies between the constituent republics, (3) to try charges against high officials of the Union for offences committed in the discharge of their duties The Supreme Court consists of 11 members

To the Council of People's Commissaries (*Sovnarkom*) of the Union is attached a Joint State Political Department formerly known as the *Tcheka*, but since 1922 as the O.G.P.U. (*Obiedinionnoje Gosudarstvenn'je Politicheskoje Upravlenie*), which is designed to combat political and economic counter revolution espionage and brigandage The Chairman of the O.G.P.U. is a member of the Council of People's Commissaries of the Union The O.G.P.U. is directed by special rules and regulations which have not been promulgated The control of the legality of the acts of the O.G.P.U. is exercised by the Attorney General of the Union in accordance with a special decree issued by the *Tsik*

I SOVIET RUSSIA (R.S.F.S.R.)

Rossijskaya Sotsialisticheskaya Federativnaya Sovetskaya Respublika—The Russian Socialist Federal Soviet Republic

President of the Council of People's Commissars D. E. Sulimov
Vice Presidents D. Z. Lebed I. R. Ryskulov
Chairman of Supreme Council of National Economy, K. K. Strievski
Trade, N. B. Eismont
Labour, M. M. Romanov
Finance, V. N. Yakovleva
Workers and Peasants Inspection N. J. Ilin
Central Statistical, N. P. Gorbunov
Internal Affairs, V. M. Tolmachev
Justice, N. V. Krylenko
Education, A. S. Pubnov
Health, M. F. Vladimirski
Agriculture M. I. Muralov
Social Welfare, I. A. Nagovitzin
Communal Economy N. P. Komarov

The **R.S.F.S.R.** consists of 50 Governments and includes 11 Autonomous Republics and 10 Autonomous Provinces *Autonomous Republics* Bashkir Tartar Kirghiz, Mountain Daghestan, Turkestan Crimea, Yakut, Karelia, Buriat-Mongol and Volga Germans *Autonomous Provinces* Chuvash Kalmuck Mari Votiak, Zyrian (Komi) Oirad Kabardian Balkarsk, Karachai Circassian, Adighe Circassian Tchetchen From the economic point of view this vast territory is usually divided into Black Soil and Other Zones the *Black Soil Zone* being subdivided into (1) Central Agricultural Region (2) Middle Volga Region (3) Lower Volga Region (4) Northern Caucasus (5) Siberia, (6) Kirghiz Autonomous Republic (7) Crimea, while the *Other Zones* are (1) Western Region, (2) North Western Region (3) Central Industrial Region (4) North Eastern Region (5) Basins of the rivers Viatka and Vetluga (6) Ural

Local Government was and still remains, highly developed The villages in Imperial Russia had their assemblies (*skhod*) under the presidency of a mayor (*starosta*) they were grouped into volosts the latter into districts (*uyezd*) and these into governments (*gubernaya*) The districts and governments had their elective councils (*zemstvos*) for the administration of local affairs Combined with this system of village communities was a highly organised system of co operative trading, the population being grouped into voluntary local associations usually corresponding with local government areas The produce of the soil was disposed of in return for manufactures obtained by the society and distributed at the co operative shops Municipalities were also administered by elective councils (*dumas*) under the presidency of a mayor (*golova*) but in many cases the local authority of such municipalities and local land councils (*zemtsos*) was overshadowed by the superior authority of the *bureaucratic* governor After the Revolution, the village and other administrative units set up *soviets* of workers and peasants and the provincial councils send representatives to the All Russia Congress municipalities having a double representation from their own *soviet* and from that of the province (or district) in which the municipalities are situated

Education.—Under the Bolshevik *régime* popular education is administered by a commissary, in whose charge have been placed all educational institutions theatres museums and galleries. Beyond this the State has monopolised the photo cinematographic industry and the publishing of manuals for schools of all types and as the *Soviet* Government possesses almost all the printing houses it practically controls the printing and publishing trades The education of the workers in the towns is facilitated by lectures and school teaching but among the peasants in the rural districts even the inadequate provision formerly made has in many places been discontinued In 1931 there were stated to be 20,000 000 pupils in the schools as compared with 8 000 000 in 1914, the number of students attending higher educational centres was stated at 350 000 in 1931, there are two universities in Moscow and 21 in other large centres

Religion.—The Orthodox Church was disestablished by the *Bolsheviks* and all its property confiscated All ecclesiastic schools, seminaries

and academies have been abolished, and the teaching of religion to persons under 18 years of age forbidden But the law did not forbid the exercise of religion and churches remained open in virtue of contracts concluded between the congregations and the local authorities A recent questionnaire addressed to the soldiers of the Red Army shows that 70 per cent of them believe in a Deity The clergy live on voluntary donations from their parishioners On Feb 14 1918 the Soviet Government adopted the Gregorian (Western) Calendar A *Godless Five Year Plan* was embodied in a decree issued by the Council of Peoples Commissaries in October, 1932, with the object 'not to leave a single house of prayer on the territory of the U S S R, and to extinguish in the minds of the people the very notion of God

Soviet Union Budget, 1931

	Roubles
Revenue	21,774 018 000
Expenditure	20 274 018 000

Debt—The outstanding Foreign Debt of Russia on Jan 1, 1917 (before the Revolution), may be stated as under —

	Debt
To Great Britain	£622 674 106
To France	*Francs* 3 950 000 000
To U S A	$282 000 000
To Japan	Yen 256 000 000
To Italy	*Lira* 36 123,836

Since the revolution various internal loans have been raised and these were stated to amount on July 1 1931, to 3,965 700 000 gold roubles.

Defence—The *Red Army* recruited by universal military service, consists of about 800,000 all ranks including 37 cavalry brigades of about 3,000 men and about 30 000 sailors serving on land It was reported that the *Red Air Fleet* was to comprise an organisation of 10 000 aeroplanes for the year 1924, in 1932 it was stated to consist of about 1,500 aeroplanes The *Red Navy* is believed to consist of 3 battle ships, 4 old cruisers 17 destroyers and 16 submarines *Civil Aviation* statistics will be found on p 659

The Five Year Plan

The Soviet Five Year Plan (1928 1933)—The avowed object of the Five Year Plan is to increase the industrial and agricultural production of the U S S R so that it may overtake and outstrip all other nations For this purpose the territory is being equipped with factories railroads, steamships, telegraphs, motor vehicles and tractors The land is to be made to produce food, houses are to be built, and opportunities for recreation provided so that the population may have these amenities in greater abundance than the peoples of capitalist nations The Plan has the political aim of making the U S S R a far more powerful industrial, economical and political State, and the political aim is being pursued at the expense of the people, the products of the soil being employed primarily in payment of imports required for industrial development, even if starvation is thus imposed on the people The principal industries undergoing development are *asbestos* (at Azbest) *steel* (at Magnetogorsk), *manganese* (at Chiaturi), *tractors* (at Cheliabinsk, Stalingrad and Kharkoff), *wheat* (at Gigant and Verblud), *petroleum* and *crude oil* (at Baku), and *tea* and *oranges* (at Chakwa) The factories are to be provided with electric energy from Dniepostroy, where a dam is under construction, the work being under the superintendence of U S engineers The political development of the Plan appears to be abreast, in most particulars and in some directions ahead, of the time schedule, and in April 1931, V Kuibyshev, Chairman of the State Planning Commission stated that the Five Year Plan would be completed in 1932 (one year ahead of the schedule), and the Government had therefore decided to begin work on a new Five Year Plan for 1933 1938

Agriculture—The Soviet Board of Statistics publish the following particulars of the harvests —

Crop	*Metric Tons* 1929	1930
Rye	20 359 140	24 556 670
Wheat	18 877 820	28 360 070
Barley	7 213 530	7 170 600
Oats	15 739 260	17,246 470
Maize	3 018 660	3 057 470
Millet	3 112 670	3 237,060
Buckwheat	1 513 800	1 199 590
Other Cereals	1 906 630	2,836,550
Potatoes	45 629 700	49 772,100

The *Live Stock* are stated at —

Animals	1929	1930
Cattle	66 700 000	52 600 000
Horses	34 000 000	31 200,000
Sheep and Goats	147 200 000	89 900,000
Swine	20 900 000	12,200 000

Industry—The natural riches of Russia in coal iron ores copper manganese, gold, platinum, timber naphtha and so on are enormous The value of the industrial output is stated at —

Ores	*Metric Tons* 1928-29	1929-30
Iron	7 265 000	10,012,060
Manganese	1 256 000	1,550 000
Copper	772 600	1 080 000
Coal	38,431,000	46 700 000
Refined Oil	10 721 000	14,836,500

External Trade—The external trade of the U S S R for 1929 30 is stated as under in *thousands of roubles* —

Exports from Russia to	Countries	Imports into Russia from
238,158	Great Britain	160,000
214 254	Germany	234 389
44,579	U S A	280,360
44,705	France	33,956
47,263	Italy	10,305
5 691	Czechoslovakia	23,593
70,083	Latvia	14,907
61 189	Persia	47,355
14 813	Poland	34,807
16 507	Turkey	9,967
32 645	Scandinavia	54 883
16,423	Mongolia	15,222
25 000	China	25,000
16 838	Japan	16,230
34,350	Netherlands	8,155
26,620	Belgium	7,594
94,124	Other countries	91,921
1,002,170	Total	1,068,644

According to the Soviet Customs Returns there was a Balance of Trade in 1929-30 *adverse* to the U K of 159,233,000 *roubles*, and in *favour of* the U S A (235,780,000 *roubles*) and of Germany

(20,135 000 *roubles*) The U K contributed 9 4 of the Imports and took 27 per cent of the Exports, whereas the U S contributed 33 5 and took 5, and Germany contributed 28 and took 24 per cent

Board of Trade figures for transactions between Russia and Great Britain —

	1930	1931
Imports from U K	£9 291 000	£9 044 000
Exports to U k	34 235,000	32 179 000

Communications —Length of railroads in use

Year	Miles
1925-6	46 255
1926 7	47 022
1927-8	48 023
1928 9	48,236

The principal railway lines are the main *European* network from Leningrad, through Moscow to Astrakhan and across the Urals *viâ* Perm Ufa Samara and Saratov with northern extensions to the Kola Peninsula and to Archangel and running southwards to the Baltic, the Crimea and the Caucasus the *Trans Siberian Line* from Chelyabinsk on the Ural frontier to Omsk and round Lake Baikal to Chita and Stryetensk From Chita the line crosses the Manchurian frontier (as the Eastern China Railway) to Harbin and Vladivostok where a northward extension runs to Khabarovsk The *Amur Railway* connects Stryetensk with Khabarovsk and the Trans Siberian line thus connects the western and eastern limits of Russia on Russian territory The *Trans Caspian Railway* runs from Krasnovodsk (opposite Baku) to Askabad, Merv Bokhara Samarkand Khokand and Andijan with a 200 mile branch from Merv to Kushk (near Herat) on the Afghanistan border The *Orenburg Tashkent Line*, from the European boundary across the Kirghiz Steppe to Kazalinsk Perovsk and Iashkent, whence a short line connects with the Trans Caspian system The *Trans Caucasian Line* runs through Georgia Azerbaijan and Armenia from Batum and Poti on the Black Sea, *viâ* Tiflis to Baku on the Caspian, where it is met by the European system of Rostov on the Don From Tiflis branches run to Kars, and *viâ* Erivan to Mount Ararat on the Armenian frontier and to the Persian frontier at Julfa There are in the *Soviet* Union (1927) 228 600 miles of inland waterways of which 54 500 are navigable by steam vessels and nearly 110 000 miles by rafts The principal seaports are Leningrad and Kronstadt on the Gulf of Finland Sevastopol and Novorossiysk (Black Sea) Archangel on the White Sea and Ekaterininsk in the Kola River (Murmansk) Vladivostok (Sea of Japan), and Petropaulovsk in Kamtchatka

Posts and Telegraphs —In 1929 the post offices handled about 650 000 000 letters and postcards the length of telegraph lines was stated at 156,000 miles, with over 8,000 offices

Capital —On March 14, 1918, the seat of Government was transferred from Petrograd to Moscow, which had a population in 1931 of about 2,800,000 LENINGRAD (before the war "St Petersburg, and until the death of Lenin "Petrograd"), the former Capital, founded by Peter the Great on the banks of the Neva in 1703 had a population in 1928 of 2,783,000 Other centres are Saratov (320,000), Rostov (300,000), Samara (150 000), Nijni Novgorod, renamed Gorky in 1932, (190,000), Voronezh (100,000), Kazan (180,000), Krasnova, formerly Ekaterinodar (150 000) Astrakhan (180 000) Orenburg (120,000), Irkutsk (104,000), Tomsk (90 000), Omsk (170,000), Vladivostok (100 000) Archangel had about 40,000 inhabitants in 1920

II —THE UKRAINE
(Ukraina)

President V J Tchubar

On Nov 21 1917 the greater part of "Little Russia consisting of the former governments of Chernigov, Kharkov, Kieff, and Poltava (with Ekaterinoslav and Kherson in "South Russia and Podolia and Volkynia in "West Russia), was encouraged by Germany to declare itself independent as the *Republic of the Ukraine* The new Republic was invaded by Germany in 1917 18 and subsequently overrun by Bolshevik forces and a military and economic alliance was concluded between *Soviet* Russia and the *Ukraine Socialist Soviet Republic* (Dec 28, 1920) The majority of the inhabitants belong to the Greek Orthodox Church The chief town and seat of government is Kharkoff (pop 1923 312 000) other large centres being Odessa, the great port on the Black Sea (with a population in 1923 of 316 000) Kieff (pop 1923 406 000) Ekaterinoslav (pop 1923 127 000) Nikolayev (81 000) Poltava (88 000) and Taganrog (100,000) The Ukraine is the great cereal growing district of Russia, and before the Great War the harvests exceeded 1 000 000 000 poods, during the Civil War the production was reduced to 385 million poods but in 1923 it had increased to 700 millions In 1922 3 there were 112 sugar beet factories (200 in 1915) producing 10 000 000 poods (500 millions in 1914 15) The Ukraine also contains large deposits of iron ore and coal and is the principal source of the European supply of quicksilver Agriculture is the principal industry and there are large iron and steel works Before the Great War the exports from the Ukraine (grain sugar, hides bristles quicksilver and wool) were of the annual value of about £75 000 000 and the imports (manufactured goods and machinery) about £50 000 000

CAPITAL Kharkoff Population (1930) 530,600 Other towns Dnieropetrosk 233 000, Kieff, 514 000, Nikolaieff, 105 000, Odessa 481,000, Poltava 92 000

III —TRANSCAUCASIA
(Zakavkarskaya F S S R)

President of the Council of People's Commissars, M D Orakhelashvili

The Transcaucasian Federation consists of three Socialist Soviet Republics

Republic	81 miles	Population
Armenia	15 065	1,339,969
Georgia	25 470	2,135,633
Azerbaijan	33 570	2,463,098
	74 105	5,938,100

Armenia or Hyastan.
(S S S R)

President of the Council M S Hambartsumian

Armenia occupies the uplands between the Iranian plateau and Asia Minor and is bounded by the Black Sea on the N, by Kurdistan on

the S by Azerbaijan on the E and by Turkey on the W Until the outbreak of the Great War it was shared between Turkey (35 600 sq miles) Russia (20 587 sq miles) and Persia (6 518 sq miles) The rivers Euphrates Tigris Aras Kur and Chorokh take their rise within its boundaries and at the meeting of the former Turkish Persian and Russian boundaries is *Mount Ararat* (17 160 feet) the traditional resting place of Noah's Ark In the uplands the climate is severe but in the valleys and plains the soil is fertile producing all kinds of cereals cotton rice sesame hemp flax and tobacco Sericulture (silkworm breeding) sheep breeding and fruit growing are capable of great development Armenia has great mineral resources hardly as yet developed Naphtha sulphur bitumen and nitre abound while the mountains yield salt (mineral and in solution) gold silver copper lead iron and valuable marbles there are also numerous hot and cold mineral springs (similar in nature to those of Vichy) more than half the supply of copper from Russia was derived in 1914 from Soviet Armenia and the value of carpets manufactured in 1914 exceeded 120 000 000 *gold roubles* The Armenian Church is the oldest established Christian church Christianity having been recognised as the State religion in 300, and from the 5th century there is a national language and literature On account of their religion the Armenians have suffered a general persecution by Islam particularly in the *vilayet* of Sivas, Bitlis Diarbekr Mamuret el Aziz Van and Erzerum where massacres have frequently occurred In 1915 17 there were wholesale deportations and massacres of the Christian population of Turkish Armenia while the Armenian Christians of Azerbaijan and of Russian Armenia were similarly treated by Turkish and Kurdish hordes In 1918 the Supreme Council of the Allied Powers recognised the independence of the *Republic of Armenia* Under the Treaty of Peace with the Allies (May 11 1920) Turkey recognised the independence of Armenia with its capital at Erivan In 1920 a Bolshevik movement set up the *Armenian Socialist Soviet Republic* on the lines of the Moscow government

CAPITAL Erivan population 65 000 Leninakan (formerly Alexandropol) 43 000

Georgia or Sakartvélo
(G S S R)

President of the Council M Ivanoff Kavlatsky

The Socialist Soviet Republic of Georgia includes two autonomous Republics (Abkhasia and Adjaria) and one autonomous Province (South Ossetia)

Georgia a former Kingdom in Transcaucasia with a history of more than 2 000 years as a State was annexed by Russia in 1801 in violation of the Treaty of Alliance of 1783 At the beginning of 1918 it regained its independence but in 1921 the country was occupied by Bolshevik forces and became a member of the Transcaucasian Federation *Soviet Georgia* is bounded on the N by the Caucasian Mountains on the S by Armenia on the E by the Republic of Azerbaijan and on the W by the Black Sea There are 970 miles of railway the trunk line connecting the Black Sea ports of Poti and Batoum with Baku, on the Caspian Batoum and Baku are also connected by a petroleum pipe line The manganese ore beds are the richest in the world, more than one half of the world's supply being derived from the Tchiatury mines (in the district of Sharopausky) in 1914. There are also abundant supplies of coal (5 million poods in 1914) and over 500 mineral springs partly unexploited Wine is produced in considerable quantities and the tobacco plant (chiefly in Abkhasia) yielded 800 000 poods in 1914 a great deal of which was imported by Egypt and produced as local grown Timber (especially box) is an important industry Oil wells with unproved quantities of crude oil have been discovered in many places particularly in the Shirak Steppe The chief town and seat of government is Tiflis population 300 000 the administrative centre of Abkhasia being Sukhum (62 000) and of Ajaria Batum (32 000) other large centres being Kutais (50 000) and Poti (21 000)

CAPITAL Tiflis Population (1925) 400 000

Azerbaijan
(A S S R)

President M Musoabekoff

Azerbaijan, on the south western shore of the Caspian Sea extends from the Caucasus in the north to Persia in the south and from the Caspian in the east to Armenia and Georgia It includes the provinces of Baku, Hanjin (Elisavetpol), the district of Zakathal and the autonomous territories of Nakhitchevan and Nagorni Karabach More than 75 per cent of the people are Muhammadans The *Azerbaijan Socialist Soviet Republic* entered the Union as a Member of the Transcaucasian Federation on Dec 31 1922 The Republic is very rich in minerals (naphtha magnetic ironstone and manganese) but oil is the principal industry, concentrated in the Baku region the production being 466 800 000 poods in 1914 and 213 000 000 poods in 1922 3 Fishing is also important and 15 000 000 poods of caviare were produced in 1922 The principal crop is cotton

The CAPITAL is Baku (pop 460 000) on the shore of the Caspian Sea the centre of the petroleum industry Baku is connected by railway with Batum (Georgia) on the Black Sea via Tiflis and with Moscow via Rostov Other towns are Hanjin (60 000) Kuba (14 000) and Nucha (23 000)

IV—WHITE RUSSIA
(Byelorussiya)

President (and Chairman of the Central Executive Committee) A G Tchervyakoff

The independence of White Russia was recognised by Soviet Russia in 1919 and a military and economic alliance was concluded Jan 16, 1921 The independent republic covers the former government of Minsk and parts of Vitebsk and Mogilef The political neighbours are Lithuania and Poland in the west and the Ukraine on the south The capital is Minsk (pop 131,530) where there is a University founded by the *Soviet* Government other towns are Gomel (87,000) Bobruisk (51 000) and Mogilieff (50 000)

CAPITAL, Minsk Population 131,530

V—TURKMENISTAN
(T S S R)

President, M Atabaieff

Turkmenistan is bounded on the west by the Caspian Sea and on the south by Persia with Afghanistan as a south eastern neighbour.

Eighty-five per cent of the inhabitants are Muhammadan Turkomans, with about ten per cent. Muhammadan Uzbegs and five per cent. Russians of the Orthodox faith. The seat of administration is temporarily at Poltarask (formerly Achabad), other centres being Merv (22 000) and Karichi (20 000). Krasnovodsk is a port on the Caspian and a railway terminus on the Trans Caspian line.

CAPITAL, Poltarask (52 000)

VI.—UZBEKISTAN (U.S.S.R.)

	Sq. miles	Population
Bokhara	50 000	2 000 000
Khiva	13 640	400 000
	63 640	2,400,000

President, Achun Babaieff

Bokhara lies between Turkmenistan (on the W.) the Kara Kalpak territory of the U.S.S.R. (on the N.) and is bounded on the south by Afghanistan. The majority of the inhabitants are Muhammadan Uzbegs. The former capital (Old Bokhara) is a station on the Russian Trans Caspian Railway. The principal products are rice, wheat, fruit, hemp, cotton, silk, and carpets. Exports (mainly to Russia) are agricultural products and silk and cotton manufactures. Imports are principally manufactured goods and sugar. The Emirate was abolished in 1920 and the Emir fled to Afghanistan. A *Soviet* Republic of Bokhara was established and its independence was recognised by Soviet Russia by treaty of March 4, 1921.

Khiva, or *Khorezm*, formerly the Khanate of Khiva, lies between Bokhara and the Kara Kalpak territory of the U.S.S.R., and has a population of whom about half are nomads and nearly all Muhammadans. The country occupies the fertile delta of the Oxus and is highly productive (rice, wheat, cotton, silk, fruit, hemp).

CAPITAL OF UZBEKISTAN: Tashkent (population 700 000). Other towns: Samarkand (106 000), Andijan (80 000), Bokhara (50 000), Kokand (70 000), Namangan (71,000). Khiva has about 20,000 inhabitants.

VII.—TAJIKISTAN

Tadzhik.—The autonomous Soviet State of the Tadzhik lies between Bokhara (on the W.) and the Kara Kirghiz territory of the R.S.F.S.R., with Afghanistan as a southern neighbour. The inhabitants are largely nomads and almost all are Muhammadans. The estimated area is 56 108 square miles, with a population of about 2,000 000.

CAPITAL: Stalinabad, population 6 000. Other centres, Kojent 38 000 and Dura Tube 22,000.

BRITISH EMBASSY

Public Health and Agriculture: Señor Juan E. Paris

Envoy Extraordinary in London, Dr. Diógenes Escalante, 50, Pall Mall, S.W.1
1st Secretary, Oscar Aguilar
2nd Secretary, J. V. Lopes Rodriguez
Commercial Agent, Alirio Parra Marquez
Vice Consul, C. Gurtubay
Consul General, Liverpool, S. A. Mendoza
Consulates at *Birmingham, Cardiff, Glasgow, Newcastle upon Tyne, Leith* and *Hull*.

The most northerly Confederation of South America situated approximately between 1° 40' S. lat. and 12° 26' N. lat. and 59° 52' 73° 15' W. long. It consists of 20 States and a federal territories. The best authorities calculate the actual present area to be approximately 363 728 square miles. The census of 1925 gave the population as 3 026 878.

Venezuela lies on the north of the South American continent and is bounded on the north by the Caribbean Sea, west by the Republic of Colombia (with which Republic the boundary is in dispute), east by British Guiana and south by Brazil. Included in the area of the Republic are over 70 islands off the coast with a total area of about 14 650 square miles, the largest being *Margarita*, which is politically associated with Tortuga, Cubagua and Coche to form the newly constituted State of *Nueva Esparta*. Margarita has an area of about 400 square miles.

Venezuela was visited by Columbus in 1498, and in 1499 by Alonzo de Ojeda and Amerigo from Spain, while Peru was enabled to establish Vespucci, the former naming the Gulf of Maracaibo Venezuela or 'Little Venice' (on account of the Indian pile built settlements on the coast and shores of the lake) and the name was afterwards extended to the whole of the Orinoco basin. In 1550 the territory was formed into the captaincy general of Caracas and the country remained under Spanish rule until the revolt under *Simon Bolivar*, a native of Caracas, who defeated the Spanish forces in the battles of Lastoguanes (1813) and Carabobo (1821), and thus secured the independence of the country. Bolivar was an untiring hero in the cause of independence and through his efforts (and those of his adjutant Sucre) Venezuela, Ecuador and Colombia (Upper Peru) achieved their freedom from Spain, while Peru was enabled to establish its independence in consequence of his victories. He died in 1830 at the age of 47 and his remains were re-interred at Caracas in 1842. Venezuela formed part of the Federal Republic of Colombia from 1821 to 1830, since which time it has been independent. There have been many revolutions since 1846, particularly in 1849, 1868, 1889, 1892, 1900, and 1908. In 1854 President Monagas

liberated the African slaves and in 1864 President Falcón divided the country into States and formed them into a Federal Republic The present constitution rests upon the fundamental law of June 13 1919 under which the government is that of a Federal Republic of twenty autonomous States a Federal District and two Territories, with a President elected by the Federal Congress for seven years a new Constitutional Law of 1925 left that position unchanged

The Eastern Andes from the south west cross the border and reach to the Caribbean Coast where they are prolonged by the Maritime Andes of Venezuela to the Gulf of Paria on the north east The main range is known as the Sierra Nevada de Merida, and contains the highest peaks in the country in Picacho de la Sierra (15,420 feet) and Salado (13 878 feet) the maritime ranges containing the Silla de Caracas (8 531 feet) Near the Brazilian border the Sierras Parima and Pacaraima and on the eastern border the Sierras de Rincote and de Usupamo enclose the republic with parallel northward spurs, between which are valleys of the Orinoco tributaries The Sierra Parima contains Yapacana (7 175 feet) and Duida (8,120 feet), and Para Cima contains Maraguaca (8,228 feet) and Roraima (8 530 feet) the latter being on the Venezuela Guiana boundary The slopes of the mountains and foothills are covered with dense forests, but the basin of the Orinoco is mainly *llanos*, or level stretches of open prairie, with occasional woods

The principal river of Venezuela is the *Orinoco* with innumerable affluents the main river exceeding 1 500 miles in length from its rise in the north western mountains of the republic to its outflow in the deltaic region of the north east The Orinoco is navigable for large steamers from its mouth for some 700 miles and by smaller vessels as far as the Maipures Cataract some 200 miles further up stream Among the many tributaries of the main stream are the Ventuari Caura and Caroni from the south, and the Apure (with its tributary the Portuguesa) Arauca Meta and Guaviare from the west, the Meta and Guaviare being principally Colombian rivers The upper waters of the Orinoco are united with those of the Rio Negro (a Brazilian tributary of the Amazon) by a natural river or canal known as the *Casiquiare* The costal regions of Venezuela are much indented and contain many lagoons and lakes, of which *Maracaibo* with an area exceeding 7,000 square miles, is the largest lake in South America Other lakes are Zulia (290 square miles), south west of Maracaibo, and Valencia (216 square miles) about 1 400 feet above sea level in the Maritime Andes The *llanos* also contain lakes and swamps caused by the river floods, but they are dry in the summer seasons

The climate is tropical and, except where modified by altitude or tempered by sea breezes is unhealthy, particularly in the coastal regions and in the neighbourhood of lowland streams and lagoons The hot wet season lasts from April to October, the dry cooler season from November to March

The principal industries are agriculture and cattle raising The oilfields are of increasing importance, the production being 136 890,784 barrels in 1930 and 118,770,000 barrels in 1931

The principal imports are cotton prints and shirtings and cotton drill, mainly from the U K., and hardware principally from the U S The principal articles of export are petroleum (127 506,930 barrels in 1929), coffee (64,368 metric tons in 1929), cacao (21 118 metric tons in 1929), goatskins, asphalt, sugar, hides, and balata The U S is the principal customer

There are about 680 miles of railway in operation

Yugoslavia consists of the former Kingdoms of Serbia and Montenegro and of Croatia and Slavonia, part of the Banat, Bosnia Herzegovina part of Carniola and part of Styria and has an estimated area of 248,050 square kilometres (94,230 square miles), with a population (Census 1931) of 13 930,918

Montenegro (*Crna Gora*) was, before the Turkish occupation of the remaining territory a province of the Serbian Empire Its independent existence ended with the decision of its Parliament (Nov 29, 1918) to depose King Nicholas and reunite with Serbia The chief towns are Cetinje (pop 5 000) and Podgorica

Pre War Serbia had no seaboard but the inclusion of Croatia, Dalmatia and Montenegro in the Kingdom of Yugoslavia gives access to the Adriatic down a lengthy coast The principal Yugoslav ports are Sušak Split, Dubrovnik and Kotor, and by an agreement with the Greek Government Yugoslavia has a free zone at the port of Salonika In 1926 there were 4 050 miles of normal gauge and 1 083 of narrow gauge railway in operation The Danube forms a great commercial highway and the tributary rivers Sava and Tisa provide other important shipping routes the port of Belgrade is now the second busiest on the Danube The Paris Istanbul service of the French Aviation Company (*via* Prague Vienna Budapest) calls daily at Belgrade which has also regular air services to Bucharest and Salonika a national company connects the chief towns with the capital The Army on a peace footing consists of 130,000 officers and men, the war strength being about 250 000

The Greek Orthodox Roman Catholic Protestant, Muhammadan and Judaic faiths are recognised by the State nearly 47 per cent of the population is of the Greek Orthodox faith Education is compulsory and elementary education is free In 1930 there were about 10 000 elementary schools, with 21,000 teachers and 1,000,000 pupils about 20 000 attend continuation schools and some 70 000 receive instruction at technical colleges There are Universities at Belgrade, Zagreb Ljubljana and Skoplje

The principal industry is agriculture over 80 per cent of the population being engaged therein In 1929 about 5 250,000 acres under wheat yielded 2,600,000 tons of wheat, maize (5,730,000 acres 4,200 000 tons), barley (1,200,000 acres 420,000 tons), oats (1,000,000 acres, 350 000 tons), rye (600,000 acres, 220,000 tons), about 500,000 acres are under vines which yielded 60 to 70 million gallons of wine in 1929 The live stock in 1930 included 3,730,600 cattle 1,141,000 horses 7 736 000 sheep, and 2 700 000 swine The mineral resources include coal (output 6 000 000 metric tons in 1929), iron, copper lead, chrome ore, antimony, &c The principal exports are maize wheat, timber, live stock and meat products prunes eggs, poultry, skins and minerals, the imports are chiefly textile manufactures, machinery, food products and coal

The International Institute of Agriculture.

(Villa Borghese, Rome)

THE International Institute of Agriculture at Rome was founded in 1905 as the result of a Convention made between the representatives of 40 different countries The number of nations subscribing to the Convention is 72, and the Institute may be regarded as the pioneer of official international institutions, and as the most representative of all It is estimated that the countries and colonies adhering to the Institute represent over 95 per cent of the population of the world

The following is a complete list of the countries now adhering to the Convention of 1905, and therefore represented at the Institute and contributing to its funds —

Abyssinia
Argentina
Austria
Belgium
  Belgian Congo
Bolivia
Brazil
Bulgaria
Chile
China
Colombia
Cuba
Czechoslovakia.
Denmark.
Ecuador
Egypt
Estonia
Finland.
France
  Algeria
  French West Africa
  Indo China
  Madagascar
  Morocco
  Tunis
Germany
Great Britain and Northern Ireland
  Australia.
  British India
  Canada
  Irish Free State
  Union of South Africa
Greece
Guatemala
Haiti
Hungary
Italy
  Eritrea
  Cyrenaica
  Italian Somaliland.
  Tripoli
Japan
Latvia
Lithuania
Luxemburg
Mexico
Netherlands
  Netherlands East Indies
Nicaragua
Norway
Panama
Paraguay
Persia.
Peru
Poland
Portugal
Rumania
Russia
San Marino
Siam
Spain
Sweden
Switzerland
Turkey
United States
  Hawaii
  Philippine Islands
  Porto Rico
  Virgin Islands
Uruguay
Venezuela
Yugoslavia

The essential objects of the Institute are defined in Article 9 of the Convention and may be summarised as follows —

The Institute, confining its activities to the international sphere, shall —

Collect, examine and publish, with the least possible delay, statistical, technical and economic information with regard to farming, crop and live stock production, trade in agricultural products and the prices current on the different markets,

Indicate the wages paid for farm work;

Record any new diseases of crops which may have appeared in any part of the world, showing the countries affected by such diseases, their progress and, where possible, any effective measures for their control,

Study questions concerning agricultural co operation, insurance and credit in all their forms, collect and publish all information that may be useful in the various countries for the organisation of systems of agricultural co operation, insurance and credit,

Submit, should occasion arise for the approval of the various Governments, measures for the protection of the common interests of farmers, and for the improvement of their conditions

The Institute has its seat in Rome, in a palace in the Villa Borghese specially erected through the munificence of H M Victor Emmanuel The Governing Body consists of a General Assembly of Delegates of the adhering Governments, meeting once every two years and of a Permanent Committee of Delegates, mostly resident in Rome acting as its executive Apart from the General Secretariat to which in addition to the ordinary administrative offices the Section of Agricultural Legislation is attached, there are special bureaus dealing with General Statistics, Agricultural Science, and Agricultural Economics, respectively

The Library of the Institute is one of the largest and best stocked of libraries specialised in agriculture, particularly on the social and economic side In addition to purchases the library receives a number of gifts from Governments, institutions and from private sources The material is arranged and catalogued in accordance with the most modern methods Thus the Library offers quite unusual facilities for the study of agricultural problems, and permission to utilise its resources is readily accorded to all properly accredited persons Up to the present the growth of the Library has resulted in severe pressure on the space originally provided in the main building A remedy is now being found in the erection of an annexe for which the funds are supplied by the special Royal Commission administering certain properties on behalf of the Institute

Information on agricultural questions is supplied by the Institute mainly through its various publications, issued in English and French and, in some cases also in other languages The regular publications have for many years included two Year Books the *International Year Book of Agricultural Statistics* and the *International Year Book of Agricultural Legislation*, as also the *International Review of Agriculture*, published monthly and in three separate sections, dealing respectively with *Agricultural Statistics Agricultural Science and Practice*, and *Agricultural Economics and Sociology*, in addition an *International Bulletin of Plant Protection* appears monthly

Among the newer publications, special mention may be made of the Economic Commentary on the Year-Book of Agricultural Statistics, published under the title of *The Agricultural Situation* in the year in question, of *Farm* [illegible] also

The first issue of the "Economic Commentary early in 1931 was followed by that relating to the agricultural year ended July 31, 1931, published in January 1932 The volume for 1931-32 is due to appear early in 1933 The second issue contains a full discussion of the factors and course of the agricultural crisis in relation to the general economic crisis, and of its effects on the markets of agricultural products, a special chapter on international action on behalf of agriculture which distinguished the period reviewed, and as before notes on Government

and unofficial action taken in the interests of producers and on the economic conditions of farmers and farming in over fifty countries of the world. *Farm Accountancy Statistics for* 1928–29 is designed to be the first of an annual series containing the accountancy results of farms of 16 countries of Europe, prepared with the collaboration of the respective Accountancy Offices. It is expected that future issues will include also results from overseas countries, the U.S.A., Canada, Union of South Africa, Japan, &c. These statistics are not intended to institute any direct comparison between financial results, but rather to throw light on the influence of natural and economic conditions on the returns of different types of farms, and to serve as a basis for theoretical and practical enquiries. *Forestry Statistics* have for two years past been included in the Year Book of Agricultural Statistics but the growth of the material collected on forestry has made it advisable to issue a separate publication, and the present volume contains statistics relating to a series of years and to 31 countries. The data have special reference to forest composition and production and to the international trade in timber. In addition a statistical monograph on world trade in maize has just appeared. During 1932 valuable lists were published or brought up to date showing the experimental stations and similar institutions and institutions for agricultural education in tropical countries and in the large colonising nations. An International Directory of Agricultural Engineering Institutions with a glossary in several languages of names of agricultural machines, &c. The various publications of the Institute may be obtained in London from Messrs. P. S. King and Son, or may be ordered direct from the Institute.

The economic work of the Institute comes under the purview of its expert *Agricultural Economic Committee* which advises on the economic and statistical programme in its international aspects in general with special reference to the requirements of the Economic Consultative Committee of the League of Nations. The establishment of this Committee completes the list of advisory bodies required to give the cachet of authority to the institute's work. The *International Agricultural Scientific Council* through the expert members of its various Commissions, is in a position to advise on any purely technical questions that may arise, and the *Permanent International Commission of Agricultural Associations* provides means for ascertaining the views of practical agriculturists. At the same time liaison with other bodies interested in agriculture is maintained by the *International Commission for Co-ordination in Agriculture*.

The *World Agricultural Census* of 1929–30 undertaken by the Institute with the object of obtaining on a uniform basis as complete an inventory as possible of the agricultural resources of the world, has, as a result of very careful and detailed work of preparation, achieved a large measure of success. The number of countries which made their census in accordance with the standard forms prepared by the Institute was 44, and many completed returns are already available. A beginning has been made with the publication of these results, and in order to facilitate their utilisation they are being issued separately for each country as they come to hand, in as uniform a shape as possible, and in English and French as the most generally known languages. General and methodological studies interpreting the documentation thus collected constitute the second stage in the scheme of work which the Institute proposes to accomplish on the basis of the information supplied by this first world census of agricultural production. In consequence of the prevailing economic crisis some difficulties are being experienced in the execution of the complete programme but the General Assembly at its meeting in October resolved that a priority should be given to this important undertaking, and every effort used to secure the speedy publication of the results.

For general financial and other reasons public activities of the Institute in connection with special Conferences and Congresses were curtailed during 1932, but a meeting was held during May under the auspices of the Tropical Commission of the Agricultural Scientific Council at which *inter alia* reports on the agricultural crisis in relation to native agriculture in different tropical countries were presented, leading to a valuable discussion of certain practical issues involved in a problem which has recently become one of major importance.

The XIth General Assembly in October was held under the Presidency of the High Commissioner for India Sir Bhupendra Nath Mitra. Finance problems, the World Census, definition of the relations of the Institute to other Organisations and to Conferences also dealing with agriculture internationally, were among the chief items on the Agenda. The most important feature of the meeting however, lay in the announcement that the prolonged pourparlers and negotiations between His Exc. De Michelis, President of the Institute, and the authorities of the League of Nations, with reference to the organic relations between the two institutions, had now reached a successful issue. By the accord that has now been established through a resolution adopted by the Council of the League on October 3 1932 the Institute is recognised as duly qualified to act as the League's advisory organ in agricultural matters and the resolution at the same time outlined the machinery necessary for implementing this accord. The General Assembly accepted with acclamation the terms of the arrangement now so happily concluded between the two great international institutions. This ratification of a collaboration that has effectively been in existence for a number of years should go far to fortify the position of the Institute in carrying out its obligations under its Foundation Charter of 1905, in regard to the furtherance of agricultural progress and the welfare of farmers in all countries.

President His Exc. Prof. G. De Michelis (Delegate of Italy).
Vice-President M. Louis Dop (Delegate of France).
British Delegate H. I. French, C.B., O.B.E. (*Ministry of Agriculture and Fisheries*).
Delegate of the Irish Free State M. Harvey Rafferty.
Delegate of the Indian Empire Sir Bhupendra Nath Mitra (High Commissioner) K.C.S.I. K.C.I.E.
Delegate of the Union of South Africa. His Exc. Barend Pienaar.
Secretary General Prof. Alessandro Brizi.

THE WEATHER OF 1931-32.

(1931) Following a dull wet summer, *October* provided a pleasant contrast by its dryness and sunniness The first half of the month was generally mild but cold conditions with severe frost at night prevailed during the last ten days Unsettled mild conditions with south westerly to westerly winds prevailed until the 10th Heavy rain fell in Scotland and Ireland during this period Falls of 50 mm or more were recorded locally on the 1st 4th and 9th Thunder storms occurred in the Orkneys on the 2nd and locally in England on the 7th After the 10th anticyclonic conditions prevailed in the south and by the 13th a large anticyclone covered the British Isles About the 20th a colder type of weather set in A ridge of high pressure across the country from the 21st to 23rd was followed by northerly winds on the 24th and 25th associated with an anticyclone to the west of the British Isles Snow fell in parts of northern England and Scotland on the 24th and 25th On the 26th and 27th an anticyclone covered the southern districts while northern districts came under the influence of a depression near the Faroes In Scotland and the north of Ireland moderate rain fell on the 27th Northerly winds prevailed during the next few days over the greater part of the British Isles Severe frost occurred at night and temperatures below 20° F in the screen were recorded at many places during the nights of the 24th to 27th On the 31st south westerly winds brought milder conditions to all districts temperatures of 60° F and over being recorded Monthly pressure means exceeded the normal by 7 or 8 millibars over the greater part of England and Wales Over England and Wales there was a prevalence of northerly winds but on the whole the month was quiet Although during the first half of the month maximum temperatures were above the normal, a cold spell from the 21st to 30th caused monthly mean temperatures to be about or below the normal in England and Wales In Scotland and Ireland they were generally above normal The extreme temperatures of the month were (England and Wales) 72° F at Cromer on the 6th and 15° F at Rickmansworth (Dublin) on the 4th, and 20° F at Markree Castle on the 25th The outstanding feature of the weather of October was the general deficiency of precipitation In south east England it is generally the wettest month of the year but it was the driest month this year, and was a record dry October in many places, Teignmouth for more than 60 years, Redruth 52 years Cork 48 years, Hereford 37 years and at Eastbourne for 35 years Expressed as a percentage of the average for the period 1881–1915 the values were British Isles 49, England and Wales 32 Scotland 82 and Ireland 56. The month was also conspicuously sunny, the only large area with a deficiency being the north of Scotland In most districts it was the first month since March in which aggregates exceeded the normal Fog was reported on several occasions Huddersfield had fog on 19 mornings, and Manchester on 14 mornings *Aurora* was observed in Scotland on 12 nights, that on the 18th, the most widely observed, being reported as brilliant from Skye and Kirkwall A comparatively rare phenomenon a corona of 5° in diameter in cirrus cloud, was observed at Salt Island, Holyhead

November —A remarkable feature of the month was the abnormal prevalence of southerly winds It was unusually mild and in most parts rather dull On the 1st and 2nd the south and east of England lay within the influence of an anticyclone over the Continent Brilliant weather was enjoyed over a wide area with sunshine records exceeding 8 hours in many places By the 3rd unsettled conditions spread from the west and heavy rain, strong winds and gales were experienced over the southern half of the country In the west the rainfall from the 2nd to 4th was abnormally heavy Unsettled mild and wet weather continued for several days Southerly gales in the English Channel coincided with high tides on the 10th and 11th and much damage by flooding occurred along parts of the south coast of England A short spell of sunny weather occurred on the 12th and 13th, but on the 14th heavy rain fell in Wales and the Isle of Man At Douglas 61 mm fell in 22 hours On the 17th fog occurred in many parts of eastern England, especially in the Thames estuary The 21st was generally sunny but the fine spell ended on the 22nd, when a deep secondary to a complex depression in the North Atlantic travelled north eastwards across the country, causing strong winds and heavy rains in Ireland and western parts of Great Britain Among the heavy falls being 71 mm at Ballinacurra Co Cork 44 mm at Glasgow and 41 mm at Aberdeen on the 23rd Serious floods occurred in parts of Scotland in western Ireland and the Isle of Man Pressure rose rapidly on the 29th, and widespread fog developed over most of England and southern Scotland Monthly mean pressures were below normal in all parts of the British Isles the deficiency ranging from 3·4 millibars at Yarmouth to 12·6 millibars at Malin Head South easterly to southerly winds were remarkably prevalent Among the highest gusts recorded during the month were 83 m p h at Butt of Lewis on the 18th 82 m p h at Pendennis Castle on the 4th 76 m p h at Kirkwall on the 18th and 75 m p h at Scilly on the 4th The mean temperature of the month was above the normal in all parts The warmest days were the 2nd to 4th In many parts of England and Wales the night 3rd 4th was remarkably mild at Ross on Wye and Kew Observatory the minimum temperature 57°1 was the highest for November in records extending back more than 70 years and 60 years respectively The extreme temperatures of the month were (England and Wales) 64° F at Llandudno on the 3rd and 23° F at Rickmansworth on the 2nd, (Scotland) 61° F at Banff and Gordon Castle on the 3rd, and 22° F at Dalwhinnie on the 16th, (Ireland) 64° F at Killarney on the 2nd and 25° F at Kilkenny on the 16th An outstanding feature of the month was the pronounced excess of precipitation in most districts Expressed as a percentage of the normal, the values were British Isles 153, England and Wales 143, Scotland 143 and Ireland 192 It was the wettest November in Ireland as a whole since before 1881 In the north of Scotland it was locally the driest November on record, while in the south it was the wettest At Rothesay it was the wettest November since at least 1800 In England and

Wales a deficiency occurred locally in the north east more generally in the east and also in the London area elsewhere there was a decided excess especially in the west On the 2nd and 3rd unusually heavy rain fell in the west among the largest amounts being 244 mm at Trecastle (Brecon) 220 mm at Patterdale (Lake District) and in the Black Mountains (Carmarthen) and 193 mm at Borrowdale (Lake District) Serious flooding occurred and Derwentwater and Bassenthwaite which are about 5 miles apart were joined in one great lake Sunshine aggregates exceeded the normal locally in the north of Scotland the Midlands and in the south west of England the Channel Isles and most parts of Ireland but were generally below elsewhere Fog occurred fairly frequently in the north east and Midlands of England and the estuary of the Clyde *Aurora* was observed in Scotland on 7 occasions during the month

December was characterised by high pressure and unusually mild and mainly dull weather with a marked deficiency of precipitation During the first ten days cyclonic conditions prevailed with strong winds and gales between the 3rd and 5th and unusually high temperatures for the time of year Heavy rain occurred in Ireland and Scotland on the 2nd and extending to all districts on the 3rd The mild conditions prevailed until the 14th when a depression west of Iceland moved eastwards In the rear of this depression, cold northerly winds brought a considerable drop in temperature and an anticyclone moved south from Iceland This remained centred near the British Isles until the 22nd giving cold weather in England with slight local rain and from the 17th 20th considerable fog though the 17th and 18th were sunny in some districts By the 23rd mild conditions had again become general In Scotland the highest temperature of the month was recorded on the 24th 60° F recorded at Aberdeen, being the highest in December for at least 60 years Heavy rain occurred in the west on the 23rd (77 mm at Dungeon Ghyll and 67 mm at Sawrey) but over Christmas the weather was mild and dry with some sun on most days Thunderstorms occurred in north west England on the 28th On the 29th cold northerly winds swept across the country and snowstorms were reported from Scotland north east England and the Midlands and slight snow and sleet from elsewhere in the British Isles On the 30th and 31st snow still lay thick in the north and it remained cold in the south, but on the evening of the 31st mild conditions were spreading from the west Monthly mean pressures were decidedly above the normal, the excess ranging from 8·2 millibars at Lerwick to 15·7 millibars at Scilly (St Mary's) Westerly winds predominated Strong winds or gales occurred widely from the 26th 29th Among the highest gusts recorded were 87 m p h at Lerwick on the 23rd, 80 m p h at Kirkwall on the 27th and at Butt of Lewis on the 27th and 28th 77 m p h at Liverpool (Bidston) on the 4th Monthly means of temperature were above normal in all districts and several places recorded the highest temperature ever recorded in December At Kew Observatory (59° F) it was the highest since at least 1871, Ross on Wye (59° F) for over 70 years, and at Cambridge (60° F) since at least 1876 Ground frost was most severe on the mornings of the 7th–8th, 17th–20th and 28th–31st The extreme temperatures of the month were (England and Wales) 62° F at Perdiswell (Worcester) and Margate on the 4th, 15° F at Rickmansworth on the 19th and at Appleby on the 31st (Scotland) 60° F at Aberdeen Banff Chalbstone and Gordon Castle on the 24th and 16° F at Dalwhinnie on the 31st (Ireland) 60° F at Killarney on the 3rd and 24° F at Kilkenny on the 31st There was a marked deficiency of precipitation in almost all parts of the country The values expressed as a percentage of the normal for the period 1881–1915 were British Isles 57, England and Wales 45, Scotland 81 and Ireland 66 At Marchmont, with the exception of December 1926 it was the driest December since 1808 The heaviest daily falls were 82 mm at Kinlochquoich and 60 mm at Glenbranter on the 2nd Snow and hail occurred in the north between the 25th and 30th and widely on the 29th Snow lay to a depth of 6 inches at Balmoral on the 30th and 7 inches at Achnashellach on the 31st Sunshine was, with very few exceptions below the normal No sunshine was recorded at Greenwich and Westminster from the 11th 26th inclusive Fog occurred in many places on the 1st and 2nd, in London and the south east on the 18th and more widely on the 19th, and 20th *Aurora* was observed in Scotland on 9 occasions during the month

THE YEAR 1931.—The year was chiefly remarkable for the excessive wetness and dullness of the summer months April to September inclusive The summer was more conspicuous for spells of cold weather than for warmth there being an absence of any really hot weather *January* was cold and foggy during the first fortnight, and during the second half was wet and windy There were however considerable bright periods The chief features of the weather of *February* were the squally westerly or north westerly winds and frequent wintry precipitation Sunshine aggregates were in general deficient *March* was on the whole cold and quiet and, except in south east Ireland and south west England dry and sunny *April* was unsettled and dull and very wet in England and Wales Apart from a spell of moderately warm weather from about the 8th 12th day maximum temperatures were mostly below normal Unsettled, wet and cloudy weather prevailed throughout most of *May* The days were mostly cool but the nights frequently mild The first three weeks of *June* were on the whole dull and wet, followed by fine weather generally during the last week *July* was wet and dull with widespread thunderstorms There were no really hot days but night temperatures were frequently above normal *August* was wet, cool and dull in England and Wales, but sunny and dry in the west and north *September* apart from warm days at the beginning and middle of the month, was mostly cold and dull Abnormally heavy rain fell during the first four days, but thereafter precipitation was unimportant *October* was dry and sunny mild conditions prevailed generally during the first half of the month, but the last ten days were cold and at most places there was severe frost at night *November* was very mild and wet, and in most places rather dull with an abnormal prevalence of southerly winds *December* was characterised by high pressure and unusually mild, dry and dull weather Annual pressure means were about or only slightly below the normal The temperature means for the year differed only slightly from

the normal in most places The extreme temperatures of the year were (England and Wales) 83° F at Bromley (Kent) on June 14th and 5 F at Rickmansworth on March 10th (Scotland) 81° F at Onich and Ardtornish on August 4th and at Glenbranter on August 5th and 1° F at Braemar on March 3rd (Ireland) 79° F at Markree Castle on August 4th and 18° F at Hazelhatch (Dublin) on March 10th The year 1931 continued the remarkable run of wet years which set in about 1922 The general precipitation of the British Isles for 1931 expressed as a percentage of the average for the period 1881 1915 was 107 England and Wales 108 Scotland 104 and Ireland 109 The accumulated excess over the British Isles during the last ten years has amounted to 97 per cent Among the outstanding daily falls were 106 mm at Cardiff on May 27th and 126 mm at Baldale Hall (Yorks) on September 3rd Perhaps the most striking rains of the year were those of November 2nd–3rd, which were not only widespread but gave as much as 220 mm at Patterdale in the English Lake District and 244 mm at Blaenau Ffestiniog in the north of the Black Mountains The general deficiency of sunshine during the summer months was sufficiently marked to affect the annual aggregates which in all districts were below the normal *Aurora* was observed in Scotland during each month with the exception of May and June

1932 —*January* was very mild sunny in northern England and eastern Scotland and very wet in the west and north of Scotland The month opened with a change to very mild conditions the rise in temperature in many parts of England amounting to 25 degrees The mild and damp south westerly winds that were established so suddenly throughout the British Isles proved persistent and blew very strongly at times in the north west The mild weather was interrupted temporarily by polar winds from between north and west on the 7th and 8th and eventually gave way about the 20th to lighter winds which over England were of Continental origin Pressure slightly exceeded 1,030 millibars (32 inches) over a part of England on the 26th this being for many places in the Midlands the highest reading recorded for at least 50 years The anticyclonic spell made the second half of the month comparatively dry and there was practically no rain over a large proportion of England during this period Temperature now became comparatively low and frequent night frosts occurred over England and Scotland Gales occurred widely on several days between the 5th and 14th Among the highest gusts recorded were 95 m p h at Bell Rock on the 13th 92 m p h at Scilly on the 6th 89 m p h at Lerwick on the 13th and 82 m p h at Pendennis Castle on the 6th Monthly means of temperature were everywhere above normal The extreme temperatures for the month were (England and Wales) 60° F at Colwyn Bay on the 2nd and at Llandudno and Wakefield on the 18th, and 12° F at Rickmansworth on the 1st (Scotland) 62° F at Gordon Castle on the 18th and 17° F at Eskdalemuir on the 26th (Ireland) 60° F at Killarney on the 31st and Newcastle (Wicklow) on the 28th, and 24° F at Kilkenny on the 1st. The general precipitation of the British Isles expressed as a percentage of the normal for the period 1881–1915 was 123 per cent The rainfall was very unevenly distributed, for while at Glenquoich the total was 807 mm, Glenbranter 476 mm and Achnashellach 431 mm at Tynemouth and Felixstowe only 15 mm were recorded The excess of sunshine (about 60 per cent) in the east of Scotland and north east of England in a month when rain was so heavy at no great distance to the west is noteworthy and may be attributed partly to the fact that there was an almost complete absence of winds from the North Sea such as so often bring cloud formed by turbulence Fog was rather frequent over England except in the south west mostly during the quiet dry period late in the month *Aurora* was seen in parts of Scotland on the nights of 6th 7th 11th and 25th Thunder and lightning occurred rather often during the unsettled windy period The solar or lunar halo was unusually frequent it was observed on ten occasions between the 5th and 16th at Oxford

February —The outstanding feature of the weather of the month was the remarkable deficiency of rainfall in all districts associated with abnormally high pressure and persistent winds from a northerly or easterly point During the first few days of the month the anticyclone which had set in on the 20th January was situated to the west of Ireland By the 9th the high pressure area lay to the north and during the next few days cold north easterly to easterly winds prevailed generally Snow was widespread from the 10th to 12th but the amounts were small There were frequent sunny periods from the 14th to 24th The days became less cold and temperatures of round about 50° F were recorded at many places By the 28th easterly winds had again become established over southern districts and were accompanied by a considerable drop in temperature at Boscombe Down the maximum on the 29th was 33° F Monthly pressure means were from 15 to 25 millibars above normal At Southport the mean was the highest recorded in any month for at least 60 years and at Glasgow for at least 65 years No centre of low pressure crossed the country during the month Northerly to easterly winds were unusually persistent and with few exceptions there was a notable absence of strong winds Gales occurred only on the 10th 11th and 28th 29th The month was cold in the south of England and Ireland but in Scotland the temperature was high for the time of year The warmest days were around the 3rd and the 22nd Ground frost occurred frequently during the month The extreme temperatures of the month were (England and Wales) 54° F at Harrogate on the 3rd and 15° F at Rickmansworth on the 7th and 19th (Scotland) 58° F at Crieff and Perth on the 3rd and 15° F at Dalwhinnie on the 11th (Ireland) 52° F at Armagh and Roches Point on the 3rd and at Mallaney on the 20th and 18° F at Markree Castle on the 19th The precipitation of the month expressed as a percentage of the average for the period 1881 1915 was England and Wales 18 Scotland 12 Ireland 7, British Isles 14 The figures for Scotland and Ireland are the lowest recorded for over half a century At the end of the month the drought still continued, many places having had no appreciable rain since the middle of January Sunshine totals were generally below the normal except in parts of Scotland, Wales and the west of Ireland Some good daily records were obtained, among the largest being 9·1 hours at Hastings and 9·0 hours at Brighton on the 18th Fog occurred

frequently, except in the south west, during the first three weeks The fog was thick locally on the 4th, 8th and between the 15th and 18th *Aurora* was observed locally in Scotland on the nights of the 3rd, 4th 8th, 11th and 12th

March —The drought which formed so remarkable a feature of the weather of February continued with cool easterly winds and bright periods during the opening days of March In Scotland the drought was broken on the 4th or 5th but it was not until the 8th that the drought was really broken in the south At some places 10 mm or more was recorded on this day Subsequently an anticyclone spread south east from Iceland, bringing a renewal of dry and mainly cool weather which lasted until the 20th During this period daily records of 10 hours or more sunshine was recorded in places The 20th marked a change to unsettled rainy weather which except for fine to fair weather in England on the 24th and 25th continued until the end of the month The 27th (Easter Sunday) was wet and the 28th (Easter Monday) was showery with sunny periods On the 31st cold northerly winds spread across the northern and western districts with local snow and hail in the north and thunderstorms in the south Monthly pressure means were again above the normal Strong winds or gales were reported from western districts about the 6th, 25th and 31st Otherwise the month was quiet Mean temperatures were generally below normal due mainly to the frequent cold nights in England and Wales but in Scotland and most parts of Ireland they exceeded the normal The extreme temperatures for the month were (England and Wales) 59 F at Tavistock on the 16th Cambridge on the 19th and Greenwich Observatory on the 31st 12 F at Rickmansworth on the 13th (Scotland) 60 F at Arbroath on the 13th 11 F at Dalwhinnie on the 12th (Ireland) 59 F at Kilkenny on the 23rd and 26th and at Hazelhatch (Co Dublin) on the 27th 20° F at Phœnix Park (Dublin) on the 17th Precipitation over the British Isles as a whole was below the normal In most places the rainfall during the last ten days accounted for the greater part of the month's total In England and Wales there were considerable variations but in general there was a deficiency except in the north east In Scotland it exceeded the normal in the north and east and locally elsewhere, while in most parts of Ireland there was a considerable deficiency In the south of England and Wales and most of Ireland, sunshine aggregates were above the normal but elsewhere the month was on the whole, dull Fog was widespread on the 3rd and was dense locally in the Clyde area on the 4th It occurred in the south east on the 13th to 15th and on the 19th In the south on the 24th it was thick locally Coastal fog occurred on the east *Aurora* was observed in Scotland on nine occasions while on five occasions it was seen as far south as Dumfriesshire Halo phenomena was observed over a wide area in the Midlands and Southern England on the 25th

April —Unsettled wet weather with cool days and in most places less than the normal sunshine prevailed during the month Depressions off north east England on the 1st and over southern England on the 3rd and 4th caused cold northerly to north easterly winds and wintry precipitation Severe ground frost occurred in Scotland on the 3rd amongst low grass minima recorded were 9° F at Dalwhinnie and 16° F at Renfrew In southern England the 5th was dry and sunny with sunshine records exceeding 10 hours in places Very unsettled conditions prevailed widely from the 6th to 11th The 12th was a brilliantly fine day but weather deteriorated again in the west and north on the 13th at the approach of a fresh Atlantic disturbance A change occurred about the 16th with pressure high to the north and north west and low over the Continent Bright, sunny weather was enjoyed in Scotland and Ireland but mainly dull rainy conditions were experienced in England Unsettled weather was renewed on the 18th in the north and later throughout the country During the next few days showery weather with local thunder and hail prevailed Snow fell in Yorkshire on the 26th Conditions then became much milder and although rain fell at times there were bright intervals Mean pressures for the month were well below the normal Westerly winds predominated with less than the normal seasonal frequency of easterly winds Strong winds or gales were experienced widely between the 7th and 11th and in a gust 79 m p h was recorded at Dunfanaghy (Donegal) on the 7th Mean temperatures were generally from 1° F to 3° F below the normal In many places it was the coldest April since 1922 The extreme temperatures of the month were (England and Wales) 66° F at London (Camden Square) Rickmansworth and Canterbury on the 30th and 23° F at Castleton on the 3rd and at Rickmansworth on the 25th (Scotland) 62° F at Oban on the 30th, and 19° F at Dalwhinnie on the 17th (Ireland) 62° F at Newcastle on the 9th and 26° F at Dublin (Glasnevin and Phœnix Park) on the 3rd Precipitation occurred frequently during the month but daily amounts exceeding 1 inch were rare In almost all districts there was a pronounced excess of precipitation, monthly totals exceeding twice the normal locally in England and Scotland and over a large area in Wales Expressed as a percentage of the normal for the period 1881–1915 the values were — British Isles 149 England and Wales 156 Scotland 160, and Ireland 118 The unsettled wet conditions which prevailed during the month resulted in a marked deficiency of sunshine in most districts In southern Scotland, however there was an excess Little fog was reported during the month Dense fog occurred in the Firth of Forth on the 29th *Aurora* was observed in northern districts in Scotland on each night from the 1st to 4th and on the 6th 7th 11th and 21st Halo phenomena observed at Armagh Observatory on the 27th included the halo of 22 with parhelia and part of the mock sun ring the halo of 46° and traces of the upper arc of contact to the 46° halo which was described as very brilliant at the point of contact

May —The most remarkable features of the weather of the month were the pronounced excess of rainfall in England and Wales and the destructive floods in the Midlands and Yorkshire During the first three days rain occurred in most parts of England and Wales, associated with thunderstorms in the Midlands and south east on the 1st As a result of these, many roads in Wiltshire, Shropshire and Worcestershire were flooded By the 3rd, cold northerly winds had set in over the country generally Winds were strong locally about the 6th, whilst wintry showers occurred in northern districts A complete change of weather occurred about the

11th A deep depression lay over the Atlantic southerly winds spread over the country and temperature rose considerably There was heavy local rain on the 11th 12th and 15th but many sunny periods notably on the 14th and 17th (15 1 hours at Tiree on the 17th) On the 18th another depression approached from the Atlantic and there ensued the warmest spell of the month temperature rising to 70° F and over during the period 19th to 21st A depression which moved from the English Channel to off the north east coast of England on the 21st to 22nd caused unusually heavy rain and widespread destructive floods in western districts the Midlands and Yorkshire After the 21st followed a period of northerly winds and cool weather at Kew the maximum temperature fell from 74 F on the 20th to 53° F on the 25th On the 29th another depression approached from the Atlantic temperature rose and heavy rain occurred in the south west of Ireland but in Scotland the 30th and 31st and in eastern England the 31st were sunny Monthly mean pressures at 7 h were everywhere below normal the deficiency being slight in the extreme north and amounting to about 5 millibars in the east of England Winds were mainly light to moderate There was a considerable frequency of northerly winds in northern districts Apart from brief warm spells about the 20th and towards the end of the

were not very much below normal The extreme temperatures for the month were (England and Wales) 77° F at London (Regent s Park) on the 20th, 24° F at Cantref (Brecknock) on the 8th (Scotland) 73° F at Ardtornish on the 31st 23° F at Braemar on the 8th (Ireland) 68° F at Killarney on the 21st 27° F at Markree Castle on the 6th The general precipitation over the British Isles expressed as a percentage of the normal for the period 1881 1915 was 174 the values for the constituent countries were England and Wales 221, Scotland 108 Ireland 134 Generalised rainfall values for England and Wales for earlier years back to 1727 have been computed recently, and although the values for the earliest years are naturally less reliable, one may fairly conclude that May 1932 ranks as the wettest May over England and Wales as a whole for the past 160 years In striking contrast to the general marked excess of rainfall a pronounced deficiency was recorded in the west of Scotland, Orkney and the Shetlands With the exception of Orkney, southern Hebrides and the north west of Ireland, sunshine aggregates were well below the normal In parts of England the month was the dullest May on record e g , at Kew Observatory where records extend back to 1880 Coastal fog was reported during the period 16th–20th *Aurora* was observed locally in northern districts in Scotland on the 2nd 4th, 5th and 8th Ball lightning was observed during a thunderstorm at Upper Heyford on the 1st

June —The outstanding feature of the month was its pronounced dryness the general precipitation over the British Isles being only slightly more than half the June normal The month was sunny in the west, but, except locally in the south of Ireland, was not remarkable for any great warmth The month opened generally sunny but heavy rain occurred locally on the 3rd The 4th was cool, but an anticyclone over Iceland moved south and then eastwards, and temperature gradually rose high day temperatures were recorded on the 11th in eastern England Local thunderstorms occurred on the 10th and 11th During the next week a spell of dry sunny weather occurred Temperatures were low on the 19th and 20th, but little rain fell From the 21st most of the British Isles came under the influence of an anticyclone and temperatures rose The fair spell broke in England on the 27th, when a secondary trough to a deep depression near the Faroes moved across the country heavy rain and thunder storms occurred locally on the 27th and 28th while heavy rain fell in the south west on the 29th and spread to all districts on the 30th Monthly mean pressures were above the normal in all districts Winds were mostly light and were mainly from between north and east Monthly mean temperatures were above the normal in the west, but slightly below in the east The warmest days were about the 16th and 26th 80 F being recorded locally The extreme temperatures for the month were (England and Wales) 82° F at London (Camden Square) on the 27th, 30° F at Rhayader on the 7th (Scotland) 80 F at Paisley Renfrew and Ruthwell on the 17th 27° F at Dalwhinnie on the 6th (Ireland) 80° F at Kilkenny on the 18th and Killarney on the 17th and 19th and 33° F at Dublin (Phœnix Park) on the 5th In contrast to the abnormal wetness of May June was remarkable for its dryness In many parts of the country the rainfall of the 30th June to 1st July accounted for the greater part of the month s rainfall Among the heavy falls on the 30th were South Brent 3 70 inches Holne 3 28 inches and St Briavels Glos 3 20 inches The general precipitation over the British Isles expressed as a percentage of the normal for the period 1881–1915 was 57 England and Wales 59 Scotland 49 Ireland 60 Sunshine aggregates exceeded the normal in western districts and were deficient in most parts of north eastern Scotland and eastern England Fog occurred in coastal districts and in eastern districts of Great Britain during the first three days about the 13th and on the 24th Parhelia and an upper arc of contact to the halo of 22° were observed at Oxford on the 29th

July was dull and wet with widespread thunderstorms The cloudy and unsettled weather of this month was in strong contrast with that of June During the first ten days conditions were influenced by depressions between Scotland and Ireland but in the south east of England the falls of rain were generally small and many sunny days were enjoyed along the South Coast After the 10th unsettled weather and northerly winds predominated for a week winds tended to be more north westerly after the 18th, and after the 24th more often from west or south west Depressions were centred over or near Scotland from the 24th to the end of the month No large area of fine weather developed at any time during the month, although little or no rain fell over England from the 8th to the 10th there was no day on which some part of the country was not having wet weather Monthly pressure means were everywhere below the normal, the strongest winds were generally felt on the first few days , on the 9th, 17th, 18th, and 26th to 29th Gale force was reached for a few hours on the 1st at Butt of Lewis and Bell Rock (Forfar), and gusts of 50 m p h or more were registered in many parts of England, Scotland

and Ireland on that day Monthly temperature means were, in general slightly above the normal The warmest spell occurred generally between the 9th and 12th, while the coolest was between the 18th and 23rd The extremes for the month were (England and Wales) 86° F at Pontefract and Attenborough on the 10th and London on the 10th and 11th 34 1 at Rickmansworth on the 19th, (Scotland) 83° F at Aberdeen on the 10th 34° F at Dalwhinnie on the 23rd (Ireland) 81° F at Newcastle (Wicklow) on the 9th 41° F at Hazelhatch on the 18th The total rainfall for the month was very variable owing to the exceptionally heavy falls that occurred in some of the numerous thunderstorms but there was enough windy cyclonic weather for the wet climates of elevated places in the west and north to be apparent a number of such places in Scotland having 250 mm or more Among the heaviest daily falls were 130 5 mm at Cranwell on the 11th, 102 mm at Stalybridge (most of which fell in a thunderstorm between 16 h and 20 h on the 11th and 34 mm in 40 minutes at Shinfield on the same day The general precipitation of the British Isles expressed as a percentage of the average for the period 1881 1915 was 137 the values for the constituent countries were England and Wales 144 Scotland 121, and Ireland 138 With the exception of the extreme north of Scotland there was a general pronounced deficiency of sunshine The solar halo was observed frequently, at Oxford on no fewer than 13 days A small tornado left a track of fallen trees in its wake near Wych Cross Ashdown Forest on the afternoon of the 26th

August — The outstanding feature of the weather of the month was the excessive heat over a large part of England The month opened with rather unsettled cool weather and local thunderstorms About the 4th an anticyclone off our south west coasts began to spread north east Much fog was experienced from the 4th to 10th The warm spell culminated in a very hot day on the 11th Severe thunderstorms occurred on the 12th For a few days shallow depressions lay over the country On the 14th an anticyclone developed over Northern Scotland and moved south, bringing temporarily cooler, north easterly winds and mainly cloudier skies Subsequently westerly winds prevailed in the north and another spell of anticyclonic conditions in the south Temperature rose considerably and the 19th was the warmest day on record in some places Again the warm weather was ended by thunderstorms, on the 20th, though they were delayed in south east England until the night of the 20th to 21st A sudden drop in temperature occurred in the Midlands, and a more gradual one in south east England At Birmingham the maximum on the 20th was 66° F, as against 91° F on the 19th There followed a few days of anticyclonic weather, but it remained cool Towards the end of the month shallow depressions moving east brought unsettled weather with local rain and thunderstorms Monthly pressure means were everywhere above the normal the excess ranging from 6 4 m b at Malin Head to 3 0 m b at Roches Point Winds were variable and light to moderate in force A gale occurred at Dunfanaghy on the 6th Mean temperature for the month was everywhere above the normal and notably so in south and east England and the Midlands. In many parts of Southern England and the Midlands temperature exceeded 90° F on the 19th and at the following places the figure for that day is the highest registered since records began —Camden Square (97° F) for 74 years Halstead (97° F) in 40 years Norwich (96° F) in 50 years and Oxford (95° F) in 51 years It is extremely rare for temperature to remain above 70 F throughout the night, but at Lympne it did not fall below 73 F, between 18 h on the 19th and 7 h on the 20th The extreme temperatures for the month registered in standard screens were —(England and Wales) 97° F at Halstead Camden Square, Regent's Park Enfield and Tottenham on the 19th, 32° F at Castleton on the 24th (Scotland) 82° F at Kelso (Broomlands) and Marchmont on the 11th 28 F at Balmoral on the 23rd (Ireland) 80° F at Killarney on the 19th 36° F at Armagh on the 25th In spite of the rainfall deficiency over the country as a whole there were large variations owing to the severe local thunderstorms For example, while less than 20 per cent fell in parts of Kent and Carmarthen there was 186 per cent at Crawley Mill Woburn, 131 per cent at Wellington College, 122 per cent at Stafford and 126 per cent at Douglas, Isle of Man In the Edinburgh district it was the driest August since at least 1785 Sunshine was above the normal in south east England and nearly normal in the extreme north of Scotland and in eastern England Elsewhere it was deficient, markedly so in Ireland Solar halo was observed at Oxford on no fewer than 13 days

September —In contrast with that of August, the weather of this month was mainly wet and very dull in southern and eastern England During the first twelve days conditions were generally unsettled Heavy rain fell at times and the wind was mainly from between south and west north west but with the subsequent movement of the Azores anticyclone in a north-easterly direction the best weather of the month occurred from the 14th to 17th inclusive Temperature rose to 75° F and above at many places Local rainstorms occurred in the south east late on the 18th and thereafter depressions developing near Iceland moved in an east south-easterly direction Cool, unsettled weather prevailed generally but a wedge of high pressure gave a beautiful day at most places on the 21st About the 27th sharp ground frosts occurred, especially in northern districts, on the 28th A depression over the Bay of Biscay, moving northward, caused a renewal of unsettled weather, with rain in the south on the 29th, and more general rain later Monthly pressure means were everywhere below the normal while winds from between south and west-north west prevailed generally during the first half of the month From the 28th, cold winds from some northerly point frequently prevailed. Gales occurred locally on the 8th, 11th, 18th, and from the 25th to 29th Mean temperature on the whole differed little from the normal There were two warm spells during the month, the first about the 2nd and the other from the 14th to 17th The extreme temperatures for the month were —(England and Wales), 81° F at Birmingham (Sparkhill) on the 15th, 26° F. at Houghall on the 21st (Scotland), 76° F at Craibstone and Balmakewan on the 15th, 22° F at Linlithgow on the 28th (Ireland), 76° F at Waterford on the 13th, 29° F at Markree Castle on the 21st and 22nd The general precipitation over the British Isles as a whole

expressed as a percentage was 135 the corresponding values for the constituent countries were —England and Wales 144, Scotland 137, Ireland 109 There were a few isolated areas where there was a deficit at Waterford for example the fall was only 59 per cent of the normal Among the heaviest daily falls were —71 mm at Lynywaun and Stonyhurst on the 2nd and 70 mm at Borrowdale on the 1st The fall at Stonyhurst is the largest daily rainfall there in September for the last 84 years Sunshine was deficient in all districts except north east England and east Scotland At Eastbourne the total of 113 hours was the lowest recorded in September between 1887 and 1932 Aurora was observed on six occasions during the month, while the solar halo was observed at Oxford on 10 days

STORMS AND FLOODS IN 1931-32

(1931) *October* 3 —Three inches of rain fell in Funchal and floods to a depth of 2 feet occurred in the low lying streets 10 After torrential rain at Mons the streets were found to be full of frogs 12 A typhoon swept along the Pacific coast of Japan 21 Basements and lower storeys of houses fronting the Neva at Leningrad were flooded when the river level rose suddenly owing to a cyclone over the Baltic

November 5 —Four lives were lost and much damage caused by floods in the counties of Hordaland Sogn and Fjordane Norway owing to the heavy rains 6 A hurricane struck the oil producing town of Maracaibo Venezuela

December 10 —Three persons were drowned and half the wheat crop of Queensland was destroyed by floods in the south of the State The suburbs of Brisbane were flooded 13 A gale and snowstorm over the whole of Tuscany put the wireless station at Florence out of action and unroofed many houses 14 After three days continuous rain the Maritza overflowed and interrupted railway communication between Bulgaria and Turkey Severe seasonal storms off the Barbary coast caused a great deal of damage to the port and shipping at Algiers Constantine and the surrounding country was covered with snow 25 Snow fell in Bethlehem 28 Rain fell at Florence after the thermometer had gone down to 19° F On reaching the ground it froze immediately 29 Snow fell in Switzerland down to a level of 3 000 feet breaking the drought which had prevailed throughout December Two Dutch aeroplanes were forced down by a snowstorm at Mont Tognan near Senlis 30 A tornado swept across the cotton lands of Southern Mississippi wrecking houses and farm buildings Five persons were killed and more than 50 injured

(1932) *January* 2 —Heavy south east gales swept the Cape, with torrential rain Much flooding occurred and damage to flocks and crops was enormous 7 Heavy rain caused a rise of the Meuse The rivers Sambre and Semois were also in flood 11 During a storm at Bilbao the bell tower of the Convent of Carmelite Nuns fell down One of the nuns was killed and three others injured 12 The French schooner *Rubis* of Dakar, was driven ashore in a southerly gale off Europa Point Gibraltar 13 Eleven persons were killed and over 100 injured in a tornado which swept the Alabama-Mississippi border 16 Thirty thousand people were rendered homeless by great floods in Northern Mississippi Three major breaks occurred in the embankment north of Swan Lake A 10 feet deep torrent swept down on the sleeping families The floods extended for a distance of 200 miles and covered six counties 17 Twenty thousand Zuñi and Navajo Indians were cut off from civilisation in western New Mexico by one of the heaviest snowstorms ever known in that part of the country

February 1 —The Cape to London air mail was forced down by a heavy rainstorm about 40 miles south of Broken Hill Northern Rhodesia 12 A man was frozen to death at Morris Manitoba during a severe blizzard which swept the Prairie Provinces The temperature touched 32° F below zero 20 Heavy snowstorms in the north of Greece interfered considerably with air routes from and into the Balkans

March 7 —Gales snowstorms, and bitter cold caused the deaths of 36 persons along the Atlantic seaboard of New York Much damage was done to shipping 21 A cyclone swept over Alabama The township of Northport was in ruins The number of deaths in Alabama was 246 and damage estimated at $2 000 000 The cyclone spread over five southern States 22 Extensive floods occurred in Adygeisk Autonomous Area, the Kuban Basin and other regions of the Northern Caucasus More than 20 000 collective farms were flooded 29 Nine persons were killed and 50 injured in a second series of storms which broke over Alabama and Western Georgia

April 5 —Much damage was caused by floods in Rumania In Northern Moldavia thousands of acres of farm land were under water Mud rain fell at Florence Genoa and elsewhere in Italy which left slight traces of solid black material on the ground 21 Southern Alberta was covered with about 2 feet of belated snow Heavy rain fell in Edmonton where the rainfall was already over the average for April 25 Seven persons were killed in Tennessee by a tornado which also swept over Arkansas and Alabama 26 A tornado devastated the village of Majhugati, 7 miles from Khulna Bengal 30 In a typhoon over the Philippines 20 persons were killed

May 10 —As a result of a severe storm which swept over Chambery some hundreds of tons of earth were undermined and moved slowly down the valley 9 A tornado struck the Mymensingh gaol, Bengal, and almost completely demolished the walls and buildings 16 A woman and her four children lost their lives as a result of violent storms which broke over the Rhineland The village of Guls was flooded to a depth of from 6 to 10 feet 20 A heavy monsoon rain broke over Burma 27 Eleven persons were killed and much damage done by a cyclone moving round a belt over 60 miles wide

June 2 —Eighty persons were killed and 80 injured in a hurricane which struck the town of Ismail Many buildings collapsed 3 A hailstorm over the Jura region partly destroyed vineyards along Lake Neuchatel A cloudburst

over Oppenheim on the Rhine Torrents of water rushed down the hills and wrought havoc with the vineyards making holes in the ground from 12 to 15 feet wide and 10 feet deep 11 A storm of great severity passed over Jubbulpore and several people were killed by lightning 25 Some 30 persons were drowned and much damage done to property and crops by floods which followed torrential rain and hail in Moldavia and Bukovina 28 Violent storms in the mountainous regions of Portugal destroyed many crops and vineyards Three persons were killed by lightning

July 2—Nine passengers were killed and 15 injured in a train collision near Prague during a severe thunderstorm 3 Torrential rains at the close of the rainy season caused widespread floods in western and southern Japan 4 During a tornado, the principle buildings of Washington (Kansas) were demolished 6 The town and district of Fussen in Upper Bavaria experienced the most destructive hailstorm recorded in Bavaria during the last 60 years 17 As a result of a cloudburst between Florence and Leghorn long stretches of railway line were washed away 30 Canton was flooded after very heavy rain and 200 lives were lost

August 13—A cloudburst occurred in the Bavarian Alps During a 75 m p h hurricane which swept the Gulf coast 13 persons were killed 14 Three men were killed by lightning and 7 were drowned during a thunderstorm in the Rhineland 30 Twelve thousand acres of rich dairy land were flooded in the Wairarapa and Manawatu districts in the North Island of New Zealand 31 A violent thunderstorm burst over Toulouse and much flooding occurred

September 6—Several hundred families were left homeless by floods caused by the overflowing of the Rio Grande River 7 Fourteen persons were killed and between 60 and 70 injured in a hurricane which hit North Abaco Island in the Bahamas 9 A storm of unusual violence broke over Marseilles and severe flooding occurred 17 A 50 m p h gale swept down the Annapolis Valley leaving tremendous damage in its wake 22 A violent storm swept over Southern Ticino The village of Molinaccio was flooded to a depth of 3 feet 26 A hurricane swept over Puerto Rico Two hundred persons were killed and 1 000 injured The damage was estimated at $10 000 000 28 Thunderstorms and heavy rains did much damage all ng the coast from Frejus to Nice 29 While a hurricane passed to the south of Jamaica storm on the north side destroyed more than 100 000 banana trees

BETTER TRADE RETURNS

LARGER EXPORTS OF MANUFACTURES

The returns of oversea trade in October are more encouraging Compared with September exports increased by £4 211 000 or 16 per cent and the greater part of this increase took place in manufactured articles exports of iron and steel, machinery chemicals drugs dyes &c and vehicles (including locomotives and ships) all being higher Re exports also advanced while of an increase of £6 561 000 or (12 per cent) in imports only £1 360 000 was in the form of manufactured goods

For the month of October 1932 the apparent adverse balance of trade was £26,695 000 against £25 136 000 in September and as much as £42 577 000 in October, 1931 while for the first 10 months of the year 1932 the unfavourable balance is £263 749 000 compared with £323 237 000 in the corresponding period of 1931

Compared with October 1931 (in which there was one more working day) imports in October 1932 show a reduction of 24 6 per cent exports of 7 2 per cent and re exports of 30 per cent For the 10 months ended October, 1932 imports were reduced by £120,974 720 (or 17 2 per cent) to £581 017 083 exports by £23 675 318 (or 7 2 per cent) to £301 547 625 and re exports by £10,811,402 (or 20 1 per cent) to £42 720 686

MORE PASSENGERS BY ROAD

WORK OF TRAFFIC COMMISSIONERS

The first annual reports of the Traffic Commissioners for each of the 13 areas in Great Britain review the work done during the year ended March 31 1932

APPEALS

The appeals made against the Commissioners' decisions on applications for road service licences and backings totalled 1 309 Of those 140 reversed or modified the decisions no order was made in 249 255 were withdrawn and 665 are awaiting decision

STATISTICS

On March 31, 1931 there were 47 870 public service vehicles in operation but at the end of that year the number had fallen to 46,230 Passengers increased however from 1 208 508,598 for the first quarter to 1 305 633 718 in the last quarter the total for the year being 5 265,584,930 The daily average number of passengers was 14 400 000 The receipts totalled £58,323,653

The vehicle miles run aggregated 1 318 774,945 The operators of these vehicles numbered 6,434 Of this total 2 760 owned only one vehicle each One company owned 4 841 vehicles

Bissextile.—When Julius Cæsar reformed the Roman Calendar in the year 46 B C, 365¼ days was adopted as the mean length of the year that being the value then current in Egypt Three out of four years were given 365 days and the fourth 366 days, the sixth day before the Kalends of March being repeated The intercalary day came to be called *ante diem bis sextum Kalendas Martias*, or more briefly *bissextum*, whence our word bissextile for leap year

Before the introduction of this calendar the Roman year consisted of 355 days, with a month of 23 days intercalated after February 23 when necessary This intercalation had, however, been sometimes omitted and it was found necessary to make the year 46 B C consist of 445 days This year is called the Year of Confusion

WEATHER RECORD OF THE HARVEST AND HOLIDAY MONTHS DURING THE YEARS 1927–1932

For fifty one years 1876–1926 see "WHITAKER'S" for 1927 (pp 855 860)

1927—*June*—The opening week was fine The following one was cold After this the weather became wet as well as cold and the concluding week was dismal, rainy and sunless

July The same type of most unsettled weather continued There were many rainy days, but occasionally there were sunny intervals

August—The first day of the month (Bank Holiday) was wet from start to finish Two or three rather fine days followed and then persistent rain set in again on Saturday the 20th, it fell in torrents During the week following the weather continued most unsettled but on the 27th there was a change for the better and the last few days of the month were fine

September—There was no rain during the first nine days of the month The tenth day was cold and wet The two following days were dry but not warm On the 13th and 14th wet weather set in for good till the end of the month, first with the wind in a northerly quarter it shifted afterwards to the west and south west

1928—*June*—During the first three weeks the weather was variable it was never very warm and often cold and showery The last week was bright and sunshiny

July—Early in the month a period of great heat often very oppressive set in The weather during the last few days was unsettled

August—The opening days of the month were marked by the occurrence of heavy rains The middle of the month was mainly fine and warm There was more rain again in the fourth week and at quite the end of the month it was unsettled The total rainfall varied in different districts at Greenwich it nearly equalled that of August 1927, when the general character of the weather was much worse

September—Very fine warm and sometimes hot during the first three weeks About the 23rd a cold period set in The rainfall was very small

1929—*June*—Showery during the first part of the month afterwards dry Cool on the whole, occasionally a few hot days last day (30th) very cold

July—Unsettled at first About the 9th a spell of very hot weather set in this lasted to nearly the end of the month Closing days very unsettled

August—A good deal of rain during the first week this was followed by a dry spell Unsettled again during the third week, but the closing ten days were hot and fine

September—Almost rainless very hot during the first seventeen days A slightly cooler spell from the 18th to the 24th was followed by several warm days lasting till the end of the month

1930.—*June*—Mainly warm and pleasant One or two very severe thunderstorms (notably that of the 18th) rendered the rainfall for the month at Greenwich heavy (3 65 inches) though the number of days upon which rain fell (namely 7) were comparatively few

July—The first twelve days were fine and warm After that the weather changed abruptly and the remainder of the month was rainy with comparatively low temperatures

August—A dull and unsettled month up to the 23rd After that there was an abrupt change to hot weather There were thunderstorms locally on the night of the 30th

September—The fine weather of the end of August continued to the 8th of the month The remaining three weeks were wet and unsettled Friday the 26th was a very cold day with torrents of rain

1931—*June*—Round London and in the south east of England there was not much rain in this month though it was very wet in other parts of the Kingdom An earthquake occurred in some parts of England on June 7th in the early morning and a week later (the 14th) a tornado visited the Birmingham district There was a fine warm spell in the south east of England during the last ten days

July—From the 1st till the 10th the weather in the south east of England was excellent Elsewhere there was hardly a day without rain or thunderstorm From the 14th onward the weather became bad in the London district and so continued till the end of the month four fine days excepted (21st to 24th)

August—During the first two thirds of the month the weather was of the worst description possible There were just two or three days of passably warm weather from the 3rd to the 5th But between those dates there occurred a series of thunderstorms which for violence and intensity found few to equal them Over 2 inches of rain fell at Greenwich on the evening of the 5th Then the weather became much worse There was a whole series of downpours for the next fortnight and some days were very cold Towards the end of the month the rains abated The rainfall—judging by British standards—was excessive at Greenwich (6 25 inches) partly owing to the thunderstorm of the 5th, a less amount fell at Kew (3 92 inches)

September—This month again, opened with wet weather but the main feature was the persistent cold There were a few drier and warmer days about the middle of the month, but later the weather became bleak again

1932—*June*—Almost rainless Much sunshine Very warm at the end of the month

July—Much hot weather during the first three weeks with occasional thunderstorms The last ten days were marked by unsettled weather during which sunshine was deficient and rainfall plentiful

August—The month opened badly On the evening of the 1st there was a severe thunderstorm and the next three days were dull and showery From the 5th onwards there was a remarkable change to fine weather which lasted till nearly the end of the month The most persistent feature was the great heat the temperature on several days much exceeded 90° F It was not exactly a period of drought, as during this hot spell there was more than one thunderstorm Heavy rain fell on the night of the 29th, but the closing day of the month was fair

September—During the afternoon of the 1st rain set in and continued with little intermission till the 8th The 9th was a fine, warm day but the next three days were unsettled Then followed nearly a week of warm weather without rain On Sunday the 18th there was a heavy fall, and after this, with the exception of an occasional bright day, the remainder of the

month was marked by cold and sunless weather with frequent rain The winds during this latter period were mainly from the north north west or east

SUMMARY

The special interest attaching to the weather survey of this short series of Holiday Months (1927 1932) consists in the fact that every kind of summer weather is represented The summer of 1927 was distinctly bad and so was much of that of 1931 that of 1930 was very mixed in character The summer of 1928 was very fairly good that of 1929 very good and the summer season of the present year (1932) again good, though comparatively short in duration

Taking the years in the order in which they come the following are the special points of interest With the exception of the disastrous summer the weather of the year 1927 was fairly good The preceding winter was mild the spring fine and warm, and the later autumn pleasant But the bad weather persisting at intervals from the later part of June to the end of September destroyed the reputation of the year in this respect July was wetter than June August wetter than July and September wetter than August The holiday season proved a complete failure and at the end of September the drenched and mildewed corn was cleared off the fields as so much rubbish

The winter of 1927 28 was short, though severe it was over for the time being early in January though there were brief returns of it in March and April The Spring really set in during January the weather was variable, periods of brightness alternating with those of gloom The summer weather lasted from late in June to nearly the end of September There was much rain in the later autumn and in December the extremely severe winter of 1928 29 set in

The summer of 1929 was the terminal period of a drought that began in the early months of the year—that is during the intense cold There was little warmth in June, but most of July and parts of August were hot The heat and drought of September 1929 exceeded that of September 1928 A very wet autumn and wet early winter followed and as a result of this, the rainfall, deficient during the greater part of the year, equalled the average

Much of the spring of 1930 was wet some pleasant weather followed in June and early July the remainder of July and most of August were unsettled There was a short period of heat at the end of August and beginning of September the remainder of the latter month was wet A fine October followed too late, however to be of value for holiday makers and of use for the in gathering of the crops

The later spring of 1931 was wet, April was very cold As regards the earlier summer months the weather was much worse in June in districts elsewhere than round London, and the same remark applies to July August was wet everywhere in Great Britain except in the west and north of Scotland the prohibitive cost of getting there precluded its access to the majority of holiday makers in that month Taken as a whole the bad summer formed the terminal portion of a wet season beginning in April As regards September 1931 that month was distinguished not so much by excess of precipitation as by excess of cold October 1931 was proportionately much warmer than September

In the present year (1932) one distinguishing feature has consisted in the wet and cold late spring following a dry period which embraced part of January all February and most of March In fact the weather of April and May of this year resembled that which prevailed in the corresponding months of 1931 except that whereas last year April had the worst weather in this year (1932) May was comparatively colder and much the wetter of the two months Instead however of a persistence more or less, of cold and wet throughout the three following months as in last year there was a welcome change with a prevalence of great heat during most of June much of July and nearly all August The weather of September 1932 however has shown no improvement over that of the same month last year It was rather wetter and the later part of the month was exceedingly cold

LABOUR AND PARLIAMENT

Strength of the Labour Party in Parliament

BRITISH ASSOCIATION.—The annual meeting of the British Association for the Advancement of Science was held at York from *Aug* 31 to *Sept* 7. The President was Sir J. Alfred Ewing who succeeded Gen. the Rt. Hon. J. C. Smuts and delivered an inaugural address on the subject of 'An Engineer's Outlook.' He spoke in terms of grave concern of the trend of modern mechanical progress. The cornucopia of the engineer had been shaken over all the earth scattering everywhere an endowment of previously unpossessed and unimagined capacities and powers. Man was ethically unprepared for so great a bounty. The command of Nature had been put into his hands before he knew how to command himself. In the mechanization of life machinery delivered a stream of articles in the creation of which the workman had little part. He had lost the joy of craftsmanship the old satisfaction in something accomplished through the conscientious exercise of care and skill. In many cases unemployment was thrust upon him an unemployment that was more saddening than any drudgery. There was a sinister side even to the peaceful activities of those who in good faith and with the best intentions made it their business to adapt the resources of Nature to the use of man. He could not tell where to look for a remedy. A perfect adjustment of labour and the fruits of labour, a fair spreading of employment and of wages and of all the commodities that machines produced, would still leave the question how was man to spend the leisure he had won by handing over nearly all his burden to an untiring mechanical slave? But he could not think that man was destined to atrophy and cease through cultivating what after all was one of his most God-like faculties, the creative ingenuity of the engineer.

The Presidents of the various sections and the subjects of their addresses were as follows. *A*, Mathematics and Physics: Prof. A. O. Rankine, "Some Aspects of Applied Geophysics." *B*, Chemistry: Dr. W. H. Mills, "Some Aspects of Stereo-Chemistry." *C*, Geology: Prof. P. G. H. Boswell, "The Contacts of Geology, the Ice Age and Early Man in Britain." *D*, Zoology: Lord Rothschild, "The Pioneer Work of the Systematist." *L*, Geography: Prof. H. J. Fleure, "The Geographical Study of Society and World Problems." *J*, Economics: Prof. R. B. Forrester, 'Britain's Access to Overseas Markets.' *G*, Engineering: Prof. Miles Walker, "The Call to the Engineer to Manage the World." *H*, Anthropology: Dr. D. Randall-MacIver, "The Place of Archæology as a Science." *J*, Psychology: Prof. Beatrice Edgell, "Current Constructive Theories in Psychology." *K*, Botany: Prof. J. H. Priestley, "The Growing Tree." *L*, Education: Mr. W. M. Heller, 'Present-Day Teaching of Elementary Science.' *M*, Agriculture: Prof. R. G. White, "Sheep Farming a Distinctive Feature of British Agriculture."

The Meeting in 1933 will be held at Leicester under the Presidency of Sir Frederick Gowland Hopkins, P.R.S.

AIR SPEED OF 600 MILES AN HOUR.—Air speeds up to 600 miles an hour which is faster than the speed of sound have been reached in the course of a number of experiments in the Langley Field high speed wind tunnel of the National Advisory Committee for Aeronautics, U.S.A. It was definitely established that with the present conventional form of wing section the increase in drag at about 600 miles an hour is so great that it will be impossible to carry sufficient power to overcome it assuming the present methods of conversion of fuel to air thrust. This is confirmed by experience with high speed propellers, the blade tips of which may be travelling at a peripheral speed approaching the velocity of sound. In such cases their outer portions may be actually exerting negative effect. The delicate mechanisms of the human body do not appear to be susceptible to steady high speeds, but react to accelerations at much lower figures. This arises often during flight when every turn is an angular acceleration. It has been established that the maximum speed that the human body can stand during an average sharp turn is about 300 miles per hour.

ALUMINIUM ALLOY.—A new aluminium alloy known as M.V.C. has been placed on the market by the Metropolitan-Vickers Electrical Co. This alloy is pure aluminium-silicon in which the amount of impurities have been reduced to a negligible proportion. It can be rolled into thin sheet or drawn into bars, spun, pressed or stamped whilst castings can be bent without breaking. It can also be forged and welded without difficulty. It is used principally in the form of castings for parts requiring maximum resistance to tarnish and corrosion. The new alloy has been employed in certain Admiralty work owing to its ability to withstand the effects of salt water and sea air for long periods.

ANTS AS MINERAL DETECTIVES.—A study of ant hills in many undeveloped areas of America has provided valuable clues to the deposits of precious metals beneath the surface. Although occasionally located at the surface the minerals are generally deeply buried and in the case of one big test in the Florida mountains it was only by the examination of the materials of the ant hills along the general projection of the vein that the scientists were able to continue their investigations. The ants they found brought up bits of the minerals from beneath the surface of the earth. The transportation is accomplished by the workers of the ant family. A field investigation in Idaho in a region of weathered igneous rocks was also aided by an examination of the material of ant hills, which in this case showed the presence of quartz. Much of the ant's value as a detective of mineral deposits is said to be due to its remarkable ability in selecting certain mineral soils for their agricultural value. The ant's gifts as a farmer are shown by the activities of one family, which weed a selected space and only allow plants with edible seeds to grow there. In due time the seeds are gathered and stored in the form of little biscuits which are made from a chewed seed dough and dried in the sun.

ARTIFICIAL LARYNX.—The Western Electric Company has made a talking picture of an invention that may be described as a mechanical larynx, which it is claimed, will restore the power of speech to those whose natural larynx has been surgically removed or whose vocal chords are paralyzed. When an operation is performed for the removal of the larynx, the mouth and throat are disconnected from the lungs and the windpipe is terminated in a small

opening at the base of the throat To use the artificial larynx, a rubber pad device is placed over this opening The air which is normally exhaled here by a person suffering from the infirmity is conducted through rubber tubing to a small metal sound box in which is located a reed The force of the exhaled air striking the reed causes it to vibrate, thus producing sound The sound in turn is passed on to the mouth by a rubber mouthpiece, and, through the movement of the mouth, throat and lips, which are actuated in a similar manner as for normal speaking the sound is modulated and converted into intelligible speech It is claimed that the speech as manufactured by the device is almost indistinguishable from the natural voice

AUTOMATIC TYPESETTING — Mr Buford L Green a printer on the staff of the Charlotte Observer North Carolina has invented a process for automatic typesetting which enables a sheet of ordinary typewritten copy to be put into type without the intervention of a line type operator The copy is typed in the usual way on an ordinary keyboard but the typewriter is so built that with each letter typed a symbol in the form of varying combinations of dots representing that letter appears on the paper The symbols are all that are essential the letters being given on the keyboard merely for the convenience of the typist The paper is placed in the carriage of a linotype machine, and the carriage released by an electric switch This carriage then moves to and fro automatically passing the whole of each line of the dotted typescript in succession under a tiny beam of light As each combination of dots passes under the beam the light passes through the paper and falls on a photo electric cell which converts the light impulses into electric impulses and these in turn operate the mechanism regulating the release of the proper matrix from the magazine For the purpose of demonstration the machine was regulated to produce six lines a minute but it is claimed that its speed is limited only by the ordinary limitations of the linotype machine

BEACON FOR AIR TRAFFIC — The Companhia Aga do Brazil a subsidiary of the Swedish Aga Company has built a lighthouse for aviation and shipping on the almost inaccessible islands Penedos de Sao Pedro e Sao Paolo a considerable distance off the coast of Brazil It was primarily the needs of Transatlantic aviation that decided the Brazilian Government to have the lighthouse constructed Owing to the difficulty in landing on rugged rocks the only possibility was to select an Aga beacon, the invention of Dr G Dalen the blind Swedish Nobel Prize winner, who lost his sight while experimenting with the accumulation of gas needed for these lights The Aga beacons, through a device called the sun valve, work automatically, extinguishing themselves at daylight and switching on the light at dark or in a fog without being touched by a human hand for more than a year When the gas mantle is burnt out it is automatically replaced Besides this lighthouse, said to be one of the most powerful in the South American waters, a reserve beacon has been built on the same islands and constructed so as to operate automatically if the main light should get out of order

"BLACK FLY" PEST IN JAMAICA — An announcement by the Jamaican Department of Science and Agriculture suggests that the "black fly, which has for years been a menace to cultivation chiefly of citrous trees, in Jamaica is likely to be exterminated in the near future These particular flies cluster in large numbers on domestic plants, they suck the sap, with the result that the trees become weak and unhealthy and do not produce the maximum quantity of fruits The Department is combating the pest by means of millions of tiny wasps which on being hatched attack the black fly With its sting the wasp punctures the body of the black fly, and lays an egg in the wound In a short time the grub developed from the egg destroys the "fly It then emerges as a fully formed wasp and repeats the work of its mother

BLIND READING PRINT BY SOUND — MM Thomas and Coniand, two French inventors, have devised an apparatus by which ordinary print can be made legible for the blind The apparatus is called the photoelectrograph A ray of light is passed over the printed page, and as each letter is illuminated the corresponding letter is presented in relief and in magnified form in another part of the machine where the blind reader identifies it by touch Not only ordinary print, but also Braille can be read with the machine, and in the latter case the Braille characters can be printed with ink on a smooth page and need be no larger than ordinary type, thus reducing Braille types to a convenient size and making them cheaper and easier to produce than hitherto

BRINE FREEZING OF FISH — The new method of freezing fish by means of brine, as carried out at the Torry Research Station Aberdeen, has proved entirely successful By improving existing methods of handling and stowing while fresh at sea, it had been found possible to keep it in good condition for fourteen days but when trawlers went to more distant fishing grounds cold storage at temperatures of about 15° F had not been very successful With brine freezing at —5° and subsequent storage at —6°, it has been found that fish can be kept for periods up to three months In the course of a number of experiments last summer fish caught off Aberdeen by a vessel attached to the Torry Research Station two or three months earlier were eaten with relish in London The capital value of the brine freezing and storage plant is about £1,700, but figures have been prepared to show that, allowing for depreciation and maintenance costs, the use of the plant would be to the financial advantage of the trawler owner He would be saved the loss at present caused by deterioration of part of the fish The view is also held that there would be brought about an improved supply of fish in prime condition and the gradual elimination of stale fish

CAST IRON ROADWAYS — The first cast iron roadway laid in a public highway to the satisfaction of a public body was put down in West Ham in August, 1931 The system, which was invented by Major Frank Small, is known as the Tripedal Unit System of Cast Iron Road Surfacing, and the construction is being adopted by boroughs in various parts of England and is also being laid on the Continent The units are

constructed of equilateral triangular castings, measuring 2 ins by 12 ins and weigh 10¼ lb Ten square yards of this cast iron construction weighs one ton

CIGARETTES AND SOUND.—Prof Andrade, Quain Professor of Physics at University College, London, has discovered that the smoke of the "gasper"—the comparatively cheap cigarette—is the ideal indicator for the rapid vibrations of air which we experience as sound By this means he has obtained direct measurements of the movements of air during the passage of a sound, and his results may find industrial application in the 'clotting' of smoke to enable waste products to be recovered An assistant blows the smoke through a drying tube into the long tube in which the sound experiments are conducted The movement of the air is extraordinarily small Although movements down to one thousandth of an inch can be measured it is estimated that the human ear can detect movements of less than one millionth of this amount corresponding to a change of pressure of one thousand millionth of that of the atmosphere

CREASELESS COTTON.—Fourteen years of research and the expenditure of thousands of pounds by the Tootal Broadhurst Lee Co has resulted in a process for the treatment of cotton artificial silk, and silk textile fabrics which renders them as creaseless as woollen materials It was found that by putting a synthetic condensation product inside the cotton hair and inside the artificial silk filament, so that it enters these spongy substances just as a dye goes into a properly coloured cloth, the fabric of cotton or artificial silk was endowed with wool like properties in respect of creasing The condensation product has the advantage of adding to the weight of the material, and, as it is cheaper than cotton, and the method of applying it is not expensive, it can be used for a large range of fabrics The process has a further advantage when used with artificial silk of the viscose variety, it not only strengthens the material in the dry state, but it nearly doubles the wet strength, and thus overcomes a notable defect of certain artificial goods in becoming rotten by washing The process is also applicable to linen, shoddy, and silk

DEAF SPEAKER.—Prof F Bedell, the well known physicist of Cornell University, has invented a device which will enable the deaf to hear radio and gramophone music He calls it the "deaf speaker," because it serves a purpose similar to a loud speaker in a radio set It does not broadcast sound, but carries vibrations of the requisite amplitude and frequency to anyone who holds the receiving part of the apparatus with his teeth or pressed against his forehead or a cheekbone Prof Bedell worked on the theory that most people who hear badly have a defective middle ear, and sought to bring the sound waves to the inner ear by some other channel He found that it could be done by bone conduction to the inner ear of the listener It was not sufficient to transmit vibrations of the same frequency as the actual sound waves to the inner ear of the listener, they must first be adjusted to the requisite loudness and frequency This adjustment is substantially what takes place in the normal middle ear Prof Bedell's deaf speaker steps up the force of the sound waves very appreciably Since some people are deaf to high tones and others cannot hear lower tones the deaf speaker is provided with a device for altering the frequency At a demonstration at the National Academy of Sciences, Prof Bedell showed two kinds of receiving instruments in one of which the receiver, which looks like a long tube is held between the teeth while the other consists of a flat disk held against the forehead or a cheekbone The disk type has made it possible for deaf people with the aid of a microphone to hear their own voices

ECLIPSE OF THE SUN.—A total eclipse of the sun occurred on Aug 31 The track of totality after passing the North Pole crossed Hudson Bay Quebec Province Vermont New Hampshire, and Maine and ended in the Atlantic Ocean The belt of totality was about 100 miles wide, and at the centre of the belt the eclipse lasted about 100 seconds Unfortunately clouds obscured the eclipse for many of the observers At Louisville, 50 miles north of Montreal eight photographs of the corona were obtained with an 8 in camera The shadow bands began 30 seconds before totality and continued for 30 seconds after it They came from 6 inches to 8 inches apart at the beginning and gradually closed to about 2 inches apart Prof Andrew Thomson of the Canadian Meteorological Service, noted that the shape of the corona was more pointed and less evenly arranged than in the eclipses of 1918 and 1919 Prof N Hiyama director of the expedition from the University of Kyoto observed the eclipse from Alfred Maine, and obtained what he believes to be a unique and perfect picture of the entire corona and colour photographs of every part of the spectrum, ranging from the ultra violet to the extreme infra red He also claims to have discovered a new gas in the spectrum, which he has called "forty one

"EGYPT'S GOLD RECOVERED.—Gold in ingots and sovereigns to the value of more than £725 000 has been recovered from the P & O liner *Egypt*, which was sunk in collision in 1922, with a loss of many lives 25 miles south west of Ushant at a depth of 66 fathoms The value of the whole treasure which was sunk is substantially more than £1,000,000 The cargo of gold consisted of 1,089 ingots, which were packed in 122 cases, and weighed something over 4½ tons There were also 37 boxes of gold sovereigns to the amount of £164,979, and 43 tons of silver, consisting of 1,229 bars weighing between 60 lb and 70 lb each The finding of the gold was the fruit of long and patient effort, for the Italian divers on the salvage boat *Artiglio* had been working on the wreck for three years

ELECTRICITY TRANSMISSION.—The method by which an electric current passes through metal is claimed to have been discovered by Prof J C McLennan, of Toronto University. He has combined metals which, under very low temperatures, proved themselves perfect conductors of electricity These alloys, made into rings, have carried an undiminished flow of current round and round for hours at a time, the flow, in some experiments, having measured up to 100 ampères, or enough to have brought 100 electric light bulbs to full brilliance The temperatures at which these alloys were perfect conductors were created through the use of liquid helium, and Prof. McLennan states that

it only remains to discover an alloy which will be a perfect, or nearly perfect, conductor at ordinary temperatures in order to make all existing electrical transmission equipment obsolete

EYEBROWS AND EYELASHES.—Prof V Suk and Dr F Rosplym of the Faculty of Science of the Masaryk University Brno, have published a preliminary report of their study of eyebrows and eyelashes in man They divide eyebrows into 11 types, according to form, which varies extensively Of 470 cases the greatest number are classified as spreading those which are evenly formed on each side occurring much more rarely, 96 cases of the latter as against 157 of the former The "even" occurs 20 times as frequently in women "Peaked," rising in the middle, is rare, occurring 12 times only "Narrowing" in which the eyebrows are thick at the medial end and narrow towards the distal side, seems to be a feminine form occurring three times as often in women A whorl running outward from the nose is also feminine Long curved eyelashes occur 250 times in a total of 470, being present twice as often in children under 16 years of age It is an infantile form, for this type of eyelash is shed at puberty and often replaced by a different type Short and straight occur equally often in men and women, but never in childhood Short curved is least represented and occurs most frequently in men never in children Form and colour are not inherited together, but the inheritance of form is clearly to be seen

FISH STEERED BY ELECTRICITY.—A scientist at Oregon State College has discovered that fish are sensitive to weak electric currents and that it takes very little power to paralyze them that less shock is needed to stop long fish than short ones that they recover from shocks according to their vitality that when they get too much electricity they are stunned and change colour and that high frequency current has very little effect on them In a recent development in the salmon rivers of the American North West, fish are steered towards the right streams by placing electrodes across the mouths of irrigation ditches loosing a current of 24 volts which induces the fish to avoid the wrong turnings

FLYING FOXES IN AUSTRALIA.—The Australian Council for Scientific and Industrial Research has conducted an enquiry into the prevalence of the flying fox and its economic significence It is shown that flying foxes, some of which measure 4 feet from wing tip to wing-tip, are not a serious menace to the fruit industry, and since the numbers are much greater than had been supposed, the effective control of them is regarded as beyond compass at reasonable cost These bats live in "camps," and a typical Queensland "camp" during the day, when the animals hang asleep upon the trees, covered 5 to acres of rain forest When the camp rose for the night at 6 o'clock it formed a great column, about 100 yards wide and 100 feet deep in the centre, which continued to discharge itself out of the trees continuously for 25 minutes The number of bats was estimated at about 220 000, and this was a small camp. A really large camp on Red River was half a mile wide and about 4 miles long, and the bats were present in millions

FORESTS PLANTED BY THE BRICK.—Prof Svend Heiberg of the College of Forestry at Syracuse, who has been studying forestry methods in Europe, has described a new type of seed sowing developed in Norway which he terms "planting forests by the brick instead of by the tree The seed bricks or briquettes are made of good soil, and are 1 in × 1½ in in size Three or four seeds are placed at one end near the surface, and the briquette is then dipped in paraffin wax, except the side in which the seeds have been placed The briquette can then be put in the ground by means of a specially designed tool Prof Heiberg who has been experimenting at the College with this new system of planting, suggests that the idle land in the United States may be reforested by this means, but it would only be practicable on fairly land free of heavy weed growth

GULF STREAM.—Mr P E Church has communicated to the American Geographical Union the results of his investigations on the behaviour of the Gulf Stream from which it appears that the stream has many irregularities in width and temperature but no seasonal fluctuations The data were obtained by recording instruments placed on commercial vessels crossing the triangle of waters between Halifax Bermuda, and the German coast Inshore water extends to about the hundred fathom line beyond which is a wide area of cold water ending in a narrow band of cold water believed to be due to upwelling from the depths The Gulf Stream lies beyond, and was found to be 50 miles wide off Cape Hatteras and not more than 70 miles wide south of Nova Scotia Outside the Gulf Stream to the south east lies a broad area of warm water reaching towards mid ocean During the winter months and occasionally at other seasons, the Gulf Stream flows as a double stream, with a tongue of cold water between which may pinch off the northern stream and push the main stream considerably southward Mr Church doubts if wind action is the cause of this South of Halifax the northern end of the Gulf Stream averages a distance of 290 miles offshore, but varies between 230 and 420 miles

HAIR IN DETECTING CRIME.—A new method of determining accurately the age of a human being by the hair rings is claimed to have been found by Dr Carlton Hood, of the scientific crime detection laboratory of Northwestern University, U S A The human hair, he says, is as important as a finger print It is possible to prove that one hair can come from only one man The ring system is quite simple Rings run around the hair at intervals along it, and not one inside another as they do in a tree trunk or an onion A young woman's hair grows rapidly Age makes it grow slower and not so steadily A hair grows for a time, then stops for a time Each stop produces a discoloration at the point where the hair emerges through the scalp, and the discoloration becomes a ring. If there are six rings to a tenth of a millimetre, the subject is twenty if there are twelve rings to a tenth of a millimetre, the subject is forty. Dr Hood says he has helped solve one murder by the hair test A Hindu was killed, and a single black hair was found clutched in the victim's hand. After routine tests, Dr Hood advised the police to search for a Philippine, aged thirty two, a dish washer, who often went

bareheaded and had a scalp disease unknown except in the tropics And so the criminal was duly traced

HALF A MILE UNDER THE SEA —Dr William Beebe and Mr Otis Barton whose diving experiments were described in WHITAKER'S ALMANACK for 1931 have succeeded in descending to a depth of half a mile below the surface of the sea at a point off Nonsuch Island, in the Bermudas They once more used Mr Barton's invention the bathysphere, which is a steel ball built to resist tremendous pressure and equipped with more than 40 gallons of oxygen Two hours were spent on the voyage Wireless stations in New York first picked up Dr Beebe's voice in describing his experiences when he was 1 500 feet below the surface At 1 700 feet he said It is pitch black now but he was able to make out a number of fish which were visible only by the light radiating from their luminous sides The colour of the fishes varied from pale green to pale blue there were no deep tones Many photographs were taken At a depth of 2 000 feet the sea resembled a clear sky at night whose black depths are full of stars At the lowest point the pressure on the bathysphere was 5,000 tons and the inside temperature was 50°

HUMBOLDT CURRENT —Researches conducted from the R R S *William Scoresby* throw doubt on the generally accepted explanation that the Humboldt Current of the Pacific coast of South America is derived mainly from the westerly drift of the Southern Ocean and only partly by the upwelling of cold water The *William Scoresby* was engaged in surveying the Humboldt Current during the winter of 1931 The current was not found at that season south of Valparaiso which seems to dispute the view that the surface drift of the Southern Ocean feeds it and favours the secondary cause namely the upwelling of cold water due to prevailing south east and south erly winds The current reaches its maximum width and greatest strength about 25 miles a day off Peru It finally disappears about five degrees south of the equator underneath the warmer waters of the El Nino current that sets south The El Niño waters occasionally pass inside the cold Humboldt waters with disastrous consequences to the climate of Peru The Humboldt Current has always been known to be very variable from year to year and its seasonal fluctuations take it well south of Valparaiso in summer and even in winter but at that season at a considerable distance from the coast

INFANTILE PARALYSIS —At a meeting of the American Association for the Advancement of Science, Prof Frederick Eberson, director of the clinical laboratories and research at the Mount Zion Hospital San Francisco, announced that he had succeeded in cultivating the virus of poliomyelitis (*infantile paralysis*) in a special culture medium and in reproducing the disease in the monkey by inoculation of the culture The virus has long been known as an invisible and filterable one in which state it is present in the brain and spinal cord of the patient but in the culture it is claimed that it becomes larger and assumes a form which is just visible microscopically

INSECT DENSITY AT SUNRISE —A number of experiments have been made in France by Mlon A Bonnet to determine the "entomological density of the air a few feet above the ground This quantity defined as the number of insects in a cubic metre was obtained by means of a muslin net attached to the front of a motor car The car was driven for a kilometre in unfrequented regions far from places where insects collect in exceptional numbers and the insects in a 1 000 cubic metre sample of air were collected and counted The density was found generally to vary from one or two at sunrise to about 70 in the early afternoon with a subsequent decline to one or two again at sunset Those species normally found only very early and late tended to appear in the middle of the day when the air was nearly saturated

K GUTTA —In a paper published in the *India Rubber Journal* Mr F N Dean describes the preparation and properties of a new thermoplastic insulating material known as K gutta which has been specially designed for the insulation of submarine telephone cables and high speed submarine telegraph cables K gutta consists of an intimate mixture of 60 to 70 per cent of gutta percha hydrocarbon with 30 to 40 per cent of purified petroleum jelly The dielectric constant of K gutta is only 2 5 under the working conditions of a submarine cable compared with the value 3 3 for normal cable gutta percha and its power factor under similar conditions towards an alternating current of 2,000 cycles only about 1 that of gutta percha

LIVINGSTONE CLEAR VIEW SCREEN —Mr R W Livingstone has patented an invention for securing a clear view from the bridge of a steamer in the worst of weather The device consists of two screens set up in parallel with two open slits exactly opposite each other through which the clear view is obtained Below the outer slit there is a channel three times as wide as the slit which leads upwards and backwards through the open space between the slits into a continuation of the channel, which passes over the head of the look out man The wind and rain which rush in through the outer observation slit are met by the wind which enters by the outer channel below and the force of the wind through the channel being so much greater carries the wind and the rain upward and through the upper channel In other words the wind is used to blow the wind away In one experiment it was found that with wind and rain ahead the screen stopped about 80 or 90 per cent of the rain and all the wind, and in another experiment it was reported that 'practically every drop of moisture is driven over the look outs head before it reaches the eyes or face

LONDON'S NEW WELL —A supply of 8 000,000 gallons of water daily is made possible by the construction of a new well at Deptford, as part of a great scheme of improvements by the Metropolitan Water Board The diameter of the mouth of the well is 14 ft., it is 118 ft deep and its cost was £300 000 It has been connected by adits to three older wells which are now replaced so that its great pumping plant which raises the pure chalk water to points 400 ft above the River Thames, now brings all the supply up the new shaft The water being pumped direct from the chalk, does not require filtration, chlorination, or treatment of any sort

MICE PLAGUE IN AUSTRALIA.—Vigorous attempts are being made in Australia to combat the plague of mice, which are causing enormous damage to crops. The greatest visitation of these pests occurred in 1917. The plague was first noticed in February and March of that year; it was at its acme between April and August. At Lascelles, three tons approximately 200,000 mice, were caught in one night. Until the end of June, 1917, the recorded total caught was 544 tons, at least 32,000,000 mice. In March ... after all the wheat had been trucked from the Jab railway station, near Warracknabeal in Victoria, a raid was made on the mice. The site was fenced and two 40 gallon oil drums were sunk in the ground. The dunnage was then cleared and the mice driven into the drums. On the first night the catch, placed on the weighbridge, weighed one ton, and on two successive nights eight cwt. and ten cwt. were caught.

MICROPHONE FOR THE COAT LAPEL.—To get over the difficulty of speakers who move about freely in front of the microphone, with the result that sometimes they can scarcely be heard, the Bell Telephone Company has invented the lapel microphone. This instrument is only about an inch in diameter and weighs one and a half ounces. A thirty foot length of flexible cord provides the connexion to the amplifier of the public address system. The diaphragm is made of thin aluminium in the form of a cone of sufficient stiffness to cause it to vibrate as a unit throughout the required frequency range. A rubber covering eliminates the disturbing noise which would otherwise result from rubbing against the speaker's clothing, or would be picked up through the clip which is provided for attaching it to the clothing. The best place to attach the clip is to the lapel of the speaker's coat. This device has been used successfully in large auditoriums in America where it has proved useful to speakers who depend on gestures for effective delivery or who need to turn to explain lantern slides or to use a blackboard.

MUMMIES UNDER X RAYS.—Mr. Roy L. Moodie has carried out an X ray study of the unopened Egyptian and Peruvian mummy packs in the collections of the Field Museum of Natural History, Chicago, which has yielded valuable additions to our knowledge of diseases in ancient times. The percentage of disease or injury among the fifty-three mummy packs examined is high, 10·52 per cent. of the Peruvian pre-Columbian mummies and 40 per cent. of the Egyptian being affected. The examination of the Peruvian children showed no evidence of rickets, but there was a trace among the Egyptians. The Egyptian mummies showed arthritis arteriosclerosis, and absorptive osteitis resulting from pyorrhœa. Owing to the masses of pitch or sand-sprinkled tar which obstructs the head and masks and ornaments, the interpretation of the teeth is not possible. In the Peruvian mummies arthritis and arteriosclerosis are rare. Few cases of caries can be identified, owing to the intervention of various objects. Pyorrhœa and calculus are common. Nasal disturbances of the turbinates were revealed, though none is sufficiently clear to admit diagnosis. Aural tumours were a frequent cause of partial or complete deafness.

MUSK RAT IN EUROPE.—Two cases have been put on exhibition in the Natural History Museum, South Kensington, in order to show what kind of animal the musk rat is, how it lives, and the damage it does. Well known as the musquash, an inhabitant of North America, the musk rat has been for many years of considerable commercial value because of its beautiful thick soft richly coloured and glossy fur. In its original home, the increase of the musk rat is controlled by the usual kind of checks, which do not exist or have not developed elsewhere, and in consequence the animal has become a destructive plague. It is said that in 1905 two males and five females were turned loose in Bohemia, twenty-one years later there were computed to be no fewer than a hundred millions of these animals in Central Europe. Owing to their burrowing habits, the damage that they do to waterways, fields and bridges is enormous. In Great Britain the danger has been recognised, and under the Destructive Imported Animals Act regulations have been made to control the distribution of the musk rat in this country.

NEANDERTHAL MAN.—During excavations at Florisbad Hot Springs, 25 miles north of Bloemfontein, Dr. Dreyer, Professor of Zoology and Archæology in the Gray University College, discovered the skull of a species of man whom he has named Homo Helmei. Homo Helmei, he says, bears out the thesis of Sir Arthur Keith that each continent produced its own human races, and also Dr. Hrdlicka's thesis that Neanderthal man has not disappeared but is still living to-day in his modern descendant, Homo Sapiens. His conclusion is that during the Pleistocene period Homo Neanderthalensis must have had a wide distribution and had been differentiated into local races just as Homo Sapiens to-day.

NORMAN LOCKYER OBSERVATORY.—On May 28 Sir Frank Dyson, the Astronomer Royal, opened the new Mond photographic equatorial and dome at the Norman Lockyer Observatory, Salcombe Regis, which had been presented by Sir Robert Mond, a generous supporter of the observatory since it was founded. The instrument consists of a battery of four cameras with lenses of different sizes and different focal lengths. It is fitted with clock mechanism, so that it will be possible to follow automatically the movements of the heavens over a wide field of the sky, and obtain exposures hitherto impossible in England. The uses to which the instrument can or will be put include the photography of meteors, comets, or large nebulosities of the galactic type. In addition, the search for new minor planets, comets, variable stars, and novæ can be undertaken with a greater hope of success than where an instrument of greater power but smaller field of view is used.

PEKING MAN'S USE OF FIRE.—Evidence that "Peking Man" knew how to make fire and used stone implements has now been laid before the Chinese Geological Society. The careful work of Mr. W. C. Pei, the Chinese geologist in charge of the excavation of Chou Kou Tien, where the "Peking Man" was found, has been rewarded by the discovery of a large selection of stone implements which have been chipped with great skill, thus emphasising the fact that the human

qualities of appreciation of form and skill in manipulation found expression in the making of excellent tools The discovery that the 'Peking Man' used fire, which has been confirmed on the spot by the observations of the Abbé Breuil the French palæontologist puts back the history of fire making to a period more than twice as remote as that which hitherto had been assumed and establishes the contention that "Peking Man was definitely human Whether he used the fire merely to keep himself warm or to cook his meat is not certain

PENMAENBACH TUNNEL —After two years work a tunnel has been cut through a bastion of rock known as Penmaenbach on the coast road between Conway and Llanfairfechan, North Wales Its course 565 feet long is through a fissure ridden headland round which runs a notorious section of the Chester Holyhead road, where owing to a treacherous geological formation the traffic has long been threatened by landslides of shale from the steep screes which strew the face of the mountain The tunnel consists of a carriageway wide enough and high enough to permit freely of the passage of double decker omnibuses and of a roomy path way for pedestrians

PETROL FROM COTTON SEED OIL —Dr Gustav Egloff a Chicago chemist described to the American Chemical Society at its meeting at New Orleans his achievement in making a high grade of petrol from cotton seed oil The present cost of such petrol is too high to make it a competitor with the ordinary commercial product but as the same process can be used with other vegetable fish shale, and coal oils of low cost, it has obvious commercial possibilities in countries where petrol is not cheap Dr Egloff ran the cotton seed oil through a metal coil at a temperature of 900° F and at a pressure of 150 lb per square inch The rearrangement of the atoms results in a yield of more than 50 per cent of petrol a heavy fuel for Diesel engines coke 13 different gases, some of which are commercially profitable, and a kind of alcohol

PHOTOGRAPHING ERASED WRITING At one end of the spectrum are the invisible ultra violet rays by means of which Dr Menthe a German professor made a photograph in 1908 Five years later Dr Koegel discovered that erased writing could be brought out by short wave ultra violet rays with an exposure lasting many hours and Lt Col W R Mansfield has now evolved a method whereby he obtains similar photographs in a few seconds He makes his "luminograms" in a special instrument in which the ultra violet rays pass through a silver screen before reaching the photographic plate Traces of chemicals in the inks used can never be wholly eradicated, and under the rays it is possible for the writing to be read clearly A notable success was made with an old blank parchment which had been picked up in Turkey as part of the loot of 1921 of the ex Sultan's palace It had been washed and scraped to get rid of the original writing, to make it available for a new communication Under treatment by Lt Col Mansfield it was proved to be a document addressed to the great Emperor of the Mussulmans," which seemed to deal with the appointment of Count de Choiseul de Gouffier, and was signed by Louis XVI of France

PHOTOGRAPHING THE INVISIBLE —By a method of photography which has recently reached a practical stage it is possible to photograph through mist and haze and to secure remarkably clear pictures of distant objects which are invisible to the naked eye The process has been perfected by Mr Olaf Bloch, chief chemist to Messrs Ilford and President of the Royal Photographic Society He knew that it is impossible to see far in misty or hazy weather because the moisture in the air scatters the light The light is scattered also on a fine day, though less when the light is yellowish or reddish as towards sunrise or sunset Red light is scattered less than blue The problem has been how to use the infra red light in the atmosphere, and to exclude all the light in the atmosphere which is not infra red This has been achieved by a filter, or suitably dyed piece of gelatine placed in front of the lens which allows infra red rays alone to penetrate and to carry the image Though infra red light is invisible to the eye the sensitive material employed in the camera is responsive to it Thus by an infra red sensitive plate photographs can be taken at distances not possible in the ordinary way with a telephoto camera, and objects revealed which the eye cannot see By this means it has been found possible to take a panoramic picture of the coast of France from Dover, and of Ben More from the Wallace Monument at Stirling a distance of 29 miles

PICTURE CONSERVATION —A new method for the conservation of pictures has been invented by Mr S Kennedy North, and successfully applied to the two famous Titians 'Diana and Actæon and Diana and Callisto in the possession of the Earl of Ellesmere The picture is first thoroughly soaked in a solution of paraffin wax which is chemically and bacteriologically inert and has the power of slowing down the action of any solvent that may be applied to the painting It is then placed in a frame of metal and asbestos with a glass top with holes for ventilation and appliances for regulating the temperature and pressure and an electric fan to induce a regular circulation of the solvent vapour The picture is placed face upwards in the frame and the solvent vapour applied Its action is to dissolve the binding constituents of the varnishes leaving them other ingredients in the form of a resinous powder which is then carefully removed The effect of this process is to remove the varnishes without disturbing the delicate original glazes underneath and not only to restore the picture to its original condition without the least injury to the pigment but to preserve it against future damage from time insects, and atmospheric influences

PNEUMATIC TYRES FOR FARM USE —The latest development of the commercial use of rubber is the pneumatic tyre adopted for use on farms known as the land tyre it is a product of Fort Dunlop and is designed to overcome the disadvantages of the old large diameter wheels with iron rims In a series of tests carried out at Castle Bromwich a two wheeled cart was equipped with 8 in tyres on 19 in wheels It is claimed that by means of the invention heavier loads can be carried and that the saving of horse power is equal to at least 50 per cent greater speed can be achieved, travel over soft ground is made easy, and obstructions logs ruts

and inclines are readily surmounted the carting of loads over grass land can be carried out without cutting ruts the low loading cart with its small diameter wheels reduces handling effort, time and labour are saved in potato planting when used for transporting cattle to market the animals travel in greater comfort and at greater speed the cart does not break down ridges or harden furrows and there is a reduction in the initial cost and maintenance of wheelwright's work The rubber of the tyre is compounded to resist farmyard acids

PREHISTORIC SETTLEMENT IN WILTSHIRE — During the last six years Mr Alexander Keiller has been excavating the site of the prehistoric settlement at Windmill Hill Wiltshire about one mile from Avebury and 625 feet high The earthwork was found to contain three concentric ditches dug in the solid chalk in short, straight sections adjacent sections being divided by a causeway The most spectacular of his discoveries was the earliest example of a skeleton of a domesticated dog which is regarded as probably being earlier than the domesticated dogs known to have been used by the lake dwellers in Switzerland He also found the skeleton of a six months old child which was dolichocephalic like the skeletons in the British long barrows and the state of its teeth indicated that it suffered from measles The stones found belong to formations in North Wales and Scotland showing that the people of Windmill Hill were in communication with those parts while the remains of wood charcoal indicate the presence of wild apple trees, oak, poplar, willow elm ash and hornbeam

RAILWAY RUN AT 92 3 MILES AN HOUR — Another record for the fastest train journey in the world was made on June 6 by the Cheltenham Flyer on the Great Western Railway The non stop run from Swindon to Paddington, a distance of 77 3 miles was made in 56 min 47 seconds, at an average speed of 81 6 miles per hour which beat the record of 1931 made over the same route of 80 7 miles per hour In order to get this average including the time spent in getting into speed and the slow approach to Paddington it was necessary to run a distance of 70 miles in exactly 48 minutes or at an average of 87 5 miles an hour, while for 30 miles the speed was maintained at over 90 with a maximum of 92 3

SEAWEED ORIGIN OF PETROLEUM — In a paper read before the Institution of Petroleum Technologists Mr J E Hackford indicated what he regarded as the precise method by which petroleum has been derived from the decomposition of marine vegetation He claimed to have established the formation of oil from algæ by processes similar to those obtaining in Nature the presence of decomposition products of algæ in both naturally occurring oils a obtained from wells and also from various oils and bituminous deposits the reconversion of oils n to materials closely resembling, sometimes identical with the constituents and decomposition products of algæ, the formation of oils from sugars and the reconversion of oils into bodies resembling bitumens which on hydrolysis yield sugars

SHIPS GUIDED BY COLOURED LIGHTS — Ocean liners may soon be equipped with a three colour signalling apparatus similar to that used for traffic control Experts at the Radio Research Station Datchet, under the Department of Scientific and Industrial Research, have produced a wireless navigating device which automatically records deviations from a course set on any wireless transmitting station Red means that the helm is to port of the true course, green to starboard yellow that the course is truly set. The apparatus is guaranteed sensitive to three degrees and with more elaborate methods of detection can be made sensitive to half a degree The adjustable apparatus consists of two wireless receiving sets which can be tuned in to any desired station in the normal manner Where no station is on the exact course corrections could be made on any desired bearing One of the attractions of the new navigator is that, unlike a compass needle it cannot swing The effective indicator is a narrow beam of fast moving electrons which are so light that they have virtually no inertia This means that all movements of the ship are immediately shown The great advantage of wireless navigation is that the effect of drift is entirely eliminated Moreover, if wireless observations are taken in conjunction with magnetic bearings throughout a voyage the position of the ship is obtainable exactly without astronomical bearings

SLEEP — The theory that sleep is caused by the pouring into the blood stream of a chemical manufactured by one of the ductless glands of the body receives definite support from a discovery by Prof Hermann Zondek, of Berlin He has discovered a new hormone or internal secretion which is stored in the pituitary gland at the base of the brain and is discharged during sleep into the fluid surrounding the brain, and hence to the blood stream When the patient wakes this discharge ceases and the hormone is once again stored in the pituitary gland Prof Zondek examined the blood of certain patients suffering from manic depressive insanity, and found that there was less than the normal quantity of bromine present becoming normal between the attacks Carrying his investigations further he found that this lack of bromine was due to the absence of a hormone manufactured by the pituitary rich in bromine He succeeded in isolating the hormone in a soluble form and on injection it produced fatigue apathy, and a great decrease in motor power These discoveries fit in with the fact that bromides have a great reputation as sedative drugs and also with the fact that one of the features of the form of insanity studied is the absence of regular refreshing sleep

SPLITTING THE ATOM — Dr J D Cockroft and Dr E T S Walton, who had been working for three years on special apparatus in the Cavendish Laboratory Cambridge under the direction of Lord Rutherford have succeeded in 'splitting the atom Using voltages of between 120 000 and 600 000, they sent several millions of particles per second through a vacuum tube at a speed of 10 000 kilometres per second It was found that the bombardment of different elements by the particles split light elements but for every atom split several millions of particles were required "We concentrated on an atom of hydrogen, Dr Cockroft said We were prepared to work on voltages ranging from 100 000 to 500 000 volts. We found that at 120 000 volts some of the atoms we were bombarding began to break up into helium These helium atoms came out with energies of

the order of 100 to 250 times that of the particles we were firing into them. In one sense it is true that by this means we are turning 120 000 volts into 190,000 volts But only one particle breaks up for every 10,000 000 we use to bombard it. We are producing from these atoms 100 to 160 times of the known energy but only once in 10 000,000 times Therefore it would only be strictly true to say we were turning 100 000 volts into 160 000 volts if every atom broke up Dr Cockroft also said that though the discovery was of immense scientific importance it was not of immediate practical value

STAINLESS STEEL WELDING.—According to the 'Scientific American' steel with a rust proof 'veneer' of stainless steel is one of the latest developments of welding The new material known as plykrom is made by welding bonding a sheet of stainless steel to a mild steel slab and then rolling the slab into plates Many problems were encountered in the development of this product Oxidation, the great detriment to welding had to be prevented The weld between the two had to be so constructed as to permit the expansion of the alloy under the influence of increased temperature without breaking its bond with the steel Welding had to be accomplished at controlled temperatures which would be effective with the alloy metal but not harmful to the mild steel The primary uses to which plykrome will be applied in chemical process industries will be to prevent the enormous loss in the destruction of steel by corrosion

STREAM LINING IN LOCOMOTIVES.—Dr O G Tietjens, of the Westinghouse Company has carried out a number of experiments on stream lining in locomotives and motor cars He has found that an electric locomotive travelling at 80 miles an hour requires five times as much power as when travelling at 40 miles an hour In the case of a heavy locomotive and two heavy coaches, stream line design saves 13 per cent of the power at a speed of 35 miles an hour and 32 per cent at a speed of 75 miles an hour It requires 286 horse power to drive an inter urban street car at a speed of 80 miles an hour Tests made in the Westinghouse wind tunnel indicate that the same type of car constructed with stream line design can be driven at 80 miles an hour with only 140 horse power The power required in the latter case is less than one half that required in the former By converting the modern American tramcar with its blunt ends, sharp corners, and hundreds of air pockets into a stream line car, having a new front and a new rear, and the roof made smooth, the sides extended downwards and the recesses for the windows eliminated the wind resistance is reduced to one third its former value

TELESCOPE WITH 69 IN MIRROR.—The new telescope at the Perkins Observatory, Ohio Wesleyan University, Delaware Ohio, has been completed by the installation of the large 69 in mirror This disk of glass, which weighs 3,000 lb, was cast as an experiment in American glass making in the optical shops of the United States Bureau of Standards The annealing, which required eight months of controlled temperature, facilitated greatly the polishing and figuring of the surface of the mirror, which was carried out in the factory of J W Fecker, in Pittsburgh Exhaustive tests showed that the surface was of the highest order of excellence, and that departures from the mean focus of 25 ft were not greater than 0 01 in for any zone. The Perkins telescope brings into the Central States the third largest telescope in existence the other instruments of greater aperture being the 72 in reflector of Victoria B C, and the 100 in reflector at Mount Wilson California

TELEVISION PROGRESS.—Television has continued to make remarkable progress during the year Dr H Hartman the American submarine explorer and engineer has visited the Riviera for the purpose of testing his new submarine television apparatus, by which he claims to be able to 'see' into the greatest ocean depths. The device consists of a shell globe containing heavy quartz lenses and powerful lamps the television mechanism, and a motion picture camera driven electrically and controlled from the ship As soon as an interesting object comes within the illuminated area in the ocean depths, a touch on an electric lever sets the camera working and the image is recorded on the film The submarine television images can it is claimed be transmitted by ships wireless to land stations and thence broadcast by television Mr J L Baird gave the first public demonstration of ultra short wave television in this country This improvement makes it possible for the televised image to be shown on a screen instead of as in the past, in a lens The size of the image is also greater, so that more onlookers can be accommodated In May a successful experiment showing the combination of ordinary telephony with two way television was demonstrated in Paris The head and shoulders of the speaker listener at either end were clearly visible to the other speaker listener, and vice versa, the features were easily recognisable, and the play of expression on the faces was remarkably clear The movement of the lips could be easily followed On June 1 the television of the finish of the Derby on Epsom Downs was witnessed in a London cinema The images were large enough and clear enough for the horses and the points of the horses tails to be seen A month later the new Baird model television, made expressly for home use, was exhibited in the Baird laboratories The most important advantage of the new instrument is that the image is reproduced on a screen 9 inches high by 4 inches broad so that it can be seen by a room full of people, instead of by only three or four persons

TEN AND A HALF MILES HIGH.—On Aug 18, 1932 Prof A Piccard, the Belgian scientist, who was accompanied by his assistant, M Max Cosyns, made his second ascent into the stratosphere, with the object of making a further investigation of cosmic rays" He started from the Dubendorf aerodrome, near Zurich, in his specially constructed balloon shortly after 5 a m, rose to a height of 16,700 metres (about 10½ miles, beating his record of 1932 by 919 metres), and after 12 hours flight, during which he crossed the Alps, landed at Cavallaro di Monzambano, 10 miles south of Lake Garda The balloon had a capacity of 14,000 cubic metres, and the airtight gondola, which weighed 550 lbs, contained an ionisation chamber, instruments for recording the electro-magnetic, electro static, and mechanical measurements of the cosmic rays, a wireless transmission set, and a barograph capable of registering an altitude

of 12 miles The air regenerating apparatus similar to that used in submarines was sufficient to enable the two aeronauts to live for 30 hours inside the airtight gondola if necessary Professor Piccard's preliminary report on his ascent shows that so carefully were all his arrangements made that everything worked smoothly throughout the flight During the first part of the ascent the aviators breathed the normal atmosphere, but at a height of about 5 000 feet they closed the hatch and rendered their gondola airtight Throughout the ascent internal atmospheric pressure in the gondola corresponded to that which would be experienced at a height of 6 500 feet The instruments for measuring the cosmic rays worked without a hitch Prof Piccard was able to measure the absorption of cosmic rays by paraffin and lead and he came to the conclusion that the rays came from all directions with the same intensity The observations as a whole permitted the belief that the cosmic rays had a stratospheric origin Equally satisfactory was the wireless apparatus, and messages were successfully transmitted to and received from the earth Prof Piccard and his companion suffered greatly from cold and a contributory cause to this was the white painted cabin, which repelled the sun's rays His ascent in 1931, on the contrary was made almost unbearable by the heat which was absorbed by the cabin then painted black The intense cold made the task of securing measurements rather a painful affair, although it in no way affected their accuracy

"Voice" of Planet Venus.—In the course of wireless experiments Prof Sheppard, of the Science Laboratory of New York University has been able to obtain a sound like a violin note from the planet Venus and broadcast it throughout the country Although clouds were gathering, Venus was shining clearly at the moment of the broadcast The planet's beam shone into a telescope passed through it and at the eyepiece was picked up by a photo electric cell and its sound amplified into the microphone of the radio As the turning of the earth brought the telescope to bear on Venus the sound rose in a crescendo and began its diminuendo as the move out of the earth carried the telescope out of range The sounds of objects were also broadcast The American flag made a noise like an orchestra without a conductor, and a cigar made a hoarse growling sound

Volcanic Dust from the Andes.—On April 10 12, 1932, violent eruptions took place from a number of volcanoes in the Andes, stretching over a distance of 200 miles, and rising in height from 11,000 to 22 000 feet Enormous quantities of volcanic dust were deposited over wide tracts of country and even Buenos Aires and Monte Video, over 700 and 800 miles away respectively, were affected It was estimated that over 3,000 tons of volcanic debris in the form of a pale, greyish white powder, fell on Buenos Aires in a single day As in the case of the eruption of Krakatoa in 1883, the dust thrown up into the air and carried by upper winds caused fine sunset effects in other parts of the world In South Africa the sunset colours were magnificent, and the appearance was finer still an hour later when the western sky showed a flaming red light extending to the zenith compared to the smoke from a huge volcano Similar phenomena were observed in Australia, where the afterglows ranged in colour from pale pink to yellowish pink, and showed a structure suggestive of thin, high smoke In New Zealand the sunsets in May and June were exceptionally brilliant Dr Kidson, the Director of Meteorological Services, also reported that low temperatures were experienced during May, and that in all probability these were due to the volcanic ash reflecting and scattering heat radiation waves coming from the sun to the earth, while the dust particles would also absorb much heat which would otherwise penetrate to the lower atmosphere and the earth's surface

Western American Dinosaur.—Mr Barnum Brown of the American Museum of Natural History while exploring the Cretaceous rocks of Montana, discovered a nearly complete skeleton of the armadillo shaped dinosaur Nodosaurus which has hitherto been known only in fragments Although the reptile measured only 14 ft in length, it was 7 ft wide at the hips It had heavy scale like plates to give flexibility, and feeble teeth for feeding on vegetables or insects The age of the skeleton is given as approximately 100,000,000 years

Wireless by Ultra Short Waves.—Senator Marconi has announced an important discovery in the development of wireless communication by means of ultra short waves Using an apparatus of low power fitted with portable reflectors and producing waves of 57 centimetres, he was able to communicate clearly both radiotelegraphically and radiotelephonically from Rocca di Papa near Rome to Cape Figari, in Sardinia, a distance of about 170 miles The great importance of the discovery lies in the fact that it illustrates the possibility of using the ultra short wave system for communicating over distances which in theory are impracticable owing to the curvature of the earth Hitherto Senator Marconi's experiments in the use of these have been successful only for distances contained within the normal horizon, but the difficulty with regard to the earth's curvature has now been overcome and it is possible to reach stations beyond the visible horizon.

Zuyder Zee Reclamation.—On May 28 the deposit of clay was made which finally and entirely cut off the waters of the Zuyder Zee from the outer ocean and converted it into the Ysel Lake The embankment which thus closed the last gap is 18½ miles long and runs from the eastern extremity of the former island of Wieringen to Zuurg, north of Makkum, on the Frisian coast It is intersected by three locks for the purposes of navigation, and by two groups of sluices for the discharge of superfluous water The embankment is 120 ft. wide at the top, and 400 ft wide at sea-bottom On the top of the embankment there will be a 100ft.-wide road and a railway line will keep up communication between North Holland and the Frisian coast This closing of the Zuyder Zee means that ultimately over half a million acres of land will be added to the country This will increase the area of the Netherlands by 7 per cent., while giving an addition of arable land equal to 10 per cent of that now available. This land is divided into four sections known as the North-West, North East South-West, and South-East Polders, and of these the North-West Polder has already been reclaimed from the sea and built on.

LITERARY output, according to the statements of its producers, has suffered less from the financial depression of the past year than most other occupations

In the enforced search for economies it has been discovered that a book can be purchased for less than a theatre seat, and borrowed from a library at a still smaller expenditure The total number of books published during the period under review (October, 1931 to September, 1932) is 15 564 as against 14,876 for the previous twelve months, the figures being taken from *The Publisher and Bookseller*, the official organ of the book trade

There are some indications of growth in the reading habit Fulham Public Library's latest annual report records the issue of 671 488 volumes, their largest total as yet Other libraries report increased demand for books other than fiction

The nation spends close on two millions a year in providing facilities for the use of books, yet with our adult "literate" population of over ten millions the figures of book consumption are still very far from laudable and an acute critic has recently said that "the reading capacity of the general public has never been so low as at the present time. . The general reading public of the twentieth century is no longer in touch with the best literature of its own day or of the past" The circulating library, with its undue emphasis on current fiction and the new journalism with its herd instinct, are held to blame "In the past, people did not go to books for an escape from their lives, but to qualify themselves to live to some purpose Mr Swinnerton writes "It is probably true that 75 per cent of the books published each year involve their publishers either in losses or in profits so small as to be noticeable only in bulk", and Mr Samuel Courtauld deplores that, of the 180 millions spent annually on advertisement, nine tenths is worthless from a national standpoint

Subjects which have aroused acute controversy during the year have been the partial cessation of literary notices by the B B C , the constitution and methods of the Book Society, the author reviewer, and the ethics of criticism by publishers readers or other possibly interested parties In Mr Langdon Davies' view "the critic should not be employed by any publisher, should be anonymous, should not act as a bait for advertisement, should not be ignorant, nor Protean"—good counsel, which has small prospect of general adoption "The Hallelujah Chorus," as one writer named it, of the book review and advertisement pages of certain Sunday papers has again received a good deal of caustic comment, and discussion has also arisen as to whether the National Book Council should undertake the onus of selection in its book lists, and whether Public Libraries should discontinue the issue of recent fiction

Turning from the machinery of current production to more general topics, the following may be mentioned amongst features of the year under review:

1 Celebrations of the Centenaries of Scott, Goethe, Lewis Carroll, John Locke, and Crabbe

2 Exhibitions at Messrs Bumpus's, illustrating the History of the English Press, Lewis Carroll, The Cambridge Press, etc , also one of Children's Books at the Victoria and Albert Museum

3 Issue of a series of new ninepenny novels by Ernest Benn If these are to pay their way, we are informed by Sir Ernest, 100,000 of each must be sold For a sale of half that number, the paying price would be half a crown

4 The completion of the first year's encouraging work of The Friends of the National Libraries

5 Repercussions of a period of financial stringency, in the production of Omnibus Books, and the increasing issues of cheaper editions of old books

The Bible remains the best seller The British and Foreign Bible Society reports (Sept , 1932) that "during the last year the Society has issued 1,065 662 complete Bibles, 968 864 New Testaments and 8,517,758 integral books of the Bible, a total of 10,552,284 volumes, ' and this in spite of the fact that no Bibles may be printed, circulated or even studied in public in any part of the Soviet Republics, whilst the book is also banned in Afghanistan and Arabia, and in Germany "the description 'godless,' which hitherto no self respecting man has cared to acknowledge, is now ostentatiously claimed as their own by a considerable section of the population'

The new *Irish Academy of Letters* has been formed with the following membership: Austin Clarke, Padraig Colum, Daniel Corkery, St John Ervine, Oliver St J Gogarty, F R Higgins, Douglas Hyde, James Joyce, Brinsley Macnamara, George Moore, T C Murray, Sean O Casey, Frank O Connor, Sean O Faolain, Padar O Donnell, Liam O Flaherty, Seumas O Sullivan Forrest Reid, Lennox Robinson, George Russell ("A E "), Miss E O. Somerville, James Stephens, Francis Stuart, W B Yeats, and G B Shaw.

LITERATURE PRIZE AWARDS.

Femina Vie Heureuse—Of the three books recommended, viz "The Corn King and the Spring Queen' (Naomi Mitchison) "Tobit Transplanted' (Stella Benson), and "Simpson' (E Sackville West), Miss Benson's was awarded the prize, *Northcliffe*—"Saint Saturnin" (Jean Schlumberger); *Hawthornden*—"Without My Cloak" (Kate O Brien); *Atlantic Monthly*—"Peking Picnic' (Ann Bridge), *Pulitzer*—"My Experiences in the World War" (Gen Pershing), "The Good Earth" (Mrs Pearl Buck), "Life of Theodore Roosevelt" (H J. Pringle); *Royal Empire Society*—Gold Medal: "The Milner Papers" (C Headlam); *James Tait Black Prize*—Biography "David Hume" (J. Greig); Fiction "Without My Cloak" (Kate O'Brien)

Censorship—Amongst books banned by the Irish Free State during the year may be mentioned: "Thunder Below" (T. Rourke), "The Puritan" (Liam O Flaherty), "Bernard Shaw" (Frank Harris), "Brave New World" (Aldous Huxley), "Seed' (C G Norris), "Isobel" (Gerald Gould), "The Single Heart" (Storm Jameson), "And no Bird Sang" (P Leader), "Safer Motherhood' (Sir W Arbuthnot Lane), and "Work, Wealth and Happiness of Mankind" (H. G. Wells)

Signs of a welcome slump in sex novels—described recently by Mr. Cecil Roberts as "asteriské literature," are evident this year

Detective fiction shows no signs of having as yet exhausted its possibilities

Honours conferred during the year in the domain of literature include Knighthoods for Dr Raymond Unwin, J W McAra Patrick Geddes and Laurence Binyon, whilst John Buchan and E V Lucas became Companions of Honour, and John Murray a K C V O

Deaths.—Amongst names associated with the production of Literature the following may be recorded G F Barwick Mrs Mary St Leger Harrison (Lucas Malet) F H Lovell, Arthur Hind, David M Murray Harold Monro, Edward Marjoribanks, Edgar Wallace, E W Everett Green (Cecil Adair) R Brimley Johnson, Mrs H Nevinson Dr William Briggs Kenneth Grahame Fergus Hume G Lowes Dickinson Vere Hutchinson Frank Harris Graham Wallas, Sir Gilbert Parker and Sir Ronald Ross

The Year.—Looking back across the year under notice the increasing production and greater prominence of biographical and historical work are remarkable in a period not otherwise noteworthy for outstanding features Guedalla's "Duke of Wellington Bryant's 'Charles II Buchan's 'Scott' the Lilen Ferry, Bernard Shaw Rothenstein and Henry James Letters and Memoirs were widely read and discussed and *The Times* Fifty Years series naturally evoked very general interest D H Lawrence's death could not fail to stimulate varying criticism of his genius Russia and the Five Years Plan have demanded the increasing attention of economists and travellers, whilst British travel slogans have stimulated interest in our own countryside, its villages, churches, wolds and open air life

Much (perhaps too much) criticism has been levelled at book societies and the author reviewers in Sunday and other papers Their influence is admittedly enormous and many of their recommendations admirable But two grains of salt—as readers begin to realise—are needed for the digestion and appreciation of their pabulum As regards the first it must be remembered that book societies are commercial booksellers and that as was recently stated, a "chosen seven and sixpenny novel can be got for three shillings if the order be large enough And in appraising reviews Sidney Smith's dictum may usefully be recalled "I never read a book I review it prejudices a man so"

A classified selection of books published during the year from October, 1931 to September, 1932 follows With a few exceptions, translations, reprints and scientific manuals are not included As an index of popularity—which is of interest though not, of course, a final criterion of merit—books reported in trade and other journals as "best selling" are indicated by an asterisk (*) The whole selection only includes about two per cent of the publications of the year, and must obviously pass over many good and useful books

ART

"The Meaning of Modern Sculpture," by R Wilinski, 'The Near and Middle East," by R Grousset, "Confessions of a Keeper" by D S MacColl, "A Grammar of the Arts" by Sir Charles Holmes, "An Outline of Modern Painting in Europe and America," by S C Kaines Smith, "Nineteenth Century Painting" by John Rothenstein, "A Short History of Costume and Armour," by F M Kelly and R Schwabe, "Medieval Costume and Life," by D Hartley, "English Painting from the VIIth Century to the Present Day" by C Johnson, "Mozart," by Sacheverell Sitwell "Rembrandt," by Arthur M Hind 'The New Movement in the Theatre' (L Moussinac R H Packman and Gordon Craig), Early Muslim Architecture,' by K A C Cresswell 'A Short History of French Painting," by E Underwood

BIOGRAPHY

* King Charles II, by Arthur Bryant 'Edmund Burke' by Rev R H Murray, 'Vacant Thrones' by Sir Ian Malcolm "Foch The Man of Orleans," by Liddell Hart "Gordon and the Sudan" by R M Allen, "The Letters of Robert Burns" edited by J de L Ferguson Germaine de Stael by R McNair Wilson John Wesley, by C E Vulliamy, "Ellen Terry and Her Secret Self," by E Gordon Craig Dear and be Slain" by Rt Hon J E B Seely "Past Years" by Sir Oliver Lodge, "Lord Rosebery" by The Marquess of Crewe, "Life of Robert Marquis of Salisbury" by Lady Gwendolen Cecil (Vol IV) * Bernard Shaw," by Frank Harris, "John Crome of Norwich," by R H Mottram, 'The Life of Daniel Defoe,' by Thomas Wright, 'Cranmer, by Hilaire Belloc, The Passionate Pilgrim A Life of Annie Besant by G M Williams * The Questing Beast an Autobiography by Oliver Baldwin, And no Birds Sing (the Autobiography of Pauline Leader) 'My Indian Summer, by Maud Valerie White * Sir Walter Scott, by John Buchan The Life of Horace Walpole, by Stephen Gwynn, * Sir George Otto Trevelyan O M, by G M Trevelyan 'But for the Grace of God by J W N Sullivan, "Sir Christopher Wren His Life and Times,' by C Whitaker Wilson Revaluations by various Authors * 'Julius Cæsar, by John Buchan, 'Charlotte Bronte by E F Benson, * Chaucer by G K Chesterton (a critical estimate) Metternich by Arthur Herman, Three Houses by Angela Thirkell, "Lamb before Elia, by E V Morley, 'Sappho of Lesbos,' by Arthur Weigall, *"Men and Memories," by W Rothenstein, "Under the Fifth Rib a Belligerent Autobiography," by C F M Joad Charles Gore by Gordon Crosse, Dorothy Wordsworth by C M Maclean, Sir William Temple by Clara Marburg, 'Stanhope by Basil Williams 'Lenin," by James Maxton Swinburne' by Georges Lafourcade *' The Journals of Arnold Bennett Erskine' by J A Lovat Fraser *' John Clare by J W and Anne Tibble, 'Akbar, by Laurence Binyon, "Lady Caroline Lamb,' by Elizabeth Jenkins "Theodore Roosevelt by H F Pringle, 'Warburton and the Warburtonians by A W Evans, "The Life of John Redmond, by Denis Gwynn, "The Savage Pilgrimage (a Narrative of D H Lawrence) by C Catswell, "Goethe and Schiller,' by Annette Meakin 'Unpublished Letters of S T Coleridge edited by Earl L Griggs, *" The Life of Lord Carson' (Vol I), by Edward Marjoribanks, "Theatre and Friendship' (Henry James to Elizabeth Robins), "The Life and Letters of Sir Thomas Moore, by N Harpsfield, edited from the MSS by E V Hitchcock, Introduction by R W Chambers, 'Mazzini," by G O Griffith, "Lord Cromer,' by the Marquess of Zetland, "Marlborough by Sir John Fortescue, "The Wife of Rossetti,' by Violet Hunt (legendary in part), "The Life of Mary Kings-

ey by Stephen Gwynn, "Sarah Duchess of Marlborough by Kathleen Campbell Scott's Letters, edited by H Gerison (first of ten volumes) Mary Wollstonecraft, by H R James, * 'Golden Horn by Yeates Brown

IN the world of art the year was a period of almost unexampled depression Artists and picture dealers alike suffered from a general want of business and in the auction rooms cases were known of pictures by eminent Eighteenth century masters which realized under the hammer only about a fourth of what was paid for them soon after the end of the War Even worse was the fall in value of some of the works of once popular painters of the Victorian period, which, purchased from the Artists for hundreds of pounds, were knocked down for merely nominal sums The first event of the season and the most important was the exhibition of French art held at Burlington House under the patronage of the King and the President of the French Republic The exhibition which contained 1,021 works representative of French art ancient and modern, was most successful It was opened on January 4 and closed on March 5 and was visited by 340,233 persons The French General Committee was presided over by M Paul Leon Director General of the Fine Arts and Sir William Llewellyn the President of the Royal Academy, was chairman of the British Executive Committee

The Summer Exhibition of the Royal Academy (the one hundred and sixty fourth) was opened on May 2 and closed on August 6 The Hanging Committee was composed of Sir E L Lutyens, Mr L C Campbell Mr A J Olsson, Mr L C Taylor, Mr Oliver Hall Mr C J Hartwell, Mr G Harcourt Mr E L Griggs, Mr S Jagger, and Mr Harold Knight The works of all kinds submitted for exhibition numbered 11,706, of which 9 691 were rejected and 2 015 made doubtful From the doubtful works and the contributions of the Academicians and Associates the exhibition was composed, for not a single work was regarded by the Committee as worthy of being accepted outright There is no precedent for this in all the history of the Royal Academy

The principal works sold included 'Riverbed (£210) "The Moorhens Nest (£157 10s) and In Springtime (£84) by Mr Adrian Stokes "The River Pool (£75) 'Snowclad (£75) and By the Dune (£75) by Mr R G Brandt 'Girl Reading (£120) by Mr Harold Knight "The Severn from the Forest of Dean (£75), by Mr Charles M Gere The Sampler' (£420) by Mr J C Taylor The Bridge of Gweek (£150) 'The Old Barge (£125), and "At High Water (£105) by Mr Stanhope Forbes 'The Full River (£200), by Mr A J Munnings 'Old Mill House (£262 10s) and Marshland on the Moorish Coast (£78 15s), by Mr Oliver Hall, 'The Beach (£630), by Mr Arnesby Brown, 'Diana (£85) and Reflections in a Silver Ball (£145), by Mr H Davis Richter Cagnes, France' (£700) by Sir H Hughes Stanton, 'A Psalm to Winter Skies Pond Pounder Lands End (£300) by Mr Tamorina Birch "The Family (£200) by Mr B Fleetwood Walker 'Dampier joins the Buccaneers (£200) and 'Saluting the Vanquished (£200) by Mr J D McCormick 'The Staircase (£180) by Frederick W Elwell "Conversation Piece Hilaire Belloc, G K Chesterton and Maurice Baring (£1,500) by Mr H James Gunn Czech Peasant Girl' (£90) by Miss Phyllis Dodd 'The Young Menage (£150), by Mr Harold Harvey 'A Conversation in Aragon (£150), and "Spanish Gipsies Winter Quarters (£150) by Mr W Russell Flint and The Young Rower' (£120), by Mr L M Glasson Pictures marked 'sold but unpriced, included "The Derbyshire Mill and "Nancy, by Mr Sydney Lee and 'The South Downs Hikers Resting, by Mr George Henry No works were bought for the Chantrey collection from the exhibition, but three acquired before it was opened were on view These were "Decomposing' (496) by Mr Alan Beeton, (£200) 'Miss Jean Werner Laurie (593) by Miss Ethel Walker (£68 5s) and A Cotswold Farm (603) by Mr Gilbert Spencer (£350)

Sir Philip Sassoon held a third successful loan exhibition at his house in Park Lane in aid of charities composed of furniture pictures plate, jewels and documents A very interesting collection of pictures by Some Neglected English Masters was held in the summer in the gallery of the Burlington Fine Arts Club Some of the artists represented were not perhaps, altogether in the neglected, and the identity of one of them remained a mystery in spite of all the investigation of connoisseurs and critics, the 'Portrait of an Artist and his Wife which some ascribed to Arthur Pond, a painter of whose work little is known At the Leicester Galleries the exhibitions included recent paintings and sculpture by Mr Glyn Philpot RA drawings by Mr Richard Sickert ARA and lithographs in colour by the French artists Bonnard and Vuillard At Colnaghis were portrait studies by Sir John Lavery made for his Academy picture Then Majesty's Court' at Agnews pictures by Duncan Grant Vanessa Bell and Keith Baynes and at the Cotswold Gallery, watercolours and oil paintings of the English school In May and June contemporary paintings drawings and sculpture were on view at the French Gallery 11 Berkeley Square, and later in the summer some surprising works by the late Charles Sims RA, described in the catalogue as "spirit pictures were shown at the Redfern Gallery At the annual exhibition of early English watercolours at Walkers Galleries in Bond Street the usual standard of excellence was maintained Etchings and engravings by Mr Frederick Carter, and watercolours by Mr Adrian Bury were shown in June at Messrs J Leger's gallery a capital collection of paintings and drawings by British artists of eminence was held in July at the Beaux Arts Gallery Bruton Place, and busts by Rysbrack were on view at Messrs Spinks At the Fine Art Society's gallery in New Bond Street the most important of several exhibitions held was of a collection of bronze statuettes by Sir Alfred Gilbert RA

The memorial to Queen Alexandra in the garden of Marlborough House, executed by Sir Alfred, was unveiled in the summer when he was knighted and re elected to membership of the Royal Academy which he had resigned more than twenty years ago A statue of Sir Joshua Reynolds by Mr Alfred Drury, RA, a commission from the Royal Academy was unveiled in the courtyard of Burlington House and was awarded the silver medal of the Royal Society of British Sculptors as being 'the best work of the year by a British sculptor, in any way exhibited to the public in London The Albert Medal of the Royal Society of Arts was awarded in June to Mr Frank Brangwyn RA for services to decorative and commercial art

By the resignation of Mr Collins Baker, a painter and a well known writer on the fine arts

the National Gallery lost the valuable services of its Keeper, who has accepted a post at the Huntington Library and Art Gallery, San Marino, California, where Gainsborough's 'Blue Boy' and Sir Joshua's "Mrs Siddons" found a permanent home some years ago. At the National Portrait Gallery, where the extensions in progress are rapidly approaching completion, an exhibition was arranged in connection with the centenary of the death of Sir Walter Scott. It was composed of portraits of Scott himself and of literary men, artists and others who had been more or less in his circle in London and Edinburgh. The Gallery received some interesting additions during the year, among them a capital portrait of Thomas Day, the author of 'Sandford and Merton,' painted by Wright of Derby a hundred and fifty years ago and still in perfect condition.

In the sale room the season was probably the worst of modern times. The most important sale or at least the one that excited the greatest public interest, was held, not in London, but at Lambton Castle, Durham, the seat of the Earl of Durham who offered for disposal many of his family pictures, including Lawrence's famous 'Red Boy.' For this picture, exhibited at the Royal Academy in 1825, £95 000 was bid and at this price was withdrawn. At Christie's Sir John Ramsden's collection of furniture, bronzes, carpets, silver and pictures realized £49,644; and another collection formed by the late Sir Ernest Cassel was sold at Brook House by Puttick and Simpson for £25,636. At the Chester Beatty sale of manuscripts, Sotheby's disposed of a Book of Hours for £5,000 and the same firm in June sold a Rembrandt portrait of Helen Boyl for £3 500. A record price £2,415 for a work by Arthur Devis, was obtained at Christie's at Sale in March.

THE YEAR'S MUSIC.

Opera.

When at the beginning of 1932 it was announced that Covent Garden would not reopen its doors there was much lamentation in various musical camps. Some weeks later, however, the Syndicate decided to embark on a month's German season, two complete cycles of "Der Ring des Nibelungen" and other Wagner operas being promised. The management's curiously worded prospectus also mentioned that ladies should "remove their bonnets," an order which suggests that the Royal Opera authorities have lost track of feminine modes for long years the only bonnets now on view being those which adorn the museums.

A short time elapsing between the Syndicate's decision and the opening night, May 10, it was thought (by the uninitiated) that few of the leading German singers would be available. They were to be had almost for the asking, since, the financial crisis having attacked Germany, talent seemed to be going a begging. Consequently, each opera was advantageously cast.

An outstanding success rewarded Hofmann, a Wotan new to Covent Garden, and one whose fine style is a model which many of his compatriots might copy with great advantage. Habich, as upon former occasions, was a very satisfying Alberich, Olszewska ever reliable, made Fricka unusually interesting, Janssen's Kurwenal long remained memorable, Wolff, a singer of rank, was all that could be desired. Melchior's Siegfried, well conceived and skilfully projected, even if he is not a complete master of style, again proved him to be the best Siegfried available, recalling every now and then Jean de Reszké—of blessed memory. I doubt if her voice occasionally seemed harsh, fell back on an excellent technique, Helgers Hasolt and Hagen afforded genuine pleasure, Schorr, in 'Die Walküre,' often triumphed, for if his voice sometimes went a little raucous, he quickly held one's attention. Many consider that Schorr's best part is Sachs, yet as Wotan he has fine moments.

Janssen's Wolfram scarcely equalled his Kurwenal, the *cantabile* demanded by 'Als du in kühnem Sange uns bestrittest,' "O du mein holder Abendstern" and other portions of the *role* being somewhat beyond him. De Loras was a Senta of quality. Schorr's Hollander reminded one a little of Van Rooy's. Helgers did all that is possible with Daland. Wolff endeavoured to make Erik, the mincompoop, interesting. Melchior's Tristan and Helgers's Isolde, as upon former occasions, were very satisfying impersonations, while Olszewska's Brangäne greatly contributed to a highly successful performance. Praise also is due to Goodacre, Allin and Bertram, three English artists, who proved thoroughly capable as Frida Lafner and Pogner, respectively. If all British singers who aspire to a Covent Garden engagement were equally competent, there would be more hope for a languishing cause. Unfortunately, so many aspirants have no 'stage feeling,' and their actual singing bears little relation to *il bel canto*, the result, perhaps of improper teaching. Quacks in short, abound.

Particularly welcome was a "Tannhäuser" performance which enabled Lindoberg to make the acquaintance of Lehmann's Elizabeth. As Sieglinde and Eva this really fine artist had delighted everyone, both as singer and actress; in 'Tannhäuser' she added to her laurels—gained in many a theatre during the past dozen years. 'Dich, theure Halle' and the Prayer were most impressively sung and with beauty of tone, the perfect combination while she exhibited a complete understanding of the character. Hofmann, as the Landgrave, reminded old *habitues* of Plançon, whose singing of the part in pre war days was unequalled; Melchior's Tannhäuser was on much the same plane as Lehmann's Elizabeth, and their voices blended admirably in the duet of the second act. Lehmann also sang Eva to Wolff's satisfying Walther, Schorr Pogner and Jessner being, respectively, the Sachs, Beckmesser and David of the cast. 'Der Fliegende Holländer' for some extraordinary reason, failed to draw good houses, though Schorr's Holländer was all that exacting *connoisseurs* (a few of whom still frequent the Royal Opera) could wish for. The conductors were Barbirolli, Heger and Beecham, who was referred to by a musical paper as 'conductor-in-chief,' a foolish distinction which doubtless annoyed his colleagues.

The Old Vic. management gave the stage version of 'Elijah' which some twenty-five years ago, was produced by Manners. The work lacks dramatic situations though with Sumner Austin and Joan Cross in the two most important parts it was well performed. At Sadler's Wells "Il Trovatore" and Otello (Verdi's extremes) were given in English with British singers who on the whole distinguished themselves. Cox the Manrico and Otello of the company is a *tenore di forza* with an unusually powerful voice and (wise man) he refrains from the slightest forcing. Edith Coates the Sadler's Wells Azucena giving melodrama a miss succeeded in making the part more than usually acceptable.

Satisfactory Instrumentalists

Despite the financial crisis a number of instrumental concerts were well attended. The Italian Trio for example received adequate support the executants Casella Poltronieri and Bonucci being deservedly lauded by all music critics for their accurate thoughtful playing and the Lener Quartet exhibited its customary perfection of *ensemble*. Schnabel (who in many good judges consider the best amongst leading pianists) was heard in Schubert's posthumous Sonata in B which he certainly played to perfection. Stravinsky was engaged for a B.B.C. Symphony Concert performing the solo part in his own "Concerto". Harriet Cohen introduced Bax "Sinfonia Concertante" for pianoforte and orchestra. Busch gave a fine performance of the Brahms' Concerto. Ravel's Pianoforte Concerto was deftly played by Marguerite Long at a Royal Philharmonic Society's concert with Ravel as the most inconspicuous conductor ever seen in London. Rachmaninov gave his third "Concerto" perhaps a unique work again showing himself to be a pianist of the first rank. Cortot tried conclusions with the 'Emperor" concerto, to make one wish that he had selected Chopin—in which he excels. Lamond showed us how Tchaikovsky should be interpreted. The Kolisch Quartet was deservedly applauded for its excellent performance of Alban Berg's Lyric suite inspired by modern Vienna, and most skilfully written. Later joining forces with the International String Quartet it gave a fine performance of the Mendelssohn Octet. At the City String Players welcome concert the 'Serenade' (for muted strings) from the Haydn "String Quartet No. 68 Op. 3 No. 5" was included in the programme, Arensky's 'Variations on a Theme by Tchaikovsky' also figuring in the scheme. Bonaro contributed Vivaldi's "G minor Violin Concerto".

The Promenade Concerts enjoyed their usual success though much disappointment was expressed at the lack of novelties. In former days one could depend upon hearing many new compositions some of which gained a place in each year's *repertoire*, of late the programmes have become a routine affair—without malice, for improvement. Admirers of Elgar and Vaughan Williams consider that works by these composers should have been given the preference more judicious supporters of the Proms. And it possible to do without them. Meanwhile the concerts draw good audiences so little else matters.

Vocal Recitals

Eleanor Marshall's singing gave the impression that if 'Le Songe (Iphigénie en Tauride)' is a little beyond her means she might, with thought and work develop into a lyric soprano of value. Much the same may be said of Victoria Fiskine who in recital showed that further cultivation would not come amiss while Montgomery Lyffe and Cuthbert Lively who appeared in a joint recital could do more with the material at their command. Marguerite Alvarez opulent tone rather spoiled by mannerisms and wandering from the key made its usual effect. Nora van Rapp and displayed a carrying voice of appealing quality the newcomer's *legato* suggesting that Italy has been her training ground. Oda Slobodskaya's art was a lesson in breath control and voice colour. Eric Marshall did justice to Schumann's 'Dichterliebe' though he rather overdid the sentiment. Julian Gardiner who accompanied himself, gave the impression that he would have sung better with the assistance of a sympathetic accompanist. Florence Easton, who, years ago denied a chance in England her native land migrated to America returned for a recital showing herself to be a more than ordinarily capable artist. George Parker in a Hugo Wolf group which Norman Franklin accompanied most admirably proved himself to be a singer of quality. Elizabeth Schumann was amongst the few German artists of the first rank to have given recitals, she demonstrated how Bach ought to be sung.

Flora Collins a soprano from America gave "O sleep! Why dost thou leave me" better than it has been sung in London for years. Her interpretation of 'Die Stadt' was equally satisfying. Marova succeeded in making Debussy welcome and that is not easy, Percy Manchester, though over emphatic at times used a good voice well. Lillian Hill, evidently a beginner should—with applied study—do better. Lillian Evans's fresh well rounded voice showed to particular advantage in the *andante* from "Qui la voce" and in other things owing partly to her much to be admired skill in economising the breath. Claire Croiza as on former occasions sometimes approached perfection. Hugh Campbell sang a mixed programme and with pleasure to his audience. Gerhardt if now on the down grade exhibited much of the skill which has been hers for at least twenty-five years. There also were other vocal recitals engineered by usually concert agents whose motto evidently is 'after your money' one fears that the aspirants spent more than was made for the attendance was poor. Incidentally these singers had not progressed beyond the amateur stage—nor are they likely to go far.

THE LONDON STAGE.—The theatrical season of 1931 can only be described as varied. Seldom has a year been marked by so many short runs several plays being withdrawn after less than a dozen performances, but on the other hand there were a number of striking successes, including a few by authors new to the stage. Tragedy was associated with one of these—*Musical Chairs*, by Ronald Mackenzie a young and promising dramatist who was accidentally killed shortly after his comedy had established itself as a favourite at the Criterion where a six months run did not exhaust its popularity. An even greater success in the West End was scored by another light play *While Parents Sleep*, by Anthony Kimmins which claimed the longest run of the year. Mr. John van Druten the biggest force among the newcomers to the stage, increased his reputation by two plays—*Somebody Knows* and *Behold We Live*—each of which displayed a keen sense of stagecraft and drama. Mr. J. B. Priestley in his first play written directly for the theatre *Dangerous Corner* showed an advance upon *The Good Companions* while 'C. L. Anthony,' in *Service* scored a triumph almost equal to that of *Autumn Crocus*, her first attempt. Mr. Walter Hackett twice showed his ability to fit his wife with parts and to devise amusing situations in *The Gay Adventure* and *Road House*. Mr. Ivor Novello hit the public taste with *Party* and "Ian Hay" collaborating on this occasion with Anthony Armstrong, added *Orders Are Orders* to his amusing Service comedies. Late in the year Mr. Frederick Lonsdale in *Never Come Back* promised another success and in *Tensong* Mr. Edward Knoblock and Mr. Beverley Nichols provided an attractive adaptation from the latter's novel. It was not a good season for the established dramatists. Mr. Bernard Shaw's *Too True to be Good* failed to attract, while Sir Arthur Pinero, returning to the theatre after a long interval with *A Cold June*, added nothing to his earlier reputation. Mr. Noel Coward's historical spectacle, *Cavalcade*, was not withdrawn until over 400 performances had been given, and a few days after this moving production ended his one-man revue, *Words and Music*, began what promised to be a long run. During the year the Prince of Wales opened the Shakespeare Memorial Theatre at Stratford on Avon in time for the Festival, while there were several Shakespearean productions in London notably a beautiful revival of *Twelfth Night*. A number of translations of striking foreign plays were given, many of them dealing directly or indirectly with the war. Among these should be mentioned *Miracle at Verdun* and *Versailles*. A play of a different character from Germany was *Children in Uniform*, which greatly impressed London. Mr. Cyril Maude made a welcome "come back," while Sir Henry Lytton bade farewell to the West End during a season of Gilbert and Sullivan operas. Many of the old musical plays were revived, and a new spectacle, *Casanova* scored a big success. A wonderful production of *The Miracle* was a feature of the year.

The following is a list of productions between Nov. 1, 1931 and Oct. 31, 1932 —

ADELPHI, 411 Strand, W.C. 2.—(1932) *Jan.* 30 *Helen*, opera bouffe based on La Belle Hélène by A. P. Herbert music by Offenbach directed by Max Reinhardt (Messrs. George Robey, W. H. Berry and Bruce Carfax, and Mesdames Evelyn Laye and Desirée Ellinger) *Sept.* 16. *Words and Music* revue by Noel Coward (Mr. Romney Brent and Mesdames Ivy St. Helier, Joyce Barbour, Steffe Duna, Doris Hare and Nora Howard).

ALDWYCH Aldwych, W.C. 2.—(1932) *March* 7 *Dirty Work* by Ben Travers (Messrs. Ralph Lynn, J. Robertson Hare and Henry Hewitt, and Mesdames Constance Carpenter, Mary Brough, and Marguetta Scott) *Sept.* 5. *Fifty-Fifty*, adapted by H. F. Maltby from the French of Louis Verneuil and Georges Berr (Messrs. Ralph Lynn, J. Robertson Hare Morris Harvey Clive Morton and Frederick Burtwell and Mesdames Winifred Shotter and Mary Brough).

ALHAMBRA 23 Charing Cross Road, W.C. 2.—(1932) *Aug.* 27 *Over the Page* revue (Messrs. George Gee Tilly Melson and Reginald Gardiner and Mesdames June and Violet Loraine).

AMBASSADORS West Street Cambridge Circus, W.C. 2.—(1932) *Feb.* 16 *So Far and No Father*, by H. M. Harwood (Messrs. W. Graham Browne and Robert Andrews and Mesdames Marie Tempest Yvonne Rorke and Margaret Scudamore). *June* 6 *The Price of Wisdom* by Lionel Brown (Messrs. Harvey Braban, Walter Piers and Whitmore Humphreys and Mesdames Irene Vanbrugh and Joan Henley) *Sept.* 26 *The Left Bank* by Elmer Rice (Messrs. Martin Walker, Hugh E. IVOR, Strand, W C 2 —(1931) *Nov* 2. *Carnival* British (Matheson Lang, Dorothy Boucher and Joseph Schildkraut) *Nov* 30 *The Congress Dances* (Conrad Veidt, Henry Garat and Lilian Harvey) (1932) *Jan* 11 *Blue Danube* (Dorothy Boucher Joseph Schildkraut and Brigitte Helm) *Feb* 1 *Frankenstein* (Colin Clive Boris Karloff and Mae Clarke) *Feb* 22 *Tonight or Never* (Gloria Swanson) *March* 7 *Delicious* (Janet Gaynor and Charles Farrell) *March* 28 *Brewsmith* (Ronald Colman) *May* 16 *The Lost Squadron* (Dick Grace, Eric von Stroheim and Mary Astor) *June* 6 *Melody of Life* (Ricardo Cortez and Irene Dunne) *June* 27. *Jack's the Boy* British (Jack Hulbert, Cicely Courtneidge and Winifred Shotter) *Sept* 5 *Bring 'Em Back Alive* animal picture by Frank Buck *Sept* 26 *The First Year* (Charles Farrell and Janet Gaynor) *Oct* 17 *The Flag Lieutenant* (Henry Edwards and Anna Neagle) *Oct.* 31. *Tell Me Tonight* (Jan Kiepura and Sonnie Hale)

THE events of another year in the history of British broadcasting show that the period of progress and expansion is not yet ended. Important developments of 1932 include the transfer of broadcasting headquarters from Savoy Hill to Broadcasting House, the opening of the new Scottish transmitter at Westerglen, the building of a new short wave station for Empire broadcasts, the establishment of an Empire news service, and the introduction of short television programmes as a regular feature of broadcasting. The developments in the ordinary programmes are less striking, but there has been a welcome increase in the number of relays from foreign stations, which is quite in keeping with the B.B.C.'s motto 'Nation shall speak peace unto nation'.

These changes and innovations have been accompanied by a further increase in the number of listeners. The final figures for 1931 showed the enormous increase of 918,825, bringing the total number of licences issued to 4,330,735. The greatest increase previously recorded in a single year was 455,174, less than half the 1931 figure. By August 31, 1932, the number of licences issued had risen to 4,821,436, which made it reasonably certain that the five million mark would be reached before the end of the year.

BROADCASTING HOUSE

The new B.B.C. building in Portland Place had become one of London's architectural points of interest long before the first programme was sent out from it. The transfer from the old premises in Savoy Hill began in the autumn of 1931, but it was not until the early months of 1932 that the main body of the staff moved to the new headquarters. From March onwards both Broadcasting House and Savoy Hill were used for the transmission of programmes, and on the evening of May 14 Savoy Hill was closed down, leaving Broadcasting House as the sole headquarters of British broadcasting. Two months later, on July 7, Their Majesties the King and Queen paid a visit to Broadcasting House and made a tour of the building.

With its large entrance hall, its twenty-two studios, including a large concert hall and a group of ten for dramatic productions, its comprehensive ventilation system, and its magnificent technical equipment, Broadcasting House is undoubtedly a worthy home for British broadcasting, but the guiding principle of the building, by which the studios are encased in a central tower and thereby separated from the surrounding offices, has taken away much of the informality which was a pleasant feature of Savoy Hill. Mr. James Agate has charmingly expressed the difference between the two buildings by putting himself in the position of 'an old time sailor who, having learned his job on a four-master, is now confronted with the marvel of funnels and asked where his heart lies. If he is an honest mariner he will speak the truth.'

NEW STATIONS

The rapid expansion of British broadcasting is also shown by the two new stations which were completed in 1932—the Scottish Regional station at Westerglen, near Falkirk, and the Empire Station at Daventry.

The opening of the Scottish Regional station, which began its full service in September, marks a further stage in the B.B.C.'s plan to provide alternative programmes for as many listeners as possible. Like the corresponding station at Brookmans Park and Slaithwaite, which enable London and Northern listeners to receive alternative programmes, the new station at Westerglen has two transmitters working on different wavelengths. One transmitter, with a wave length of 376.4 metres, sends out the Scottish Regional programme, which contains a considerable number of items originating in Scotland, while the other, working on 288.5 metres, transmits the National programme. The two transmitters are similar in design and power, and Scottish listeners are thus provided with a full alternative programme service. Progress has also been made with the building of a similar station near Minehead, in Somersetshire, which will transmit alternative programmes for a considerable part of Wales and the West of England.

The other station which was completed during the year was the Empire short-wave station at Daventry. Since 1927 the B.B.C. has transmitted part of its programmes from the experimental short wave station at Chelmsford, and these transmissions have been enthusiastically received in various parts of the Empire. This service, however, was definitely experimental, and at the end of 1931 the B.B.C. decided to proceed with a comprehensive Empire broadcasting scheme, which will enable every part of the British Commonwealth of Nations to receive a short wave programme transmitted from England. The scheme involves the use of a number of different wave lengths, and the old transmitter at Chelmsford was quite inadequate to the purpose. A new station equipped with two transmitters has been built at Daventry, and preliminary transmission tests were begun at the end of 1932. These tests are to be continued until it is possible to determine which are the best wave lengths for serving the different parts of the Empire, and it is expected that the full Empire service will be inaugurated during 1933.

In anticipation of the opening of the new station the B.B.C. made an important addition to its short wave transmissions during 1932. A service of Empire news bulletins was established on January 4, and the bulletins which were broadcast each weekday at 12.30 p.m., 6.15 p.m. and midnight sent the latest news from home and abroad to short-wave listeners overseas.

TELEVISION

Although the day of complete television has not yet arrived, and the majority of broadcasters can still enjoy the privilege of being heard but not seen, each year sees the passing of a further milestone in television's relentless advance. In 1931 transmissions by the Baird process were made from a B.B.C. studio for the first time in the history of broadcasting, and in 1932 television programmes from Broadcasting House became a regular feature of the B.B.C.'s work. These programmes, which are given for half an hour on four evenings a week, began on Monday, August 22, and the "televised" performers have included singers, musicians, and vaudeville artists, as well as exponents of Yo Yo and Jiu Jitsu. The latest television receivers, which were to be seen at the Radio Exhibition at Olympia, mark a considerable advance on the old ones, as the image is now shown in black and white, and can be watched by several people

at a distance Only broad effects of colour and movement can at present be televised satisfactorily, and there is still a long way to travel before the invention will be capable of universal application

OUTSTANDING BROADCASTS

Of all the material which was broadcast in 1932 there was no item which aroused so much interest and excitement as the verbatim reading of Mr Neville Chamberlain's War Loan Conversion speech on the evening of June 30 This was an important occasion, for it revealed the value of broadcasting as a means of conveying important announcements to the general public with the least possible delay Until the moment when he rose in the House of Commons on June 30 the secret of Mr Chamberlain's announcement had been closely guarded but special arrangements had been made for its immediate communication to the public A few minutes after he had finished his speech the complete text was broadcast and to mark the significance of the occasion it was read by Vice Admiral Sir Charles Carpendale the Controller of the B B C , who had recently received his knighthood in the Birthday Honours In the following month speeches in support and explanation of the scheme were broadcast by Mr Ramsay MacDonald Mr Stanley Baldwin, Lord Hailsham and Mr George Lansbury

The Prince of Wales who is one of the most popular of all broadcasters was heard in several outstanding items of the year On January 27 his striking ... to youth at a meeting organised by the National Council for Social Service was relayed from the Albert Hall London on April 23 listeners heard his speech on the spirit of Shakespeare and England at the opening of the new Shakespeare Memorial Theatre at Stratford on Avon and on August 1 the broadcast of the unveiling ceremony of the Somme Memorial at Thiepval included speeches by the Prince of Wales and M Lebrun, the President of the French Republic

The chief religious events of the year also figured in the broadcasting programmes An address by the Archbishop of Canterbury, in connection with the National Day of Prayer was relayed from Canterbury Cathedral on January 3 the Eucharistic Congress at Dublin in June was marked by broadcasts of Cardinal Lauri's opening address and the Pontifical High Mass in Phœnix Park the speeches by the Duke of York and Dr J Scott Lidgett were relayed from the Uniting Conference at the Albert Hall on September 20, when Dr Scott Lidgett read the Declaration of Union of the Methodist Churches and the Archbishop of Canterbury was again heard at the Church of Ireland National Commemoration Service, which was held at St Patrick's Cathedral, Armagh on June 9.

One of the great benefits of broadcasting is that events which occur overseas can now be brought nearer to the British public than was possible before Thousands of listeners were able to be present in spirit at the unveiling of the Somme Memorial, and thousands were able to hear the inauguration of two conferences which, though held overseas, vitally concerned the interests of Great Britain When the World Disarmament Conference opened on February 2, the inaugural speech of Mr Arthur Henderson, the President of the Conference, was relayed from Geneva and later in the year the speeches of Mr Stanley Baldwin, Mr R E Pennett and others were relayed from Ottawa at the opening of the Imperial Economic Conference The Atlantic was no barrier to the clear reception of the speeches, and part of the ceremony, which had been recorded by the Blattnerphone, was broadcast again for the benefit of those who had not heard the original relay British listeners were also enabled to sympathise with the French nation in the loss of two distinguished statesmen, for the funeral orations on M Briand the great Foreign Minister and M Doumer, the murdered President, were broadcast by the B B C Both the orations were given by M Jardien

In connexion with the transfer of broadcasting headquarters from Savoy Hill to Broadcasting House two items deserve special mention—the first transmission from Broadcasting House and the last from Savoy Hill The first broadcast from the new headquarters took place on March 15 when Mr Henry Hall, who had recently succeeded Mr Jack Payne introduced the new B B C dance orchestra to the listening public The last from Savoy Hill was the retrospective programme on May 14, entitled 'The End of Savoy Hill The greater part of the programme which was devised by Mr Lance Sieveking and lasted for more than two and a half hours was given from Broadcasting House, but the later stages were transmitted from Savoy Hill, where each studio was used for the last time and the microphones were then cut off Although the retrospect of the early history of broadcasting was excellently done the programme encountered a good deal of adverse criticism on the grounds that it was too long, and that after a good beginning it dwindled away into insignificance

Among other notable broadcasts of the year were Miss Amelia Earhart's account of her flight across the Atlantic Mr Neville Chamberlain's speech on his Budget the appreciations of M Briand by Lord Cecil of Chelwood and of M Doumer by Sir John Simon Mr Stanley Baldwin's talk on the Ottawa agreements, Sir Samuel Hoare's account of "India since the Round Table Conference and Mr Ramsay MacDonald's Empire Day broadcast Important speeches and addresses which were relayed by the B B C included those by Mr De Valera at the opening of the League of Nations Assembly, by the Duke of York and Mr Walter Runciman at the British Industries Fair banquet at the Mansion House, by Prince George Mr Winston Churchill and others at the Royal Academy banquet by Mr Lloyd George at the National Eisteddfod of the Welsh League of Youth and at the Royal National Eisteddfod of Wales and by the Archbishop of York at the service held at St Peter's, Geneva in connexion with the opening of the Disarmament Conference In lighter vein, though many listeners will remember it for a long time, was the short message broadcast by the American film comedians Laurel and Hardy, during their visit to Great Britain

INTERNATIONAL PROGRAMMES

The advance in broadcasting is being accompanied by a marked increase in the number of programmes which are originated in one country and relayed to others, and this increase was reflected in the B B C programmes for 1932 In the early part of the year two concerts were relayed to British listeners from the New York

studios of the Columbia Broadcasting System, and although the first of these concerts was more notable for the excellence of the transmission than for the quality of the items the experience was an undoubted success It led to the further experiment of a series of programme exchanges, in which the items broadcast could be heard simultaneously in Great Britain and the United States The British contribution included talks, a production of Milton's Comus' and one of Mr John Watt's Songs from the Shows programmes and similar talks, an adaption of 'Miles Standish' and a selection of songs and tunes from Broadway successes, were transmitted to British listeners from New York

Contact with the United States is easy to establish, on account of the great resemblance between the English and American languages but most of the Continental relays are still confined to the international language of music The Salzburg Festival was again heard in the British programmes in 1932, when a concert of contemporary French music and the second act of Weber's "Oberon" were relayed and the Munich Festival contributed an excerpt from Mozart's Don Giovanni which was being performed at the Residenz Theatre Another relay from Munich was a studio version of Mozart's Cosi Fan Tutte which was conducted by Dr Richard Strauss and was specially performed for British listeners and other operas were relayed from the Berlin State Opera House and the Berlin broadcasting studios The Continental relays of the year also included a performance of M Gustave Charpentier's La Vie du Poète, from the Theatre des Champs Elysées Paris, a concert from the Ostend Kursaal, and a concert of folk music from Prague

Foreign countries returned the compliment by taking several relays from Great Britain during the Covent Garden opera season and the Symphony concert of works by British composers which was conducted by Dr Adrian Boult and broadcast on February 21 was relayed by Austria Belgium Czechoslovakia, the Netherlands, Hungary, Norway, Poland Sweden and Switzerland

MUSIC

The musical relays from abroad were only a tiny fragment of the musical output of the B B C during the year, and the principal honours for providing Great Britain with music must go to the B B C Symphony Orchestra and Dr Adrian Boult the Director of Music The symphony concerts, the Promenade concerts and the studio performances have covered a wide field of musical works, and the orchestra has maintained its high place among the orchestras of the world

The second half of the 1931 1932 symphony concert season was notable for the first performances of Arnold Bax's 'Winter Legends and the revised version of Arthur Bliss's A Colour Symphony' In addition to Dr Boult and Sir Henry Wood, the conductors included Dr Felix Weingartner, Herr Bruno Walter and M Nikolai Malko, who conducted a concert of Russian music, and among the soloists were Stravinsky, who played the solo pianoforte part in his own 'Capriccio for Pianoforte and Orchestra,' Suggia, Cortot and Huberman The foreign conductors who came to London for these concerts were also invited to conduct the B B C orchestra in a Sunday concert in the studio, and the Sunday performances were as attractive and interesting as the full symphony concerts in the Queen's Hall The series of concerts devoted to contemporary music was continued and in the early part of the year two were devoted to the works of Russian composers and of Bela Bartok the Hungarian

The summer season of Promenade concerts provided further proof of the untiring energy and talent of Sir Henry Wood who again performed the task of rehearsing and conducting the forty nine concerts but the season was criticised by many listeners on the ground that it lacked novelty One item which received its first English performance during the season was Ravel's Concerto for the Left Hand which was given in the concert broadcast on August 16 The piece was written by Ravel for Herr Paul Wittgenstein a distinguished pianist who lost his right arm in the trenches and it was played at the Promenade concert by Herr Wittgenstein himself

While the B B C Symphony Orchestra provided the greater part of the broadcast orchestral music concerts were also broadcast by most of the leading orchestras throughout the country, including the Hallé Liverpool Philharmonic, Leeds Symphony and City of Birmingham orchestras Among important studio performances were a programme of Mr Rutland Boughton's works conducted by the composer a performance of Delius's A Village Romeo and Juliet conducted by Sir Thomas Beecham, and vocal or instrumental recitals by Elena Gerhardt Irene Scharrer Rudolph Dolmetsch, Albert Sammons John Coates Peter Dawson Irene Chemet and many others The policy of providing opera for the masses was continued, and there were many operatic relays from Covent Garden and provincial theatres

As regards the supply of lighter music the principal change of the year was the departure of Mr Jack Payne who had won a great reputation as a purveyor of dance music His successor Mr Henry Hall brought with him a new dance orchestra which adequately filled the vacant place

TALKS AND EDUCATION

The spoken word has always taken an important part in the broadcast programme, and the many series of talks in 1932 provided their usual quota of education and entertainment, with here and there an occasional thrill The more serious talks were contained in the scheme entitled 'The Changing World A Broadcast Symposium which was brought to an end in March An effort was made in these talks to provide a comprehensive survey of the present state of the world, and among the speakers were Sir Oliver Lodge Professor J B S Haldane, Mr Bertrand Russell and Mr Hilaire Belloc, who gave their views on science and civilisation, Mrs Sidney Webb Professor W G S Adams and Sir Arthur Salter who dealt with various problems of society and government Professor John Macmurray and Mr T S Eliot, who spoke on "The Modern Dilemma" and Dr C. Delisle Burns, who considered the place of leisure in modern life Contributions were also made by Professor Henry Clay, Professor Arnold Plant Mr D H Robertson, Sir Barry Jackson, Mr Kingsley Martin and Mr J E Barton, and

the series on "Changes in Family Life," which was given by Sir William Beveridge and others caused a good deal of comment on account of the questionnaire which was issued in connexion with the talks. The questionnaire, which was designed to elicit useful information about modern family life, was described by indignant critics as an inquisition, but the B.B.C. was able to retort that the whole affair was quite voluntary, and that no one would receive a questionnaire unless he or she asked for it.

Although the main talks in the "Changing World" symposium were brought to an end in March a number of supplementary series were arranged for the closing months of the year. The subjects included 'The Law of the Land,' 'Our Neighbours To-day and Yesterday' and 'Our Debt to the Past.' Among other series which dealt with contemporary conditions and developments were those by Mr J. L. Hammond and Professor Arnold J. Toynbee on Britain and the Modern World Order and by Sir John Russell and others on 'Must Britain Starve?' a survey of modern agricultural problems. The tenth and eleventh National Lectures were broadcast in January and March, Sir Frederick Hopkins discussing 'Vitamins as Necessities for Life' and Professor George Gordon dealing with 'The Art and Ethics of Modern Biography.'

The talks of general interest included the entertaining 'Rungs of the Ladder,' in which such diverse personalities as Mr J. H. Thomas, Mr W. H. Davies, Mr Bernard Shaw and Mr C. B. Cochran explained or were supposed to explain, how they had climbed to success. Mr Shaw, as might have been expected, talked about something entirely different. Mr Stanley Casson had a series of duologues with distinguished artists whom he questioned about their method of work, and many speakers took part in the conversations on varied topics which were supposed to occur in a tram and were given under the general title 'On the 9.20.' Mr S. P. B. Mais discussed the beauty of England in talks on 'The Unknown Island,' and first hand accounts of thrilling adventures by land, sea and air were given in the 'Hazard' series. Two talks by Miss Stella Benson showed that she is as witty at the microphone as she is in her novels.

In the closing months of the year Mr Vernon Bartlett temporarily abandoned his weekly survey of foreign affairs in order to tour Europe and to broadcast at fortnightly intervals from foreign capitals. At the same time Mr G. K. Chesterton and Mr E. M. Forster came to the microphone as critics of new books in the place of Mr Desmond MacCarthy and Miss V. Sackville West. Other autumn innovations were the institution of a daily eye-witness account or topical talk to supplement the second general news bulletin, the provision of a short daily epilogue in prose or verse, the opening of a series of unfinished debates, and the presentation of a number of knotty problems under the title 'Consider your Verdict.'

The usual programme of broadcasting for schools was carried out, and during the year the Central Council for School Broadcasting was reconstituted under the chairmanship of Lord Eustace Percy, M.P. One of the new developments was a series of discussions on subjects of topical interest, in order to encourage school children to read the newspapers. The discussions were conducted by Mr Hugh Ross Williamson the editor of the *Bookman* and Mr. Godfrey Lias.

There was no change in the religious policy of the B.B.C., and the Thursday evening services from St Michael's, Chester Square, which were initiated during the period of national emergency in 1931, were continued throughout the year as a regular feature of the programme.

DRAMA

A survey of the year's dramatic broadcasts reveals that Shakespeare and Mr L. Du Garde Peach are the two dramatists whose plays are most frequently broadcast. The Shakespearean productions included 'Othello' (with Henry Ainley, John Gielgud and Peggy Ashcroft), "As You Like It" (with Gwen Ffrangcon Davies), 'Hamlet' (with John Gielgud, Martita Hunt and Margaretta Scott), and 'Henry V,' and they showed that the B.B.C. producers have considerably improved their methods of bringing Shakespeare to the microphone. Mr Du Garde Peach is by no means a Shakespeare, but he is a clever writer who has devoted much time and thought to the technique of radio drama. His new plays 'Bread' and "Love One Another," together with the revivals of 'The Path of Glory' and "The Man of Oakesle," bore witness to his skill in holding the listener's interest and constructing suitable dialogue for broadcasting.

Marlowe's 'Doctor Faustus' and Mr John Drinkwater's 'Midsummer Eve,' which was written for broadcasting, were other notable productions of the year and there were welcome signs that the B.B.C. slave of the macabre is at last decreasing. Such plays as 'Catastrophe' and 'Rope' still supplied the listener with occasional horrors, but less sensational fare was provided by Mr Denis Goodrich's "Ann and Harold," Mr Philip Wade's 'Oranges and Lemons' and a delightful production of Harold Brighouse's 'Hobson's Choice.' Other interesting plays were the German 'Flags on the Matterhorn' dealing with Whymper's historic ascent, Vernon Robinson's 'The Round Table,' Oscar Wilde's 'An Ideal Husband,' Stephen King-Hall's 'B.J. One' and Edward Lewis's 'The Triumph of Youth' adapted from Jacob Wassermann's novel. In general the B.B.C. kept a fair balance between radio drama and adaptations of plays originally written for the stage.

The Midland Regional programmes included a number of dramatic broadcasts from the Birmingham Repertory Theatre, which is now equipped with a broadcasting studio, and the eighteenth century 'Tom Thumb the Great' was relayed from Malvern during Sir Barry Jackson's festival season. Many performances by the Abbey Players were broadcast from Belfast, and the West Regional programmes contained some ingenious programmes called "Facets," which illustrated the way in which different dramatists had approached similar subjects. The 'Miscellany' programmes by C. Denis Freeman and M. H. Allen provided an attractive blend of plays, poetry and music.

LIGHT ENTERTAINMENT.

The field of light entertainment included comic opera, musical comedy, revue and vaudeville. Four outstanding productions were 'Good Night, Vienna,' with book and lyrics by Holt Marvell and music by George Posford, which was subsequently made into a talking

film, an adaptation of Johann Strauss's 'The Gipsy Baron,' for which the orchestra was conducted by Dr Adrian Boult. 'His Majesty Proclaims," a romantic operetta with a cast which included Violet Loraine, Lady Tree Nancie Lovat and Claude Hulbert and the burlesque Victorian melodrama, "The Pride of the Regiment," which was later produced at a West End theatre. An adaptation of Leyniel's Hahn's "Beau Brummel" was not so successful.

Mr Gordon McConnel maintained his high reputation as a producer of broadcast revues and his collaboration with Mr Christopher Stone produced the delightful series of 'New Songs for Old.' Mr John Watt was responsible for a number of excellent productions including his charming series of 'Songs from the Shows.' "Love in Greenwich Village" and 'Postman's Knock' which he wrote in collaboration with Paul England and Claude Hulbert. Among other successful productions were Mr Ashley Sterne's "Grand Slam" and the three programmes of Mr Harry Pepper's concert party "The White Coons" which enabled Stanley Holloway to recount the sad history of Albert who was eaten by a lion at a Blackpool Zoo.

The vaudeville programmes continued their usual course though they were enlivened by a number of special performances called "Music Hall," in which an attempt was made to capture the real spirit of a music hall. All the vaudeville favourites were heard at one time or another during 1932 and John Tilley, George Gee and Florence Desmond were perhaps the most notable of those who came to the microphone for the first time.

SPORT

The principal sporting events of the year were the subject of running commentaries or eye witness accounts and Mr R. C. Lyle (racing) Mr Howard Marshall (cricket) Mr Bernard Darwin (golf) Mr George Allison (Association football) Captain H. L. V. Wakelam (Rugby football and lawn tennis) and Mr. Lionel Secombe (boxing) were prominent members of the B.B.C.'s team of sporting critics. Mr Allison's activities were still restricted owing to the general ban on broadcasting by the Association football authorities but he was able to give an excellent commentary on the Cup Final. Mr John Snagge dealt with the Boat Race very effectively and ice hockey, Rugby League football and speedway racing were also the subject of one or more running commentaries.

No review of the year's broadcasting would be complete without a reference to the gramophone recitals of Mr Christopher Stone and the story telling of Mr A. J. Alan. Mr Stone's programmes were as popular as ever and Mr A. J. Alan's 'An Adventure at Christhurst' was told with his customary charm and ingenuity.

GLIDING PROGRESS IN 1932

CONSIDERABLE progress has been made in motorless flight both as a sport and as a development of aeronautical science in the past year. It was obvious to everyone seriously interested in aviation that there was bound to be a certain degree of evanescence about the sudden popular "boom" which gliding enjoyed two or three years ago, when one or two German experts came over to England and created a good deal of astonishment amongst laymen by the feats they were able to perform when piloting motorless aircraft. At that time a good deal of nonsense was written concerning the immediate possibilities of gliding, and the imaginations of many people were inclined to run riot when they envisaged a few years further progress making it possible for everyone to glide over the country side at little effort and no expense. These optimistic prophecies were given additional encouragement by the ease with which young gliding pupils overcame the initial difficulties of keeping an "A" type glider in the air for a few seconds. It was undoubtedly the sporting side of gliding which made the greatest appeal at that time. It was hailed enthusiastically as "the sport with a thrill in it,' and the gliding clubs formed all over the country to cater for the new demand found in many cases that they had queues of members anxiously waiting to taste the first joys of taking a glider into the air. In some instances the large numbers of young men who were attracted by the formation of these clubs were inclined to become something of an embarrassment, for it was seldom that a club could start with more than one Primary type glider which had to be hauled back to a suitable starting point after every launching, and which was often out of commission for a day or two owing to minor damage caused by awkward handling and imitation crash landings. Luckily a Primary type glider lands slowly and comparatively lightly for it has no engine aboard, and its construction is such that the pilot is given considerable protection if he strikes trouble. It is a tribute to the relative safety of gliding as compared with the element of risk in powered aircraft that few serious accidents occurred then or have happened since. During the past twelve months two glider pilots have unfortunately been killed—one British and the other German—but in the former case at least, an experimental flight under unknown conditions was being carried out. In England very few gliding clubs have had their activities interrupted by anything but minor mishaps, despite the fact that during the past two years much more advanced work has been undertaken by the majority of clubs. It is a matter for congratulation, indeed that the British clubs realised so quickly that the gliding movement in this country would not progress very rapidly if they contented themselves with putting as many pupils as possible through the elementary stages. Fortunately, a number of responsible enthusiasts in this country carried out a good deal of useful propaganda work by emphasising the importance of Britain creating as soon as possible a nucleus of skilled pilots able to soar on the

advanced types of sail planes with which the German experts were setting up so many records It is in soaring, or sail planing, that the most important developments in gliding will come about If gliding achieves any importance in the future in a commercial relationship it will be as a result of research on these lines So far it must be admitted that while skilled soaring pilots have covered some remarkable distances without the aid of an engine they have only been able to do so because of their great skill in the control of a sail plane their advanced meteorological knowledge and the use they have been able to make of it because of a highly developed air sense It is a plain fact that while the average beginner in ordinary flying can quickly learn the essentials of controlling an aeroplane a comparatively lengthy training and special temperamental qualifications are necessary to make a skilled sail plane pilot At the same time it must be realised that the difficulties in regard to this special kind of training have been greatly simplified by the research work initiated by the Germans and since carried on successfully by many gliding clubs in England, America and some other countries The most important research and training work is still being carried out by the German gliding schools which are very capably organised and which are accomplishing work of high scientific value in this new sphere of aviation It is probable that the German Government realises that Germany has gained a good deal of international prestige from the successful way in which research in motorless flight has been resuscitated in that country At all events, the Government now grants a useful subsidy every year to the movement In 1930 it amounted to £16 000 This financial assistance from official quarters enables the German gliding schools and clubs to make a very good show They certainly use the money to the best advantage and provide facilities whereby pupils can become skilled sail plane pilots at small expense It is estimated that during the past two years well over six thousand pupils have been trained in the German schools In addition to the schools where specialised training is carried out during the greater part of the year, Germany has over four hundred ordinary gliding clubs During the past year there has been a further expansion of the international interest in motorless flight There has been a noteworthy gliding boom in France, where the Government has voted 5 000,000 frs to develop the national movement A number of clubs have also been formed in Italy, which has already a number of enthusiastic pilots who are doing much to foster a gliding interest in that country Both in America and Australia a good deal of progress has already been made In the former continent nearly two thousand gliders are in use Pilots from countries all over the world have been trained in the German schools and are now engaged in teaching club pupils the latest sail planing technique The British Gliding Association of which the Chairman is Mr E C Gordon England, continues to do useful work in controlling the movement in Great Britain It has now nearly 80 clubs under its supervision and for the most part they are composed of enthusiasts who are keen to advance the research side of gliding while still enjoying its fascinations as a sport It is being increasingly recognised that gliding and sail planing are of great value in relation to civil aviation inasmuch as they offer an attractive incentive to young people to become 'air minded' Gliding is undoubtedly a valuable means of training young pilots who are afterwards able to master very quickly the control of an aeroplane In this way the British Gliding clubs, if properly supported by the Government should be able to do much to build up a reserve of young pilots who could rapidly qualify as ordinary aeroplane pilots if their services were required Although a few have taken the advanced certificates women so far have not taken a very active interest in the gliding movement Further progress was made during 1932 in towed flight by which a sail plane is towed in the air by an aeroplane or by a motor car from the ground Further experiments in power launching by motor car have also been carried out by various clubs The element of risk is obviously greater than in ordinary manual launching and power launching is now covered by strict official regulations Good propaganda work was done during the summer by Mr Lowe Wilde, who gave demonstrations of towed flight all over the country in connexion with Sir Alan Cobham's National Aviation Day scheme Many hundreds of passengers were successfully initiated into the mysteries of gliding by this means and the movement generally was thus given valuable publicity For these demonstrations of course, a two seater glider of the latest design was used It has been interesting to note how quickly a literature of gliding has been built up during the past two years Since Messrs L Howard-Flanders (a member of the Council of the British Gliding Association, and the first Secretary of that body) and C F Carr brought out the first British book on the subject Gliding and Motorless Flight,' two years ago, about ten notable technical works have been published in this country Herr Robert Kronfeld, the famous German pilot is the author of one of the latest No sensational departures in glider construction has recently been made but steady progress is always going on The latest sail planes are of great beauty, and in the hands of expert pilots give remarkable performances in long distance and course flying and in cloud and storm soaring The International Commission on Motorless Flight continues its valuable work in controlling the international aspects of gliding and in carrying on constant research work of the highest technical merit It was announced towards the end of 1932 that Herr Kronfeld would probably go to India to carry out extensive gliding experiments in relation to thermal currents in that country, where the possibilities of commercial gliding are considered to be more promising than in other parts of the world As far as the movement in Great Britain is concerned, it can be said that, despite many handicaps, it is steadily progressing on sound lines Suitable sites for soaring and for general experimental work are being carefully catalogued, and it is probable that within a few years training schools on German lines will have been established Centralisation of gliding club activities around areas of outstanding suitability seems to be indicated, and there is little doubt that British gliding and sail planing pilots will continue to take a prominent and successful part in the international competitions which the International Commission is fostering

THE NOBEL PRIZES.

THE Nobel Prizes are awarded from the income of a fund bequeathed to trustees by the Swedish scientist Alfred Nobel, the inventor of dynamite, who died December 10 1896 leaving a fortune of about £1,750 000 *The first awards were distributed on the fifth anniversary of Nobel's death*, Dec 10, 1901 The awarding authorities are the Swedish Academy of Science—(*a*) Physics (*b*) Chemistry, the Stockholm Faculty of Medicine—(*c*) Medicine or Physiology the Swedish Academy of Literature—(*d*) Literature and a committee of five persons elected by the Norwegian Storthing—(*e*) Peace The fund is managed by a Board of Directors elected by fifteen deputies appointed by the authorities above named The Swedish Government appoints a President of the Board of Directors Particulars concerning conditions &c can be obtained from Nobelstiftelsens Styrelse Sturegatan 14 Stockholm Sweden

COMPLETE LIST OF AWARDS (Value 1931 *Award* 173 206)

ELCHO CHALLENGE SHIELD.

The Elcho Challenge Shield was instituted in 1862. It is open to one team of 8 from England, Scotland and Ireland respectively. 15 shots each at 900, 1,000 and 1,100 yards. Highest possible score 1,800.

THE ASHBURTON SHIELD, BISLEY.

The Ashburton Challenge Shield Competition was instituted in 1861 for teams of 8 from the Public Schools (teams of 11 from 1861 1876, teams of 8 since 1877). In 1861 and 1862 the Hay M.L. rifle was used; in 1863 the long Enfield M.L., 1864 to the Navy 5 groove M.L., 1871 1884 Snider, 1885 1896 Martini Henry, since 1897 the 303 Magazine. The present regulations are 7 shots at 200 and 500 yards, one team of 8 pupils from each of such schools as have a contingent of the Junior Division of the Officers Training Corps. The Highest Possible score is 560.

L'ACADÉMIE FRANÇAISE.

THE FRENCH ACADEMY is composed of 40 members, elected for life, and is the highest of the five Academies constituting *l'Institut de France* (*Secretary of the Institute*, M. Robert Regnier) The Academy was founded by Cardinal Richelieu in 1635 and reorganized in 1816 The special object of the Academy is the composition of a Historical Dictionary of the French Language, and its members, "The Forty Immortals," are as follows —

Elected	Name	Born
1894	Paul Bourget	1852
1897	Gabriel Hanotaux	1853

ACADEMIE DES SCIENCES MORALES ET POLITIQUES (for the study of questions of social and political economy), founded in 1832, 40 members, 5 sections

All the Academies with the exception of the Académie Française elect a certain number of honorary members and of national foreign correspondents

THE GRAND PRIORY IN THE BRITISH REALM OF THE VENERABLE ORDER OF THE HOSPITAL OF ST JOHN OF JERUSALEM

(INCORPORATED BY ROYAL CHARTER)

THE Order was founded in Jerusalem in 1099 by the Blessed Gerard as an Order of Hospitallers under the Augustinian rule His successor inspired by the example of the Templars, converted it into a Military Order On the loss of Jerusalem it migrated to Acre and from thence to Rhodes and Malta, where it formed one of the most important bulwarks against the naval power of the Moslems in the Mediterranean Since the loss of Malta in 1798 the Order, which is International, has devoted itself to works of charity and humanity The objects and purposes of the Order are, amongst othe things, the maintenance of the St John Ophthalmic Hospital at Jerusalem, and the St John Ambulance Association and Brigade at Home and Overseas and the London Light and Electrical Clinic for poor people The Order is conferred for services in the cause of humanity throughout the Empire and is open to both men and women There are 5 classes Bailiffs and Dames Grand Cross Knights and Dames of Justice and of Grace, Commanders of both sexes, Officers of both sexes Serving Brothers and Sisters These distinctions are notified in the *London Gazette* but do not confer any rank or title The ribbon of the decorations of the Order is black (watered) *Headquarters* St John's Gate Clerkenwell E C 1

CLOSE TIMES FOR GAME

In each case the dates are inclusive —

Black Game—Dec 11 to Aug 19 (Aug 31 in Somerset, Devon and New Forest)

Grouse— Dec 11 (Dec 10 Scotland) to Aug 11

**Partridge*— Feb 2 to Aug 31

**Pheasant*— Feb 2 to Sept 30

**Ptarmigan* (Scotland only) Dec 11 to Aug 11

It is also unlawful (in *England and Wales* by statute) to kill the game marked * on a Sunday or Christmas Day

In *England and Wales* hares rabbits woodcock, snipe quail landrail and heath or moor game (and the eggs of swan wild duck teal and widgeon) are protected under the Game Laws though no close time is fixed for them by those laws In *Scotland* the same remarks apply to deer and hares to the first four birds and to wild duck The close time for all these birds is under the Wild Birds Protection Acts 1880 to 1908 from March 2 to July 31 both inclusive Otherwise this close time applies to all wild birds throughout Great Britain

HUNTING AND GROUND GAME

There is no statutory close time for fox-hunting or rabbit-shooting nor for deer or hares but by an Act passed in 1892 the *sale* of hares or leverets in Great Britain is prohibited from March 1 to July 31 inclusive under a penalty of a pound The first Monday in November is the recognised date for the opening of the *fox hunting* season which continues till the following April *Otter hunting* lasts from mid April to mid September The period for *deer hunting* or *stalking* varies from about August 12 to October 12 for stags and from November 10 to the end of March for hinds

SEASONABLE AND UNSEASONABLE FISH

THE following table shows the periods when the different kinds of edible fish mostly in use are in season and out of season

The letter *p* signifies that the fish are then in their prime or most plentiful the letter *x* signifies that the fish may be obtained but are not at their best the letter – signifies that it is close time as fixed by statute

Name of Fish	Jan	Feb	Mar	April	May	June	July	Aug	Sept	Oct	Nov	Dec

(*a*) This is for sea crayfish (or crawfish) River crayfish can be obtained in the summer and autumn. It is illegal to take fresh water crayfish from March to June

(*b*) Foreign oysters can be sold in the close season, and are to be had almost all through the year even though they have been laid down in English beds for temporary storage

(*c*) For the first six months the bulk of our London supply of shrimps comes from the Netherlands, but Dutch shrimps are far inferior to the English, which are plentiful from July to Dec.

(*d*) In the close season, salmon from the Netherlands, and also from certain British rivers where net fishing is permitted later in the year than usual are largely sold

Head Master—

R. A. SHEPHEARD-WALWYN, M.B.E., M.A.

(Late House Master of the "Probationers" House at Glenalmond)

Rickerby House is a solidly built family mansion in some ten acres of its own grounds on the north side of the River Eden, just outside the city boundary.

The district possesses what is probably the most equable climate in the kingdom. The house has electric light and central heating throughout. The rooms are all high and light, and the majority face west. The drainage system is modern, and has been approved by the Rural District Sanitary Inspector.

The usual subjects are taught, and the methods employed aim at making it possible for each boy to progress at his own best speed, neither "cramming" the intelligent boy nor neglecting the slow one.

The use of out of school hours is as varied as possible, the usual games being played and creative hobbies being encouraged. The aim is to make games and athletics a real recreation and not a business. Riding lessons are available for boys whose parents wish it.

The domestic arrangements are under the care of Miss E. H. FUTTARD, an experienced School Matron and a Trained Hospital Nurse and Housekeeper.

Entire charge of pupils if desired.

Prospectus and Fees on application to the Head Master.

Chichester School

Chichester, Sussex

Tannachie Court School

Malvern Wells, Worcestershire.

MR. KEITH BREBNER BULLEN, M.A. (Hons.),
Caius College, Cambridge,

Assisted by a qualified Staff, prepares boys, aged 7 to 14 years, for Public Schools and the Royal Navy.

Tannachie Court School, with 16 acres of Playing Fields and Gardens, is situated on a slope sheltered by the Malvern Hills and enjoys a bracing and sunny climate.

The aim of the School is to develop each boy according to his individual ability, and by method and enthusiasm to ensure a sound preparation for later work.

Classes are small, and the backward boy is given extra help and encouragement.

The domestic arrangements are under the direct supervision of Mrs Bullen, who is assisted by a trained nurse as Matron. Entire charge can be taken of children whose parents are abroad.

All the vegetables are grown in the gardens, and fruit is abundant. The School has its own little farmyard, with poultry and pigs; a model dairy is to be installed later. Healthy appetites are encouraged, the food being varied and attractively served. Special attention is paid to young and delicate children.

HARROGATE
THE BRITISH SPA

One of the most apt descriptions ever applied to Harrogate is the Mecca of the Ailing and the Playground of the Robust. Its Bathing Establishment (the Royal Baths) is most elaborately and completely equipped. There are upwards of two hundred medically trained and certificated male and female nurses. There are within a radius of fifty miles of Harrogate no less than sixty stately homes of England. Harrogate is a gem in a perfect setting and no visitor will fail to appreciate its intimate charm and delightful associations.

FERNBANK 5, ST. MARY'S AVENUE.

Comfortable Apartments, with or without Board.
2 minutes Baths and Pump Room, Valley Gardens.

Telephone 2960. *Proprietress*, Mrs E. WADDINGTON

MALVERN,

WORCESTERSHIRE U D C 119 miles from London. Pop 25 632 Means of Access—G W Railway and L M & S Railway Location On the slopes of the Malvern Hills, 8 miles from Worcester Elevation—300 to 900 feet above sea level Climate—Dry and bracing. Water Supply—Pure, constant Drainage—Modern Soil—Gravel Season—Summer and winter Annual Fixtures—Shakespeare Week in May, Croquet and Lawn Tennis tournaments in May and June Malvern is an inland watering place important educational centre, and a pretty residential town consisting mostly of villas standing in own grounds The highest point of the Malvern Hills is the Worcestershire Beacon 1 400 feet high from the summit of which is obtained one of the most extensive panoramic views in Great Britain, embracing the Severn and Wye Valleys the Cotswold, Mendip and Welsh hills and in the plain below can be seen Droitwich, Worcester Evesham Cheltenham Gloucester and the Bristol Channel

The Malvern Hills being a single chain, there are no lateral intervening valleys in the range. This has much to do with the dryness of the climate The Malvern district is rich in botanical, geological entomological and ornithological specimens Assembly rooms (high class bands and theatrical companies) public library three clubs tennis bowls croquet, golf—gentlemen's course (18 holes) ladies course (9 holes)—hunting hunting fishing Places of Interest—Rivers Severn (4 m) Teme (6 m) Avon (12 m) boating fishing river scenery Deerhurst (17 m)—Saxon church Tewkesbury Abbey (15 m) Pershore Abbey (16 m) Bosbury (8 m)—Edna Lyall's tomb Valley of the Wye—by rail to Ross and boat down river to Chepstow

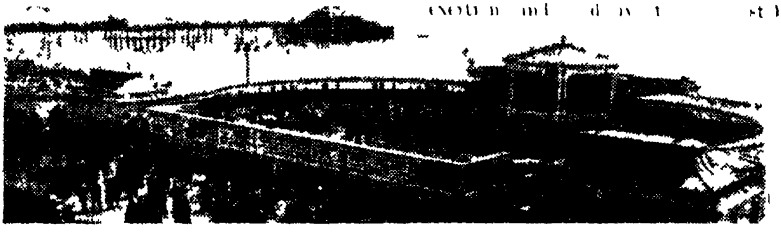
THING

is noted for the equability of its climate which is largely due to its geographical situation The proximity of the sea and the shelter afforded by the South Downs combine to modify the climate and avoid extremes The absence of hills enables ocean breezes to reach Worthing without exception and [illegible] to the benefit



from the high percentage of ozone in the air and the large amount of sunshine A palatial Pavilion at the Pier entrance and a commodious Landstand on the shore on the Parade have been added to the town's many attractions An all the year round repertory plays in the Pavilion There are facilities for sports of all kinds

83 minutes from London by the luxurious corridor trains of the Southern Electric Railway. Trains every half hour.

The Ideal Residential Town 'twixt Sea and Downs.
Unsurpassed for Sunshine and Equability of Climate.

WHITAKER'S PEERAGE

"Whitaker's Peerage, Baronetage, Knightage and Companionage" is a companion volume to, and not less authoritative than, the ALMANACK. Introduced in 1895, it is now firmly established, and serves its public almost equally as well as its more expensive contemporaries.

J. Whitaker & Sons, Ltd., 12, Warwick Lane, London, E.C. 4.

Insurance Advice

MR. T. G. ROSE (Author of *Cost Price Assurance* and Hon. Lecturer to University Economic Dept.) is at all times willing to give intending ASSURANTS assistance on Assurance matters, without any charge falling upon the applicant. All proposals and premiums may be sent direct to the Company concerned.

THE TABLES PRESENTED below indicate the advisability of writing to or seeing the author *before* investment. Letters, giving the fullest possible information as to date of birth, etc., should be addressed :

14, THE GREEN, RICHMOND, SURREY

EXAMPLE OF RESULTS :

Whole Life Assurance (with profits) £10 Annual Premium. †

Age at Entry	25	30	35	40
Assumed age at death	70	70	70	75
Yield	£1,175	£933	£740	£635

"Whole-Life" Twenty Limited Payments of £10

Age	20	25	30	35	40	45
Result at age 70 (Death assumed)	£982	£820	£677	£552	£450	£363

WHITAKER'S ALMANACK PP. 471, 1931, and 469, 1932.

* The selection of the office best suited to requirements and likely to produce the best results should be carefully made but the study of any tables or suggestions is not sufficient to enable persons without technical knowledge to gauge the respective merits of the various companies and large sums may be saved or earned by intending proposers through obtaining reliable advice before a proposal is made *

£10 Annual Endowment Premium.	Age at Entry	Age at Maturity	Yield †
	20	60	*£873
	30	60	£516
	40	65	£370

† World wide policies

HOUSE PURCHASE BY ASSURANCE

One of the first Insurance Companies to popularise House Purchase in conjunction with Life Assurance was the BRITANNIC ASSURANCE CO., LTD., who have over 10,000 contented householders on their books.

Each of these householders not only secured his house for himself, and abolished rent, but, owing to the protective Life Assurance feature in his contract, his family is assured of a home without further payment in the event of his death.

Advances up to 80% of approved value

Yearly inclusive outlay little (if at all) more than rent.

Explanatory leaflet forwarded free on application.

BRITANNIC ASSURANCE CO. LTD.

Chief Offices: **Broad Street Corner, BIRMINGHAM**

ANNUITIES

The Canada Life Assurance Company specialises in Life Annuities and offers the very best value and service to its clients. Its rates are exceptionally attractive and the contracts are protected by

ASSETS of £42,000,000

invested in absolutely first-class Securities. The Company is one of the strongest in the British Empire, with

Surplus Funds and Special Reserves of £1,678,971

at December 31, 1931.

Full particulars can be obtained from

CANADA LIFE ASSURANCE COMPANY

(Incorporated in Canada as a Limited Liability Company).

J. R. WANDLESS, F.I.A., Manager,

Established 1847.

BEFORE buying an Annuity Consider

Will you

(1) be secure?

(2) be sure you are secure?

(3) obtain the best value for your money?

THE CONFEDERATION LIFE ASSOCIATION, the old established Annuity Office, grants annuity rates which rank among the very best obtainable, allowance is made for each month of age actually completed contracts may be obtained under which *the full return of the purchase money is guaranteed*, and it possesses funds exceeding £18,000,000 under direct Government supervision

A man aged 65, for example, can obtain a guaranteed return on capital exceeding 10 per cent per annum for life The return at other ages to both male and female investors is equally generous

Even more favourable terms are granted to those in Impaired Health

Write to day – stating exact date of birth for a personal quotation, which will be sent you without obligation Please mention Whitaker's Almanack

START YOUR PROSPERITY PUSH NOW

The turn of the tide is your opportunity to make the future safe for you and yours. Arrange now for a private Income for Life for your own later years—with immediate financial protection for your family.

NEW PLAN SOLVES TWO VITAL PROBLEMS

If you live to age 60

You will receive from the Sun Life Assurance Company of Canada

£300 A YEAR

for the rest of your life, or

£3,500 CASH

And if you do not live to that age, your family will receive from the Company the following:—

£350 . 0 . 0 IMMEDIATELY (This will come just when ready cash is most necessary.)

£17 . 10 . 0 A MONTH for any period up to 20 years (wife can choose the period).

FINAL CASH SUM at end of chosen period. Amount depends upon length of time monthly income has been taken.

The above Plan applies at any age and for any amount. You can arrange for a larger pension, or a smaller one, according to what you can now spare from your income. Why not write now to the Sun Life of Canada for exact figures based on your own requirements? This places you under no obligation.

The Fallen Income

A NEW PLAN FOR A NEW PROBLEM

Offered and Guaranteed by the Leading Annuity Company

The reduction of interest rate has seriously affected the standard of living for thousands of men and women.
The Sun Life Assurance Company of Canada has evolved a Plan which more than makes good the loss of income, makes the income absolutely secure for life, and also solves the problem of dependents. The Plan provides for a

GREATLY INCREASED INCOME NOW, WITH A SUBSTANTIAL CASH AMOUNT LATER FOR DEPENDENTS

As an example of the Plan, a man age 65 can secure an annual income for life equivalent to 7 *on the whole of his Capital*, with a substantial cash amount guaranteed to be paid later to his dependents.

Full details of the Plan may be had on application. No obligation is incurred.

Principal Charitable Bequests of the Year.

APPENDED is a list of the principal bequests for charitable purposes recorded during the year. The amount for charitable purposes is in a considerable proportion of the cases approximate owing to the bequests including a share of the residuary estate or consisting, wholly or in part, of business interests, or of blocks of shares &c. for which a definite value cannot be given.

Reversionary bequests, *where these are absolute* (usually on the cesser of life interests or of a period of years) are included, but contingent reversions (dependent upon failure of issue, the failure of prior trusts, or the failure to observe certain conditions, &c.) *are not so included*, unless it is known that the reversion, though nominally contingent, is, in the events which have happened, absolute.

The amounts of residuary bequests are subject to variation on the final winding up of the estate, owing possibly to variations in the amount of duty payable (as the final figures may place an estate for duty purposes in a different category either higher or lower as compared with the original value submitted on obtaining the grant of probate) or to variation in the values between the date of death and the final realization of the assets.

The list records the principal bequests published during the year, not necessarily those becoming payable during the year.

The heavy fall in values during the last year and the persistently high level of taxation upon the more well to do of the community has had its effect upon the amount available for charitable purposes, but despite these adverse conditions, which affect the very large estates more particularly, the appeal of charities has not been affected so severely as might have been expected.

The increase in the proportion of bequests for educational trusts and for hospitals and for "social purposes" and the relative decline in those for purely religious or church purposes which has been noted during the last few years still continues.

	Gross Value of Estate	Approx. Amount	
	£	£	
Lipton, Sir Thomas, of South Gate	566,068	350,000	Bequests include £100,000 (less sums given in lifetime) for benefit of poor mothers of working classes in Glasgow, residence (and £20,000) as a hostel for nurses and other bequests include £3,000 Lipton Memorial Nurses Home, Cumbuslang, and residue for endowment of infirmaries and (certain) hospitals for relief of sick and poor within the City of Glasgow and (2) Cumbuslang.
Schiff, Mortimer Leo, of New York (estate in England)	2,500	240,625	Bequests to many charitable institutions in New York including 500,000 dollars to Federation for support of Jewish Philanthropic Societies, New York, and 100,000 dollars to the Boy Scouts Association of America and 50,000 dollars to New York Zoological Society.
Van Heussen, John Manning, of New York (English estate)	4,409	240,625	About 1,000,000 dollars subject to life interests) to religious and charitable societies in New York and district.
Warren, Henry Boniface Cordon, of Liverpool	421,789		Residue in equal shares to such charitable purposes as Williams Deacon's Bank Ltd. may appoint, it is stipulated however that it may be used for scientific and industrial research and in the endowment of such work.
Ogden, Henry J., of Bournemouth	209,147	150,000	Residue for division into 100 parts, which are left specifically to Manchester Royal Infirmary, Salford Royal Hospital, Ancoats Hospital, Manchester Children's Hospital, St. Mary's Hospital for Women and Children, Manchester, Lord Mayor of Manchester for the poor, Manchester and Salford Adult Deaf and Dumb Benevolent Institute, Henshaws Institute for Blind, Old Trafford, Manchester and Salford Children's Mission, Manchester and Salford Boys and Girls Refuges, London Hospital, Dr. Barnardo's Homes, Battersea General Hospital, Lord Mayor Treloar's Cripples Hospital, Mayor of Hampstead for poor, Anti Slavery and Aborigines Protection Society, Furnishing Trades Benevolent Fund, National Education Society, London, Cobden Club, London, Manchester Liberal Federation, National Liberal Federation, London Liberal Federation, Lancashire, Cheshire and North West Liberal Federation, and Mr. Herbert Samuel for distribution among political federations or bodies in the United Kingdom (other than those mentioned).

ALEXANDRA ORPHANAGE

Haverstock Hill, LONDON, N.W. 3.

Founded 1758.

Patrons: **Their Majesties The King and Queen.**
President: **H.R.H. The Prince of Wales, K.G.**
Treasurer **(since 1897): The Rt. Hon. Lord Marshall, P.C., K.C.V.O.**

The Orphanage is unsectarian and helps fatherless and other necessitous children from all parts of the country and the Dominion without restriction as to class or creed. Boys and girls are admitted at all ages between infancy and 11 years of age, and are cared for until 15. Then education fits them for useful positions in after life. Opportunity for suitable children to have a secondary education. During the past 174 years 3,400 have been received. 370 are now resident and other applications vacancies.

More annual subscribers are needed. £10,000 required (by voluntary donations) each year above the assured income. The balance must be raised by donations. Legacies are a useful means of helping. Please include the School in your Will. Annual Report sent on request, and the School may be visited by interested friends.

Forms of application for the admission of children and all needful information may be had of the SECRETARY, FRED J. ROBINSON, F.C.I.S., 34-40, LUDGATE HILL, LONDON, E.C.4.

Why we need
LEGACIES and BEQUESTS

THE need of ex-Servicemen including the Widows and Children dependants and the care of those left behind by men who fell in action are ever present in the ceaseless work of the Legion. Its work in these directions is dependent upon the sale of Poppies—a slender support for so great a work that must go on indefinitely. Every year since the inception of the Fund the expenditure has increased, and it is vitally necessary that the Fund should be strengthened and fortified against any possible diminution of income in the future by means of Legacies and Bequests.

EARL HAIG'S BRITISH LEGION APPEAL FUND

Full particulars and Forms of Bequest can be obtained from the Organising Secretary,

Capt. W. G. WILLCOX, M.B.E., Haig House, 26, Eccleston Square, London, S.W.1.

The Cry of the SICK CHILD

HELP is desperately needed by the

Dockland's very poor sick little ones are being cared for by the East London Hospital for Children. Many thousands of little lives have been re-made. To-day the Hospital is in urgent need. Will *you* help relieve the strain? Donations gratefully received by Secretary, Shadwell, London, E.

EAST LONDON HOSPITAL FOR CHILDREN

GENERAL LYING-IN HOSPITAL,

York Road, Lambeth, S.E.1. ESTABLISHED 1765.

Patron—**H.M. The Queen.**

This Hospital is situated in one of the poorest parts of London, in the district South of the Thames, with a population of nearly two millions

Married women in indigent circumstances, especially the wives of Soldiers and Sailors, and certain single women (with their first child, after investigation by the Committee), are admitted to the Hospital from all parts of the kingdom, but mainly from the immediate neighbourhood, from which, owing to its poverty, little pecuniary help is obtainable

Subscriptions and Donations thankfully received by the Treasurer, or MISS LILY HEARN, *the Secretary, at the Hospital* 1246

THE GORDON BOYS' HOME

(THE NATIONAL MEMORIAL TO GENERAL GORDON).

Patron—THE KING *Vice Patron*—H.M. THE QUEEN

Chairman Executive Committee—H.R.H. THE DUKE OF YORK, K.G.

THE HOME IS SITUATED AT WEST END, WOKING, between BAGSHOT and BISLEY.

The Home is constructed to accommodate 250 Boys chosen from the necessitous classes between the ages of about 14 and 15½, and give them a training up to the age of 17 or thereabouts which will fit them alike for civil life in this country or its Colonies, and for service in the Army, Navy, Air Force or Mercantile Marine

CONDITIONS OF ADMISSION.—1. The age for admission is from about 14 to 15½ years. 2. A boy must, in the opinion of the Committee, be really necessitous. He must be free from such physical or mental infirmity as would disqualify him for service in the Army or Navy or, for civil employment in the Colonies or elsewhere, which would require active bodily exertion. 4. Boys of known bad character are ineligible.

Free admission is given to such number of boys as above as can be provided out of the general income of the Home. A guaranteed payment of £45 annually during his stay at the Home will give a right of nomination for a lad fulfilling the conditions of admission. *Subscriptions and Donations are urgently needed in order that the above number of boys may be maintained.*

Subscriptions are received by THE WESTMINSTER BANK LIMITED, 1, St. James's Square, S.W., and by the Commandant at the Home, from whom any further information can be obtained. For financial reasons the London Office has been abolished.

COMMANDANT, LIEUT.-COLONEL H. C. HERBERT, O.B.E.

THE HOSPITAL FOR DISEASES OF THE SKIN

70-71, BLACKFRIARS ROAD, S.E.

Telephone: Hop. 1021. ESTABLISHED 1841.

Treasurer—THE RT. HON. THE LORD MORRIS, P.C., K.C.M.G.

This Hospital, established in 1841, was the first and for many years the only one of its kind established in the United Kingdom. Donations and Subscriptions are urgently desired in order to re-open its beds for In-patients. Since its foundation no less than 610,000 patients have been treated, and the scientific equipment of the Institution has always been kept thoroughly abreast of modern developments in research and treatment. The Light Department is provided with X-rays, radium and ultra-violet light apparatus. It is a centre both of dermatological therapeutics and education, and welcomes at its clinics medical practitioners and students. Patients should attend daily at 1.30 p.m., or on Fridays at 6 p.m. They are expected to contribute to the funds of the hospital according to their means and position.

FREDERICK HAYTER, *Secretary*.

GUY'S HOSPITAL

LONDON BRIDGE, S.E. 1,

URGENTLY NEEDS HELP.

President: H.R.H. THE PRINCE OF WALES, K.G.

Founded in 1725 by Thomas Guy, a Bookseller and Publisher in the City of London, Incorporated and Governed by Acts of Parliament 11th George 1st ch. xii. and 31st Victoria, ch. vi., as "The President and Governors of the Hospital founded at the sole costs and charges of Thomas Guy Esquire."

The Hospital is empowered to receive gifts of, and to hold land up to an aggregate yearly value of Sixty Thousand Pounds (exclusive of the site of the Hospital) notwithstanding the provisions of the Mortmain Acts.

BEDS	IN PATIENTS (1931)	OUT PATIENTS (1931)
648	**12,068**	**122,867**

Expenditure: £192,138. · **Income from Endowments £68,910**

The Governors earnestly appeal for further Subscriptions and Donations. The present Subscription List is only about £6,000 a year, although the Charity is dependent upon support from sources other than its endowments to the extent of over **£120,000 per annum.**

To form a permanent Memorial if desired a Donation or Bequest should be allocated to the Re-endowment Fund which is permanently invested and the income only applied for the general purposes of the Hospital.

A Gift of £1,000 to this Fund or an Annual Subscription of £50 will respectively endow or support a Bed over which a brass tablet inscribed in accordance with the wishes of the Benefactor can be placed.

A copy of the Annual Report of the Hospital can be obtained on application to Mr. W. J. Curry, Clerk to the Governors, Guy's Hospital, S.E. 1. Telephone: Hop 1080.

Bankers: THE BANK OF ENGLAND. Treasurer: F. P. WHITBREAD, Esq.

Imperial Cancer Research Fund.

Patron—**HIS MOST GRACIOUS MAJESTY THE KING.**

President—**His Grace the Duke of Bedford.**

Hon. Treasurers—**Sir George Makins, G.C.M.G., C.B.**
Sir Percy Sargent, C.M.G., D.S.O.

Director—**Dr. J. A. Murray, F.R.S.**

The object of the Research is for the good not only of the whole British Empire but of the whole world. The scope of the work embraces detailed investigation of Cancer in every part of the Empire as it occurs in the human race and in the vertebrate animal kingdom. Our recent researches have undoubtedly advanced our knowledge of Cancer, and it is not too much to hope that the further prosecution of the investigations will ultimately yield results of the greatest importance on the nature and treatment of the disease.

Donations and Subscriptions may be sent to the Hon. Treasurers, Imperial Cancer Research Fund, 8 Queen Square, London, W.C. 1, or may be paid to the Westminster Bank, Marylebone Branch, 1 Stratford Place, London, W. 1, A/c. Imperial Cancer Research Fund.

FORM OF BEQUEST.

I hereby bequeath the sum of £ to the Treasurers of the Imperial Cancer Research Fund under the direction of the Royal College of Physicians of London and the Royal College of Surgeons of England, 8/11, Queen Square, London, W.C. 1, for the purpose of Scientific Research, and I direct that their receipt shall be a good discharge for such legacy.

The Royal United Kingdom Beneficent Association

INCORPORATED BY ROYAL CHARTER

Office: ALDINE HOUSE, 13, BEDFORD STREET, STRAND, W.C. 2.

Patron **HIS MAJESTY THE KING** *President* **HIS GRACE THE DUKE OF ABERCORN, K.G., K.P.**

The Association grants Annuities to Gentlefolk of both sexes such as Clergymen, Officers of the Navy and Army, Barristers, Solicitors, Landowners and Gentlemen Farmers, Doctors, and their families, and others of similar Social Standing. Applicants must be over 60, of sound mind, unable, through age or bodily infirmity, to earn a livelihood, and not in receipt of an income exceeding £65 a year. Since its foundation in 1863, the Association has granted annuities to 6,186 persons, of whom 1,680 are now living. The last list of accepted Candidates for annuities contained the names of over 80 persons, many of whom were certified to be without any income at all. Permanent Memorial Annuities can be founded, to which, under certain conditions, the Founders can retain for life the right of nomination. The cost can be ascertained from the Secretary.

ANNUAL SUBSCRIPTIONS, DONATIONS and LEGACIES are Earnestly Solicited to provide annuities for waiting Candidates, and to augment the Annuities.

Brig.-Gen. B. J. ANLEY, C.B., C.M.G., D.S.O., *Secretary.*
